Program Description

The University of Charleston-Fruth Pharmacy Community Practice Residency Program will provide the resident the opportunity to be involved with MTM programs, medication distribution and use process, immunization services, wellness programs, and disease state prevention programs. The primary site of practice will be located in Point Pleasant, WV but opportunities for practice development may be found throughout the different Fruth locations and at UC. The resident will also receive a teaching certificate through the University of Charleston, where they will be actively involved in academic pharmacy. The resident will also be expected to complete a community-pharmacy based research project and submit the project for publication. This program will provide flexibility to the resident to allow them to pursue interests and develop skill sets in areas in which the resident has personal interests and career goals.

Fax: (304)675-7338

University of Charleston Community Practice PGY1 Residency in Affiliation with Fruth Pharmacy

Advancing the practice of pharmacy in rural West Virginia and Southern Ohio.
Fruth Pharmacy

Fruth is a regional chain of pharmacies providing care to patients in West Virginia and Ohio. Fruth Pharmacy was founded by Jack Fruth in 1952 as a single, hometown pharmacy in Point Pleasant, WV. Fruth now consists of 25 stores, but still maintains the values of being "Your Hometown, Family Pharmacy." Fruth pharmacists are involved in the local communities, and develop strong relationships with their customers in order to better serve them. Fruth Pharmacy also offers a full line pharmacy with all over the counter medications, and health and beauty products.

University of Charleston

The University of Charleston located in Charleston West Virginia trains tomorrow’s pharmacists for compassionate patient care, advocacy, and community engagement. The University of Charleston encourages advocacy in all of their students and faculty. Many of the faculty members have played integral roles in recent pharmacy legislation in the state of West Virginia. The University of Charleston has a clinic pharmacy in the building where many of their faculty members provide MTM services. The university teaches its students to provide care with case-based, real-world scenarios and an interactive class format.

Residency Responsibilities

- Patient Care (50%)
- Teaching and Training (15%)
- Research and Contribution to the Literature (5%)
- Community and Professional Involvement (5%)
- Electives (10%)

The resident will have sufficient exposure to community pharmacies already engaging in innovative practices yet have ample opportunity to assist in the design and implementation of similar patient care services at other sites. Development of basic skills in practice-based research and academics will be a component of the residency experience. The residency will be tailored to complement and augment the background and career goals of the successful applicant.
