

HEALTH SCIENCE MINOR

The minor in health sciences is designed for undergraduate students from a variety of disciplines across the University. Choosing a health science minor will provide the student with interdisciplinary healthcare knowledge, which will provide flexibility in their future career. Students will have a board-based overview of the health care industry, including the history of health science, healthcare management, communication, interprofessional practice, informatics, ethics, and innovation.

Any student across the university can add the health science minor to their major to enhance their knowledge in the health care industry, ultimately increasing their career opportunities. Courses needed for the minor in health sciences are available through an online format. Pursuing students can complete the course asynchronously, allowing for flexibility for classes within a student's minor. Students must earn a "C" or higher to fulfill the requirements.

Program Learning Outcomes

1. The graduate will apply the concepts of healthcare and healthcare professions.
2. The graduate will develop knowledge of healthcare society and how to participate within the society as a professional.
3. The graduate will analyze various healthcare professions and how those professions are incorporated into the healthcare system.
4. The graduate will evaluate healthcare and the impact of healthcare professionals on the delivery of healthcare to consumers.
