The University of Charleston operates at the following locations and on an ad hoc basis at other locations throughout West Virginia; online courses may be pursued through our two locations.

2300 MacCorkle Avenue, S.E. Charleston, WV 25304-1099	127-B Dye Drive Beckley, WV 25801

Telephone: (304) 357-4800 or (800) 995-GOUC (4682)
Fax: (304) 357-4715

The provisions within this *Academic Catalog* are not to be regarded as an irrevocable contract between the student and the University of Charleston. The University reserves the right to make and designate the effective date of changes in curriculum, course offerings, fees, requirements for graduation, and other regulations at any time such changes are considered to be desirable or necessary.

Notice of Non-discrimination Policy

The University of Charleston does not discriminate against any person because of any protected class or characteristic including, but not limited to, a person's race, color, religion, sex, sexual orientation, national origin, age, disability, or veteran status in administration of its educational policies, scholarship and loan programs, admissions, employment, athletics, and other school administered programs in accordance with the laws of the United States and the state of West Virginia.

1

The terms of this Catalog may be modified in the University's discretion, including, but not limited to, any course offering; the manner, location, or mode of instruction of any course; the physical attendance requirements; the conversion of the grading option for any course or portions thereof; the duration of any course; the experiential learning components and/or requirements; and/or the inclusion, timing or elimination of any portions of any components of any course curriculum.

This catalog will be updated with an addendum published in January 2025 documenting changes to courses, academic program requirements, academic policies, admissions policies and/or graduation requirements. The addendum will be published on the University website and can be accessed at https://www.ucwv.edu/academics/academic-catalog/

MESSAGE FROM THE PRESIDENT

Welcome to the University of Charleston. I am delighted that you are attending UC!

The mission of the University of Charleston is to educate each student for a life of productive work, enlightened living and community involvement. Our faculty and staff look forward to helping you achieve great success in each of these ways.

Innovation is a UC hallmark. We are continually developing and revising programs to meet student interests and employer needs. Whether you are engaged with us on the Charleston or Beckley campus or attending classes remotely, or earning an associate, bachelor, master, or doctoral degree, UC provides you with many opportunities to expand your horizons and develop personally and professionally. Our goal is your goal – to put you on the clearest path to career success.

The information included in this catalog is designed to assist you in navigating the process of earning your degree. You will find contact information, curriculum requirements, and other information necessary to make this process easier.

We are sincere about our mission, excited about your future, and committed to assisting you in having a great college experience at UC!

Martin S. Roth, President

THE UNIVERSITY OF CHARLESTON

THE UC MISSION

The mission of the University of Charleston is to educate each student for a life of productive work, enlightened living, and community involvement.

Productive Work

The University prepares students to contribute to society. The work of our students varies tremendously, but we hope that each graduate will improve his or her world. "Productive" work isn't defined by only by acquisition of wealth, but also by the positive impact of the work on the graduate's community and world.

Enlightened Living

College graduates must possess a broad range of knowledge to thrive in modern society. Graduates should be scientifically, economically, politically, aesthetically, and culturally literate. They should have a sense of history and shared values, and a commitment to moral purpose and personal character.

Community Involvement

Finally, the University attempts to develop within every student a commitment to involvement in his or her community – at local, state, national and global levels. The foundation of our democratic society rests on community involvement, so we want graduates to take responsibility for leadership and initiative in shaping organizations, institutions, and communities.

The University's Core Values

We are student focused – we enable our students' success; we celebrate their accomplishments, champion and endorse diversity, and live our mission.

We have integrity – we promote trust and transparency, respect and applaud the work of our colleagues, are responsible for our actions, encourage collaboration, and develop character.

We provide quality – We are committed to quality service, strive for excellence in all we do, promote a culture that inspires innovation, and cultivate leaders.

HISTORY OF THE UNIVERSITY OF CHARLESTON

The University of Charleston is an independent, comprehensive institution of higher education located in the capital city of West Virginia. Founded by the Methodist Episcopal Church, South in 1888 as Barboursville Seminary, the institution was originally located in the rural community of Barboursville, West Virginia. The institution became Morris Harvey College in 1901 to honor a prominent donor. In 1935 the College responded to a request from Charleston businessmen and moved to the state's capital city.

As a result of a merger between the Methodist Episcopal Church, North and South, the College disaffiliated from the denomination and became independent in 1942. The institution grew between 1935 and 1960, due in part to mergers with Kanawha Junior College and Mason College of Fine Arts and Music. On December 13, 1978, the Board of Trustees changed the name of the institution to the University of Charleston to reflect the institution's strong ties to the local community and to recognize the diversity of programs offered by the institution.

The University of Charleston benefits greatly from its location in the state's capital city and proximity to the state's largest medical, commercial and financial centers, and to major research and manufacturing facilities, all of which provide excellent opportunities for learning experiences outside the classroom. The University, in return, serves the community as a focal point for intellectual, cultural, athletic, and civic events. These interactions between the University and community are vital to the achievement of the University's mission.

In January 2013, the University of Charleston expanded regionally, and today operates locations both in Charleston and Beckley WV. The development of online and hybrid courses and programs have further enriched the institution's academic programs. Over 2,700 students are now enrolled in classes at UC.

On June 30, 2018, UC President Edwin H. Welch retired after 29 years of service. The University welcomed its new President, Dr. Martin Roth, on July 1, 2018.

DIVERSITY, EQUITY, INCLUSION, AND BELONGING

All communities, organizations, and groups thrive when they are welcoming and supportive. They also flourish from a range of experiences and points of view that reflect society as a whole. As such, the University of Charleston benefits from the diversity of its people, fostering equity and inclusion, and advancing a genuine sense of belonging among its students, faculty, and staff.

Consistent with our core values of student focus, integrity, and quality, the University of Charleston embraces and supports efforts to attract diverse students, employees, and board members and to develop processes, programs, events and activities that facilitate equity, inclusion, and belonging. Ensuring that all members of our university community have opportunities for personal growth and professional success enables us to live our values, fulfill our mission, and achieve our goals.

At UC we define the key concepts of diversity, equity, inclusion, and belonging (DEIB) as follows.

Diversity reflects the composition of our university community.

Equity affords all university community members with the opportunities and resources they need to be successful.

Inclusion is embracing, celebrating, and learning from our university community's diversity.

Belonging makes everyone feel welcomed, accepted, valued, and safe.

With regard to diversity, equity, inclusion, and belonging (DEIB) the University aspires and strives to do the following:

Be a Diverse Community in Composition and Thought

Attract and welcome students that possess diverse backgrounds and orientations

Recruit faculty and staff that reflect a diverse student composition and that embrace our definitions of and commitment to DEIB

Foster Equity and Inclusion

Ensure that all members of the UC community have access to the resources they need to be successful

Provide formal and informal development opportunities that help us understand, appreciate, and learn from our similarities and differences

Acknowledge and promote our diversity internally and publicly

Enhance a Culture of Belonging

Seek and act on community members' feedback

Engage in community-wide activities and programs that bring us together around our shared mission

Commit to leading by example as well as by word

By embracing and integrating diversity, equity, inclusion and belonging at UC, we bring out everyone's best and work collaboratively to build a better future.

THE CURRICULUM

UC's outcomes-based curriculum requires each course and degree program to have clear statements about the skills or knowledge a student must demonstrate (competencies) to meet a specific learning goal (outcome). In addition, performance expectations and how that performance is evaluated (assessment) must also be well- defined. Sharing this information in advance of coursework ensures that students and faculty have a shared understanding of the expected coursework and how it will be judged. This approach provides a rich educational experience.

Student Learning Outcomes

As defined by the Higher Learning Commission, the University of Charleston utilizes an integrated and embedded strategy to assess student learning outcomes in all of its academic programs.

Assessment facilitates the evaluation of learning outcomes by requiring students to demonstrate that they can apply knowledge and skills in various settings. Assessment of student learning outcomes supports the University of Charleston's commitment to applied learning and experiential education.

All programs, regardless of degree level, have program learning outcomes. These outcomes guide the learning experience and ensure that students achieve the program's intended goals.

Undergraduate General Education Requirements

General Education Outcomes

The University of Charleston's General Education is designed to give students a solid foundation in core academic subjects. All Bachelor degree programs require a minimum of 30 hours of general education courses and all Associate degree programs require a minimum of 15 hours of general education courses

Through the General Education curriculum, students will:

1. Express their thoughts effectively in writing and speech.
2. Demonstrate a foundational understanding of the university's academic and support resources, college expectations, and personal development skills necessary for a successful transition to college life.
3. Develop an understanding of humanities in an individual, culture, and society.
4. Develop an understanding of social systems by examining human behavior, social problems, political systems, cultural diversity, and/or historical contexts.
5. Develop skills to analyze data, solve problems, and understand principles that will allow them to make informed decisions and engage critically with science, technology, and/or mathematics in their personal and professional lives.

General Education Flex Curriculum

Components	Requirements	Hours
Core Component	UNIV 104 and 105, SPCH 103, and ENGL 101 and 102 (Transfer students substitute UNIV 204 for UNIV 104 and 105) Students must earn a minimum grade of "C" in all core components to satisfy these graduation requirements.	12-15 hrs
Flex Component	6-8 credits in each of the following areas: Humanities, Social Sciences and STEM (STEM includes science, math, statistics, computer science and data analytics)	18-20 hrs
Elective Component	6-8 credits additional from any combination of Flex courses (e.g. 2 STEM; 1 Humanities and 1 Social Science course)	6-8 hrs
Total Gen Ed		33-36 hrs

General Education Adult Learning Pathways

The General Education Adult Learning Pathway is designed to meet general educational outcomes for students enrolled in non-traditional, adult-oriented programs, including the RN-BSN and Associate Degree in Nursing programs, A.S. in Frontline Leadership, A.S. and B.S. in Cybersecurity, Occupational Therapy Assistant and Radiologic Technology.

An Adult Learning Pathway requires a minimum number of credits distributed equally across each of the following competencies: Analytics, Communication, Technology, Innovation, Values, and Ethics. Each non-traditional program has determined the combination of course requirements that will best serve the career aspirations and educational needs of their particular students.

Competencies	
Analytics	The ability to systematically analyze and utilize data to make decisions
Communication	The ability to read, write, and speak effectively.
Technology	The ability to use technology to access, evaluate and share information
Innovation	The ability to create, synthesize and disseminate new knowledge
Values	The ability to apply ethical principles to make decisions
Engagement	The ability to participate effectively in professional and community settings

Assessment to Demonstrate Learning

The University of Charleston systematically measures students' learning using a variety of assessment strategies. Results of these assessments are used to strengthen academic programs and improve learning and teaching. They provide information about the level of a student's skills or knowledge and can be used to measure growth of learning over time. Assessments include, but are not limited to, those described below.

Placement Assessments

Scores on ACT or SAT examinations, when available, may be used to identify weaknesses in basic academic skills. Other assessments may also be used for this purpose. When weaknesses are identified, it is suggested that students participate in skill building sessions or classes designed to increase performance in such core areas as writing, reading, or mathematics.

Some academic programs, such as those in the natural sciences, also have departmental placement examinations to assure that students are placed in appropriate courses. These assessments are generally administered during freshmen and transfer orientation sessions.

Please see the entry for Placement in the Academic Policies section of this Catalog.

Program Admission Assessments

Some academic programs, including Teacher Education and most Health Science programs, require passing scores on specific, standardized tests before students are admitted to the programs. In addition to these tests, students must meet other admission requirements as stated by the program. A student may be admitted to the University and still be denied

admission to a specific program if the program's admission requirements are not met. Students should check with program faculty about these requirements.

Assessment of New Students

To establish a baseline of learning, incoming students may be required to take assessments. These are typically administered online in UNIV 104 and UNIV 204.

STATEMENT OF SPECIALIZED ACCREDITATION

The University of Charleston is committed to excellence in each program that is offered to students. We regularly review program and institutional learning outcomes results to evaluate how our students are progressing toward graduation. Specialized accreditation is sought and maintained for appropriate programs. (For a listing of currently specialized accredited programs, go to Accreditation and Memberships lists in the front of this Catalog.)

In the unlikely event a decision is made to end a program holding specialized accreditation, UC will provide opportunities to teach-out current students according to the regulations of the specialized accrediting agency, the requirements of the Higher Learning Commission, and any applicable federal or state law.

ACADEMIC MINORS

The university offers minors in several disciplines. Minors provide a pathway for students to acquire expertise in a discipline outside their major field of study. A student who elects the Multidisciplinary Studies program will complete the degree by selecting three, related minors from the list below.

Approved Academic Minor	Credits Required for the Minor
Applied Computer Science Minor	**20**
Biology Minor	**19**
Business Administration Minor	**21**

ENROLLMENT MANAGEMENT

Dr. Beth Wolfe, Executive Vice President of Enrollment Management

**Offices of Admissions, Financial Aid, and Student Solutions Center
Statement on Professional Practice in Enrollment Management**

As employees of the University of Charleston whose stated values are to be student-focused, have integrity, and provide quality, our work in recruiting and enrolling students should reflect this on a daily basis. As we work with prospective students, our actions reflect respect for the students' needs and priorities over our institutional goals.

Specifically, we work in compliance with professional standards issued by NACAC, AACRAO, and NASFAA and within the Memoranda of Understandings (MOUs) established with other entities. Prospective and current students can expect to be treated with respect and a high level of service, provided with relevant and accurate information, and be appropriately counseled regarding admissions, financial aid, registration, and other services provided within enrollment management.

OFFICE OF ADMISSIONS

Mr. Matthew Groves, Director of Admissions Outreach

Mr. Jason Sammons, Director of Admissions Operations

Admissions Office Mission Statement

The Office of Admissions seeks to identify, counsel, and enroll students who possess the potential and motivation to be successful in their pursuit of intellectual growth in their chosen major and social growth through their on- and off-campus endeavors toward enlightened living and community involvement.

UNDERGRADUATE ADMISSION REQUIREMENTS

General Freshman Admission

Students who have not enrolled on a full or part-time basis at another institution of higher education since graduating from high school, or who have enrolled but have earned fewer than 12 hours of transferrable credit, will be considered a freshman applicant. A student applying for general freshman admission may submit an application any time after the completion of six semesters of high school. **Admissions decisions are made on a rolling basis until four weeks prior to the start of the term.** Within four weeks of the term start date, applications will be reviewed at the discretion of the Director of Admissions Operations/EVP of Enrollment Management.

Applicants must submit the following documentation for consideration by Admissions staff:
- Completed Undergraduate Application for admission;
- $25.00 Application fee or application fee waiver;
- Record of high school GPA through self-report (for conditional admission) OR high school transcripts or official GED/TASC results, if applicable;
- Freshman must have a minimum 2.50 academic grade point average (on a 4-point scale); or GED/TASC score of 450 to be admitted to the University of Charleston.

Freshmen applicants with GPAs below 2.50 will be considered for admission after review by the Director of Admissions Operations and/or the Executive Vice President of Enrollment Management. These students are encouraged to submit supplemental items for consideration. These may include but are not limited to:

- A personal statement outlining the student's career goals, challenges faced and overcome, intent to improve academic performance, and how the University of Charleston fits into the student's plan for their future. (Required)
- Letters of recommendation from teachers, school counselors, coaches, mentors, employers, etc.
- Standardized test scores.
- A resume listing work experience and personal accomplishments.

Applicants with GPAs below 2.50 are encouraged to submit these materials at the time of application. However, the Office of Admissions will formally request them after determination that the student does not meet the 2.50 GPA requirement.

Throughout the application process, the Office of Admissions' first preference is for students to improve their GPA (during their remaining high school courses). Increased test scores can also be used to demonstrate readiness for college level work. Additionally, the Office of Admissions may request an interview with the applicant. Neither the submission of additional materials nor an interview guarantees admission.

Any student who is denied admission to the University of Charleston is entitled to appeal the decision to the Student Affairs Committee.

The University of Charleston operates a test-blind admissions policy. Applicants who take the ACT or SAT may submit their scores as part of a packet of supplemental documents when the student does not have a 2.50 GPA or to provide additional information for advising purposes, but students are not required to submit the score for admission to the University. Official test scores may also be utilized for consideration for selection into the Honors College.

Students conditionally admitted based on a self-reported GPA must still submit a high school transcript for the awarding of institutional scholarships. All admissions standards will apply and failure to present accurate information will be grounds for revocation of the acceptance.

Applicants accepted by the University of Charleston must submit proof of high school graduation or GED/TASC via a final official transcript to the University's Office of Admissions prior to registering for a second semester. Note: UC does not currently accept modified diplomas.

Students must also submit the following documentation when applicable:

- Official AP score reports;
- Official transcripts from an accredited university for dual enrollment credit;
- A valid driver's license or state issued photo identification (applicants to fully online academic programs).

<div align="center">**Home School Admission**</div>

The University of Charleston makes every effort to accommodate the special circumstances of home school students during the admissions process. Home school students must provide the following for admissions review:

- If you are under the umbrella of a diploma-granting organization, you will need to submit evidence of the coursework completed and your level of performance;
- In the absence of such a document, you will need a detailed portfolio the breadth of work you have completed to help us evaluate your level of preparation for college-level work (e.g. research project, resume, reading list, community service, athletic and/or artistic endeavors and study abroad);
- If receiving WV financial aid such as WV PROMISE or WV Higher Ed Grant, the home-schooled student must also submit the GED/TASC to be in compliance with WV aid standards;
- Official transcript(s) from an accredited university or college (if applicable);
- AP test scores (if applicable);
- ACT/SAT test scores (optional);
- Essay (recommended not required)

<div align="center">**GENERAL TRANSFER ADMISSION**</div>

Applicants who have earned 12 or more college-level credits (generally, courses numbered 100 and above) after high school graduation (dual enrollment credits excluded) at another institution, have a minimum 2.00 grade point average (on a 4.0-point scale) and are in good standing at the institution last attended are eligible for transfer admission. Transfer applicants must submit the following documentation for consideration by Admissions staff:

- Completed Undergraduate Application for Admission;
- $25 application fee or application fee waiver;
- Transcripts from each college or university previously attended by the student. Unofficial transcripts may be used for a conditional admissions decision, but Final and Official transcripts must be on file prior to the start of the student's second enrolled semester at the University of Charleston;
- Transfer Clearance Form from most recent school attended;

Applicants who have earned fewer than 12 college level credits after high school graduation must also submit high school transcripts.

Prospective transfer students may send their college transcripts at any time during their current college enrollment for transcript evaluation by the University of Charleston. Applicants who are accepted at the University of Charleston must submit a final official transcript to the Office of Admissions before the start of the second semester of enrollment. Transfer applicants who have been granted general admission will have the opportunity to review the evaluation of his or her transcript after review by the Student Solutions Center staff. Only non-remedial courses earned from a regionally, Department of Education, or Council for Higher Education Accreditation (CHEA) recognized nationally accredited college or university will be considered for transfer. (See Evaluation of Transfer Equivalency Policy Section.) More information on the policies for evaluation of transfer

credits and specific Articulation Agreements can be found on the Student Right-to-Know Information page on the UC website. **https://www.ucwv.edu/admissions/undergraduate/transfer-students/**

Only courses with earned grades of "D" or better will transfer unless a transfer agreement exists between the University of Charleston and another institution. No grades are recorded for courses accepted in transfer, but notations will be made to transfer credits to indicate whether the grade earned was a "C" or higher in order to ensure programmatic requirements of earning a "C" or better for credit are upheld with regard to transfer credits. A student's grade point average at the University of Charleston will be based only upon credits earned at the University of Charleston.

Transfer applicants whose cumulative university GPA falls below a 2.00 may be considered for admission after further review by the Director of Admissions Operations/EVP of Enrollment Management. These students are encouraged to submit materials that support their application which may include but are not limited to

- A personal statement outlining the student's career goals, challenges faced and overcome, intent to improve academic performance, and how the University of Charleston fits into the student's plan for their future. (Required)
- Letters of recommendation from teachers, school counselors, coaches, mentors, employers, etc.
- Standardized test scores.
- A resume listing work experience and personal accomplishments.

An applicant can choose to submit these materials at the time of application. However, the Office of Admissions will formally request them after receipt of the admissions application and transcripts indicate the student has below a 2.00 cumulative GPA. The Director of Admissions Operations/EVP of Enrollment Management may also take into consideration the length of time since previous coursework was attempted.

SPECIAL ADMISSION STATEMENT

Some programs including Education and certain Health Sciences degrees have special and separate programmatic admission requirements. Applicants should consult program descriptions in this Catalog for a complete description of any special or additional requirements specific to the program or programs in which they are interested.

PRIOR LEARNING CREDIT

Applicants who have **prior learning credit** such as military, law enforcement, or first-responder training may be eligible to receive course credit for such training. All evaluations of prior learning credit are conducted by the Student Solutions Center.

STUDENTS SEEKING RE-ADMISSION

Individuals who have previously attended Morris Harvey College/the University of Charleston as degree-seeking students, but who have not taken courses from the University for three consecutive semesters (including summer), must apply for re-admission.

The student must complete an Application for Admission. The student's standing within the Registrar, Financial Aid, Cashier, and Student Life offices must be assessed by

each department's designee. Based on their assessments, the Office of Admissions will make the final re-admission decision.

Applicants who have attended any college or university since leaving Morris Harvey College or the University of Charleston are considered readmit-transfer students and must follow both the transfer and readmit procedures.

MILITARY STUDENT ADMISSION

THE UNIVERSITY IS A SUPPORTER OF THE US MILITARY

We are proud to offer resources on all chapters of Veterans & GI Bill® Benefits, as well as Tuition Assistance guides for each branch of the military. Please contact **solutions@ucwv.edu** for guidance with setting up your TA or VA Benefits.

If planning to use Tuition Assistance, Veterans Affairs benefits, or any other type of military funding, take steps to ensure all documentation has been submitted for those benefits. If you are unsure about your eligibility, please contact your Base Education Office or the Veterans Affairs Administration directly.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official U.S. government website at **http://www.benefits.va.gov/gibill**

INTERNATIONAL STUDENT ADMISSION

International student applicants must follow the requirements for **general freshman** or **transfer admission,** depending on the desired enrollment status. For progression policies see **English as a Second Language Progression Policy.**

ENGLISH EXAM REQUIREMENTS

International Students whose first language is not English and who do not take the ACT or SAT exams must submit a standardized English test score. The College Board's **Test of English as a Foreign Language (TOEFL),** the **International English Language Testing System (IELTS),** and the **Duolingo** exams are accepted. Other standardized English exams are accepted only upon pre-approval from the Director of International Students.

A minimum score of 68 for the Internet- based test **(IBT) on the TOEFL,** an **IELTS** score of 5.5, **Duolingo** scores of 90, a Cambridge score of B2, or a PTE score of 46. Conditional admission may be offered to applicants who have not achieved the minimum English proficiency standards but who otherwise demonstrate potential for academic success.

International students whose primary language is not English and whose English exam scores fall in the lower quartile of exam scores must take an English diagnostic exam, which includes a writing sample, upon arrival on campus. The results will be used for placement purposes. Based on their scores, some students will be required to enroll in and pass an ESL course to maintain enrollment.

Current or prior enrollment at an American institution of higher education may be considered when assessing an International student's English proficiency.

Other International Admissions Requirements

International transfer students **must** have all transcripts from non-US institutions evaluated by an NACES ® member international transcript evaluation service. Please contact the appropriate service for your needs. A list of these evaluation services can be found at **http://www.naces.org/members.htm.**

All official secondary school and college/university scholastic records submitted in support of your application **must** include English translations. English translations do not need to be official, but they should be literal (word-for-word, not interpretive) translations.

Proof of adequate financial resources to support study in the United States is required to be provided an application for student visa. An official statement specifying these resources is required before an international student may gain entry into the United States for study. If the financial documentation is not in the applicant's name, the account holder or sponsor must submit a Letter of Support stating their relation to the applicant and verifying they are financially responsible for the entirety of the applicant's studies while enrolled at the Institution.

UNDERGRADUATE ADMISSION AND ENROLLMENT PROCEDURES

Once an undergraduate applicant (freshman or transfer) has submitted the application and other necessary documentation to the University of Charleston, the Admissions Office professional staff carefully review the information and make one of four decisions:

- The student is granted general full admission to the University of Charleston;
- The admission decision is delayed, and additional information is requested from the student;
- The student is granted conditional admission until the completion of their current educational enrollment and final and official documentation is received. At that point, the student gains general full admission status.
- The student is denied admission.

If the decision is delayed, a decision will be made upon receipt of the additional information. Admission decisions are made on a rolling basis and applicants are usually notified within five days of receipt of the completed admissions file.

After an offer of admission to the University of Charleston is made, the student must remit a **non-refundable** $100 enrollment deposit to proceed with enrolling at the University of Charleston unless special arrangements have been made with the Executive Vice President of Enrollment Management. This deposit will be credited to the first semester's tuition.

If the applicant requests campus housing, (freshmen and sophomores must live in the residence halls if their permanent address is outside a 50-mile radius of campus), a $100 housing security deposit must also be remitted prior to securing campus housing. This is refundable at the conclusion of campus residency providing the student has no unpaid University charges and no damage to rooms or common areas has occurred.

Applicants are permitted to defer their application one time wherein their non-refundable enrollment deposit may be carried over. Additional deferral requests will lead to a forfeiture of the enrollment deposit and will require the student to complete and submit a new application.

GRADUATE ADMISSION

Admission into the University of Charleston graduate programs is governed by each of the respective programs. See specific programs for admissions details.

Master of Business Administration
Master of Science in Business and Data Analytics
Master of Science in Cybersecurity
Master of Science in Mental Health Counseling
Master of Science in Nursing – Family Nurse Practitioner
Master of Science in Strategic Leadership
Master of Science in Occupational Therapy
Master of Physician Assistant
Doctor of Executive Leadership
Doctor of Nurse Anesthetist Practice
Doctor of Pharmacy

ADMISSIONS DISCLAIMER

The Office of Admissions reserves the right to deny admission to the University for undergraduate or graduate applicants who have documented behavioral or conduct incidents. UC reserves the right to withdraw an offer of admission when the admitted student's behaviors do not meet the University's expectations and requirements for students. See Student Handbook for conduct standards.

SPECIAL STUDENT / NON-DEGREE ADMISSION

Students who wish to pursue academic courses for purposes other than a University of Charleston degree can be admitted to the University as special students. Such students must be in good academic standing in all previously attended institutions and are subject to all academic rules and regulations of the University of Charleston.

Special students should possess the requisite academic background for college-level work. A maximum of 15 credit hours may be accumulated as a special student unless the Office of Admissions makes an exception based on individual circumstances.

If a special student later applies to be a degree-seeking student, they must complete the application process for **general** or **transfer** admission, whichever is applicable. To obtain permission to enroll as a special student or a non-degree student, contact the Student Solutions Office at **solutions@ucwv.edu** or 304-357-4947. One of the following statuses may be granted:

Regular Non-Degree - This category includes individuals who have already earned a degree but who wish to enhance job skills, seek additional academic certification or prepare for graduate school. This category also includes individuals who have not completed a degree but who wish personal or professional enrichment. Enrollment requires submission of a Non-Degree Student Application each semester. Enrollment is contingent upon class

size and availability. Students will not be able to register for courses until the week prior to the beginning of classes.

Audit Admission - Most courses at the University of Charleston can be audited (taken for no college credit). Enrollment requires submission of a Non-Degree Student Application. Enrollment is contingent upon class size and availability. Once a course is audited it may not be taken again for credit.

Transient Student Admission - Students applying with permission from their home college to transfer course credit are encouraged to enroll. A Transient Student Form must be completed along with a Non-Degree Student Application. Enrollment is contingent upon class size and availability.

High School / University Dual Enrollment - A student may choose to be enrolled in both high school and college simultaneously. After completion of the sophomore year in high school, a student is eligible to apply for special admission to the University to enroll in freshman-level coursework, provided the student is concurrently enrolled in high school. Students applying for concurrent admission must submit the following documentation for consideration by Student Solutions staff:

- Completed Non-Degree Student Application;
- Official copy of high school transcript showing evidence of a 3.0 grade point average (on a 4.0 scale);
- Written recommendation from his or her high school principal or guidance counselor.
- The high school student must consult his or her high school guidance counselor to select the course(s) to be taken, which must supplement and not overlap the high school program.

A dual enrollment student may take a maximum of two courses per semester. The Office of Student Solutions must approve participation each semester. The University of Charleston has three semesters: fall, spring, and summer with seven-week terms each semester, and a variable number of five-week summer terms annually. Course work completed at the University by a pre-college student may count toward the high school diploma if approved by the student's high school. The course work will be credited toward a University of Charleston degree for those who subsequently enroll as regular students and may be evaluated for credit toward a degree at other accredited postsecondary institutions. Enrollment is contingent on class size and availability. Exceptions to these requirements may be made when the University of Charleston enters into a cooperative agreement with a high school to offer multiple dual enrollment courses.

TUITION & FEES

Tuition and fees for undergraduate programs can be found on the **Undergraduate Tuition & Fees** page on the University website. Tuition and fees for graduate programs can be found on the Graduate Tuition & Fees page.

ROOM & BOARD COSTS-2024-2025 ACADEMIC YEAR

Room and board costs for the 2024-2025 academic year vary by housing space and meal plan selected. Current pricing and options for both room and board can be found on the UC website at **http://www.ucwv.edu/UC-Life/living-in-UC-housing/housing-costs**.

Housing rates include basic television cable service, basic telephone service, and wired and wireless Internet. Some housing choices, such as apartments, are available only on a limited basis.

Summer Session room charges will be based on contract terms at the time of reservation.

BOARD RATES

During the fall and spring semesters, three meals are offered daily except on Saturday and Sunday, when brunch and dinner are served. The cafeteria closes during vacations, including Thanksgiving, Winter Break, and Spring Break. Meals between semesters are not included in the Board Rates.

Students who reside in University of Charleston housing are required to participate in a meal plan unless they live in East Apartments, though they are available for purchase by other students as well. First year students are required to select either a 14 or 19 meals-per-week plan.

West Virginia sales tax on meals is charged to the student and collected by the University of Charleston on behalf of the state.

Other Costs

Application fee (undergraduate)	$25
Application fee (graduate)	$50
Health Science Insurance	$20 / semester
Accident/Sickness Insurance	As announced (Contact the Office of Student Life for current rates)
Identification Card replacement	$10
Laboratory and breakage fees	See class schedule
Other University fees may apply.	

Students will be charged for any damage to University of Charleston property if the damage occurs due to misuse. Students must also pay for any test required by an academic program or the University of Charleston for graduation, and any test required by the West Virginia State Board of Education.

UC COMPUTER REQUIREMENTS

Every student is required to bring a laptop computer to campus which satisfies the general requirements listed below or specific requirements indicated for the academic programs listed.

General Requirements

Windows
> Windows 10 or greater
> 256GB storage, 512GB recommended
> Intel Core i5 or Greater
> 16GB recommended
> Integrated Video Card or Greater
> Integrated camera, microphone & speakers

Apple
> Mac OS Monterey 12.0 or greater
> 256GB storage, 512GB recommended

Intel Core i5, Apple M1 or greater processor
16GB recommended
Integrated Video Card or Greater
Integrated camera, microphone & speakers

Specific Academic Program Requirements

Applied Computer Science
Processor: Intel i7 (7th gen) recommended i9 or AMD Ryzen 7 recommended AMD
Ryzen 9
Operating System – Microsoft Windows 10 or later
Memory: 16 GB or greater
Storage: 512 GB SSD or greater (Minimum of 20 GB of available hard-disk space)
Integrated camera, microphone & speakers

Accounting, Business Analytics & Sports Analytics
Processor: Intel i7 (7th gen) recommended i9 or AMD Ryzen 7 recommended AMD
Ryzen 9
Operating System – Microsoft Windows 10 or later
Memory: 16 GB or greater
Storage: 512 GB SSD or greater (Minimum of 20 GB of available disk space)
Integrated camera, microphone & speakers

Digital Media and Design:
Processor: Apple or PC – Intel or AMD Quad Core Processor
Operating System: latest OS (Microsoft Word 10 or later, Mac OS Ventura)
Memory: 16 GB Ram
Graphics: 2 GB of GPU VRAM
Storage: 512 GB SSD or greater (Minimum of 15 GB Hard Disc Space available
disk space)
Resolution: 1920 x 1080
Integrated camera, microphone & speakers

Software
UC Students receive access to the Microsoft Office 365 suite.

**Please note: Google Chromebook, iPads, and mobile phones do not support and/or
run many required applications for UC classwork.**

A minimum internet upload speed of 10 Mbps is recommended for using Proctorio

FINANCIAL AID

Ms. Christie Tomczyk, Director of Financial Aid

Financial Aid Mission Statement

The mission of the Financial Aid Office is to serve with excellence, counsel with integrity, and empower students and families with knowledge of financial aid resources. The Financial Aid Office is committed to lessening financial barriers for those who wish to pursue post-secondary education at the University of Charleston.

Financial Aid

The Financial Aid Office coordinates the awarding of federal, state, and institutional financial aid programs. This office also provides information regarding scholarships, loans, and grants from private sources (non-institutional, non-governmental aid).

Financial aid is awarded based on scholastic/athletic achievement, financial need, or a combination of both. Offers of assistance are designed to supplement the resources of the family and may vary per academic year. Financial assistance may be in the form of federal, state, institutional, or private aid. There are three types of aid: gift aid (grants and scholarships), loans (federal and private), and work study opportunities.

For federal, institutional, state, and most private aid, family resources are measured by the needs analysis formula of the Free Application for Federal Student Aid (FAFSA). Every eligible student is encouraged to complete the FAFSA for determination of their eligibility for federal aid. The FAFSA is filed electronically at www.fafsa.gov an official U.S. Department of Education website. You may submit your signatures via U.S. mail or electronically using your FSA ID.

A family's Student Aid Index (SAI) is based upon the information submitted on the FAFSA, which includes income, assets, number of people in the family, and other family factors. The difference between the Student Aid Index and the Cost of Education (COE) for an academic year represents a student's "financial need."

All financial aid is disbursed directly onto the students' account for charges related to tuition, fees, and for residential students, housing and meals. Non-institutional financial aid exceeding student account changes may be issued as a refund to the student for other educational expenses (books, supplies, etc.).

How to Apply:
1. The student must be accepted for admission to the University in order to receive an official offer of financial aid. If applying after October 1 of the high school senior year, an applicant should apply for financial aid and for admission concurrently.
2. An applicant for aid must submit the Free Application for Federal Student Aid (FAFSA) and list the University of Charleston's Federal school code: 003818. Once the FAFSA has been filed and processed, the Department of Education (DOE) will send the student and the University an electronic student aid report (SAR) provided the student listed the correct Federal school code. The University of Charleston must have the student's correct Social Security Number on file in order to tie the SAR to the student's record. Corrections to the FAFSA can be made electronically through the FAFSA website and submitted to DOE for processing.

3. UC has contracted with KHEAA Verify to complete all verification services. All verification will be completed online; if selected, you will receive notice to create an account to submit the requested information required by the U.S. Department of Education. For details about KHEAA Verification please visit the University's website at https://www.ucwv.edu/admissions/financial-aid/kheaa-verification

Students must complete the FAFSA application every year to be considered for federal financial aid. March 1 is the priority deadline for the following academic year. Any applications received after the March 1 deadline will be given consideration as funds are available.

The most current information regarding financial aid may be found on the University's website at: http://www.ucwv.edu/Admissions/Financial-Aid/

Course Program of Study Policy

To provide federal and state financial aid to students, the University of Charleston is required to ensure that students are enrolled in a degree-seeking program and that students are enrolled in a minimum number of courses which apply toward their official program of study as recorded on their student record. To ensure compliance with these requirements, the following guidelines must be employed when advising and registering students for classes.

Student eligibility for federal or state financial aid is based upon the degree course requirements specified in a student's degree plan which must specify all the course requirements necessary to meet the minimum credit hour requirement for the degree as set by the West Virginia Higher Education Policy Commission (WVHEPC).

Double Majors

A double major is a program of study in which a student earns one degree with two majors. For instance, a student who completes majors in English and Political Science earns one B.A. degree. The completion of double major must lead to the same degree and can only be achieved simultaneously. A student must be accepted into each major and fulfill all requirements for both majors in addition to satisfying all University requirements. Courses required by either degree count toward a student's financial aid eligibility.

Dual Degrees

In a dual degree program, a student pursues two majors leading to the awarding of the Bachelor of Science and the Bachelor of Arts degrees. For instance, a student who completes majors in Elementary Education and Management earns a BA in Education and a BSBA in Management. Students must be accepted into each degree program and fulfill all requirements for each degree in addition to satisfying all University requirements. Courses required by either degree plan count toward a student's financial aid eligibility. Students must work with their advisors to meet the requirements of each degree in concert to avoid completing the requirements of one degree before the other. Once a student completes all requirements of one degree, that degree must be conferred and the student would need to enroll as a second-degree undergraduate student to complete the second degree.

To be eligible for federal/state aid, each semester, a student must be enrolled in a minimum number of credit hours required by their degree plan (see table below).

Level and Eligibility	Minimum Hours from Degree Plan
Undergraduate – Full-Time	12
Undergraduate – Part-Time	6
Graduate – Pharmacy – Full-Time	12
Graduate – Pharmacy – Part-Time	6
Graduate – Physician Assistant – Full-Time	11
Graduate – Physician Assistant – Part-Time	6
Graduate – All other programs – Full-Time	6
Graduate – All other programs – Part-Time	3

Minors

Students may opt to add a minor to their plan of study. However, the courses required for the minor **do not** count toward a student's financial aid eligibility unless they also fulfill a major requirement. Students are advised to use minor requirements to fulfill elective credit within their major whenever possible. If a student has fulfilled their major elective credits, minor courses should be added to their schedule only after they have enrolled in the minimum number of major courses to reach their financial aid eligibility threshold. Further, if a student enrolls in more than 18 credit hours in a semester due to minor requirements, the student will bear the responsibility for the increase in tuition charges as the additional credits are not required for their major and are thus ineligible for additional aid.

University of Charleston Scholarships

The University of Charleston offers several institutional scholarships to undergraduate students enrolled full-time in in-seat programs on the Charleston campus, and a few select face-to-face graduate programs. Scholarships do not apply to online degree programs, or programs on the Beckley campus that utilize a per-credit-hour tuition structure. For details about our scholarships please visit the University's website at http://www.ucwv.edu/admissions/financial-aid/types-of-aid/scholarships/.

Students in their final semester will have their institutional aid prorated, if enrolled below full-time status. A student must apply for graduation to receive the prorated institutional aid. If a student is enrolled below full-time and not in their final semester, they are not eligible to receive institutional financial aid.

Combination of Scholarships and Residency Status

Scholarship award amounts and requirements are subject to change at the discretion of the University of Charleston.

Freshman and transfer applicants to in-seat 4-year programs will be awarded academic tuition and housing (if living on campus) scholarships based on the GPA recorded on their transcript(s) at the time of admission. Students whose GPAs increase after the initial scholarship is awarded may be awarded additional scholarships, but the initial academic award will not be revised.

The University retains the right to make final decisions about combinations of awards.

All athletic scholarships are subjected to NCAA regulations and are awarded on an annual basis. Athletic scholarships may be combined with institutional tuition and housing

scholarships. Additional institutional scholarships may only be awarded in consultation with the athletic coach to ensure compliance with overall team scholarship limits.

Any student (graduate or undergraduate) who receives financial aid as an on-campus, residential student and who subsequently decides to move off campus will be subject to a reduction in their institutional aid. Athletes will forfeit the entirety of their athletic scholarship. Students who are planning to move off campus should contact the Office of Financial Aid to determine how their financial packages will be impacted.

Institutional scholarships (excluding athletic) will be renewed on an annual basis through four years of enrollment provided the student remains enrolled full-time and in good standing. Students enrolling for a fifth year of undergraduate study may apply for an additional year of renewal. Renewal for a fifth year will depend on scholarship funding, student academic progress, and student need.

Beckley Campus and Online Students

Students who attend the Beckley campus or online pay a discounted per credit hour rate and are not eligible for institutional scholarships.

The University of Charleston receives limited funds from the Beckley Area Foundation and other donors which are awarded to qualifying Beckley campus students. The amounts and criteria are determined on an annual basis.

Federal and State Grants / Scholarships
Federal Pell Grants

Federal Pell Grants are available to students who apply via the FAFSA and meet the eligibility criteria determined by the U.S. Department of Education. The federal government sets the range for these awards based on the student's financial need.

Federal Supplemental Education Opportunity Grants (SEOG)

SEOG award are federally funded grants for students with exceptional financial need. The grant is based on the student's financial need and students must qualify for Pell Grant to be eligible for SEOG funds. Funds are limited and are awarded to the neediest students first.

West Virginia Higher Education Grants

The state of West Virginia provides need-based grant funds for qualified West Virginia residents. Grants are based on financial need and academic performance. Applicants must maintain a minimum cumulative grade point average of at least 2.0 ("C") and earn at least twenty- four (24) credits during an academic year, or twelve (12) credits if only enrolled for one semester. Summer term is not considered a make-up period for eligibility. Students are required to file the FAFSA each year by April 15th for consideration. Awards are determined by the WV Higher Education Policy Commission and eligibility is reviewed by the Office of Financial Aid annually. For further information please visit www.cfwv.com.

Promise Scholarships

The PROMISE Scholarship is a merit-based scholarship administered by the CFWV.

The West Virginia PROMISE (Providing Real Opportunities for Maximizing In-State Student Excellence) is a merit-based financial aid program available to West Virginia students who meet certain academic standards. The PROMISE Scholarship program is based on the student's achievements and not on his or her parents' financial resources, the college's resources, or other factors. Awards are determined by the WV Higher Education Policy Commission and eligibility is reviewed by the Office of Financial Aid annually. For further information please visit www.cfwv.com.

Other WV Grants and Scholarships

Visit the College Foundation of West Virginia website https://cfwv.com for more information about other grants and scholarships available to WV residents.

Pennsylvania / Rhode Island / Vermont / Delaware Higher Education Grants

Students from these states may be eligible to bring their state higher education grant to UC. These grants are based on the student's financial need and determined by the individual state grant agency. Please check with your state higher education agency on these grants.

Employment
Federal College Work Study

Federal College Work Study is awarded to students as part of the financial aid package solely based on financial need. A Federal College Work Study Application is required for consideration in the program. The Office of Financial Aid staff assigns students to positions on the Charleston and Beckley campuses as well as with non-profit agencies off-campus. Students employed within this program may earn no more than the amount of the College Work Study award.

University of Charleston Resident Advisor Awards

Resident Advisor Awards are available to residential upperclassmen to offset the cost of campus housing. Resident Advisors have responsibilities for providing campus-based programming, peer counseling, and tutorial services. Students apply for the RA Awards through the Office of Student Life.

Federal Loans
Federal Direct Loans

Federal Stafford Loans have a fixed interest rate, set by the federal government. Undergraduates must be enrolled for at least six credits per semester in a degree program to be eligible for federal loans. Pharmacy and PA students are required to be enrolled for at least six hours. Other on-line graduate students must be enrolled for three hours to qualify for full-time loan amounts.

Undergraduate students may qualify for subsidized and unsubsidized loans. Graduate students qualify for unsubsidized loans and the Graduate PLUS Loan program.

Graduate PLUS Loans

The Grad PLUS Loan is a federal loan program for graduate students. The interest rate is currently fixed, and payments are deferred if the student is enrolled at least half-time. Students may borrow the total cost of attendance less other financial aid awarded.

Nursing Student Loans

Nursing Student Loans provide funding for students enrolled in the Baccalaureate (BSN) Nursing program. No interest is charged while the student is in school. Five percent

simple interest is charged after completion of a nine-month grace period. The student must demonstrate financial need and be enrolled in nursing classes to be eligible for this program.

Federal Parent PLUS Loans

The Parent Loan for Undergraduate Students (PLUS) is a federal loan program. The interest rate is currently fixed, and repayment may begin within 60 days after the loan is disbursed or can be deferred for up to four years. Parents may borrow the total cost of education per year less other financial aid awarded. If a parent is denied a Parent PLUS loan, the student's federal direct loan amount may be increased in accordance with current federal guidelines.

Private Alternative Loans

Students needing additional funding assistance after all institutional, federal, and state aid is exhausted may wish to obtain a private alternative loan. The Office of Financial Aid can provide students with a preferred lender list.

Additional Outside Financial Aid Programs
External Scholarships

Many students receive scholarships from outside entities (local or national service organizations, a parent's employer, etc.) that can be applied to their financial aid package at the University of Charleston. Students are responsible for reporting these scholarships to the Office of Financial Aid. Checks from the awarding organization should be sent to the attention of the Student Solutions Center for application to the student's account balance. In accordance with federal aid guidelines, a student's total aid package may be altered after receipt of an external scholarship. The practice of the Office of Financial Aid is to reduce unsubsidized loan amounts first when an aid package must be amended.

Veterans
VA Pending Payment Statement of Assurance

The University of Charleston certifies that the institution has no policy in writing or in practice that would lead to any punitive measures for any student using U.S. Department of Veterans Affairs (VA) Post 9/11 G.I. Bill® (Ch. 33) or Vocational Rehabilitation and Employment (Ch. 31) benefits, while payment to the institution is pending from the VA. The University of Charleston does not:

- Prevent their enrollment;
- Assess a late penalty fee;
- Require they secure alternative or additional funding; or
- Deny their access to any resources (e.g. classes, libraries, or other institutional facilities) available to other students who have satisfied their tuition and fee bills to the institution.
- We may require such students to:
- Produce the VA's Certificate of Eligibility by the first day of class;
- Provide written request to be certified;
- Provide additional information needed to properly certify enrollment as described in other institutional policies (students are directed to the University's VA School Certifying Official for all requirements).

Veterans' Benefits are administered through the Veterans Coordinator for full-time and part-time students. Students must carry a course load of 12 credits to be eligible for full-time undergraduate student veterans' benefits. Information on benefits and payment is

available from the Veterans' Administration Regional Office in St. Louis, MO. Telephone: 1-888-442-4551 or at http://www.gibill.va.gov. GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official U.S. government website at http://www.benefits.va.gov/gibill

The Student Solutions Center is required by federal statute to recalculate federal tuition assistance eligibility for student servicemembers who withdraw, drop out, are dismissed, or take a leave of absence prior to completing 60% of a payment period or term. If a student leaves the institution prior to completing 60% of a payment period or term, the Student Solutions Center recalculates eligibility for TA funds. Recalculation is based upon the percentage of earned aid using the following funding formula:

% of term completed = # of days completed up to the withdrawal date/total days in term . This percentage is also the percentage of earned aid.

Reserve Officers Training Corps (ROTC)

Two, three, and four-year scholarships are available for those students who apply and meet the ROTC eligibility requirements. Each award covers tuition, other academic expenses, and a subsistence allowance. These scholarships are offered in cooperation with the Yellow Jacket Battalion ROTC Detachment at West Virginia State University, and may not be stacked with UC institutional scholarships.

Satisfactory Academic Progress for Financial Aid

To receive federal and state need based funds administered by the Office of Financial Aid at the University of Charleston, students must be making measurable academic progress toward completion of an eligible degree. Federal regulations require evaluation of both qualitative and quantitative academic progress as well as completion of degree objective within 150% of normal time frame.

Satisfactory Academic Progress (SAP) standards are the same for all categories of students. All periods of enrollment will be included in the measurement of satisfactory academic progress. Terms in which the student enrolled but did not receive financial aid are included in the measurement.

Guidelines for Academic Progress

The academic year at the University of Charleston consists of fall, spring, and summer enrollment periods. Fall term begins the academic year and the summer term concludes it. The measurement of academic progress is made at the end of each enrollment period and the status is effective with the next enrollment period.

Students applying at the University of Charleston for the first time (including transfers) are considered initially to be meeting SAP. The measurement of academic progress will be determined when all academic transcripts are received by the Office of Financial Aid. All transcripts are to be reviewed prior to any disbursement of federal/state funds. Students who have been academically suspended from the University and who are readmitted are not eligible for financial aid unless meeting the SAP policy. Students who are readmitted may follow the appeal policy if consideration for financial aid is desired. Students who receive academic forgiveness for previous course work will continue to have all attempted credit hours and all earned grades considered as part of the evaluation of academic progress for financial aid.

GPA

Students must meet a qualitative standard of academic progress measured through cumulative grade point average.

Quantitative Standards

Students must meet a quantitative standard of academic progress measured by a percentage completion rate. Students must successfully complete 67% of all attempted credit hours (this allows students to graduate within 150% of the normal timeframe). The calculation is made as follows: earned credit hours/attempted credit hours = completion rate (result will be rounded to the nearest whole number). Courses in which a student receives a grade of "W," "I,", "F", and courses taken under the University's repeat regulations are included in attempted credit hours but are not included in earned credit hours. Transfer credit hours are included in this quantitative measure.

Maximum Time Frame for Degree Completion

Students must obtain their degree within 150% of the normal time frame for degree completion. For example, in a baccalaureate program requiring 120 credit hours, students must obtain degrees within 180 attempted credit hours (120 X 1.50 = 180). For associate programs of 60 credit hours, students must complete within 90 attempted hours. Graduate students in master's degree programs requiring 68 hours must complete within 102 attempted credit hours. Doctoral students have a maximum of 219 attempted credit hours.

This maximum time frame is based upon student classification in the University's academic records. Students pursuing a course of study with greater credit hour requirements need to notify the Office of Financial Aid to have a review done on a case- by-case basis. This request for review will not be considered an appeal.

Students who are pursuing second degrees may be considered for financial aid (this is not the same situation as dual degrees). A second undergraduate degree must be obtained within 60 attempted credit hours. A second associate degree must be obtained within 30 attempted credit hours. A second master's degree must be obtained within 36 credit hours. The attempted hour limitations for a second degree, i.e., 60 attempted credit hours, is measured from the point at which the student earned the initial degree.

Financial aid eligibility is limited to no more the two associate degrees, two undergraduate degrees, two master's degrees, and one doctoral degree. Students who wish to pursue degrees beyond these may do so without federal financial assistance.

Warning Period

A student who fails to meet SAP (excluding maximum time frame) at the end of the enrollment period will automatically be placed on "warning," not to exceed one enrollment period. During the "warning" enrollment period, the student may receive federal financial aid despite the determination that the student is not meeting SAP standards. The student must meet SAP standards at the end of the warning period or will be suspended from further financial aid until such time the student meets SAP standards (student must pay for any additional course enrollment after the warning period through personal or private funds) or the student must appeal and the appeal be granted.

Probation Period

"Probation" is the status assigned to a student who fails to meet SAP standards and who had appealed and has had eligibility for aid reinstated. A student on financial aid probation may receive financial aid for one enrollment period. At that point, the student must meet SAP standards or meet the requirements of the individual academic plan developed in conjunction with an academic advisor to remain eligible for aid.

Appeal Process

There may be extenuating circumstances encountered by a student which impact their ability to be successful during an enrollment period. These circumstances may include personal injury or illness which occurs during an enrollment period; death of an immediate family member or legal guardian during an enrollment period; or other documented circumstances that were unexpected in nature and beyond the control of the student. In these cases, cumulative grade point average or completion rate may decline resulting in the student not meeting the minimum qualitative and quantitative standards previously described.

If this occurs and the student wishes to appeal the suspension from financial aid eligibility, a Satisfactory Academic Progress Appeal Form must be submitted to the Office of Financial Aid no later than the date listed on the student's denial letter. The Academic Progress Appeal Form will be available in the Office of Financial Aid and will be mailed and emailed to the student. If the appeal is granted, the student must complete an academic improvement plan contract with their advisor which will include an indication of the number of credit hours and semester GPA required to meet the SAP policy within one enrollment term. If it is not possible to meet the SAP policy within one enrollment term, an academic plan must be developed which specifies the course work and term GPA necessary to become compliant within three enrollment periods. A review will be done at the end of each enrollment period to ensure that the student is meeting the terms of the academic plan. If the student is not meeting those terms, further eligibility for aid is suspended immediately. An academic plan should not exceed three additional terms of enrollment.

In some cases, a student may not complete the degree objective within 150% of the normal time frame; one possible reason might be a change in major. If this occurs and the student wishes to appeal the suspension from financial aid eligibility, a Satisfactory Academic Progress Appeal Form must be submitted no later than the deadline listed on the denial letter sent from the Office of Financial Aid. This appeal must include an academic plan which specifically identifies remaining required course work and the projected graduation date.

Extensions of the maximum time frame will not exceed three additional enrollment periods.

Extensions of the time frame will not be granted to students who have less than an overall 2.0 grade point average or less than 67% completion rate or who received academic forgiveness under the University Academic Forgiveness Policy.

An appeal form must contain a copy of the University academic transcript (unofficial copy is acceptable), appropriate documentation regarding the extenuating circumstance, and a signed University academic advisor/official form. Incomplete appeal forms will not be reviewed.

The appeal will be reviewed by the Satisfactory Academic Progress Appeal Committee.

Additional Special Requirements Report of Graduation Rates

Information about the graduation rates of a variety of student groups, and other information in compliance with the Student Right-to-Know Act, is available in the Student Solutions Center and on the UC website's **Student Right-to-Know page.**

Student Withdrawal

Financial Aid – Title IV Refund Policy

Withdrawal from a class or from all classes may impact aid eligibility, both in the semester in which the withdrawal occurs and in subsequent semesters. The University's refunds are made based on University policy as specified in the section below. Refunds to financial aid programs are made in compliance with the U.S. Department of Education Federal Title IV Refund Policy regulations, state program policies and University regulations.

Federal Return of Title IV Aid (R2T4)

The Financial Aid Office is required by federal statute to recalculate federal financial aid eligibility for students who withdraw, drop out, are dismissed, or take a leave of absence prior to completing 60% of a payment period or term. If a student leaves the institution prior to completing 60% of a payment period or term, the financial aid office recalculates eligibility for Title IV funds. Recalculation is based on the percentage of earned aid using the following Federal Return of Title IV funds formula:

Percentage of payment period or term completed = the number of days completed up to the withdrawal date divided by the total days in the payment period or term. (Any break of five days or more is not counted as part of the days in the term.) This percentage is also the percentage of earned aid.

Funds are returned to the appropriate federal program based on the percentage of unearned aid using the following formula:

Aid to be returned = Percentage of unearned aid (100% aid - % earned aid) x total amount of aid that could have been disbursed during the payment period or term.

If a student earned less aid than was disbursed, the institution would be required to return a portion of the funds and the student would be required to return a portion of the funds. Keep in mind that when Title IV funds are returned, the student borrower may owe a balance to the institution.

If a student earned more aid than was disbursed to him/ her, the institution would owe the student a post-withdrawal disbursement which must be paid within 120 days of the student's withdrawal.

The institution must return the amount of Title IV funds for which it is responsible no later than 45 days after the date of the determination of the date of the student's withdrawal.

Refunds are allocated in the following order:
- Unsubsidized Direct Loans (other than PLUS loans)
- Subsidized Direct Loans
- Direct PLUS Loans

- Federal Pell Grants for which a return of funds is required
- Federal Supplemental Opportunity Grants for which a return of funds is required
- TEACH Grants for which a return is required
- Iraq and Afghanistan Service Grant for which a return is required
- For other assistance under this "Title" for which a return of funds is required (e.g., LEAP)

University Tuition Refund Policy

Refunds will be made according to the following schedule.

Students who are registered for 15-week classes and withdraw within the first two weeks of scheduled classes are not charged tuition. If a student withdraws for any reason after the first two weeks of a 15-week semester, they are responsible for the full charges of the semester.

Students who are registered for 7-week classes and withdraw within the first two weeks of class are not charged tuition. If a student withdraws for any reason after the first ten days of a 7-week semester, they are responsible for the full charges of the term.

Students who are registered for a 5-week summer class and withdraw on or before the first scheduled class meeting day of the course are not charged tuition. If a student withdraws for any reason after the first day of scheduled classes, they are responsible for the full charges of the term.

Students who are pre-registered and decide not to attend the University of Charleston must contact the Student Solutions Center to have their name removed from course rosters. The date and time of this communication will determine the amount of tuition that will be charged.

A student dismissed for disciplinary reasons will receive no refund of any charges, except for room and board, which would be proportionate to the number of days of the term remaining after the university ID is surrendered.

Student Lending Code of Conduct

The University of Charleston is committed to providing students and their families with the best information about loan processing and alternatives available for student borrowing. In support of this and an effort to rule out any perceived or actual conflict of interest between University officers, employees, or agents and education loan lenders, the University has adopted the following:

The University does not participate in any revenue-sharing arrangements with any lender.

- The University does not permit any officer, employee, or agent of the school who is employed in the Office of Financial Aid or is otherwise involved in the administration of education loans to accept any gifts of greater than nominal value from any lender, guarantor, or servicer.
- The University does not permit any officer, employee, or agent of the school who is employed in the Office of Financial Aid or is otherwise involved in the administration of educational loans to accept any fee, payment, or other financial benefit (including a stock purchase option) from

a lender of affiliate of a lender as compensation for any type of consulting arrangement or contract to provide services to a lender or on behalf of a lender relating to education loans.

- The University does not permit any officer, employee or agent of the school who is employed in the Office of Financial Aid or is otherwise involved in the administration of education loans to accept anything of value from a lender, guarantor, or group of lenders and/or guarantors. The University does allow for the reasonable reimbursement of expenses associated with participation in such boards, commissions, or groups by lenders, guarantors, or groups of lenders or guarantors.
- The University does not assign a lender to any first-time borrower through financial aid packaging or any other means.
- The University recognizes that a borrower has the right to choose any lender from which to borrow to finance his/her education. The University will not refuse to certify or otherwise deny or delay certification of a loan based on the borrower's selection of a lender and/or guarantor.
- The University will not request or accept any offer of funds to be used for private education loans to students from any lender in exchange for providing the lender with a specified number or volume of Title IV loans, or a preferred lender arrangement for Title IV loans.
- The University will not request or accept any assistance with call center or Office of Financial Aid staffing from any outside lending agency.

Identity Theft Prevention Policy

The risk to the University of Charleston's faculty, staff, students, and other applicable constituents from data loss and identity theft is of significant concern to the University. The University of Charleston actively works to detect, prevent, and mitigate identity theft, and to help protect its faculty, staff, students, and other applicable constituents from damages related to the loss or misuse of identifying information due to identity theft.

Under this policy, the University will:
- Identify patterns, practices, or specific activities ("Red Flags") that could indicate the existence of identity theft with regards to new or existing covered accounts.
- Respond appropriately to any red flags that are detected to prevent and mitigate identity theft.
- Ensure periodic review/updating of institutional software, hardware, and physical files, including reviewing the accounts that are covered, for necessary updates to ensure data security; and
- Promote compliance with state and federal laws and regulations regarding identity theft protection.

The University shall, as appropriate, incorporate existing anti-fraud programs and information security programs that control reasonably foreseeable risks.

Rights and Responsibilities of Aid Recipients

As a consumer of a commodity (financial aid for higher education), you have certain rights to which you are entitled, and certain obligations for which you are responsible.

You have the right to know:
- The names of accrediting or licensing organizations

- Information about its programs; its instructional, laboratory and other physical facilities and its faculty.
- Special facilities and services available to persons with disabilities.
- Financial assistance is available, including information on federal, state and institutional financial aid programs.
- The deadlines for submitting applications for the federal aid programs available.
- The cost of attending the University and its refund policy.
- The criteria used by the University to select financial aid recipients.
- How the University determines your financial need.
- What resources (such as parental contribution, other financial aid, your assets, etc.) are considered in the calculation of your need.
- How much of your financial need, as determined by the University, has been met.
- What portion of the financial aid you received is loan aid and what portion is grant aid. If the aid is a loan, you have the right to know what the interest rate is, the total amount that must be repaid, the repayment procedures, and the length of time you have to repay the loan and when the repayment is to begin.
- How the University determines whether you are making satisfactory academic progress and what happens if you are not.

It is your responsibility to:
- Review and consider all information about the University before you enroll.
- Complete all application forms accurately and submit them on time to the right place.
- Pay special attention to and accurately complete your application for financial aid. Errors can result in long delays in receiving financial aid. Intentional misreporting on application forms for federal financial aid is a violation of the law and is considered a criminal offense, subject to penalties under the U.S. Criminal Code.
- Submit all additional documentation, verification, corrections and/or new information requested by the Financial Aid Office.
- Read all forms that you are asked to sign and keep copies of them.
- Accept responsibility for all agreements that you sign.
- Notify the Financial Aid Office of changes in your name, address, housing or enrollment status. (This also applies to loan recipients after they leave the University.)
- Perform the work agreed upon in accepting a work study award.
- Know and comply with the University's deadlines for application or reapplication for aid.
- Know and comply with the University refund procedures.
- Notify the Financial Aid Office in advance when your course load at the University may be less than full-time. Failure to do so will cause delay in the receipt of your funds.
- Notify the Financial Aid Office of any changes in financial status. Failure to do so can result in termination of financial assistance.

- Maintain satisfactory academic progress. Withdrawal from the University or never attending classes will result in partial or full repayment of aid disbursed for the semester involved.

ACADEMIC POLICIES

Dr. Dan Silber, Provost

GENERAL ACADEMIC POLICIES

Full-time/Part-time

Students enrolled in undergraduate programs at the University of Charleston are considered to be full-time if they are enrolled for 12 credit hours or more.

Students enrolled in graduate programs at the University of Charleston are considered to be full-time if they are enrolled for 5 credit hours or more in a given semester except for students enrolled in the Pharmacy, Physician Assistant Studies, or Doctor of Nurse Anesthesia Practice programs which require students to enroll for 12 or more credit hours in a semester to be considered full-time.

Residency
Undergraduate

Undergraduate students enrolled in an undergraduate degree program must complete a minimum of 25% of the total credits required for the program while in residence at the University of Charleston. The minimum residency requirement for an associate degree is 15 credits. The minimum residency requirement for a bachelor's degree is 30 credits.

Students pursuing a bachelor's degree may apply a maximum of 6 graduate course credits toward the 30-credit residency requirement. To be eligible, students must be enrolled in the last semester of their senior year and complete a course substitution form to be submitted to the Student Solutions Office. Course substitution requests should be submitted during the course registration period for the upcoming semester but no later than the dates listed in the Course Substitution Policy above. The form must be signed by the student's faculty advisor, the director of the student's undergraduate program, the director of the graduate program in question, and the financial aid director. Course substitution requests are subject to final approval by the Registrar.

Graduate

Graduate students enrolled in a graduate degree program must complete a minimum of 70% of the total credits required for the program while in residence at the University of Charleston. However, some programs may require a greater percentage of program credits to be completed in residence. Graduate students should refer to their program handbook for precise details about the residency requirements for their program.

Class Standing

Students are classified by the cumulative number of semester credit hours they have earned as recorded in the student's official records. The cumulative number of hours will include all institutional credit earned at University of Charleston and all transfer credit which has been presented by the student and accepted by the Registrar. Acceptance of transfer credit is indicated by the credit being recorded in the student's record as maintained by the institution.

Students are classified as follows:

Freshmen	25 or fewer hours earned
Sophomores	26-60 hours earned
Juniors	61-90 hours earned
Seniors	91 or more hours earned

These classifications will apply for institutional and federal financial aid as well as in any academic uses which may exist in the various catalogs and publications regarding undergraduate study.

Academic Credit for Prior Learning

The University of Charleston's outcomes-based philosophy encourages evaluation of prior learning for college credit. Students may be able to meet certain degree requirements by demonstrating achievement of University or program competencies. Evaluation of prior learning also assures that students begin the college experience at the most appropriate level, subject to the limitations detailed below.

The Registrar and major advisors will discuss placement, course credit and options for demonstrating outcomes achievement through prior learning when schedules are arranged during orientation and advising. Prior learning may be demonstrated in the following ways:

Examination

Advanced Placement

Credit may be given to students who have a score of at least three (3) on the appropriate College Board Advanced Placement Examinations. Some scores must be a four (4) or higher to receive credit. The University accepts the following AP tests:

AP Test Name	Credits	Equivalent UC Course
U.S. Government and Politics	3	POLS 101
American Literature	3	ENGL 223
Art – History of Art	3	ART 203
Art – Studio: Drawing	3	ART 100
Biology (Score of 3 or 4)	4	NSCI 117

World History	3	HIST 212

College Level Examination Program (CLEP) and Dantes Subject Standardized Tests (DSST)

Students may be exempted from one or more introductory courses, with an award of credit for such courses, based on good CLEP or DSST performance. The Student Solutions Center and the Academic Success Center can provide information about which CLEP and DSST tests are accepted for credit. CLEP and DSST testing facilities are available on the Charleston campus.

Credit by Examination

Academic departments or programs may develop examinations to allow students to demonstrate mastery of course content. The Program Director, Department Chair, Provost, and the Registrar must approve the award of credit. The Program Director shall approve content of the examination prior to administration. Completed examinations are filed in the Office of the Registrar. Credit will be awarded only to those receiving a grade of "C" or above on the examination. A grade of "P" or "F" is recorded on the student's transcript. Students who fail to establish credit for a course by examination will not be allowed to take a second examination for credit for the same course. Contact the Director of the program of interest to inquire about this option.

IB Degree

Students achieving 5, 6, or 7 in an individual higher-level examination may receive credit for an equivalent course at the University of Charleston. No credit will be awarded for subsidiary (lower) level subjects. Official transcripts must be issued by the **International Baccalaureate North American Office**.

European Patterned Education

Up to one year of credit may be awarded upon completion of the courses and the national examination for advanced high school work, the equivalent of the thirteenth year of school. If you are completing such curricula, you may be eligible to receive variable amounts of advanced standing credit (0 – 32) depending on your examination results, course syllabi and subjects taken. We require an officially certified copy of your externally issued exam results showing scores for each exam subject. We also require an official English translation. Advanced standing credit is most often awarded for the following programs:

- British GCE Advanced-level or AS-level examinations
- Canadian (Quebec) two-year College d'enseignement General et Professionnel (CEGEP)
- Caribbean Advanced Proficiency Examinations (CAPE) when two units are completed
- Danish Studentereksamen
- Finnish Ylioppilastutkinto
- French Baccalaureate exams
- German Abitur exams
- Hong Kong HKALE
- Icelandic Studentsprof – Menntaskoli exams
- Italian Maturita
- Lebanese Baccalaureate
- Netherlands Voorbereidend Wetenschappelijk Onderwijs (VWO)
- Norway Vitnemal
- Singaporean Advanced-level exams
- Swedish Fullständigt Slutbetyg från Gymnasieskolan
- Swiss Federal Maturite exams
- Other European Baccalaureate

Other international high school programs and diplomas will be evaluated for transfer credit on a case-by-case basis. A final evaluation of credit is subject to receipt of official documents and information about the courses of study completed.

Professional Experience

Professional Experience is used to earn academic credit for learning that occurred outside the classroom. Regularly enrolled students or applicants for admission may request credit to be applied to specific courses, program requirements, or general education requirements. They submit a written request and a portfolio documenting mastery of the content area(s) and outcome(s) to program faculty. The portfolio is evaluated by a faculty member (full-time or part-time) who has expertise in the field or fields being assessed. **The University of Charleston does not award academic credit in areas in which it does not have faculty expertise.**

Credit for professional experience may also be awarded if the educational experience being evaluated is listed in **The National Guide for College Credit for Workforce Training.** Published by the American Council on Education (ACE), this guide lists credit recommendations for educational programs and courses sponsored by non-collegiate organizations that offer courses to employees or members. These include business and industry, unions, professional and voluntary organizations, and government agencies. In most instances, the University of Charleston will accept such recommendations and award appropriate credit.

Workforce Training. Published by the American Council on Education (ACE), this guide lists credit recommendations for educational programs and courses sponsored by non-collegiate organizations that offer courses to employees or members. These include business and industry, unions, professional and voluntary organizations, and government agencies. In most instances, the University of Charleston will accept such recommendations and award appropriate credit.

Military Experience

The University may accept military learning experiences if these experiences are consistent with recommendations made by ACE (American Council on Education). The Joint Services Transcript (JST) or a transcript from the Community College of the Air Force (CCAF) are the records for these credits. ACE recommendations are provided to assist the University in assessing the applicability of military learning experiences to an educational program. The University may modify the recommendations in accordance with institutional policies and practices.

Credit may be applied to a student's program in various ways: (1) applied to the major to replace a required course, (2) applied as an optional course within the major, (3) applied as a general elective, (4) applied to meet basic degree requirements, or (5) applied to waive a prerequisite. Credit granted by a postsecondary institution will depend on institutional policies and degree requirements.

The learning of some service personnel may exceed the skills, competencies, and knowledge evaluated for a specific course. In these cases, the University may conduct further assessment.

The University requires the prospective student to provide the JST or CCAF transcripts as primary source documents when reviewing military training completed by a service member, verified by the services, and evaluated and endorsed by ACE.

Policies

Application for credit for Prior Learning must be submitted prior to the completion of 96 credit credits for bachelor's degree programs and prior to the completion of 45 credits for associate degree programs. The Registrar must approve any exceptions to this regulation.

Credit Limit: There is a limit on the number of credits that can be awarded through the credit for prior learning process to ensure that students meet the required credit hours for graduation.

Associate of Science degree - up to 45 credits of the 60 credits needed to graduate.

Bachelor of Science degree - up to 90 credits of the 120 credits needed to graduate.

Master of Science degree - up to 9 credits of the 36 credits needed to graduate.

Doctorate degree - up to 15 credits of the 58 credits needed to graduate.

International Exchange Program

In addition to study on the Charleston campus, the University of Charleston recognizes the value of study abroad, which enriches the student's educational experience and provides intercultural, cosmopolitan, and enhanced pluralistic dimensions of knowledge. These experiences are highly desirable for performance and advancement in various fields, including business, government, and cultural affairs.

The University of Charleston welcomes qualified students from abroad and regularly enjoys the presence of students from other countries who are enrolled on the Charleston campus. Likewise, the University has benefited from visiting scholars from such international centers as Rome, Italy; Villa Velha, Brazil; Tokyo, Japan and Baoding, China. Professors and students from the University of Charleston have studied and taught on campuses in other countries and those campuses in turn have sent scholars to the Charleston campus for both short-term and extended residence. The University seeks to promote such exchanges of both students and scholars as a valuable contribution to the learning environment.

Credits from Another Institution

UC accepts credits from earned from a regionally or Department of Education or Council for Higher Education Accreditation (CHEA) recognized nationally accredited institutions.

Credit for the course is reflected on the student's transcript, but grades are not recorded and may not be used to make up quality point (grade point) deficiencies at the University of Charleston.

Only credits earned at a level of "D" or better will be accepted for transfer to the University.

If a "D" is earned in a course at another institution, it will be noted in the student's University of Charleston record to ensure that policies requiring a grade of "C" or better for successful completion are upheld.

Transient Student

Study at another institution can be beneficial to a University of Charleston student in a variety of ways, including opportunities to enroll in courses not available at the University, the opportunity to study with other faculty, and the opportunity to experience unique living/learning environments.

In order for transient credit to be awarded, the following conditions apply:

- Students with a grade point average of 2.0 or better may obtain permission to attend another institution with the intent of transferring credit back to the University of Charleston.
- Transient credits will be accepted toward fulfilling degree requirements provided approval of courses and written permission are granted by the Registrar and the student's major advisor prior to the term in which the courses are to be taken.

- It is the student's responsibility to request that a transcript be forwarded to the University of Charleston upon completion of the course.
- Transient students are not eligible for financial aid from the University of Charleston for these courses.

Transfer Student

The University of Charleston's outcomes-based curriculum provides distinct advantages to transfer students. In addition to credits that may be awarded by the Registrar for work completed at another accredited institution, students may be able to receive credit for prior learning using strategies outlined in the "Academic Credit for Prior Learning" section of this Catalog. Decisions on acceptance of transfer equivalencies within the program may be referred to the program faculty. However, transfer students should be aware that they must meet the University's general education requirements before a degree can be awarded.

Transfer students are responsible for submitting an official transcript from each of their previously attended institutions. Failure to do so will delay their admissions decision and ability to register for courses at the University of Charleston.

The Office of Admissions will request an evaluation of each incoming student's transcripts from their previously attended institution(s). The results will be shared with the student and their advisor to outline their remaining program and general education requirements at the University of Charleston.

Students transferring into certain academic programs will be required to enroll in UNIV 204 College Success and Leadership. This course is designed to help students complete some elements of the lower-level UNIV courses in an accelerated timeline.

Placement

Appropriate placement of students in introductory courses is imperative to students' long-term academic success. UC recognizes this process is multi-faceted and, therefore, utilizes multiple measures to determine a student's entry-level course in math, chemistry, reading, and English language proficiency. Students are encouraged to discuss all initial placements with their advisor to ensure they are enrolled in the most appropriate course for their skill and comfort level.

Math

The following guidelines will be used for initial math placement. If students provide ACT or SAT math sub scores, those scores will be used to determine math course placement. If those scores are unavailable, students will be placed in MATH 120. In this case, students who desire higher course placement can contact the Mathematics Program Director to request a math placement test.

Chemistry

Chemistry Placement: MATH 121 is a co-requisite for CHEM 101. Students must successfully complete MATH 121 as a pre-requisite for CHEM 102.

Reading

Students scoring 89 or below on the Nelson Denny reading test (administered at the start of the student's first semester) will be required to take UNIV 106: Success in College Reading.

English Language Proficiency

Students whose native language is not English and who have not met the minimum test requirement for admission, will be required to submit a writing sample to determine if they will enroll in a supplemental ENSL course. Please see the international student admission requirements for minimum test scores.

Students who do not meet the minimum test score per the admissions policy and whose writing sample does not meet the requirements will be required to complete the following course:

ENSL 096 – Advanced English Integrated Skills with a grade of pass unless the student was not required to take this course based on a diagnostic evaluation by the Director of International Programs.

Students enrolled in the ENSL 096 course will be graded on a pass or fail grading scale. Students who do not pass the course will be given one more opportunity to take the course and pass it to remain a student.

DEGREE REQUIREMENTS

Undergraduate Degree Requirements

Students must meet the graduation requirements as published in the Catalog in effect when they first enroll, unless they have not maintained continuous enrollment (summers exempted). Students who interrupt their studies may be expected to meet degree requirements of the Catalog in effect at the time of their return. Transfer student requirements are governed by the Catalog in effect at the time of initial enrollment. Subsequent changes in degree requirements, as published in the Catalog or amended by the faculty, may be substituted at the option of the faculty in discussion with the student.

Students are expected to complete all requirements for the bachelor's degree within 10 years of original enrollment at the University and within five years for the associate degree. After 10 years, students pursuing a bachelor's degree will be advised to complete a General Studies degree. Within the University certain programs have specific guidelines as to the courses accepted for credit or the time in which courses can be applied for credit. Records of students not completing degree requirements within these times will be subject to review to determine graduation requirements. Students wishing to graduate with a degree in their original program are required to obtain approval from the dean of the school.

Departmental requirements for graduation are those in effect at the time the student declares the major except in cases in which an external accrediting agency requires otherwise. Changes in departmental requirements after declaration will apply, provided they do not require a student to enroll in more than a normal complement of credit hours in any term or do not prolong the time required to complete degree requirements.

Associate Degree

Minimum requirements include:
- 60 earned academic credits;
- Cumulative University of Charleston grade point average of 2.0
- Fulfillment of all general education requirements (15 hours)
- Fulfillment of all requirements and outcomes of the academic major
- 15 University of Charleston credits

Bachelor Degree

Minimum requirements include:
- 120 earned academic credits;
- Cumulative University of Charleston grade point average of 2.0
- Fulfillment of all general education requirements (33-36 hours) ;
- Fulfillment of all requirements and outcomes of an academic major;
- 30 upper-division credits (300-level or higher) – six of which must be University of Charleston credits;
- 30 University of Charleston credits, 15 of which must be earned during the senior year

Majors

Academic majors consist of a variety of learning experiences with at least 40 credits, 15 of which must be from upper-division (300-400 level courses) that meet program outcomes. Students must complete at least six upper-division credits in their major at the University of Charleston, with a 2.0 grade point average. An overall grade point average of 2.0 is required in all work attempted in the major. Some programs may have a higher requirement. Students must declare a major before completing their 60th academic credit.

Any change in major, including a choice of major by an undecided student, requires the student to file a new "Declaration of Change of Major" form with the Student Solutions Center, to ensure that proper credit toward a degree is tracked and awarded.

Minors

A minor is a sequence of courses within an integrated curriculum that is offered outside of a student's degree program or major. Minors require a minimum of 18 credits in the discipline. At least six (6) of these credits must be completed at the University of Charleston. Up to six (6) credit hours may be counted toward a major's course-specific requirements or another minor. No limit is placed on the number of major elective credits that can be used toward a minor's requirements. No limit has been placed on the number of minors a student may acquire. Please note that courses required for a minor do not count toward a student's financial aid eligibility unless they are also fulfilling a major requirement. See the financial aid section of this catalog for more information.

Double Majors

A student may declare a second major. Students need to satisfy general education requirements only once, regardless of number of majors. At least 21 credits in the second major must be outside the core requirements of the first major and unique to the second major. If the two majors are in two different degree classifications (AS, BS and BA) the student will receive two diplomas. If the majors are in the same degree classifications (AS,

BS or BA) only one diploma will be received, noting both majors completed. Please see the Financial Aid section of this catalog for information on financial aid eligibility for double majors.

Graduate Degree Requirements

See specific programs for graduate degree requirements.

Concentrations and Certificates

Concentrations

A concentration is a sequence of courses within an integrated curriculum that is offered within a student's degree program or major. At least 9 credits must be outside the core requirements of the student's program of studies. A concentration must contain at least 12 credits.

Certificates

A certificate is a sequence of courses within an integrated curriculum that may or may not be offered within a student's degree program or major. Certificates may be credit-bearing or non-credit bearing. A credit-bearing certificate normally includes at least 12 credits. No limit has been placed on the number of certificates a student may earn.

Second Degree Requirements

Students who have obtained a bachelor's degree from an accredited institution other than the University of Charleston may receive a second bachelor's degree from the University of Charleston. Requirements include:

- The second degree field of study must be different from one completed as part of the student's first bachelor's degree.
- Take at least 30 credits at the University of Charleston. Students who earn their first bachelor's degree from the University of Charleston and wish to return for a second degree must also complete an additional 30 credit hours.
- Students completing a second bachelor's degree will not need to complete additional general education requirements.

COURSE POLICIES

The minimum enrollment for a course is generally eight (8) students. Courses with enrollments of less than eight students are subject to cancellation by the Department Chair, School Dean, or the Provost.

Credit can be counted toward a degree only once for a course covering a specific body of knowledge. No credit can be given for a second course covering essentially the same body of knowledge at the same level, even though there is a difference in the course titles and/or numbers.

Certain courses may be counted toward a major in more than one department (cross-listed). Cross-listed courses are given designations under both departments, and listed under both departments. Even though the course numbers are different, the course may not be taken twice to earn credit for both course numbers.

In order to provide a wider range of courses for students, certain advanced courses are offered on a rotating basis or only if the number of students majoring in the field justifies

the offering of the course. The official Class Schedule must be consulted to determine which courses will be offered in a given year.

<p style="text-align:center">Course Definitions</p>

Traditional

Most of the courses described in this Catalog are traditional, in-seat courses of 15- or 7-week lengths. For each credit granted, the student participates in one hour of faculty-directed lecture/discussion/activity per week. The student is expected to spend approximately two hours per week per credit hour preparing/studying for that class.

Laboratory/Studio/Production classes receive at least one credit and meet for varying lengths of time based on program requirements.

Clinical

Clinical courses involve hands-on experiences, often outside of campus, and vary in the number of hours required and the nature of the work expected of students. Almost all Clinical courses are found in Health Science programs. Sometimes Traditional courses have clinical components and in some cases, Clinical courses are stand alone courses. A Clinical course is similar to an internship with the exception that a group or team of students may be involved and supervision from instructors is more frequent. The number of hours the student is required to take part in Clinical courses varies significantly and is not guided by the amounts of time prescribed in Regular courses or Internships. In some cases, the Clinical course is a full-time commitment.

Special Topics

Special Topics courses are also similar in many ways to Traditional courses, but they are offered on a one-time basis only. In this Academic Catalog, Special Topics courses do not list a specific title, e.g., HIST 350 Topics in History: The American Civil War (3 credits). These courses allow faculty to teach courses in special fields of expertise from time to time and provide attractive opportunities for students to delve more deeply into academic disciplines. Special Topics courses are assigned the number 350.

Directed Study

Directed Studies are traditional courses which, under exceptional and limited circumstances, are taught on a basis arranged between the student and the instructor and approved by the Dean of the School. A course taken by Directed Study will only be recognized if a Change to Schedule form is completed and filed in the Student Solutions Center prior to the beginning of the course.

Independent Study

Independent Study courses are offered on a tutorial basis. The content of the course may be suggested by the student to supplement work in his or her major field of study, or it might be suggested by a faculty member to give a student greater experience in the research in the major. However, the content is not the same as delivered in a Traditional course. A full-time faculty member must determine if the student has a sufficient academic background to pursue an Independent Study course successfully. The student and faculty member work together to design the syllabus. The student then signs this syllabus to indicate agreement with course requirements. The student and the sponsoring faculty member should be in regular contact (at least every other week) for a total of 15 hours for

the duration of the course to assess the progress of the study. Independent Study courses usually carry the number 299 or 499.

Internship

Internships provide opportunities for a student to apply principles learned in Traditional courses to a career-related work experience. The student, with the assistance of the supervising faculty member and the University's Center for Career Development, identifies an appropriate Internship placement site and worksite supervisor. The faculty member and student complete a Learning Contract outlining learning outcomes and competencies the student is expected to achieve, the method of assessing achievement, and the means of maintaining communication between all parties. The faculty member and the Director of the Center for Career Development communicate the terms of the Learning Contract to the worksite supervisor. A copy of the Learning Contract is retained by the supervising faculty member, the student, the worksite supervisor, and by the Center for Career Development. The amount of academic credit granted to the Internship should be determined by comparison with student effort in Laboratory/Studio courses. An internship usually requires a minimum of 40 hours of involvement for each academic credit. Internships usually carry the course number of 298 or 498. No student may take more than 16 credits of Internship in the 120 credits required for graduation.

College Preparation

Courses identified by numbers beginning with a "0," e.g. 095, are meant to prepare students for college-level work. Equivalency courses do not count toward the 120 credits required for graduation, but they do count as part of the academic load for purposes of financial aid and to determine academic good standing. Some students, athletes in particular, need to monitor the number of equivalency courses included in college work. For more information on these limitations, consult the faculty athletic representative or the Registrar.

Modalities
In-seat

An in-seat course in one in which all activities occur at the same classroom location at a designated class time.

Online

An online course is one in which all activities occur through computer or Internet with no in-seat class time. An online course may be synchronous or asynchronous.

- Synchronous : At least one required session where all students and instructors meet at the same time through a web-conferencing software such as Zoom or Collaborate.
- Asynchronous: No required sessions where students and instructors meet at the same time. Instructors and students may meet virtually for office hours or other non-required meetings.
- Hybrid: A hybrid course combines traditional, in-seat class time with online and out-of-class work. Hybrid courses replace a percentage of in-seat class time with online out-of-class work. The student must attend in-seat classes at the location designated on the course schedule.

Prerequisites

Students may be required to prove a certain level of competence or complete specific courses before being allowed to enroll in a specific course or participate in a learning experience. Questions concerning prerequisites should be referred to the course instructor. Students who have not met all the prerequisites may be excluded from the course or the instructor may waive the prerequisite, based on demonstrated competence or equivalent academic experience. Prerequisites are listed in the course descriptions in the Catalog.

Corequisites

Students may be required to take two courses simultaneously, such as a science lecture and an accompanying lab. Content and competencies of corequisite courses are linked.

Course Substitutions

Department chairs and program directors have the authority to waive or provide substitute coursework for academic program requirements. Course substitution and waiver requests must be submitted to the Student Solutions Office using the course substitution form as soon as it is determined the substitution is necessary. Course substitution requests should be submitted during the course registration period for the upcoming semester but by no later than August 1st for Fall classes, December 1st for Spring classes, and April 1 for Summer semester classes. Course substitution and waiver requests are subject to final approval by the Registrar. If a student will be completing the course to be substituted for the requirement outside of the University of Charleston, a transient form must be submitted to the Student Solutions Center prior to the student's enrollment at the other institution.

The student is responsible for completing all requirements of his or her major program, including mastery of exit-level outcomes at designated standards, and for meeting all University requirements, including all general education requirements, before they will be allowed to graduate. Students should confer with their major advisor and refer to the Academic Catalog in place when they originally entered the program, to assure satisfactory progress toward graduation. Those catalogs may be available online.

Course Numbering system

000-099	College Preparation courses. These courses count as part of the student's academic load, but credit cannot be used to meet graduation requirements.
100-199	Lower division freshman level courses.
200-299	Lower division sophomore level courses.
300-399	Upper division junior level courses. Freshman may not enroll without permission of the Department Chair and Dean responsible for the course.
400-499	Upper division senior level courses. Freshman may not enroll without permission of the Department Chair and Dean responsible for the course.
L-Courses	Course numbers followed by "L" denote laboratory courses.
X-Courses	Course numbers followed by "X" denote one-time experimental courses, which may be offered again under a permanent number once approved by the appropriate Curriculum Committee.
500-999	Graduate level courses. Open to advanced undergraduate students with instructor permission.

Courses listed in this Academic Catalog are subject to change through normal academic channels.

The University of Charleston reserves the right to close sections of classes and to add new sections of classes as conditions warrant. In addition, the University reserves the right to change instructors from those listed in the Class Schedule whenever such a change is necessary.

Grading Policies

Students are graded on class attendance and participation, required readings, written reports and papers, tests, oral presentations, other faculty-designated activities and assessments. The student receives a final report of his or her level of achievement on academic work at the close of each semester. In addition, students receive midterm grade reports so that they can seek assistance if necessary.

Grading scheme

Students may receive one of the following letter grades: A, B, C, D, F, I, P, W, and AU. The instructor determines the grading scale for each individual course, i.e., the level of performance required to earn a particular letter grade. The significance of each letter grade is as follows:

A　An honor grade given for ability and performance of an exceptionally high quality.

B　Represents performance distinctly better than average.

C　Represents performance of average quality.

D　The lowest grade for which a student earns academic credit. A grade of "D" may not meet the standards necessary to fulfill program outcomes. Such standards are stated in program or course outcomes descriptions.

F　Represents failure to meet the outcomes or requirements of a learning experience.

I　A temporary grade that indicates a student's work is "Incomplete" because of illness or other unavoidable reasons and additional time is allowed for completion. A grade of "I" will not be awarded if the student has completed less than 20% of the coursework. See section "Removal of an Incomplete."

I/F　Designates an "I" (Incomplete) grade that was automatically changed to "I/F" at the end of the allowed time for course completion.

IM　Is a temporary grade that indicates a student's coursework is "Incomplete" because of military deployment and additional time is being allowed for completion. The student must notify the faculty members teaching the course(s) **and** the Registrar as soon as they are notified of the deployment. The student will work with their unit Commanding Officer (CO) to provide evidence of this deployment for approval prior to actual deployments. A grade of "IM" will not be awarded if the student has completed less than 20% of the coursework.

IM/F　Designates an "IM" (Incomplete due to Military Deployment) grade that was automatically changed to "IM/F" at the end of the allowed time for course completion. See section "Removal of an Incomplete due to Military Deployment."

P　Represents Passing. It is the grade that is assigned to represent satisfactory completion of the following:
- Courses designated Pass/Fail;
- Work for which fractional credit is allowed by the University because of interruption of courses by entrance by the student into the Armed Forces;
- Courses for which credit is established by examination;
- Courses in which students elect the Pass/Fail option;

• Credit for experience.

W Indicates the student withdrew from the course on or before the last day to officially withdraw.

AU Signifies that the student registered for the course on the Audit plan and did not desire to submit the evidence necessary for academic credit in the course. Once a course is audited it may not be taken again for credit.

Quality Points and Grade Point Average

Each letter grade has a numerical equivalent as indicated below. These equivalents are called "quality points." Quality points are multiplied by the number of credits a student earns for each course. The results for all courses are added together and divided by the total number of credits earned by a student to calculate his or her cumulative Grade Point Average (GPA). Courses in which grades are "P," "W," or "AU" are not included when calculating GPA.

A Four quality points per credit
B Three quality points per credit
C Two quality points per credit
D One quality point per credit
F Zero quality points per credit
I Not included in credits attempted for GPA calculations
IM-Not included in credits attempted for GPA calculations
I/F Zero quality points per credit attempted for GPA calculations
M/F-Zero quality points per credit attempted for GPA calculations

Incomplete Grade Policy

A grade of "Incomplete" is defined as a temporary grade that indicates a student's work is incomplete because of illness or other unavoidable reasons and additional time is being allowed for completion of course work.

Requirements for requesting an incomplete:

1. Student has completed at least 50% of the course.

2. It remains possible for the student to pass the course.

3. Student has provided documentation of:

    a. Major illness or injury

    b. Major illness or injury or death of a close family member or other serious family emergency

    c. Extraordinary absence due to a University-sanctioned event

In the absence of documentation, the dean of the school in which the course is housed has the authority to determine whether extenuating circumstances warrant granting the student a grade of Incomplete.

All petitions for a grade of Incomplete must be submitted by the course faculty member to the dean of the school for consideration. Incomplete grades are not awarded without the dean's approval.

The deadline for requesting an Incomplete is two weeks before the last day of class. Faculty members requesting an Incomplete for a student past this deadline must obtain approval from the dean of their school.

The following deadlines apply for completion of a course for which the grade of Incomplete has been awarded:

Deadlines for Completing Incomplete Courses:

- 15-week courses – within 10 weeks of the end of semester-length classes, including summer
- 7-week courses – within 5 weeks of the end of classes for the 7-week term, including summer
- 5-week courses – within 3 weeks of the end of classes for the 5-week term, including summer

The Incomplete must be completed by the date that is determined or it will be converted to an "I/F" grade.

An extension may be requested from the Registrar prior to the original deadline for completing coursework from an Incomplete provided the faculty member submits supporting documentation justifying the extension.

Note for active military students: If the student is active military, and is being deployed, an official letter of deployment must be submitted to the Registrar for the Incomplete. A grade of "IM" will not be awarded if the student has completed less than 50% of the coursework.

Provost and Dean's Lists

The Dean's and the Provost's Lists are calculated one month after the end of each 15-week semester. The Dean's and Provost List are not calculated for the summer term. A student who is ineligible for inclusion at the time the lists are calculated will not be given Dean's or Provost's List status retroactively. For example, a student who completes an Incomplete, i.e., "I" grade, after the list is calculated and raises his or her GPA to 3.60-3.99 will NOT receive Dean's List status. Omissions or errors in calculation on the part of the University of Charleston, however, will be corrected when detected.

Dean's List

Every student who earns a semester Grade Point Average of 3.60-3.99 for a full- time schedule of courses consisting of 12 or more credits is eligible for the Dean's List. These twelve credits may not include more than 3 credits that are Pass/Fail. The Deans of each School will recognize these students.

Provost's List

Every student who earns a semester Grade Point Average of 4.0 for a full- time schedule of courses consisting of 12 or more credits is eligible for the Provost's List. These

twelve credits may not include more than 3 credits that are Pass/Fail. The Provost will recognize these students.

<div align="center">**Policy on Grade Appeal**</div>

The assignment of grades for academic work is an important matter that falls within the professional responsibility of each individual faculty member. Grades are determined in such a way as to reflect as accurately as possible student performance according to criteria available to the student and so as to protect the academic freedom of the faculty member and the student. It is recognized that there is an inherently subjective element to grading, but it does not follow from this that grading is done in an arbitrary fashion. Grades are determined by faculty based on their academic judgment and a disagreement or dissatisfaction with the evaluation of the work is not a basis for a grade appeal. Work turned in after specific deadlines published in the course syllabus or end of the official class term cannot be considered in the grade appeal process. Note: Technical issues beyond a student's control should be reported immediately to faculty member and the Help Desk (**help@ucwv.edu**).

It is possible that a student may dispute a final grade given for a course. When this occurs, the student should follow the procedure outlined below. However, it should be recognized that the faculty member issuing the grade generally has final authority and responsibility for determining that grade. If the student feels that they have grounds for an appeal the responsibility for resolving the dispute is with the instructor of record, the student, the department chair and the dean of the school under which the course falls.

Grounds for a grade appeal of final course grade are:

1. **Error in Calculation or Recording of a Grade**. Your grade was erroneously entered in the gradebook or your final grade was calculated in a method inconsistent with the course syllabus.
2. **Arbitrary Evaluation**: A significant and unwarranted deviation from grading procedures and course outlines set at the beginning of the course (ordinarily during the first week of the course) and included in the syllabus.

Grade appeals are based on **problems of process** and not on differences in judgment or opinion concerning academic performance. Unless it can be clearly shown by the student that the faculty member has assigned a grade in an arbitrary manner, then the faculty member's grade assigned to the student shall stand. The work in question shall not be regraded or assessed by a different instructor, department chair or dean.

At each level of the process the appeal is limited to the evaluation of whether the grade was determined by the criteria spelled out in the course syllabus.

Step 1 – Appeal to the Instructor of Record: Within five business days of when final grades are posted, the student should provide a grade appeal in writing to the faculty member who assigned the grade and attempt to resolve the issue with the instructor. A form letter ("Grade Appeal Policy Letter to Faculty") found on MyUC should be used for this process. The Faculty member should file the "Faculty Member Resolution Form" with the department chair and dean within 5 business days of the meeting with the student. Note: If the faculty member does not respond to the appeal within five business days, the student should contact the department chair.

Step 2 – Appeal to the Department Chair: If no resolution of the grade dispute is achieved after Step 1, the student should provide a grade appeal in writing to the department chairperson of the faculty member within five business days of the decision by the instructor of record. The department chair will examine the information provided by the faculty member and the student to grant or deny the appeal. The department chair also may contact additional witnesses if this is deemed important. Following this process, the department chair will provide a letter of decision to the faculty member, student, and dean. Note: If the department chair does not respond to the appeal within five business days, the student should contact the dean.

Step 3 – Appeal to the Dean: If no resolution is achieved at Step 2, the student should provide a grade appeal in writing to the dean of the faculty member within five business days of the department chairperson's decision. The dean will examine the information provided by the faculty member, the student, and the department chair to grant or deny the appeal. The dean also may contact additional witnesses if this is deemed important. Following this process, the dean will provide a letter of decision to the faculty member, department chair, and student. This step is the final step in the appeal process.

The decision of the Dean is final and not subject to additional appeal by either student or instructor. **The appeals process ends at this step**.

It is expected that a final decision will generally be made within the first six weeks of the following semester. The instructor and the student should resolve grading conflicts regarding individual assignments during a semester.

Course Repeat Rule

A student earning a grade of "D", "I/F" or "F" in a course may repeat the course once to attempt to achieve a higher grade.

The original grade will remain on the student's academic record, but it will not be calculated into the cumulative grade point average (GPA). A course in which the student has earned a grade of "A" may not be repeated. Students are discouraged from repeating a course in which he/she has already earned a "B" or "C" final grade. **The grade earned when the course is repeated is the grade used in determining the student's cumulative GPA and will be used for graduation requirements.** The Registrar in consultation with the student's program coordinator may grant an exception to the "Repeat Rule."

As iterated in the Transient Policy on page 63, courses taken outside of the University of Charleston are not eligible for application to the course repeat rule, as grades for transfer courses are not factored into a student's University of Charleston GPA.

When a lecture course is paired with a lab course as co-requisite courses, a student who fails or drops either the lecture course or the lab course may be required to repeat both courses. Students should consult with their faculty advisor or program director for specific details in regard to the repeat policy for co-requisite courses that applies to their particular degree program.

Pass/Fail Option

Sophomore, junior and senior students who are not on academic probation may elect a maximum of eighteen (18) credits for Pass/Fail grading to apply to electives.

Students may not elect Pass/Fail grading in courses for courses required for the major. No more than five (5) credits per semester may be Pass/Fail. A grade of "P" will not be calculated in determining Grade Point Averages; a grade of "F" will be calculated. Courses in the major or allied field may not be taken on Pass/Fail basis. The student must declare his or her intentions concerning Pass/Fail before the end of the second week of a semester, before the second day of a summer term or prior to the beginning of an online course session by completing the Pass/Fail Request Form available in the Student Solutions Center or on the Student Solutions Center webpage.

Attendance Policy
In-seat

The faculty of the University of Charleston expects students to attend/participate in all sessions of classes for which they have registered.

Moreover, students must normally attend all classes during the first two weeks of the term in order to avoid being dropped from a class for non-attendance.

- Late arrivals to class after the beginning of a term and early departures at the end of a term or for session breaks are also not normally considered excused absences.
- The University does, however, recognize several types of excused absences:
- Illness of a student (if a student cannot attend class because of a mental health issue, the instructor should contact the Director of Counseling);
- Attendance at a University-approved function, e.g., a field trip;
- Representing the University, as a member of a University-sponsored team or music ensemble for competition or performance; and
- Personal or family emergency, e.g., severe illness or death of a family member.

For cases in which it is not clear whether an absence is excused, the Dean of Students will assist in the determination.

It is always the responsibility of the student to inform an instructor as soon as possible if they are unable to attend or participate in instructional activities.

Absences foreseen by a student should be communicated with the instructor as far in advance as possible. It is recommended that students absent from class sessions because of University-approved or sponsored activities notify their instructor at least one week prior to the absence. The Office of the Dean of Students may also contact the instructor on behalf of the student.

If, in the judgment of the instructor, even those absences incurred by reason of university activities are placing satisfactory academic performance in jeopardy, the professor should notify the director, coach, or instructor of the activity.

The following rules also apply to the University's general attendance policy:

- A student's grade may be lowered unless the work missed is made up to the satisfaction of the instructor. Since all absences represent a loss in classroom activity and learning opportunity, no absence (even an excused one) will relieve the student of academic responsibility.

- A student with an excused absence must be permitted to make up a test or other work missed, without any penalty for the absence, within a reasonable time, e.g., within two weeks of the excused absence. For cases in which allowing the student to complete the same work is not practical, the instructor will provide an alternative assignment for the missed work. Individual instructors are permitted to determine the definition of "reasonable time" for making up missed work. If the work is not completed within the established time frame after the student's return, penalties may accrue. (If a student and instructor cannot reach initial agreement about the "reasonable time" allowed for completion of coursework, the student may appeal to the instructor's program director, department chair, or dean. Such appeals must be made within 24 hours of the disagreement becoming apparent. Appeals taking place after a student's failure to meet an established deadline for submitting missed work will not normally be considered.)
- The faculty member shall communicate the attendance policy in each syllabus. The instructor should communicate the policy to each class at the beginning of the semester and explain its application to their particular class.
- Individual programs may have attendance policies with additional specifications, which will be published in the relevant program's student handbook.

Online

It is suggested students access the course several times each week in order to receive assignments, submit assignments, participate in discussions, and receive instructor feedback.

Students are required to attend an online course through active participation in the course within the first week of class to confirm enrollment and attendance. Active participation may be fulfilled by one of the following methods:

- Discussion post
- Completion of an exam or quiz
- Submission of an assignment

If a student fails to engage in at least one of these activities during the first week, they are considered "non-attending." If a student does not attend the course as stated above, the Registrar's Office will be notified and the student will be dropped from the class roster.

REGISTRATION POLICIES

Semester Credit Limitation

An undergraduate student wishing to enroll in more than 18 semester credits* A fee per credit will be charged over 18 credit hours.

A student who wishes to enroll 19-23 credits

- must have the permission of their advisor,
- a cumulative grade point average (GPA) of at least 3.50 and
- must have completed at least 45 semester credits.
- An advisor may approve only 23 hours

Note: A student who fails to meet the GPA and/or credit hour requirements must seek the School Dean and the Provost's approval via a request to be submitted by the student's advisor.

A student who wishes to enroll in more than 23 semester credits
- must have the permission of their advisor,
- a cumulative grade point average (GPA) of at least 3.50 and
- must have completed at least 45 semester credits.
- must petition their School Dean, who will seek the Provost's approval of the request.

*Total credits counted toward the limitation do not include the following courses when delivered in-seat: SPCH 103, MUSC 324 (Concert Choir), MUSC 327 (Band), and MSCI (Military Science).

Registration and Records Holds

The University of Charleston reserves the right to apply holds that will prevent student registration for a future semester and/or prevent the release of official transcripts/diplomas in situations where the student has not fulfilled a particular requirement of the university. These requirements include but are not limited to submitting final/official transcripts from previously attended institutions, having an outstanding student account balance owed to the University, completing student conduct sanctions, and more. Students may view their registration holds and the office which placed the hold through their myUC portal. Students must resolve all registration holds before pre-registration for a future semester may take place. Further, actions resulting in a registration hold after a pre-registration period may result in a student's registration being dropped. Holds preventing the release of official transcripts or diplomas must be resolved before these credentials will be released.

Add/Drop Policy

15-week courses: A student may not **add** a class after 5 p.m. on the 5th instructional day of a fall, spring, or summer semester. A student may **drop** a class prior to the 11th instructional day of the semester without receiving a "W" grade. A student may **drop** a class and receive a "W" grade through Week 10 of the semester. The specific date is listed in the Academic Calendar for each term. Students should be advised that dropping or adding a course may affect the student's financial aid. The form for gaining such approval may be obtained from the Student Solutions Center.

7-week courses: A student may not **add** a class after the 3rd instructional day of a fall, spring, or summer session. A student may **drop** a class prior to the 6th instructional day of the session without receiving a "W" grade. A student may **drop** a class and receive a "W" grade through Week 5 of the term. The specific date is listed in the Academic Calendar for each term. Students should be advised that dropping or adding a course may affect the student's financial aid. The form for gaining such approval may be obtained from the Student Solutions Center.

5-week courses: A student may not **add** a class after 5 p.m. on the 2nd instructional day of a 5-week session. A student may **drop** a class prior to the 7th instructional day of the session without receiving a "W" grade. A student may **drop** a class and receive a "W" grade through Week 3 of the term. The specific date is listed in the Academic Calendar for each term. Students should be advised that dropping or adding a course may affect the

student's financial aid. The form for gaining such approval may be obtained from the Student Solutions Center.

Withdrawal from the University

A student desiring to withdraw from all courses and exit the University of Charleston for at least a year or more should submit a "Complete Withdrawal" form to the Student Solutions Center. The Dean of Students will contact each student to discuss their request. Students may obtain the Complete Withdrawal form from the Student Solutions Center webpage or by emailing **solutions@ucvv.edu**.

A student desiring to withdraw from some or all courses for the current term but NOT exit the University of Charleston should request their academic advisor submit a "Course Drop" form via email to the Student Solutions Center. Students should review the academic calendar to ensure their requests arrive prior to the published "W" grade deadline.

Medical Withdrawal

A student must submit documentation from a medical doctor, physician assistant, nurse practitioner or other qualified health care provider stating that there is a medical reason for withdrawal and that the student is under the care of a health care professional. Documentation is to be submitted to the Dean of Students and should consist of a letter/e-mail from the student formally requesting a withdrawal and a medical diagnosis/treatment plan signed by a qualified health professional on office stationary which explains why the student should be withdrawn from courses on the basis of medical considerations. Medical withdrawal requests are subject to approval by the Provost and the Chief Financial Officer. Requests for a medical withdrawal must be submitted by the last scheduled day of classes for the semester or term in which the student is currently enrolled in classes, as specified in the academic calendar. If the withdrawal is granted the student will receive a "W" on his or her transcript for the courses in question. Withdrawal from the University also may require cancellation, refund or repayment of all or part of the student's financial aid package.

Military service

Men and women called to active duty in the Armed Services of the United States shall be granted a full refund of fees, but no credit, if the call comes before the end of the first three-fourths of the semester or term. Full credit but no refund of fees, shall be granted if the call comes thereafter, provided that credits as described above will be granted only in those courses in which the student is maintaining a passing mark at the time of departure to military service. The term "called to active duty" is herein defined as being called to active duty as a result of the federal activation of a total reserve component, National Guard unit or any portion thereof which involves a particular student or an individual who is a bona fide member of the reserve component or a National Guard unit. The student's final grades, both passing and failing, for three- fourths of a term/semester or more, will be shown on the student's record. Withdrawal from the University may require cancellation, refund or repayment of all or part of the student's financial aid package.

ACADEMIC INTEGRITY POLICY

An academic integrity violation occurs when a student knowingly "cheats" on an exam or assignment in a deliberate attempt to receive credit he/she did not earn. In general, the penalty for a violation is a "F" on the exam or assignment in question. Also, if a student

commits three violations, the student will be subject to immediate expulsion from the University of Charleston and will be ineligible for readmission to the institution.

Note: In the School of Pharmacy and the Master of Mental Health Counseling the penalty for an academic integrity policy violation is failure of the course (F). If a Pharmacy student is found guilty of committing two violations, the student will be subject to immediate expulsion from the University of Charleston School of Pharmacy. If a Master of Mental Health Counseling student is found guilty of committing two violations, the student will be subject to immediate expulsion from the University of Charleston's Master of Mental Health Counseling program. For both the School of Pharmacy and the Master of Mental Health Counseling program, if a student is expelled because of academic integrity violations, they will be ineligible for *readmission to any graduate program.*

For purposes of this policy, academic integrity violations include, but are not limited to, the following:

- Copying another student's answers during an exam
- Using unapproved resources during an exam. For example, notes, cheat sheets, electronic devices such as cell phones, data storage devices, computers, internet, smart watches, headphones or other electronic devices unless expressly permitted by the instructor for the required coursework
- Giving or receiving answers with other students during an exam
- Sharing answers after an exam with students who have yet to take the exam
- Submitting an assignment that you submitted for a grade in another or subsequent course without the permission of the instructor in the your current course
- Having another person take an exam or complete an assignment on your behalf, or doing so for another student
- Impersonating another student in order to take that student's exam or complete an assignment
- Stealing exams or sharing exam questions with other students prior to a exam
- Posting exam questions/answers via email or social media without permission of the instructor
- Buying research papers or any type of assignment and submitting it as your own work
- Copying a classmate's work and submitting it as your own work
- Copying and pasting of intellectual property (such as direct quotes, images, graphs, charts, etc.) from a source without providing proper citation
- Paraphrasing from a source without providing proper citation
- Fabricating or falsifying a citation
- Fabricating or falsifying research results and/or processes
- Completing quizzes/exams from a site other than the classroom without faculty approval to do so
- Engaging in any behavior specifically prohibited by a faculty member in the course syllabus or class discussion
- Providing others with information or answers regarding any assessment (e.g., exams, quizzes, OSCE, cases, etc.)

- Continuing to write after a timed exam or other graded assignment, such as a graded case, has ended

Note: If a violation involves a student who is not enrolled in the course in question that student shall be subject to the procedures and disciplinary measures specified in this policy except that the student will not be given a "F". In such cases the Provost will be responsible for contacting the student and adhering to the procedures outlined below. If found guilty of committing a violation the Provost's Office will record the violation as part of the student's academic record.

It should be noted that the process for investigating and resolving an academic dishonesty allegation -- discussed below – is an academic matter, and not a criminal or civil legal proceeding. Rather, it is a process unique to the community of scholars that comprise a university. It is designed to protect the rights of the students accused of violating integrity standards, to educate students, and to deter further violations. Faculty members are required to present evidence and utilize their professional judgment in determining whether a student has violated the academic integrity policy. The standard to be applied in all cases is the "preponderance of the evidence" standard rather than the "beyond a reasonable doubt" standard.

If an instructor has reason to believe that a student may have committed a violation of the academic integrity policy, the instructor will conduct an investigation to confirm and document the violation. As part of the investigation, the instructor should consult with his/her program director or department chair to ensure the evidence is sufficient to support the allegation. Once the investigation is completed, the instructor must schedule a meeting to discuss the alleged violation with the student within 5 business days. The instructor also should invite his/her program director or department chair to attend the meeting as a witness.

At this meeting, the instructor will present the student with evidence of the alleged violation and review the penalty for the alleged violation. The instructor also will notify the student of his/her right to appeal, review the permissible grounds for submitting an appeal, and discuss the process for submitting an appeal. The instructor will present the student with a completed Academic Integrity Violation Form and request that the student review and sign the document. If the student declines to sign the form the instructor should note this on the form. The instructor also must provide the student with a copy of the signed document.

Once the instructor has met with the student and the Academic Integrity Violation Acknowledgement Form has been signed, the instructor must send a signed copy of the document, a summary of the incident and a copy of supporting evidence to the Provost's Office (provostoffice@ucwv.edu) as a single PDF.

If the student does not submit a written appeal to the Provost's Office within five business days of the date of the meeting with the instructor, the Provost's Office will record the violation as part of the student's academic record. If the violation would result in the expulsion of the student from the University, the Provost also will notify the President.

If the student chooses to appeal, they must submit a written appeal to the Provost's Office within five business days of the date of the meeting with the instructor. The appeal must include: 1) the student's name and UC ID number, 2) a copy of the signed academic integrity violation form, 3) an explanation of the basis for the appeal and 4) a copy of the

evidence in support of the appeal. Student appeals must be based upon evidence which supports one or both of the following claims:

- The evidence provided by the instructor is insufficient to support the alleged violation.
- New evidence can be presented which exonerates the student in regard to the alleged violation.

Upon receipt of the student's appeal, the Provost will review it to ensure that the appeal is based upon one of the permissible grounds for an appeal. If the Provost determines that the appeal is not based upon a permissible claim the Provost will notify the student in writing. The Provost's Office will then notify administrative offices of the violation as appropriate.

Note: If the student's appeal alleges that the instructor's decision was motivated by a non-academic factor (e.g. bias, as prohibited by the University's non-discrimination policy) the Provost will refer the case to the Title VI Compliance Coordinator. No further action will be taken in regard to the appeal until the Title VI Compliance Coordinator certifies, in writing, to the Provost that the student's allegation is unsubstantiated.

If the Provost determines that the appeal is based upon a permissible claim, the Provost will notify the Chair of the Academic Integrity Review Board (AIRB) and provide the Chair with a copy of the materials submitted by the instructor and a copy of the student's appeal. The AIRB is empowered to hear appeals submitted by students enrolled in programs in any of the University's five academic schools: Arts & Science, Business, Health Sciences, Leadership, and Pharmacy. The Provost also will notify the instructor that an appeal has been submitted and that implementation of the penalty should be deferred pending the outcome of the appeal.

Upon receipt of the Provost's notification, the AIRB Chair will schedule a meeting of the AIRB within ten business days to consider the appeal. Due to scheduled University breaks, there may be times when it may not be possible for the AIRB to adhere to this requirement. In such cases, the AIRB will make a good faith effort to adhere as closely as possible to the schedule specified above. This principle also applies to student appeals that are received after the end of an academic semester. For a graduating senior who submits an appeal, they may walk at graduation if all other academic requirements have been met, but they will not receive a diploma until the appeal has been decided by the AIRB. During the appeal process, the student should continue to attend class until a decision is rendered.

The AIRB will review the documentation provided by both the student and the instructor to determine whether the student's appeal should be granted. At the AIRB's discretion, it may solicit additional information about the incident from the instructor, student or other individuals. The AIRB's decision is final and is not subject to further appeal by either the student or the instructor.

The AIRB secretary will produce a written record of the meeting. The record will include a clear and concise explanation of the considerations upon which the AIRB's decision was based. Once a decision has been reached, the AIRB Chair will notify the student, the instructor and the Provost's Office, in writing, within five business days of the date of the decision.

If the appeal is granted, no further action is required by either the student or the instructor and the Provost's Office shall not record the alleged violation as part of the

student's academic record. If the appeal is denied the instructor's original decision will stand and the Provost's Office will record the violation as part of the student's academic record. If the violation would result in the expulsion of the student from the University, the Provost also will notify the President.

Note: The term "academic dishonesty" is defined as plagiarism; cheating, dishonest practices in connection with examinations, papers, and/or projects, forgery, misrepresentation, or fraud as it relates to academic or educational matters. Examples of academic dishonesty are provided below. This is not meant to be an exhaustive list, but instead to provide examples of dishonest acts that apply under this policy.

1. "Plagiarism": Representing the words, research findings or ideas of another person as your own in any academic exercise [At their discretion, faculty may submit student work to plagiarism–detection software, such as Turnitin for review without prior notice to students.] Includes, but is not limited to:
   - Using phrases from another source embedded into original material without proper citation (quilting and patchworking words and phrases)
   - Copying of intellectual property (such as images, graphs, charts, etc.) without proper citation
   - The use, by paraphrase or direct quote, of the work of another person without full and clear acknowledgement

2. "Cheating and dishonest practices in connection with examinations, papers, and/or projects" includes, but is not limited to:
   - Copying answers from or looking at another student's exam or quiz
   - Allowing another person to copy one's own work for a graded assignment
   - Overtly or intentionally cutting and pasting or manually copying another's intellectual property without proper citation
   - False insertion of citation
   - Accessing or possessing any material not permitted during an exam or quiz. For example, notes, cheat sheets, electronic devices such as cell phones, data storage devices, computers, internet, smart watches, headphones or other electronic devices unless expressly permitted by the instructor for the required coursework
   - Having another person take an exam or complete an assignment for oneself.
   - Taking an exam or completing an assignment for another student
   - Continuing to write after a timed exam or other graded assignment, such as a graded case, has ended
   - Possession of a test or test questions prior to when exam, quiz, or any other assignment is due for submission
   - Submission of the same term paper, presentation or other work for more than one assignment, where no prior approval has been given (self-plagiarism)
   - Completing quizzes/exams from a site other than the classroom
   - Engaging in any behavior specifically prohibited by a faculty member in the course syllabus or class discussion.
   - Providing others with information or answers regarding any assessment (e.g., exams, quizzes, OSCE, cases, etc.)

3. "Forgery, misrepresentation, or fraud as it relates to academic or educational matters" includes, but is not limited to:
- wrongfully altering, or causing to be altered, any records
- Receiving or providing papers/tests/projects for the purpose of cheating
- Submission of term papers/tests/projects completed by others (purchased or otherwise)
- use of University documents or instruments of identification with the intent to defraud (e.g. transcripts)
- presenting false data or information or intentionally misrepresenting records
- Furnishing or claiming the results of research projects or experiments for the inclusion in another's work without permission and proper citation
- furnishing false statements in any University academic proceeding
- providing false or misleading information to gain an academic advantage

ARTIFICIAL INTELLIGENCE POLICY

Generative Artificial Intelligence (AI) Use in the Classroom

Generative Artificial Intelligence (GAI) is not only an exciting tool that can help when used properly but also produces challenges in the classroom. In this document, you will find definitions and examples for Artificial Intelligence (AI) and Generative Artificial Intelligence (GAI), how they relate to academic work, and an idea to demonstrate how GAI can be used in the classroom for student work. The document provides two syllabus policy templates that UC professors can employ in their courses (subject to adjustments).

What is artificial intelligence and what is generative artificial intelligence?

Artificial Intelligence (AI):

Artificial Intelligence is the reproduction of human intelligence by computers or machines and may include the mechanism for learning, reasoning, and self-correction. AI systems will process data based on rules or algorithms. Maps and Navigation, facial recognition, and text editors would be examples of AI.

Generative Artificial Intelligence (GAI):

Generative Artificial Intelligence is an advanced form of AI and focuses on the ability to create original content freely. GAI can create new content such as images, text, music, art, etc. with limited input from a person. It can use techniques like neural network (machine learning program that makes decisions like a human brain) to replicate patterns in data. This process allows GAI to produce creative outputs. Developing a client brief or care plan, creating a poster or image, or chatbots are examples of Generative Artificial Intelligence.

How should we think about Generative AI as it relates to academic work?

Most citation styles, including APA and Chicago, suggest we think about and cite generative AI as *personal communication*. It is like talking to a friend (note: who may or may not be accurate). In the absence of a clear policy on the use of generative AI, a student should treat it like receiving assistance from another person. *It is always best to consult with the professor if there is ambiguity*, but the question is this: is the student allowed to consult with another person for this type of help?

- If yes, then using generative AI is also permitted.

- If not, then using generative AI is a form of academic dishonesty in violation of UC's Academic Integrity Policy.
- Because generative AI can be used in so many ways in academic work, instructors are encouraged to be explicit about how and when it may be used on assignments in their courses. For information on citing AI, please see **UC Lib Guide on AI**

Artificial Intelligence is becoming quite prevalent in our daily lives and can be found everywhere, from smartphones to the applications we utilize to write out assignments. It is because of this that students often have questions regarding the use of AI when completing coursework. The best thing to do is first read the syllabus, then ask the professor, and then consult the appropriate manual of style for each class. The Chicago Manual, for instance, considers ChatGTP to be more like personal communication, while the APA manual does not and requires you to place the resource in the reference list. It is also prudent to ask a librarian for assistance (**librarian@ucwv.ed**) when attempting to integrate AI into your work for the first time.

If a syllabus is unclear regarding the appropriate use of AI and a student cannot contact a professor or a librarian, they should treat all material produced by AI like they would any other document, interview, etc. First, they should ask themselves if the material is potentially inaccurate using the **CRAAP test**. Then, if they deem the item worthy, they should cite the material as they would anything else, using the appropriate manual or manual website for guidance. Just like we do not copy and paste or even paraphrase material from articles, interviews, and books without a citation and quotation marks when required, we should never copy and paste material from AI tools without taking the same steps. Secondly, just as we may not ask our friend to do an assignment for us and turn it in as our own work, we may not ask AI to complete an assignment or part of an assignment for us and then turn that assignment in as our own work.

Because of its broad applications, professors are encouraged to provide specific guidance in the syllabus regarding appropriate use of AI for each course.

Academic Probation and Academic Dismissal Policy

An undergraduate student with a cumulative Grade Point Average (GPA) of 2.0 or higher is considered to be in "Good Academic Standing" with the University of Charleston. When a student does not obtain a cumulative GPA of 2.0 or higher they are subject to the University's policy on Academic Probation and Dismissal.

Level I Probation – A student who obtains a cumulative GPA of less than 2.0 in a given semester:
• May not enroll in more than 16 credits in the following semester;
• Must meet with his/her major advisor every other week

Level II Probation – A student who obtains a cumulative GPA of less than 2.0 for a second consecutive semester:
• May not enroll in more than 13 credits in the following semester;
• Must meet with his/her major advisor each week

Level III Probation – A student who obtains a cumulative GPA of less than 2.0 for a third consecutive semester:
• May not enroll in more than 13 credits in the following semester;
• May not register online for classes in the following semester;

• Must meet with his/her major advisor each week

Students on academic probation should consult with their faculty advisor, the financial aid office and, as appropriate, their athletic coach to discuss the consequences this may have for their ability to progress through their academic program and their eligibility for financial aid and athletics.

Dismissal: A student who does not obtain a cumulative GPA of 2.0 or more upon the completion of their Level III probationary semester. A student needing more than 13 hours to obtain a cumulative GPA of 2.0 upon the conclusion of his/her Level II probationary semester. Students who have been academically dismissed may be readmitted to the University after one year from the date of the dismissal by submitting a request, in writing, to the Registrar. If a student does not obtain a cumulative GPA of 2.0 or more upon the completion of his/her first semester after being readmitted the student will be subject to permanent dismissal from the University of Charleston.

GRADUATION POLICIES

Graduation Application

All students must submit a Graduation Application to receive a degree from the University of Charleston. Graduation Applications are due no later than Friday of Week 6 during the graduation semester. Students must schedule a meeting with their academic advisor to ensure their graduation plan is feasible. Students are encouraged to review the Commencement Participation section prior to finalizing a graduation plan. If the academic advisor agrees all is in order, they will complete and submit a graduation application to solutions@ucwv.edu. To be processed the graduation application must include a program evaluation signed by the student and academic advisor.

If a student applies for graduation but does not fulfill all degree requirements during that semester, they should contact Student Solutions to cancel their graduation application. Students who cancel their graduation application will have to reapply for graduation in the future term in which they will meet their degree requirements. Students will be charged the $200 graduation fee only one time.

Commencement Participation

The University of Charleston offers students the opportunity to attend a Fall (for August and December graduates) or Spring (for April/May graduates) commencement ceremony. Regardless of a student's intention of attending their commencement ceremony, a graduation application is required for degree conferral. Students must apply for graduation during the term in which their final courses will be completed.

- Fall Graduation Application Deadline – Friday of Week 6/Sept
- Spring Graduation Application Deadline – Friday of Week 6/Feb
- Summer Graduation Application Deadline - Friday of Week 6/June

Graduation with Honors

Undergraduate Students: To graduate with honors an undergraduate student must complete a minimum of 50% of the total credits required for an associate or bachelor's degree while in residence at the University of Charleston with a cumulative, institutional G.P.A. of 3.50 or better. Hence, to be considered for honors, a bachelor's degree-seeking student must complete a minimum of 60 credit hours at UC; an associate degree-seeking student must complete a minimum of 30 credit hours in residence.

Undergraduate students who are permitted to apply 60 or more transfer credits toward a bachelor's degree or 30 or more transfer credits toward an associate degree are eligible to graduate with Academic Distinction if they maintain a cumulative, institutional G.P.A. of 3.9 or better while in residence at the University of Charleston.

NOTE: Academic Distinction is based upon all work completed at the University. Final grades must be officially entered for the course to be considered completed. Academic Distinction will be denoted on a student's diploma and official transcript.

Graduate Students in the School of Business and School of Leadership: For a graduate student to graduate with honors from a master's or doctoral program the student must complete a minimum of 70% of the total credits required for the degree while in residence at the University of Charleston with a cumulative, institutional G.P.A. of 3.75 or better.

NOTE: Honors are based on all work completed at the University. Final grades must be officially entered for the course to be considered completed. Students who apply to graduate in August will NOT be recognized for honors in the May commencement ceremony. Honors will be denoted on the diploma and official transcript.

EDUCATIONAL RECORD

Ms Nicole Rupe-Harold, Registrar

Educational Records
FERPA

The University of Charleston is committed to maintaining the confidentiality of student records and abides by the Family Educational Rights and Privacy Act (FERPA). The law ensures the confidentiality of student records, permits the student access to his or her records and prohibits the release of records except by permission of the student or by a court order, while permitting the continued release of "directory information" without specific permission of the student. Information determined to be part of a student's educational record may be released according to the guidelines in this policy. Any other anecdotal information will not be released without the student's express written consent and/or personal involvement.

Educational Records

The University of Charleston designates the official records maintained in the following locations as educational records:

Record	Custodian
Registrar's Office	Registrar
Student Solutions Center Cashier	Cashier – Student Solutions Center
Office of Student Life	Dean of Students
Office of Financial Aid	Director of Financial Aid
Academic Success Center	Director, Academic Success Center

Disclosure of Educational Records

In most cases, the University of Charleston will not disclose information from a student's educational records without the written consent of the student. Normally, disclosure of educational records will occur only when the student or other eligible person makes an express request for such disclosure. Requests for information should be made in writing unless being made by an on-site University of Charleston official. Requests made via phone call will be considered in cases of extreme time sensitivity and with thorough confirmation that the request is being made by an appropriate party. The exceptions in which a student's educational records may be disclosed without consent include:

Requests from University of Charleston officials who have a legitimate educational interest in the records;

Officials of another school in which a student seeks or intends to enroll; Requests from certain government officials;

Appropriate parties in a health or safety emergency; and

Requests from parents of an eligible student who is claimed as a dependent for income tax purposes. The University will assume students are independent until a written request is made and proof of dependency is shown.

A student must complete the "FERPA Disclosure of Student" form and provide the University with a 4-digit PIN number and family names to allow them to speak about grades or financial information concerning the student. Otherwise, grades are posted electronically only.

The University of Charleston will maintain a record of all requests for and/or disclosures of information from a student's educational records, except for disclosure to University officials. The student may review this disclosure record in the Student Solutions Center.

The University of Charleston will not initiate disclosure of student records except in cases of health or safety emergencies, serious crimes or to complete financial obligations to the University.

Directory Information

The University of Charleston designates the following items as Directory Information:

- Student name, address, and telephone number;
- E-mail address;
- Date and place of birth;
- Major field of study;
- Participation in officially recognized activities;
- Height and weight of athletic teams;
- Dates of attendance;
- Degrees and awards received;
- Most recent school attended; and
- Other similar information.

The University may disclose any of these items without prior written consent of the student unless the student has completed and filed in the Student Solutions Center a

"Request to Prevent Disclosure of Directory Information" form. This form must be completed annually.

<p align="center">**Procedure to Inspect Educational Records**</p>

Students may inspect and review personal educational records by submitting a written request to the custodian of the records or other appropriate University employee, stating as precisely as possible the record or records they wish to inspect. The records custodian or an appropriate University employee will make the needed arrangements for access as promptly as possible and notify the student of the time and place where the records may be inspected. Access must be given in five (5) working days or less from the date of receipt of the request. When a record contains information about more than one student, the student may inspect and review only the records relating to him or her. The fee for copies will be 50 cents per page and must be paid at the time copies are made.

The student has the right to inspect his or her educational records at least once per year. Transcripts may be reviewed by appointment in the Student Solutions Center.

<p align="center">**Correction of Educational Records**</p>

Students have the right to ask that records they believe are inaccurate, misleading or in violation of privacy rights be corrected. To initiate the process for the correction of records a student must submit a written petition to the custodian of the educational record asking that it be amended. The petition should identify the part of the record to be amended, the reasons why the student believes it is inaccurate or misleading, and the action requested.

POLICY ON SMOKING AND TOBACCO USE

The University maintains a smoke and tobacco-free environment in all of its buildings/facilities on campus and in all of its vehicles. No smoking or other use of tobacco products (including, but not limited to, pipes, cigars, snuff, e-cigarettes, vaporizers, or chewing tobacco) is permitted in any part of any building/facility or in vehicles owned, leased, or rented by the University.

Employees and students may smoke on campus only in the designated smoking areas. No one may smoke along any pathway or walkway leading to or from the designated smoking area, the campus lawn or the parking areas. Additionally, employees and students may smoke in their personal vehicles, but the smoke and tobacco products must be completely contained within the vehicle. It is not acceptable that both smoking or non-smoking employees and students are subjected to smoke that they must walk through to reach their vehicle or any other destination on campus.

While the University makes the designated areas available to smokers, it in no way has any legal responsibility to do so. Employees and students who choose to use these smoking areas do so at their own risk. No special release time will be given to any employee or student who smokes. Finally, smokers and users of tobacco products must dispose of the remains in the proper containers. This helps to keep a neat and clean environment for all employees, students and visitors.

Enforcement

This policy applies to all employees, vendors, visitors, and students. Employees, students, or visitors violating this policy shall be subject to discipline in accordance with the progressive disciplinary policy in the Employee Handbook. Students violating this policy shall be subject to discipline in accordance with the disciplinary and social justice policies contained in the *UC Student Handbook*. Vendors or visitors violating the policy shall be notified of the policy and asked politely to refrain from smoking outside of the designated smoking areas.

Smoking Cessation Opportunities

The University encourages all smoking employees and students to quit smoking. The University's Pharmacy School can provide information to anyone who would like to quit smoking.

Questions

Any questions regarding the smoke-free workplace policy should be directed to the Administration & Finance Office (304) 357-4736.

TECHNOLOGY SUPPORT SERVICES

Mr. Scott Terry, Chief Information Officer

Technology Support Services Mission Statement

The mission of the Information Technology Department is to provide a secure and stable technology infrastructure to support teaching, service, and student life for the purpose of educating each student for a life of productive work, enlightened living and community involvement while providing technology support to all academic and administrative functions at the University of Charleston.

Help Desk

The University of Charleston Help Desk serves as the single point of contact between students, faculty and staff and the Information Technology Department. The Help Desk staff will assist you with your questions, requests and suggestions or route them to the appropriate area for resolution and provide status of your report. You must be a member of the University of Charleston community in order to take advantage of Help Desk services. Note that the Help Desk support for personally-owned devices (including mobile) is limited to email client setup and network connection.

Audiovisual Services

Audiovisual Services supports the learning process by assisting students, faculty and the public with the equipment and expertise necessary for making presentations or developing multi-media projects. The department also provides services to external groups holding meetings on University of Charleston campuses. AV will need a 48-hour notice to be able to provide the services needed for requests.

For assistance by:

Telephone: Call 1-304-357-HELP (4357) or 1-855-248-3416

Email:　　　　Contact help@ucwv.edu

In person:　　　　Visit the Help Desk - location:

Clay Tower Building, 2nd Floor, Schoenbaum Library

The Help Desk is open five days per week when classes are in session. It is closed during University holidays and for other official University closures such as emergencies and severe weather.

Help Desk Hours – Classes in Session:

Monday – Friday, 7:00 AM to 8:00 PM

Help Desk Hours – Classes Not in Session:

Monday - Friday, 7:00 AM to 6:00 PM

For computer issues outside the Help Desk hours, please use the online ticket system or send an email to help@ucwv.edu. You will receive a response to your question as soon as possible when the Help Desk reopens.

Contact the Help Desk if you:

- Are having trouble with any of your accounts
- Need access to files or printers
- Cannot connect to the network or something on your computer isn't working properly
- Would like to know about options for sharing files, email, or calendars
- Need to purchase software or equipment
- Need service or advice about your personal computer or safe computing practices
- Think you have a virus or other computer problem
- Want to report a problem or place a request concerning a campus telephone
- Having a computer problem in a campus lab or classroom
- Have questions about software licensing or availability
- Have a computing need and don't know who to ask or where to begin

Need Additional Information

- Classroom technology support
- Campus telephones and voicemail support
- eLearn [Moodlerooms] support
- Report problems with streaming video service

Password Resets

Password Resets are available during all hours of Help Desk operation for College passwords. Any community member can also reset his or her own password at http://my.ucwv.edu, by clinking the *Change Password* link.

CENTER FOR CAREER DEVELOPMENT (CCD)

Ms. Jessica Wagner, Director

Center for Career Development Mission Statement

The mission of the Center for Career Development is to prepare students for career attainment, career advancement, and community involvement while effectively meeting the challenges of today's workplace as enlightened citizens.

About the Center for Career Development

The Center for Career Development (CCD) assists undergraduates, graduates and alumni to achieve their professional goals through assessment, self-awareness, career coaching, and educational events that encourage lifelong professional preparation and career readiness. The CCD uses the eight essential career competencies established by the National Association of Colleges and Employers as guideposts when designing programs and resources.

NACE Career Competencies
- Career and Self-Development
- Critical Thinking
- Equity and Inclusion
- Leadership
- Professionalism
- Teamwork
- Technology

Services and Resources

The CCD provides an array of services and resources to 1) address the professional preparation areas described above, and 2) assist students in locating and obtaining employment opportunities. While many classes integrate CCD activities into the curricula, it is highly encouraged for students to make individual appointments with the CCD in their freshman year to begin developing personalized career plans. CCD services include the following:

Individual Career Coaching – By appointment or during walk-in hours, the CCD provides assistance with choosing a major, making career choices, devising a job search plan, resume development, interviewing, and applying to graduate school.

Career Seminars & Workshops – A variety of seminars and workshops are offered to students throughout the year. Topics include resume and cover letter development, interview skills, job search strategies, professional networking, and applying to graduate school. The CCD also holds workshops on leadership, etiquette, and communication.

What Can I Do With This Major? – WCIDWTM? is an interactive database of 90 academic majors and the careers associated with each. You can learn more about WCIDWTM here: https://drive.google.com/file/d/1FZ8EHo3216Ekjm0hDJfiz8IrI-3Ttc2Z/view

CareerOneStop: CareerOneStop is a free online resource from the US Department of Labor with self-assessments and career exploration tools. CareerOneStop can be accessed at careeronestop.org.

Resume Center – The Resume Center houses guides and instructional videos on building resumes and cover letters. The Resume Center can be found on the Center for Career Development website.

Handshake – Employers regularly post full-time, part-time, and internship opportunities via the CCD online job board, Handshake. All students and alumni have access to Handshake. Handshake is also used for event registration and the distribution of surveys relating to CCD areas of interest. Handshake can be found at ucwv.joinhandshake.com.

Quinncia – Quinncia is an artificial intelligence (AI) software system that provides resume reviews and realistic mock interviews for students. It can be used as a self-service resource by students or a classroom resource by faculty. Quinncia allows students to receive immediate feedback on resumes and interview skills if they are unable to wait for an individual coaching appointment with CCD staff for any reason.

Career Fairs – The CCD organizes career fairs for all majors in the fall and spring. Students can learn about different employers and obtain information on full-time, part-time, temporary, and internship opportunities.

Graduate School and Study Abroad Fair – For students seeking graduate programs and study abroad opportunities, the CCD conducts a graduate school and study abroad fair in the fall. Representatives from several graduate schools throughout the region attend, as well as providers of study abroad experiences.

Career Development Week – Each March, the CCD hosts a week-long series of career workshops and seminars presented by business professionals from the Charleston area and beyond. Topics include networking, business etiquette, interviewing, resume writing and maintaining a professional online presence.

Etiquette Dinner – Students are nominated by faculty members to attend this formal dinner and etiquette workshop. Local employers and alumni are invited to network with students.

Employer Presentations – Information sessions are provided by HR professionals so that students have opportunities to learn about the companies and their job opportunities. The CCD also works with instructors to organize company presentations in the classroom.

Alumni Assistance – Alumni are encouraged to use the CCD for employment assistance, accessing professional development resources, or posting job opportunities for their organizations at no cost.

Graduate Studies – The CCD provides information and resources on graduate education at UC and beyond.

Internships

UC encourages all students to complete an internship before they graduate, and some programs require internship hours (see the individual program requirements for more information). The CCD can provide guidance to students on locating internships and ensuring that internships comply with program requirements if using the internship for academic credit. Academic credit is granted at the rate of 1 credit hour per minimum of 40 hours worked. Individual academic programs may require students to work more than 40 hours to obtain one academic credit hour. The grade for the internship will be determined by the supervising faculty member. Some instructors utilize a pass/fail system while others use letter grades.

When doing internships for academic credit, students must complete the Internship Learning Agreement on Handshake with the supervising faculty member, the CCD, and their employer. The Learning Agreement connects job duties to academic outcomes to validate academic credit. At the conclusion of the internship, the employer must complete the SkillSurvey evaluation, which will be sent by the CCD.

Study Abroad Programs

Students who wish to participate in study abroad programs must register with the CCD. The CCD can provide resources on destinations and programs through an approved list of third- party providers. Students should consult with their academic advisor and the financial aid office before making a final decision on which study abroad program to pursue. Scholarships and financial aid applied to UC classes may not be applicable to study abroad programs. The transfer of study abroad credit to UC must be approved by the academic advisor and University Registrar before the student departs for the program.

Commitment to Students and Community

The CCD is committed to providing students with the best resources available to enhance professional preparation and career readiness. The CCD staff works with faculty members, alumni, employers, and community leaders to generate high quality opportunities for students. In turn, the CCD is committed to making the greater Charleston community a more vibrant and prosperous area by enabling students to become involved with local employers and organizations.

ACADEMIC SUCCESS CENTER

Mr. Christopher Ferguson, Director

Academic Success Center Mission Statement

The mission of the Academic Success Center is to help students connect with academic resources as well as disability and testing services to become successful productive citizens who work toward a lifetime of enlightened living and worthwhile community involvement.

ACADEMIC TUTORING

Peer Tutoring

All UC students have access to our Peer Tutoring program. Distance learning and Beckley students have access to a peer tutor via virtual sessions, in addition to submitting writing assignments for review. There is no fee for peer tutoring.

Discipline-specific Tutoring: Peer tutoring is available in a variety of subjects including math, sciences, business, English, nursing, and radiology using the **Brain Fuse Tutor Match** link.

Writing Tutoring: For students who need tutoring specifically in writing, peer tutors are available to help generate, organize, and develop ideas for papers. Peer Tutors can also explain punctuation and grammar and assist students with proofreading, document secondary sources, and address a host of other writing-related issues. Our goal is to provide quality assistance, tools, and resources to help students become confident, independent writers. Writing Peer Tutors can be scheduled using the **Brain Fuse Tutor Match** link.

Online Tutoring - Live, On-Demand (Brain Fuse)

Students can submit a paragraph or essay for review/critique by a Brain Fuse online tutor using access to the online tutoring portal (Brain Fuse) via myUC under the Student Resources tab or in e-Learn.

Distance learning and Beckley students can work one-on-one, in real-time with a peer tutor in any available discipline-specific subject via whiteboard technology. Sessions can be scheduled using our tutor scheduling link (https://www.registerblast.com/ucwv- asc/Resource/list) . Distance learning and Beckley students can also use Brian Fuse, the online tutoring platform. Students and faculty can access the online tutoring portal (Brain Fuse) via myUC under the Student Resources tab and e-Learn.

*All tutoring sessions must be scheduled <u>at least</u> 48-hours in advance. Students will receive a 24-hour confirmation for tutoring appointments. Subjects and scheduling for peer tutoring vary by time, according to students' needs and the availability of qualified tutors. Use the following link to schedule peer tutoring appointments: https://www.registerblast.com/ucwv- asc/Resource/list .

STANDARDIZED TESTING SERVICES

The University of Charleston offers a variety of standardized tests for UC students in Charleston. Tests offered include:

CLEP* (computer-based exams that allow students to prove mastery of college-level material in introductory subjects and earn college credit)

CLEP exams can now be taken with remote proctoring with the same timing, content, format, and on-screen experience as the test you would take in the UC testing center.

DSST* (computer-based exams that allow students to prove mastery of college-level material in introductory subjects and earn college credit)

DANTES funding for service members is available for these exams

For more information about standardized testing see the ASC's Standardized Testing Services webpage.

SERVICES FOR STUDENTS WITH DISABILITIES

The University of Charleston is committed to achieving equal opportunity for participation in all programs, services and activities. The Disability Services Coordinator works in collaboration with a variety of University offices (Housing, Dining Services, and the Department of Information and Instructional Technology) to ensure that individuals receive reasonable accommodations for documented disabilities in compliance with provisions in the Americans with Disabilities Act and the Section 504 of the Rehabilitation Act.

Individuals requesting/requiring accommodations for documented disabilities are encouraged to contact the Academic Success Center

The University of Charleston pledges to abide by the following policies mandating accessibility in physical and digital environments.

Americans with Disabilities Act (1990) and Americans with Disabilities Act Amendments Act (2008).

Prohibits discrimination against individuals with a disability.

Applies to everyone: faculty, staff, employees, student employees, students, and applicants.

Requires reasonable accommodations be provided to ensure access to classes, events, and related curricular activities.

Section 508 - Technology Access

All electronic and information technology must be accessible to people with disabilities.

Students with disabilities must be able to access the computer hardware and software, web pages, and the Internet, CD/DVDs, video/audio teleconferencing, etc.

Section 504 of the Rehabilitation Act

Civil rights legislation that is applicable to all universities that receive federal funding. It states: "No otherwise qualified individual with a disability in the United States…shall, solely by reason of her or his disability, be excluded from the participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance…"

ACCOMMODATIONS FOR INDIVIDUALS WITH DISABILITIES

The following information and a step-by-step procedure for students applying for accommodations can be found on the Academic Success Center website at Services for Students with Disabilities.

What are Accommodations?

Accommodations are adaptations and changes made to elements of a student's postsecondary program that help to compensate for the student's impairment(s) and provide equal access to students with disabilities. Here are the basics:

- Any student with a documented disability may be eligible to receive accommodations & services from the Academic Success Center.

- The purpose of accommodations and modifications is to reduce or eliminate any disadvantages that may exist because of an individual's disability.

- Accommodations are not a guarantee for success, but rather seek to promote non-discrimination and equal access opportunities.

- Accommodations are not student preferences; they are determined through an established review process based on documentation received regarding the student's disability.

- The law does not require institutions to waive specific courses or academic requirements considered essential to a particular program or degree. Rather, they are mandated to modify existing requirements on a case-by-case basis in order to ensure that individuals are not discriminated against on the basis of their disability.

- In order to access accommodations, students must disclose their disability to the Academic Success Center and state their requested accommodations.

Expectations and Key Participant Roles in Accommodation Process

It is important for the student, the faculty member, and the disability coordinator to be clear about their roles in the accommodation process. The roles of each participant in this process are as follows:

Student Role

Provide medical and/or psychological documentation to the disability coordinator

Participate in process of determining and implementing reasonable accommodations

Inform the disability coordinator when accommodations are not working, need to be modified, or symptoms change

Faculty Role

Referral to the Academic Success Center

Participate in the process to determine and implement reasonable accommodations

Identify essential course components for accommodations to be determined

Request assistance (From the disability coordinator) with accommodation, implementation, or consultation

Disability Coordinator Role

Maintain medical/psychological documentation in a confidential manner

Determine if condition(s) are a disability in accordance with state and federal laws

Identify and assist with implementation of reasonable accommodations

Request updated documentation when symptoms change to determine if accommodations need to be modified

Provide information and referral to university and community resources to resolve disability-related issues

*Adapted from the Association on Higher Education and Disability

The University, recognizing that disclosure of a disability is a personal and private decision, relies on individuals with the disability to self-identify; the University makes no preadmission inquiries about disabilities. All documentation is held in the strictest confidence and is not shared with other University offices without the consent of the student.

SERVICE ANIMAL POLICY

The University of Charleston recognizes that service animals perform a necessary service in assisting and accompanying you. We understand that your service animal is a working animal and will make every effort to educate the university community about the animal's service to you and provide the accommodations afforded a service animal.

The University of Charleston expects the partner/handler to be responsible for ensuring the safety of his/her service animal. While legal access rights are afforded users of assistance animals, the partner/handler has the responsibility of ensuring that the animal always behaves and responds appropriately in public. The animal and the partner/handler, as a team, must adhere to the same socially accepted standards as any individual in the university community.

Definitions:

Animal in training: an animal undergoing training to become a service animal. An animal in training has the same rights as a fully trained animal when accompanied by a trainer and identified as such.

Partner/Handler: a person with a service or therapy animal. A person with a disability is called a partner; a person without a disability is called a handler.

Service Animal: any animal individually trained to do work or perform tasks for the benefit of a person with a disability.

Team: a person with a disability or a handler and his/her service animal. The two work together as a team in accomplishing the tasks of everyday living.

Therapy Animal: an animal that does not assist an individual with a disability in the activities of daily living. These animals are not protected by the laws for service animals.

Types of Service Animals:

Guide Animal: an animal carefully trained to serve as a travel tool by individuals who have severe visual impairments.

Hearing Animal: an animal trained to alert a person with a significant hearing loss when a sound, e.g., knock on the door, occurs.

Service Animal: an animal trained to assist a person who has a mobility or health impairment. Types of duties the animal may perform include carrying, fetching, opening doors, ringing doorbells, activating elevator buttons, steadying a person while walking, helping a person up after the person falls, etc. Service animals can sometimes be called assistance animals.

SSIG (Sensory Signal) Animal: an animal trained to assist a person with autism. The animal alerts the partner to distracting, repetitive movements common among those with autism, allowing the person to stop the movement (e.g., hand flapping). A person with autism may have problems with sensory input and need the same support services from an animal that an animal might give to a person with visual or hearing impairments.

Seizure Disorder Animal: an animal trained to assist a person with a seizure disorder. The methods the animal uses to serve the person may vary, depending on the person's needs. The animal may stand guard over the person during a seizure, or the animal may go for help. A few animals have somehow learned to predict a seizure and warn the person in advance.

An *Emotional Support Animal* is an animal prescribed for an individual with a significant diagnosed psychiatric disability. An ESA is not a pet, a Service Animal, or a therapy animal.

A student seeking an accommodation must provide appropriate documentation of the disability for the Disability & Accessibility Services Coordinator to evaluate the student's request. The documentation must describe the disabling condition, which is defined by the presence of a substantial limitation in one or more major life activities. To be eligible for an ESA as an accommodation in Student Housing at the University of Charleston, a student must verify the following:

a disabling psychiatric condition;

animal is necessary to afford a student with this disability an equal opportunity to use and enjoy the dwelling (University of Charleston Student Housing); and

an identifiable nexus between the disability and the assistance the animal provides.

Long-Term versus Short-Term Use

Students desiring to use a service animal on campus should first contact the Disability Coordinator to register as a student in need of an accommodation. The Disability Coordinator will evaluate the documentation of the student's condition, determine if a disability exists, and discuss with the individual any accommodations appropriate to the functional limitations of the disability.

Documentation and Requirements

Documentation: The handler/partner requesting accommodations for a service animal must provide documentation from an appropriate, licensed professional of his/her need for the service animal. The partner/handler of the service animal must provide proof, which will be kept on file in the Academic Success Center, that the animal has met the following requirements:

Licensing: The animal must meet City of Charleston licensing requirements and wear the tags designated by the City of Charleston if the animal resides on the University of Charleston campus. If, however, the service animal accompanies a commuter student and resides in a different locale, the animal must meet the licensing requirements of the student's resident town and wear the tags designated by that community.

Health Records: The animal must have a health statement, including vaccinations against diseases common to that type of animal, from a licensed veterinarian dated within the past year. Annual updates must be provided. The animal must be well groomed, and measures should be taken at all times for flea and odor control. Consideration of others must be taken into account when providing maintenance and hygiene of service animals.

Control Requirements

The service animal must be on a leash or other restraining device at all times. Also, the service animal must wear a collar or harness identifying it as a service animal.

The partner/handler must be in full control of the service animal at all times. The care and supervision of the service animal is solely the responsibility of its partner/handler.

Service Animal Etiquette

The service animal must adhere to the following rules at all times:

Not be allowed to sniff people, store shelves, eating tables, or personal belongings of others;

Not initiate contact with someone without the direct permission of the partner/handler;

Not display any behaviors or noises that are disruptive to others, such as barking, whining, growling, etc.

Not block aisles or passageways; and

Be trained to not be attracted to food in common areas.

Students/staff/faculty/administration must adhere to the following rules at all times:

Not to pet a service animal that is working. Service animals are trained to be protective of partners/handlers, and petting the service animal distracts the animal from its responsibilities;

Not feed a working service animal. The animal may have specific dietary requirements. Unusual food and/or an unexpected time may cause the animal to become ill;

Not deliberately startle, tease, or taunt a service animal;

Not separate or attempt to separate a service animal from its partner/handler;

Not hesitate to ask a student if he/she would like assistance if the team seems confused about a direction, an entrance, location, etc.; and

Not give a service animal alcoholic beverages or illegal narcotics on or off-campus. To do so will result in disciplinary action through the Office of Student Life.

Conflicting Disabilities

Some people may have a disability that is precipitated by an allergic reaction to animals. Persons with asthma/allergy/medical issues who object to the presence of the

animal must register their objections with the Disability Coordinator. The person making the objection must provide verifiable medical documentation to support his/her claim(s). Action will be taken to consider the needs of both persons to resolve the conflict as efficiently as possible.

Residence Halls

The guidelines for conflicting disabilities apply in the residence halls also. If there is an allergy/animal conflict within a residence hall that cannot be resolved agreeably, the Director of Residence Life, the Dean of Students, and the Disability Coordinator will collaborate on a solution.

DISABILITY GRIEVANCE POLICY AND PROCEDURES

Although students are fully encouraged to solve disputes at the lowest possible level and to use internal procedures, a student may choose to initiate a formal grievance at any time.

The U.S. Department of Education, Office of Civil Rights (OCR), encourages individuals first to use internal grievance procedures, and when such procedures meet OCR's investigative standards, OCR will generally defer to the results reached if the process provided for fair consideration of the grievance.

Informal Resolution Procedure

Clear communication between students, faculty/staff, and University of Charleston Disability and Accessibility Services is vital to utilizing services effectively. Where possible, students are encouraged to first address concerns and problems with the individuals most directly involved in the situation: The Disability and Accessibility Services Coordinator regarding eligibility for accommodations and specific accommodations; the individual faculty or staff member in the cases of implementation or lack of approved accommodations.

Students are encouraged to express any concerns to the Disability and Accessibility Services Coordinator.

Students who are having trouble in receiving authorized accommodations by a faculty or staff member, department, or program should first address their concerns with the faculty or staff member charged with providing the accommodation.

The Disability and Accessibility Services Coordinator is available to offer assistance by discussing and exploring options with the student and/or faculty or staff member, contacting the concerned party in an effort to clarify issues, facilitating a meeting with the concerned parties, and/or advocating for the student's right to receive appropriate and effective accommodations to the extent required under either the Rehabilitation Act or the ADA.

The West Virginia ADA Coordinator is available for consultation regarding any questions or concern a student may have about one's accommodations (Kim Nuckles, 304-558-4331, Kim.P.Nuckes@wv.gov)

A student who is not satisfied with the resolution on this level may choose to file a formal complaint.

Formal Grievance Procedure

The student may submit a formal written grievance to the Provost and Dean of Students. When making a formal complaint, a student should include specific information about the concern or problem (describe the issue(s), incident(s) and the action(s) taken; state the name of the individual(s) or office(s) involved; and show documented efforts to resolve the complaint). Either the Provost of Dean of Students will meet with the student to discuss the complaint and will conduct any necessary investigation.

The Provost/Dean of Students will issue a written decision including findings and remedial actions, if any, to be taken by the University of Charleston and/or the student. This decision shall be issued to the student and any others deemed appropriate within fifteen (15) calendar days of the receipt of the complaint. Files and records on all formal grievances shall be maintained by the Provost/Dean of Students.

Appeal Procedure

If a student is not satisfied with the formal grievance procedure, the student may appeal to the President for *de novo* review of the Provost/Dean of Students. The appeal must be made in writing within five (5) calendar days of the decision. The determination of the President on any such appeal is final.

If the grievance is not resolved internally at the University, the student may choose to file a complaint with the Office of Civil Rights, U.S. Department of Education (100 Penn Square East, Suite 515, Philadelphia, PA 19107; Tel: (215) 656-8541; Fax: (215) 656-8605; OCR.Philadelphia@ed.gov.

INTERNATIONAL PROGRAM

Ms. Violetta Petrosyan, Director of International Students

International Program Mission Statement

The mission of the Department of International Programs seeks to engage and support international students, provide opportunities for all University of Charleston students to have multicultural experiences, and promote the exchange of educational and cultural ideas.

About the International Program

The International Program, which is described further in the section of this *Academic Catalog* "Office of Student Life," offers additional assistance to international students whose first language is not English by offering one course of English language integrated skills and tutoring sessions. The course offered for students whose first language is not English is described in the Undergraduate Course Listings in the section titled English as a Second Language (ENSL).

Based on documentation submitted to the Admissions Office and a diagnostic exam (in cases of a borderline proficiency score) given jointly by the Director of International Programs, students may be placed in the ENSL 096 Advanced English course at the University of Charleston. No extra fees for these courses will be assessed.

ENSL 096 – Advanced English with a grade of pass or fail unless the student was not required to take this course based on a diagnostic evaluation by the ESL Program Director.

If the student fails the ENSL 096 course, they will be required to retake the course. Students may retake the ENSL course only once. If a student does not successfully complete the ENSL course, the student will not be able to continue enrollment at the University of Charleston. Passing the ENSL course includes attendance as well as adequate performance.

All curricular programs established and implemented by the Office of International Students fosters an environment of belonging as it relates to diversity, equity, inclusion, and social justice preparing the students for the life of productive work, enlightened living, and community involvement.

SCHOENBAUM LIBRARY

Mr. John Adkins, Director of Library Services

Schoenbaum Library Mission Statement

The Schoenbaum Library fosters the development of the research, critical thinking, and information literacy skills necessary for students to excel as productive, enlightened, and involved citizens.

About the Schoenbaum Library

The ability to efficiently locate and critically evaluate information is an indispensable skill for the 21st century student. University of Charleston library faculty work closely with classroom faculty to ensure that students acquire the information and technology skills they will need to live, work, and participate in an information-based society.

The Schoenbaum Library is a state-of-the-art facility equipped with wireless networking, a library instruction classroom, and group-study rooms equipped with whiteboards, network ports, and video players.

Student learning is supported by an array of books, journals, and databases. The library has a strong collection of print and electronic resources. The collections include approximately 80,000 books and over 300,000 e-books. Over 45,000 journal titles are available either in print or electronically and are accessible from any web-enabled computer, on or off our campuses. All resources are available to students in Charleston, our Beckley campus, or to online students either electronically or through document delivery services.

The library also boasts several archival and rare book collections, as well as an outstanding collection of art and sculpture by regional, national, and international artists.

A skilled, professional reference staff is available to students during regular library hours in person, by chat, via the e-mail below, or by calling 304-357-4780. Students can also submit reference questions via e-mail to librarian@ucwv.edu at any time.

OFFICE OF STUDENT LIFE

Ms. Virginia Moore, Vice President & Dean of Students

Office of Student Life Mission Statement

The mission of the Office of Student Life is to support all students through co-curricular activities designed to promote individual and professional growth, social responsibility, and leadership development for a life of productive work, enlightened living, and community involvement.

About the Office of Student Life

The Office of Student Life begins this support by planning and implementing all Orientation programs to the university. New Student Orientation (both in-seat and online) is a vital part of the student's first-year experience. Students learn about the campus, support services, resources, and the curriculum.

Activities are scheduled to help students begin to make friends and feel at home in their new environment. The first day of New Student Orientation is also the first day of classes for first year students.

RESIDENCE LIFE AND HOUSING

Mr. A. Ryan White, Assistant Dean of Students

Residence hall living is an integral part of the student's collegiate experience. Living on campus provides many advantages to students such as-

- proximity to classes, activities,
- the development of lifelong friendships, and
- forming invaluable relationships with other students, mentors, and staff.

Housing Application

All students are required to reside on campus unless they meet one of the exemption requirements below. As part of the housing application process, a student must sign a Housing Contract, which is an agreement for the entire academic year for their housing assignment and meal plan. Applications for housing and meal plans are available in the UC Student Portal found under the Housing and Meal Plan link. Housing applications are only visible to students who are registered for classes in the term they will be living on campus.

All students are required to live on campus unless they meet one of the following requirements:

- Completed more than 60 credit hours;
- Their permanent home address is within a 50-mile radius of the University, and they are living with their parent or guardian;
- They are married;
- Age 21 or older by the second week of classes in the fall;
- A parent/guardian caring for a dependent child.

*All student athletes are required to live on campus unless they are approved by the Vice President & Athletic Director.

If a student meets one of the qualifying exemptions, they must complete an on- campus housing exemption form in the Housing Portal.

A housing application is used to match students with similar interests in the housing assignment process. Reciprocal roommate requests are honored when possible if applications with such requests are mutual. New students make housing assignments for themselves after immunization records, housing deposits, and health insurance information is received in the Office of Residence Life.

Housing Cancellation/Withdrawal

If the application for room assignment is accepted, but the student decides not to live in the residence hall, the student must complete the Housing Cancelation Form found in the Housing Portal.

Vacations

The residence halls are open throughout the academic year (including Thanksgiving and Spring Breaks) and closed during Winter Break. When a student leaves for the summer months, all personal property must be removed from the room.

Meal Plans

All residential students housed in Brotherton Hall, Middle Hall, or Ratrie Hall must purchase a University Meal Plan. Although the residence halls are open for Thanksgiving and Spring Breaks, dining services may be closed, and students should make alternative plans for dining.

STUDENT CONDUCT

Students admitted to the University of Charleston must subscribe to the mission and core values of the University. Expectations for student conduct are set forth in the Student Handbook and other official documents, including this Academic Catalog. **It is the student's responsibility to study the** Student Handbook **and this *Academic Catalog* carefully and to become thoroughly acquainted with both the student regulations and the principles and practices regarding student honesty in academic affairs.** This publication also contains information on other student services, including motor vehicle privileges, and student identification cards.

COUNSELING SERVICES

Mr. Rance Berry, Director of Counseling & Outreach Services

The University of Charleston has a licensed professional counselor on staff to work with our student population. Counseling and outreach services at UC are free for all UC students and do not have a cap on the number of sessions students are allowed to have each semester or year. UC understands that now more than ever, students may need someone to speak to, to listen to them, or give them guidance on how they are feeling about something specific or in general. UC Counseling services are trained to assist students with depression, anxiety, stress, trauma, substance abuse, adjusting to college life, and guidance counseling as well as referrals to off campus services if needed. Counseling Service can be reached by scheduling an appointment at the **UC Counseling Appointment Link** or emailing uc-counselor@ucwv.edu.

Ms. Virginia Moore, Title IX Compliance Coordinator

Policy Prohibiting Title IX Sexual Harassment

Policy Statement

The University of Charleston is committed to creating and maintaining a learning and work environment that is free from discrimination based on sex.

This **Title IX Sexual Harassment Policy** (the "Policy") prohibits sex-based discrimination, including sex-based harassment, in all operations of the University. The Policy is intended to meet the University's obligations under Title IX of the Education Amendments of 1972 ("Title IX"); the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act ("Clery Act"), as amended by the Violence Against Women Reauthorization Act of 2013 ("VAWA"), with respect to its application to sex-based misconduct; and other applicable law and regulations.

The University is committed to the principles of academic freedom and freedom of expression and the Policy should be interpreted, and will be applied, consistent with both of these principles.

The Policy also prohibits retaliation against an individual: (1) who makes a report or files a Formal Complaint of Title IX Sexual Harassment; (2) about whom a report is made or against whom a Formal Complaint is filed; (3) who participates in the reporting, investigation, or adjudication of possible violations of this Policy; or (4) who engages in good faith opposition to what another individual reasonably believes to be Title IX Sexual Harassment under this Policy.

The University's Title IX Compliance Coordinator is responsible for administering the Policy and related procedures. Any inquiries about the Policy or procedures should be referred to the University's Title IX Compliance Coordinator, Virginia Moore, who may be contacted as follows:

Office of Student Life
Geary Student Union Office 310
Charleston, WV 25304

virginiamoore@ucwv.edu or titleix@ucwv.edu

SEXUAL AWARENESS AND VIOLENCE EDUCATION

Ms. Erin Dunmore, SAVE Project Director

The Sexual Awareness and Violence Education (SAVE) program offers resources, prevention education, and training to reduce domestic violence, dating violence, sexual assault, and stalking on campus. Bystander training is also provided to the UC community each year. Bringing in the Bystander is an evidence-based prevention workshop that explores concepts such as victim blaming, rape culture, and consent. Participants learn the importance of speaking out against social norms that support a culture of sexual violence and can identify potential risks in a variety of situations that could lead to sexual violence.

For more information, resources, or referrals contact **save@ucwv.edu**.

Ms. Violetta Petrosyan, Director of International Students

The International Program is committed to promoting the exchange of educational and cultural ideas both at the University of Charleston and the greater Charleston community. Through the development and offering of programs and services for students and faculty, the department supports the process of internationalizing the campus.

New international students are supported by the Director of International Students, who assists them as they adapt to an American campus as well as a new culture.

Additionally, an orientation is provided to international students prior to the fall and spring semesters.

All students on campus are welcome to join the Global Student Organization (GSO), which aims to create and promote multicultural experiences on campus and throughout the community. Annual campus-wide international activities include International Education Week in the fall and World Fest in the spring. For more information or questions about international and/or ESL programs at the University, please contact the Director of International Students and ESL Programs at (304) 357- 4881.

STUDENT INVOLVEMENT AT UC

Mr. Grant Brinson, Director of Student Engagement and Recreation

The University of Charleston offers students many different opportunities to become involved on campus whether it be in a fraternity or sorority, campus club or organization, student activities, student government, or intramural sports. There is something for everyone. Students who are involved on campus find that it can help alleviate stress and make college a more enjoyable experience. Becoming involved can also help create a sense of belonging, friendships, and help students adjust to college life.

STUDENT GOVERNMENT ASSOCIATION (SGA)

Ms. Virginia Moore, SGA Advisor

Each student at the University of Charleston registered for twelve (12) or more credits is encouraged to become active in the Student Government Association, which provides an opportunity for involvement with campus issues and concerns. The SGA expresses student opinions, disseminates information to the student body, provides student leadership and represents the student body at various functions, offering students effective channels of communication throughout the University.

STUDENT ACTIVITIES BOARD (SAB)

Mr. Grant Brinson, Advisor

The Student Activities Board (SAB) works with the Director of Student Involvement and Student Life & International Coordinator to provide programs of an educational, cultural, and social nature, such as: comedy events, novelty artists, special UC traditional events, and educational events to meet the needs and interests of the student population. Students are encouraged to take an active role in the planning, programming, and participation in these activities. The SAB offers both residential and commuter students an

assortment of quality programs that enhance the social and academic aspects of a student's experience.

<div align="center">

GREEK LIFE

</div>

<div align="center">

Mr. Grant Brinson, Advisor

</div>

Greek life at the University of Charleston contributes to the unique experience of student development through the virtues of scholarship, leadership, community service, development of lifelong friendships, and the ideals of each Greek organization. The University of Charleston has 1national fraternity Kappa Delta Rho and 1 local fraternity Delta Alpha Lambda, and two local sororities: Theta Kappa Pi and Beta Tau Epsilon. Greek organizations hold recruitment (rush) during the fall and spring semesters, giving students the opportunity to meet with the Greek organizations and learn more about Greek life and its benefits. Being a Greek promises an active role in campus life and encourages development in leadership roles and teamwork.

<div align="center">

STUDENT ORGANIZATIONS

</div>

The University of Charleston has many diverse and interesting student organizations registered with the Office of Student Life. Current organizations are listed below.

Students may also form a new organization by following a simple process, which can be found on the website or in the Office of Student Life.

INTRAMURALS AND CLUB SPORTS

Mr. Grant Brinson, Director of Student Engagement and Recreation

The intramural and club sports program as well as the outdoor recreation center provides all students, faculty, and staff opportunities to participate in their favorite sports and activities while at the University of Charleston. Activities for men, women, and coed teams are offered, which include basketball, broomball, flag football, powder puff football, softball, soccer, volleyball, dodgeball, club soccer, along with many other challenging events. The outdoor recreation center, The Boathouse, offers paddleboarding, kayaking, fishing, table tennis, tegball, bicycling, and many other outdoor activities.

UC BANDS PROGRAM

Ms. Josie Fisher, Band Director and Dance Team Advisor

The UC Band and Dance Program offers performance opportunities for any UC student with a passion for music and dance. UC Bands includes both athletic and concert bands. The River City Youth Ballet is proud to provide the dance instruction for the University of Charleston Dance Team. Membership for the band and dance team is open to any UC student through a low-stress, interactive audition process. Students can earn academic credit and scholarship money of up to $5000, based on your skill level, participation, and residency status. Instruments, materials, and uniforms are provided at no cost to the students. Through the UC Band and Dance Team, you develop a strong work ethic, lasting friendships, and foster your love of performing while representing the University of Charleston.

ATHLETICS AND RECREATION

Dr. Bren Stevens, Vice President and Director of Athletics

Athletics Mission Statement

The mission of the University of Charleston's Athletics Department is to develop successful, well-rounded student-athletes who complete their undergraduate education and lead lives of productive work, enlightened living, and community involvement.

About Athletics and Recreation

Teams and individuals at the University of Charleston have enjoyed notable successes in athletics, winning conference and regional championships while advancing to the NCAA national tournament in various sports. During the past few years, a plethora of sports programs have advanced to post-season play in the NCAA national tournament in the sports of soccer, football, basketball, baseball, volleyball, tennis, golf, cross country and track, and softball. The university's men's soccer team won the first-ever National Championship in any sport at the University of Charleston in 2017. They followed up with another National Championship in the fall of 2019.

University teams utilize the best athletic facilities available, on and off campus. These include the University of Charleston Stadium (football and track), Welch Athletic Complex (soccer, baseball, lacrosse), Watt Powell Annex (softball), and outstanding public and private facilities used for tennis and golf. Additionally, the Russell and Martha Wehrle Innovation Center is the home for men's and women's volleyball and basketball.

Division II of the National Collegiate Athletic Association (NCAA) and the Mountain East Conference (MEC) govern intercollegiate athletics at the University of Charleston. Membership of the Mountain East Conference includes the following institutions: U.C., WV State, Concord, Glenville, West Liberty, Wesleyan, Wheeling, Frostburg State, Fairmont, Point Park, and Davis & Elkins College. The Golden Eagles won the prestigious "Commissioner's Cup" in 2013, 2015, 2017, 2018, 2019, 2020, 2021, 2002, and 2023. The Mountain East Conference is a part of the Atlantic Region, which is comprised of approximately 42 colleges and universities. Additionally, the men's volleyball program competes at the NCAA Division I level and is a prominent member of the EIVA (Eastern Intercollegiate Volleyball Association).

Men's Intercollegiate Athletics

Male student-athletes compete in ten intercollegiate sports: baseball, basketball, cross country, football, golf, indoor track, soccer, outdoor track and field, tennis, and volleyball. Scholarships are available in all ten sports and are awarded at the discretion of each head coach.

Women's Intercollegiate Athletics

Female student-athletes compete in ten intercollegiate sports at the University of Charleston: basketball, cross country, golf, indoor track, lacrosse, soccer, softball, tennis, outdoor track and field, and volleyball. Scholarships are available in all ten sports and are awarded at the head coach's discretion.

Cheerleading

The University of Charleston recruits talented individuals for its coed cheerleading squad. Interested students should contact the Head Cheer Coach for more information. Scholarships are available and awarded at the head coach's discretion.

Intramural Athletics

The intramural and club sports program provides all students, faculty, and staff opportunities to participate in their favorite sports and activities at the University of Charleston. Activities for men, women, and coed teams include basketball, broomball, flag football, powder puff football, softball, soccer, volleyball, dodgeball, club soccer, and many other challenging events.

Recreation

The Morrison Fitness Center has state-of-the-art cardio machines, workout rooms, free weights, and a wide variety of Cybex strength equipment, including selectorized and plate-loaded pieces. Special classes such as Zumba, Yoga, and other fitness opportunities are scheduled regularly by the Fitness Center Director. Additional recreation facilities include an auxiliary gymnasium, one handball/racquetball court, and a boathouse. The boathouse was renovated in the summer of 2021, giving students access to outdoor sporting equipment such as bicycles, paddleboards, fishing poles, and cornhole boards. In the fall of 2022, an outdoor space for basketball, pickleball, and beach volleyball was opened to provide additional recreational areas. Facilities are open to students, faculty, and staff with a validated University I.D. card.

FIRST-YEAR PROGRAM (UNIV)

Professor Debbie Bannister, Program Director

First-Year Program Mission Statement

The mission of the First -Year Program is to introduce university resources and curriculum which seeks to educate students for productive work, enlightened living, and community involvement.

Freshman Student Advisors (FSAs), Mentors and Major Advisors

Upon enrollment, all new students are assigned to a Freshman Student Advisor (FSA) who will schedule and advise the student throughout their transition to the university. Incoming first-year students are also paired with a faculty mentor, who will also be their UNIV 104/105 instructor. The Mentor serves the student as an informed guide, as an advocate, and as a role model. Incoming students are also assigned a major advisor who provides advice on appropriate coursework or other issues associated with a particular academic discipline or major field of study. The major advisor will change if a student changes his or her major. If the student has not declared a major, the major advisor will be the Discovery Program Director.

First-Year Program Outcomes

1. Develop Faculty/Student interactions that contribute to a positive UC experience.
2. Build positive peer relationships that lead to a positive UC experience.
3. Develop study skills and habits that lead to a successful academic experience.
4. Engage in experiences that promote enlightened living and community involvement.
5. Promote academic and co-curricular experiences that lead to student success and personal development of all first-year students.

UNIVERSITY COURSES

The **UNIV 104 College Motivation & Success** course is designed to foster a meaningful, professional relationship between the student and his/her faculty mentor. During the semester, the student will work to discover the importance of assuming responsibility for his/her role in the educational process; receive focused guidance on curricular and professional choices that will enhance personal and professional development; and identify and learn to access University resources and support structures designed to enhance academic and professional success.

The **UNIV 105 Foundations of Character & Leadership** course is designed to foster a meaningful, professional relationship between the student and his/her faculty mentor. During the semester, the student will work to discover the importance of assuming responsibility for his/her role in the educational process; receive focused guidance on curricular and professional choices that will enhance personal and professional development; and develop skills necessary for team building, leadership, and enlightened living.

Successful completion of speech opportunities in UNIV 104 and UNIV 105 will enable students to complete Oral Communications (SPCH 103) as an embedded course.

The **UNIV 204 College Success & Leadership** course is designed to foster a meaningful, professional relationship between the student and his/her faculty mentor. During the semester the student will work to discover the importance of assuming responsibility for his/her role in the educational process; receive focused guidance on curricular and professional choices that will enhance personal and professional development; identify and learn to access University resources and support structures designed to enhance academic and professional success and develop skills necessary for team building, leadership and enlightened living.

A TYPICAL FIRST-YEAR SCHEDULE

The first year's strong introduction to the liberal arts is accompanied by introductory coursework in the academic discipline or major field. The specific classes will vary from major to major, but a typical schedule will look like the one below.

Typical First Year Schedule			
Fall Semester	**Credit**	**Spring Semester**	**Credit**
General Education Course(s)	3 - 9	General Education Course(s)	3 - 6
ENGL 101	3	ENGL 102	3
UNIV 104	3	UNIV 105	3
Course in Major	3	SPCH 103 (Embedded)	3
		Course in Major	3
Total:	**15 to 18**	**Total:**	**15 to 18**

UNIVERSITY OF CHARLESTON HONORS COLLEGE

Dr. Kara Fisher and Professor Hallie Chillag, Program Directors

Honors College Mission Statement

The mission of the University of Charleston Honors College is to create a community of curious and engaged scholars to develop qualities of professional leadership, personal integrity, and respect for diverse communities.

About the Honors College

The University of Charleston Honors College is a community of high-achieving and intellectually curious students who enter the university with evidence of exemplary high school and/or collegiate achievement. The Honors College is open to students from all majors. Graduates will be uniquely prepared for work in graduate education and professional environments. Students will receive support to pursue passionate interests academically, professionally, and/or recreationally. The program employs classical and experiential learning modalities distinctive to Honors.

Incoming freshmen and transfer students who meet the entrance criteria are invited to apply. A second-semester freshman or transfer student with evidence of exemplary first-semester work may petition the program directors for admission into the program.

Program Vision and Values

The Honors College aspires to employ imaginative models of academic excellence and community engagement. Further, the Honors program aims to develop a community of scholars who excel academically and embody ethical, influential, and transformative leadership, personal integrity, and respect for diverse communities. The University of Charleston Honors College pursues lasting and positive impact on the lives of its students and the broader world.

Leadership: preparing students with the skills and opportunities to demonstrate evidence informed practice, empathy, and cooperation.

Integrity: guiding students to value and utilize ethical principles in their academic disciplines, their professions, and their personal lives.

Innovation: encouraging students to trailblaze solutions and consider new pathways in their processes and academic pursuits.

Diversity: fostering an environment for acceptance, respect, and celebration of differing ideas and characteristics among individuals, groups, and communities.

Criteria for Acceptance:

For first-time freshmen, most eligible students applying for admission to the Honors College will complete a personal interview and meet one or more of the following benchmarks:

- High School GPA (weighted or unweighted)
- 26 ACT or 1230 Redesigned SAT
- Demonstrated exceptional community activism or engagement.

It is also possible to join the Honors College after a successful first semester at the University of Charleston. Enrolled UC students may apply for admission to the Honors

College Directors and show successful completion of 15 or more credits with a cumulative GPA. Transfer students may also be eligible for admission to the Honors College by demonstrating successful completion of 15 or more credits with a 3.5 cumulative GPA earned at a previous institution.

<div align="center">

Honors College Program Learning Outcomes:
</div>

- Demonstrate intellectual curiosity utilizing arguments that critically analyze information from a variety of sources and diverse perspectives.
- Apply values of ethical leadership, interdisciplinary engagement, and respect for diversity.
- Contribute and collaborate as informed members of local and global communities.

<div align="center">

Program Requirements:
</div>

Honors Education Certificate

The co-curricular nature of the Honors College Certificate communicates to employers and graduate and professional schools that the graduate is uniquely prepared. The certificate holder can demonstrate academic excellence, specialized skill development, and the completion of enhanced learning and recreational opportunities. Students will be prepared for future goals, engaged in networking and community building, and committed to personal growth and challenges.

Certificate Requirements - 10 Academic Credits and 6 Co-Curricular Experiences:

- Honors First Year Seminar, HNRS 101/HNRS 102 – (6 credits)
- Interdisciplinary Colloquium Courses, HNRS 2XX or HNRS 3XX – (2 credits)
- Honors Capstone Seminar, HNRS 400 – (2 credits)
- Co-Curricular Experiences – 6 (Portfolio Required)

Suggested Plan of Discovery	
Year One	
Honors First Year Seminar	HNRS 101/102 (6 credits)
Co-Curricular Experiences	2
Year Two	
Interdisciplinary Colloquium	1 recommended (1 credit)
Co-Curricular Experiences	2
Year Three and Four	
Interdisciplinary Colloquium	1 recommended (1 credit)
Co-Curricular Experiences	2
Honors Capstone Seminar	HNRS 400 (2 credits)

Dr. Jeannie Dalporto, Program Director

General Studies Major Mission Statement

The mission of the General Studies Major is to prepare graduates for gainful employment within their area of concentration and to be ethical, tolerant, and informed community citizens.

Program Description

The General Studies Major is designed for students who have either completed an extensive number of college-level courses at other institutions that do not fit logically into existing University of Charleston academic majors, or students who want to combine content from existing University of Charleston majors to meet his/her personal educational goals.

The student must make an appointment with the General Studies Program Director to discuss his or her educational goal(s) and determine the student's area of concentration (contact the Student Solutions center for Program Director contact information).

The General Studies Program Director and the student, in consultation, may select an appropriate Advising Team, including a primary advisor and one or two other faculty.

This Advising Team will help the student develop a coherent program of study designed to meet the agreed upon outcomes, and a plan for demonstrating the Institutional Learning Outcomes.

Students pursuing this degree option must:

- Have, or must complete, a minimum of 120 credit hours
- Amass a total of 30 upper-division credit hours
- Keep a cumulative University of Charleston grade point average of 2.0
- Declare an area of concentration (27 hours) in consultation with his/her advisor based on the courses the student has taken and his/her goals
- Complete all the General Education Requirements
- Successfully complete the General Studies Capstone course.

The area of concentration chosen will determine whether the Bachelor of Arts (BA) or Bachelor of Science (BS) degree in General Studies is awarded.

General Studies Program Learning Outcomes

The graduate will:

1. Communicate effectively in oral, written and media formats appropriate for the content and audience.
2. Demonstrate intellectual inquiry, information literacy, and critical, analytical and reflective thinking skills appropriate for the content and audience.
3. Express in writing a thorough and sophisticated understanding of their ethical beliefs and the ethical beliefs of others; the ability to identify ethical conflicts; and the ability to make ethical decisions within given scenarios.

Professor Hallie Chillag, Program Director

Multidisciplinary Studies Mission Statement

The graduate of the multidisciplinary studies program is prepared for a dynamic world by examining the interconnections inherent in human populations as well as the natural and built planet. Students are required to think deeply, value diversity, and employ a variety of perspectives in their address of a globalized world. Multidisciplinary studies students are especially positioned to take on the changing and emerging nature of information across many disciplines.

Program Description

Often, students possess a broad range of interests that do not fit into a "traditional" major. Further, many professions and graduate and/or professional programs demand interdisciplinary thinking. The MTDS is designed so that the graduate can synthesize and apply skills and knowledge from multiple disciplines to address complex issues encountered in society, career, and personal life. The area of concentration chosen will determine whether the Bachelor of Arts (BA) or Bachelor of Science (BS) degree in General Studies is awarded.

Multidisciplinary Program Learning Outcomes

The Graduate will:

1. Evaluate phenomena from at least three major study areas using concepts and theories.

2. Incorporate interdisciplinary thinking to address real world problems.

What You Will Study

The MTDS degree program consists of three academic minors from various disciplines, plus an MTDS Capstone course. A variety of predetermined, recommended combinations of specific minors are available to the student. However, the student can make their own choice of minors with the guidance of the MTDS program advisor.

Examples:

Political Science / History / Professional Writing

Entrepreneurship / Business / Professional Writing

Entrepreneurship / Business / Digital Media Design

Psychology / Criminal Justice / Political Science

Psychology / Communication / History

Students pursuing this degree option must:

Complete a minimum of 120 credit hours

Amass a total of 30 upper-division credit hours, 15 of which must be earned during the senior year;

Keep a cumulative grade point average of 2.0

Declare an area of concentration based on the courses completed.

Demonstrate achievement of exit-level standard for at least one academic minor

Successfully complete the General Studies Capstone course.

MORRIS HARVEY SCHOOL OF ARTS & SCIENCES

Dr. Tracy Bradley, Dean

The School of Arts and Sciences provides a solid Liberal Arts education for all students, in addition to major courses of studies in the traditional disciplines. Our mission is to provide a high-quality liberal, scientific, and pre-professional education -- engaging students and faculty in an active search for learning – and to prepare our graduates for a lifetime of productive work, enlightened living and community involvement.

The School of Arts & Sciences is comprised of four Departments:

DEPARTMENT OF COMPUTER SCIENCE, DATA ANALYTICS AND MATHEMATICS

DEPARTMENT OF HUMANITIES

DEPARTMENT OF NATURAL SCIENCES

DEPARTMENT OF SOCIAL SCIENCES

The School offers programs leading to the Bachelor of Arts or Bachelor of Science degree. Requirements for these degrees can be found in the program descriptions that follow.

MATHEMATICS

Dr. Vincent Smith, Program Chair

The University of Charleston School of Arts & Sciences offers a Bachelor of Science degree in Applied Computer Science with a choice of the following majors:

- Cybersecurity
- Information Technology
- Technology Applications
- Video Game Development

All majors under the Applied Computer Science degree program will complete a common core of 15 courses and 4 labs (50 credits) that provide students with a foundation of knowledge in all functional areas of computer science. Beyond the computer science core, students gain knowledge, skills, and abilities from specialized coursework for their majors. This program is designed to give students a common core of knowledge along with the ability to choose a major that meets their unique educational goals.

The degree program in Applied Computer Science equips individuals with a comprehensive understanding of technology skills, ethical principles, and analytical thinking to tackle the complexities of today's computer science landscape. By offering professional preparation and instilling a commitment to ongoing education, this program fosters the development of graduates who are well-equipped for successful careers in their chosen fields and are motivated to serve their communities.

Applied Computer Science Core Learning Outcomes

The graduate will:

1. Apply knowledge of programming and computer networks to identify bugs or security threats and define the resources and/or requirements needed for their solution.
2. Design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs.
3. Employ current techniques, skills, and tools necessary for computing practice, and recognize the need for continuing professional development.
4. Identify professional, ethical, legal, and security issues and responsibilities, and the impact of computing on individuals, organizations, and society.

Applied Computer Science Core Program of Study

Students whose majors fall under Applied Computer Science are required to complete the following core requirements plus the additional requirements for their specific major:

Applied Computer Science – Core Requirements for all Majors		
COSC 110	Computer Science I	3 credits
COSC 110L	Computer Science I Lab	1 credit
COSC 120	Computer Science II	3 credits
COSC 120L	Computer Science II Lab	1 credit
COSC 245	Internet of Things	3 credits
COSC 250	Comp Architecture & Organization	3 credits
COSC 280	Data Structures	3 credits
COSC 315	Database Systems	3 credits
COSC 330	Embedded Systems	3 credits
COSC 340	Operating Systems	3 credits
COSC 345	Computer Networks	3 credits
COSC 355	Mobile Computing	3 credits
COSC 360	Web App Development	3 credits
COSC 390	CS Workshop 1	2 credits
COSC 440	Internship	4 credits
COSC 450	Capstone	3 credits
MATH 240	Probability and Statistics	3 credits
CYBR 250	Cloud Computing	3 credits
Total Credits for Core:		**50**

Admission Requirements

Students must gain general admission to the University of Charleston.

Additional Requirements

To register for a course, students must meet all prerequisite requirements for that course or obtain instructor approval.

To graduate, students must earn a C or better in all courses required for the major.

Applied Computer Science students must meet all University of Charleston graduation requirements.

While a Mac may be used in some courses, Applied Computer Science students are required to have a modern Windows computer capable of running the required programs. Students in the video game development major may require a low-end modern gaming laptop (minimum) to complete some assignments.

CYBERSECURITY MAJOR

Bachelor of Science
Dr. Vincent Smith, Program Chair

Cybersecurity Major Mission Statement

Our mission is to prepare students with skills in cybersecurity solutions that enable individuals and organizations to work productively and efficiently in a secure environment. Our mission is achieved using cutting-edge technology and industry best practices to deliver reliable and effective cybersecurity services that meet client needs; we seek to empower individuals with the knowledge and skills they need to protect themselves and their communities from cyber threats.

Program Description

Our cybersecurity program is designed to provide students with comprehensive and effective solutions to protect individuals, businesses, and organizations from cyber threats in addition to the core computer science coursework. Students learn a wide variety of topics such as risk assessments, vulnerability testing, incident response planning, and security training. Our program emphasizes a proactive approach to cybersecurity, focusing on prevention as well as response. The program prepares students to implement robust security measures, including firewalls, intrusion detection systems, and encryption, to reduce the risk of cyber-attacks.

The Cybersecurity major is offered as an in-seat residential program on the Charleston campus*. Students complete a 50-credit computer science core and further* coursework in cybersecurity. All CYBR classes will be taken in the online format. Students have the opportunity to double major in Information Technology, Video Game Development, Technology Applications, or Data Analytics.

Cybersecurity Learning Outcomes

In addition to the Applied Computer Science core learning outcomes, the graduate will:

1. Detect, assess, remediate, and communicate ongoing cybersecurity threats and vulnerabilities.

Cybersecurity Major Courses

In addition to the Applied Computer Science core courses, students must complete the following courses:

Cybersecurity Major Courses		
COSC 310	Software Engineering	3 credits
COSC 430	Cryptology	3 credits
CYBR 100	Intro to Computers (A+ Certification)	3 credits
CYBR 110	Intro to Networking (NET + Certification)	3 credits
CYBR 120	Intro to Security (Security+ Certification)	3 credits
CYBR 320	Ethical Hacking & Countermeasures	3 credits
CYBR 330	Incident Handler	3 credits

Cybersecurity Major Courses		
CYBR 340	Security Analysis	3 credits
MATH 201	Calculus I	4 credits
MATH 225	Discrete Mathematics	3 credits
	Credits for Cybersecurity:	**31+ 50 (Core) = 81**

Total Credit hours: 120

*Students may be required to complete some courses in online or hybrid formats.

**A low-math path is available for students who are entering below the pre-calculus level.

***MATH 201 requires MATH 123 or Math ACT Score 27 (Math SAT score 640).

Bachelor of Science
Dr. Vincent Smith, Program Chair

Information Technology Major Mission Statement

Our mission is to prepare students to work in the information technology industry through challenging coursework, exposing them to diverse perspectives, and providing opportunities for community service and experiential learning through in-class assignments, workshops, and internships.

Program Description

Our information technology program is designed to provide students with the knowledge and skills necessary to succeed in the technology industry. The program covers a broad range of topics, including computer programming, database management, networking, cybersecurity, and web development. In addition to technical skills, our program also emphasizes the development of soft skills such as communication, teamwork, and problem-solving. These skills are essential for success in the technology industry, where professionals must be able to work collaboratively and adapt to changing technologies and environments. During the program, students will have the opportunity to develop a strong foundation in computer science and information technology concepts. Our experiential learning approach is critical for students to gain the skills and knowledge needed to solve real-world problems in the technology industry.

The Information Technology major is offered as an in-seat residential program on the Charleston campus*. Students complete a 50-credit computer science core and further coursework in information technology. This unique option allows students who struggle in mathematics to take less mathematics classes than other Applied Computer Science major options. Students have the opportunity to double major in Cybersecurity, Video Game Development, Technology Applications, or Data Analytics.

Information Technology Learning Outcomes

In addition to the Applied Computer Science core learning outcomes, the graduate will:

1. Detect, assess, remediate, and communicate technological issues in both hardware and software.

Information Technology Major Courses

In addition to the Applied Computer Science core courses, students must complete the following courses:

Information Technology Major Courses		
COSC 100	Coding Languages for Industry I	3 credits
COSC 200	Coding Languages for Industry II	3 credits
COSC 305	Hardware Solutions	3 credits
COSC 365	Problem Solving for IT Professionals	3 credits
CYBR 100	Intro to Computers (A+ Certification)	3 credits
CYBR 110	Intro to Networking (NET + Certification)	3 credits

Information Technology Major Courses		
CYBR 120	Intro to Security (Security+ Certification)	3 credits
DMDS 201	Digital Media and Graphics (Humanities Flex)	3 credits
	Hours for IT:	**24 + 50 (Core) = 74**

Total Credit hours: 122

*Students may be required to complete some courses in online or hybrid format.

TECHNOLOGY APPLICATIONS MAJOR

Bachelor of Science
Dr. Vincent Smith, Program Chair

Technology Applications Major Mission Statement

Our mission is to equip students with the knowledge and skills necessary to effectively leverage technology in various fields and industries. The program aims to promote innovation, creativity, and critical thinking, while instilling ethical values and a commitment to social responsibility. Our mission is achieved by producing graduates who are not only technically proficient but also ethical, socially responsible, and committed to using technology to create a better world.

Program Description

Our technology applications program is designed to give students flexibility while completing their Applied Computer Science degree. Students choose restricted electives in computer science, cybersecurity, data analytics, digital media and design, mathematics, or video game development. Our graduates are equipped to pursue careers in a wide variety of industries, including software development, project management, and user experience design. Graduates may also continue their education through graduate studies in a technology or mathematics field depending on which courses they choose to take as restricted electives.

The Cybersecurity major is offered as an in-seat residential program on the Charleston campus*. Students complete a 50-credit computer science core and further coursework in mathematics and their choice of restricted electives. Students have the opportunity to double major in Cybersecurity, Information Technology, Video Game Development, or Data Analytics.

Technology Applications Learning Outcomes

In addition to the Applied Computer Science core learning outcomes, the graduate will:

1. Apply knowledge of mathematics to implement security, assess algorithmic efficiency, and analyze data.

Technology Applications Major Courses

In addition to the Applied Computer Science core courses, students must complete the following courses:

Technology Applications Major Courses		
COSC 430	Cryptology	3 credits
MATH 230	Linear Algebra	3 credits
MATH 201	Calculus I	4 credits
MATH 225	Discrete Mathematics	3 credits
*	Restricted Elective	3 credits
*	Restricted Elective	3 credits
*	Restricted Elective	3 credits

Technology Applications Major Courses		
*	Restricted Elective	3 credits
	Hours for Technology Applications:	**25 + 50 (Core) = 75**

Total Credit hours: 121

*Students may be required to complete some courses in online or hybrid formats.

**A low-math path is available for students who are entering below the pre-calculus level.

***MATH 201 requires MATH 123 or Math ACT Score 27 (Math SAT score 640).

****Restricted Electives are satisfied by any course in COSC, CYBR, DASC, DMDS, GAME, or a 200-level or higher course in MATH.

Bachelor of Science
Dr. Vincent Smith, Program Chair

Video Game Development Major Mission Statement

Our mission is to prepare skilled professionals for jobs in the video game industry by creating graduates who are technically proficient and committed to creating video games that entertain, educate, and inspire. The program aims to foster creativity, innovation, and critical thinking while instilling ethical values and a commitment to social responsibility.

Program Description

Our video game development program is designed to give students the opportunity to gain hands-on experience by developing video games from concept to launch. They will work in teams to create game prototypes, refine game mechanics, and implement game features. Through projects, internships, and other experiential learning opportunities, students develop technical skills in areas such as programming, game engines, 3D modeling, animation, and sound design. The program also emphasizes the development of soft skills such as communication, collaboration, and leadership. Students are encouraged to work in teams, communicate effectively, and manage projects efficiently.

The Video Game Development major is offered as an in-seat residential program on the Charleston campus*. Students complete a 50-credit computer science core and further coursework in video game development. Students have the opportunity to double major in Cybersecurity, Information Technology, Technology Applications, or Data Analytics.

Video Game Development Learning Outcomes

In addition to the Applied Computer Science core learning outcomes, the graduate will:

1. Develop and design video game structure and components to meet desired outcomes.

Video Game Development Major Courses

In addition to the Applied Computer Science core courses, students must complete the following courses:

Video Game Development Major Courses		
COSC 310	Software Engineering	3 credits
COSC 430	Cryptology	3 credits
CYBR 100	Intro to Computers (A+ Cert)	3 credits
GAME 101	Intro to Games	3 credits
GAME 102	Content & Systems Design	3 credits
GAME 201	Unity I	3 credits
GAME 300	C# Programming	3 credits
GAME 301	Unity II	3 credits

Video Game Development Major Courses		
DMDS 201	Digital Media and Graphics	3 credits
DMDS 210	3D Design and Product Development	3 credits
DMDS 301	Animation, Motion, and Editing	3 credits
MATH 201	Calculus I	4 credits
MATH 225	Discrete Mathematics	3 credits
	Hours for Video Game Development:	**40 + 50 (Core) = 90**

Total Credit hours: 120

*Students may be required to complete some courses in online or hybrid formats.

**A low-math path is available for students who are entering below the pre-calculus level.

***MATH 201 requires MATH 123 or Math ACT Score 27 (Math SAT score 640).

APPLIED COMPUTER SCIENCE MINOR

Students pursuing other academic majors may complete a 20 hour Applied Computer Science Minor.

Applied Computer Science Minor		
COSC 110/110L	Computer Science I & Lab	4 credits
COSC 120/120L	Computer Science 2 & Lab	4 credits
COSC 280	Data Structures	3 credits
COSC 315	Intro to Database Systems	3 credits
COSC 340	Operating Systems	3 credits
COSC 345	Computer Networks	3 credits
	Total Credits 20	

Students must earn a C or better in all courses required for the minor.

Students pursuing other academic majors may complete a 21 hour Video Game Development Minor.

Video Game Development Minor		
COSC 100	Introduction to Applied Computer Science	3 credits
COSC 200	Applied Computer Science	3 credits
GAME 101	Introduction to Games	3 credits
GAME 102	Content & Systems Design	3 credits
GAME 201	Unity I	3 credits
GAME 300	C# Programming	3 credits
GAME 301	Unity II	3 credits
Total Credits		**21**

Students must earn a C or better in all courses required for the minor.

Bachelor of Science
Professor Vincent Smith, Program Director

Data Analytics Program Mission Statement

The mission of the data analytics program is to equip students with the knowledge and skills needed to gather, analyze, and interpret complex data sets and to use data to drive data-informed decision-making in various industries. The data analytics program instills ethical values and a commitment to social responsibility through using real-world data sets to create positive change.

Program Description

Our data analytics program is designed to provide students with the knowledge and skills needed to gather, analyze, and interpret complex data sets to drive data-informed decision-making in various industries. The program covers a range of topics, including statistical analysis, data visualization, machine learning, and database management. Students in the program will gain hands-on experience working with real-world data sets, through a combination of coursework, projects, and internships. They will learn how to use software tools such as Microsoft Excel, R, and SQL to analyze data, create visualizations, and communicate results effectively.

The Data Analytics major is offered as an in-seat residential program on the Charleston campus*. Students complete a core of mathematics, computer science, and data analytics with further coursework in an application area of emphasis. The area of emphasis for is usually a minor that the student selects, but it can be determined in consultation with the student's academic advisor to fulfill academic objectives**. Students have the opportunity to double major in Cybersecurity, Information Technology, Technology Applications, or Video Game Development.

Data Analytics Program Learning Outcomes

The graduate will:

1. Apply data science principles relating to data retrieval, processing, and analysis.
2. Apply mathematical and statistical concepts to detect patterns in data and to draw inferences.
3. Apply critical thinking skills for approaching problems and making assessment decision.
4. Evaluate research results and communicate finings in data science.

Data Analytics Major Courses		
DASC 100	Introduction to Scientific Programming	3 credits
DASC 101	Intro to Data Science	3 credits
DASC 250	Data Visualization	3 credits
DASC 310	Machine Learning	3 credits

Data Analytics Major Courses		
DASC 330	Modeling and Simulation	3 credits
DASC 375	Natural Language Processing	3 credits
COSC 110	Computer Science I	3 credits
COSC 110L	Computer Science I Lab	1 credit
COSC 120	Computer Science II	3 credits
COSC 120L	Computer Science II Lab	1 credit
COSC 280	Data Structures	3 credits
COSC 315	Database Systems	3 credits
COSC 345	Computer Networks	3 credits
COSC 360	Web App Development	3 credits
COSC 430	Cryptology	3 credits
COSC 440	Co-Op Experience	3 credits
COSC 450	Capstone	3 credits
MATH 201	Calculus I	4 credits
MATH 202	Calculus II	4 credits
MATH 225	Discrete Mathematics	3 credits
MATH 230	Linear Algebra	3 credits
MATH 240	Probability and Statistics	3 credits
MATH 241	Probability and Statistics II	3 credits
	Credits for Data Analytics:	**66**

122 Credit Hours Total

*Students may be required to complete some courses in online or hybrid formats.

** Application Area courses (18 credit hours) are typically comprised of an existing UC minor. Other electives require an approved departmental plan.

***MATH 201 requires MATH 123 or Math ACT Score 27 (Math SAT score 640).

Admission Requirements

Students must gain general admission to the University of Charleston.

Additional Requirements

To register for a course, students must meet all prerequisite requirements for that course or obtain instructor approval.

To graduate, students must earn a C or better in all courses required for the major.

Data Analytics students must meet all University of Charleston graduation requirements.

While a Mac may be used in some courses, Data Analytics students are required to have a modern Windows computer capable of running the required programs.

<center>DATA ANALYTICS MINOR</center>

Students pursuing other academic majors may complete a 21-hour Data Analytics Minor.

Data Analytics Minor		
DASC 100	Intro to Sci Prog*	3 credits
DASC 101	Intro to Data Science	3 credits
DASC 250	Data Visualization	3 credits
DASC 310	Machine Learning	3 credits
DASC 330	Modeling and Simulation	3 credits
DASC 375	Natural Language Processing	3 credits
MATH 240**	Probability and Statistics I*** (or equivalent)	3 credits
	Total Credits	**21**

Students must earn a C or better in all courses required for the minor.

*MATH 120 is a prerequisite for DASC 100.

**MATH 121 is a prerequisite for MATH 240.

***Equivalent courses to MATH 240 include: BUSI 316 (Quantitative Methods for Business and Economics), BUSI 317 (Business Statistics), NSCI 220 (Statistics for Science & Research), PSYC 315 (Psychological Statistics), and HSCI 312 (Statistics for Evidence Based Practice).

Professor Jennifer Hoffman, Program Director

Mathematics courses are offered to help students:

1. Develop an understanding of basic mathematical concepts and their broad practical application;
2. Demonstrate competence in reading and solving problems in mathematics;
3. Demonstrate mastery of the field for use in teaching, industry, or further study;
4. Understand the relationship of the discipline of mathematics to the society of which it is a part.

No major is offered in Mathematics.

MATHEMATICS MINOR

Professor Jennifer Hoffman, Coordinator

Mathematics Minor Mission Statement

The Mathematics minor strives to promote mathematical knowledge and critical thinking, and provide students the opportunity to mature as mathematical thinkers.

Program Description

The Mathematics minor is designed to educate students interested in furthering their mathematical abilities and critical thinking skills. The curriculum focuses on the development of content knowledge in advanced mathematics for STEM-oriented students from any discipline.

Mathematics Minor Program Learning Outcomes

The graduate will:

1. Develop an understanding of basic mathematical concepts and their broad practical application;
2. Demonstrate competence in reading and solving problems in mathematics;
3. Demonstrate mastery of the field for use in teaching, industry, or further study; and
4. Understand the relationship of the discipline of mathematics to the society of which it is a part.

Requirements of the Minor

The minor in Mathematics requires that the student complete 18 credits:

Math Minor		
Required courses (12 credits):		
MATH 201	Calculus I (Prerequisite of MATH 123 or equivalent)	4 credits
MATH 202	Calculus II	4 credits
MATH 203	Calculus III	4 credits

Math Minor		
Choose 2 courses from the following list (6 credits):		
MATH 225	Discrete Mathematics	3 credits
MATH 230	Linear Algebra	3 credits
MATH 241	Probability and Statistics II (Prerequisite of MATH 240 or equivalent)	3 credits
COSC 430	Cryptology	3 credits

Note regarding prerequisites: Prerequisite requirements are based on math placement process. Please work with Mathematics program director to determine.

Equivalent courses to MATH 240 include: BUSI 316 (Quantitative Methods for Business and Economics), BUSI 317 (Business Statistics), NSCI 220 (Statistics for Science & Research), PSYC 315 (Psychological Statistics), and HSCI 312 (Statistics for Evidence Based Practice).

DEPARTMENT OF HUMANITIES

Dr. Jeannie Dalporto, Department Chair

The Department of Humanities presents students with opportunities to create, design, reimagine and apply their skills and knowledge in innovative ways. The focus of the department is on design and application of design to real-world problems and products.

Students will develop capacity for aesthetic response by increasing their understanding of the breadth of human creativity and communication.

The General Studies major offers students the opportunity to design their own learning experience in an individualized way.

Majors in the Department

COMMUNICATION

DIGITAL MEDIA DESIGN

ENGLISH AND PROFESSIONAL WRITING

GENERAL STUDIES – Individualized Major

Minors in the Department

Minors allow the student to develop some special knowledge in a discipline, though not at the depth of the major program in the same field. Minors are available in the following areas:

COMMUNICATION

ENGLISH

DIGITAL MEDIA DESIGN

MUSIC

PROFESSIONAL WRITING

Bachelor of Arts
Professor Hannah R. Kennedy, Program Director

Communication Program Mission Statement

The mission of the Communication program is to prepare graduates for a creative and progressive career in a variety of communication settings and to contribute to the profession and the community through service and scholarship.

Program Description

The Communication program provides a foundation in the study of human communication while integrating major areas of study in the communication field, including speech, writing, public relations, digital media design, marketing, journalism and event management.

The program's integrated curriculum prepares students with theoretical principles in the communication field, and then requires them to apply those principles in a variety of communication contexts. The flexible curriculum can be customized by students through selection of a focus area of seven courses outside the Communication program; e.g. from psychology, political science, business, art, etc.

The program can be completed in 3 years.

The program's multi-disciplinary approach prepares students for a variety of careers in communication fields, such as public relations, marketing, advertising, public information, event management, lobbying, development, sales, etc.

The learning experience can be customized by student selection of a seven-course area of focus outside the program.

Guest speakers and adjunct professors provide career connections and references for current students and alumni.

Students engage in two professionally mentored internship opportunities. Students complete a service-learning practicum on- campus and an external internship with a company/organization in the communication field.

Students have the opportunity to work on the campus newspaper, *The Eagle*.

Students can also join the Public Relations Student Society of America (PRSSA), our professional communication organization.

Communication Program Learning Outcomes

The graduate will:

1. Use communication theory and principles to analyze, design and evaluate oral, written, and visual communication in a variety of professional settings.
2. Use current communication technologies and software to analyze, design and evaluate oral, written, and visual communication for a variety of professional settings.

3. Use a variety of communication methods and tools to analyze, design, and evaluate an event or campaign for a variety of settings in the field of communication.

What You Will Study

The Communication major consists of 45 credits of Core Requirements and 9 credits of electives.

Program Core requirements		
ICOM 151	Human Communication	3 credits
ICOM 201	Public Speaking	3 credits
DMDS 201	Digital Media and Graphics	3 credits
ICOM 221	Introduction to Journalism	3 credits
ICOM 225	Introduction to Public Relations	3 credits
ICOM 305	Public Relations Campaigns	3 credits
DMDS 303	Digital Media & Graphics II	3 credits
ICOM 361	Practicum in Communication	3 credits
ICOM 362	Public Relations Writing	3 credits
ICOM 400	Communication Research & Theory	3 credits
ICOM 403	Advanced Videography	3 credits
ICOM 405	Senior Project in Communication	3 credits
ICOM 441	Communication Law & Ethics	3 credits
ICOM 480	Seminar in Professional Development	3 credits
ICOM 498	Communication Internship	3 credits
	Total	**45**

Admissions Requirements:

Students must gain general admission to the University of Charleston.

Additional Requirements:

In order to graduate, students must earn a C or better in all courses required for the major. In addition, students must meet all graduation requirements of the University.

COMMUNICATION MINOR

A student from another major must complete a total of 18 credit hours of Communication courses to receive a minor in Communication.

Communication Minor		
Required courses (9 credits):		
ICOM 151	Human Communication	3 credits
ICOM 225	Introduction to Public Relations	credits
ICOM 400	Communication Research & Theory	credits
Choose 3 courses from the following (9 credits):		
ICOM 201	Public Speaking	3 credits
ICOM 221	Introduction to Journalism	3 credits
ICOM 305	Public Relations Campaigns	3 credits
ICOM 314	Persuasive Communication	3 credits
ICOM 325	Feature Writing	3 credits
ICOM 361	Practicum in Communication	3 credits
ICOM 362	Public Relations Writing	3 credits
ICOM 364	Social Media Strategies	3 credits
ICOM 441	Communication Law & Ethics	3 credits
ICOM 498	Communication Internship	3 credits

DIGITAL MEDIA DESIGN MAJOR

Bachelor of Science
Professor Terry Floyd, Program Director

Digital Media Design Program Mission Statement

The Digital Media Design program prepares graduates for an entry-level position in the digital media profession. It provides the students opportunities to expand and mature thinking and embodies innovation to engage and improve communities.

Program Description

The University of Charleston's Digital Media Design Program is on the Charleston campus and offers a 4-year Bachelor of Science degree. The program offers students opportunities to learn multiple programs and develop technology for Digital Media such as web & social media development, motion graphics, video editing, 3D prototypes, and visual communications. Students will collaborate with current majors at UC in studio and classroom settings to develop tangible products. These courses will also take advantage of experiential learning to further develop the student's body of knowledge, such as working with clients to produce work. The Digital Media Design program will help students to hone their skills in areas of interest such as web development, product design, motion graphics, and visual communication to become a well-rounded UC student and future alum. The students will have an additional opportunity to serve as the DMDS Student Ambassador and Social Media Manager. The Ambassador/Social Media Manager helps in promoting the program through recruiting or DMDS events and is responsible for social media post on the DMDS accounts. The program can be completed in 3.5 to 4 years.

Digital Media Design Program Learning Outcomes

The graduate will:

1. Illustrate a foundational understanding of technical knowledge, design principles, and conceptual development in digital media. (Knowledge)
2. Summarize and interpret the principles of design, computer techniques, and visual communications with the context of digital media. (Understand)
3. Utilize design skills, computer techniques, and visual communication principles to create effective solutions in digital media. (Apply)
4. Evaluate and critique digital media, including personal work and the work of others, by analyzing the characteristics, strengths, and weaknesses, with an emphasis on effective design elements. (Analysis)
5. Assess, both in written and oral forms, a coherent and articulate explanation of design knowledge and its application in digital media. (Evaluate)
6. Develop a comprehensive body of work that demonstrates an understanding of professional practices in digital media. (Create)

What You Will Study

The Digital Media Design degree program includes 39 or 42 credits of academic work, including 3 credits of mathematics, 6 credits of Computer Science, and 10 credits of Business, Communication, and English. Students must also complete general education requirements and electives for at least 120 credits.

A Digital Media Design major will encounter many opportunities after graduation. To better prepare graduates, students should increase their knowledge at an introductory level in an additional field of study. The additional field of study could be comprised of a minor or focused electives from one of the existing programs at UC selected in conjunction with their advisor.

Digital Media Design Core Components		
DMDS 101	Introduction to Digital Media Design	3 credits
DMDS 201	Graphics I	3 credits
DMDS 202	UI Web Design	3 credits
DMDS 210	3D Product Design	3 credits
DMDS 301	Motion Graphics	3 credits
DMDS 302	UX Web Design	3 credits
DMDS 303	Graphics & Video Editing	3 credits
DMDS 310	Visual Communication Studio	3 credits
DMDS 311	Product & Motion Graphics Studio	3 credits
DMDS 312	UI & UX Web Design Studio	3 credits
DMDS 390	Professional Practices	3 credits
DMDS 410	Digital Media Design Senior Capstone	3 credits
DMDS 490	Digital Media Design Internship	3 or 6 credits
Digital Media Design Core	**39 or 42**	
Required Courses Outside of Major		
BUSI 151	Introduction to Business	3 credits
COSC 100	Applied Computer Science I	3 credits
COSC 200	Applied Computer Science II	3 credits
ENGL 361	The Eagle	1 credit
MATH 120	Intermediate Algebra	3 credits
ICOM 151	Introduction to Human Communications	3 credits
ICOM 403	Advanced Videography	3 credits
	Required Courses Outside of Major:	**19 credits**

Admission Requirements

Students must gain general admission to the University of Charleston.

Additional Requirements

To graduate, students must earn a C or better in all courses required for the major. Digital Media Design majors must meet all University of Charleston graduation requirements and successfully complete the Digital Media Design Capstone course and internship.

UC requires students to have a personal computer. Below are the computer requirements for DMDS.

Apple or PC – Intel or AMD Quad Core Processor, latest OS (Microsoft Word 10 or later, Mac OS Ventura), 16 GB Ram, 2 GB of GPU VRAM, 15 GB Hard Disc Space, 1920 x 1080 resolution.

DIGITAL MEDIA DESIGN MINOR

The Digital Media Design minor is designed for students who want to enhance their skills and abilities with digital media. Students will gain knowledge of the process for prototyping and publishing websites, motion graphics, and visual communication. The students will gain experience using industry-standard computer software while acquiring an understanding of digital media and the design process. This minor is an excellent complement for students majoring in Communications, Digital Marketing, Business Administration, Applied Computer Science, Political Science, Sports Media, Health Care, and others.

The minor in Digital Media Design requires that the student complete 12 hours of foundational courses and 6 focus area hours – Visual Communications, Product and Motion Graphics, and Web & Social Media Design. Focus areas descriptions are listed below.

Visual Communications

The Visual Communications focus area combines traditional graphic design and video editing techniques. Within the focus area, students apply design principles and elements to create layouts, posters, and promotional videos. They learn the importance of Color Psychology to evoke emotions and influence behavior for their designs. Students practice their video editing skills by creating promotional videos that tell a story and can be used in Social Media campaigns.

Product & Motion Graphics

Product and Motion Graphics focus area offers students an exploration into the fast-growing fields of motion graphics and 3D design, providing them with the tools and techniques to bring their creative visions to life. Students not only hone their technical skills but also cultivate a mindset of Design Thinking, empowering them to approach challenges with creativity, empathy, and innovation. Students are introduced to working with client briefs, gaining valuable insights into the collaborative process of translating ideas into impactful visual narratives.

Web & Social Media Design

The Web and Social media focus area offers students a journey designing web and social media applications. Students begin their progress of web and social media design by gaining the knowledge to build both low and high-fidelity sites that engage the user interface (UI) and user experience (UX). Moreover, Web and Social media design emphasizes real-world applications, providing students with the chance to collaborate with clients.

Digital Media Design Minor		
Foundation Courses 12 Hours		
DMDS 101	Introduction to Digital Media Design	3 credits
DMDS 201	Graphics I	3 credits
DMDS 202	UI Web Design	3 credits
DMDS 210	3D Product Design	3 credits
Focus Area Intermediate and Advance Courses 6 Hours **Students will select from one of the following focus areas of interest.**		
Visual Communications - 6 hours		
DMDS 303	Graphics & Video Editing	3 credits
DMDS 310	Visual Communication Studio	3 credits
Animation Editing and Product Development – 6 hours		
DMDS301	Motion Graphics	3 credits
DMDS 311	Product & Motion Graphics Studio	3 credits
Web and Social Media Design – 6 hours		
DMDS 302	UX Web Design	3 credits
DMDS 312	UI & UX Web Design Studio	3 credits

Bachelor of Arts
Dr. Jeannie Dalporto, Program Director

English and Professional Writing Program Mission Statement

The mission of the English Program is to prepare students for a life of enlightened living, productive work, and community service, by helping students learn to communicate effectively and develop sophisticated reading, writing, critical thinking, and research skills.

Program Description

The English program provides a valuable educational experience for students who need the kinds of skills that employers increasingly demand—reading, writing, research, and critical thinking. The program's flexibility allows students to acquire specific knowledge in media writing, graphic design, public relations, and other areas in order to gain real world application of these skills. The English program at UC emphasizes the following career paths for English majors: writers for web sites, businesses, media outlets, and nonprofit organizations.

English majors will experience the following:

Opportunity to work on the campus newspaper *The Eagle*.

Potential to join *Sigma Tau Delta*, a national English honorary, and gain access to scholarships and publishing opportunities.

Ability to double major or minor in ICOM, Digital Media, Psychology, Political Science, Business, and other majors.

Opportunities for internships with media companies, nonprofit corporations, and other organizations.

Preparation for a variety of career interests, including government, law, nonprofits, business, media, teaching, and graduate school.

English Program Learning Outcomes

Graduates will:

1. Identify a wide range of literary texts & periods, including historical and contemporary works by British, American, and World authors, works by female authors, and works by authors of color across several genres.
2. Engage in meta-cognition & critical thinking as they reads, interprets, analyzes, and evaluates individual works, taking into account the relationships among the text, context, critical context, & sub-text.
3. Conduct research (electronic and non-electronic) for the purpose of exploring, documenting, evaluating, and publishing conclusions orally and in writing.
4. Communicate effectively to a variety of audiences and in a variety of modes.
5. Demonstrate knowledge and application of digital media principles and/or knowledge and application of principles in the field of communications.

What You Will Study

The major in English consists of at least 120 credit hours, including a total of 40 hours in the program. Program requirements include 25 credits in the English core and 15 hours of

electives in the ICOM and/or DMDS programs. Students are encouraged to double major or minor in the following areas: ICOM, DMDS, PSYC, POLS, BUSI, or others.

English Core		
Choose 2 courses (6 credits) from the following:		
ENGL 203	British Literature: Romantics to the 20th Century	3 credits
ENGL 224	American Literature Survey II	3 credits
ENGL 230	Western World Literature	3 credits
ENGL 231	Survey of Non-Western World literature	3 credits
Required Courses (7 credits):		
ENGL 345	Advanced Writing	3 credits
ENGL 405	English capstone	3 credits
ENGL 361	*The Eagle* newspaper or Internship	1 credit
Literature Electives (12 credits) – Choose 4 courses from the following:		
ENGL 307	Appalachian Literature	3 credits
ENGL 309	Poetry of War	3 credits
ENGL 312	Shakespeare	3 credits
ENGL 320	Multi-ethnic Literature	3 credits
ENGL 326	Literature and Gender	3 credits
ENGL 336	Literature and Film	3 credits
ENGL 360	Harry Potter	3 credits
ENGL 340	Creative Writing	3 credits
ICOM and/or DMDS Electives		
Choose 5 courses (15 credits) from the following:		
ICOM and/or DMDS 200-300 level courses		

Total for the Major: 40 credits

Admission Requirements

Students must gain general admission to the University of Charleston.

Additional Requirements

In order to graduate, students must earn a C or better in all courses required for the major and ENGL 405, English Capstone. In addition, students must meet all of the graduation requirements of the University. Students must complete general education requirements and other focused electives—chosen in conjunction with their advisor--for a minimum of 120 credit hours required for graduation.

The minor in English consists of 18 credits:

English Minor		
Choose 1 course (3 credits) from the following:		
ENGL 203	British Literature: Romantics to the 20th Century	3 credits
ENGL 224	American Literature Survey II	3 credits
ENGL 230	Western World Literature	3 credits
ENGL 231	Survey of Non-Western World literature	3 credits
Choose 3 courses (9 credits) from the following:		
ENGL 307	Appalachian Literature	3 credits
ENGL 309	Poetry of War	3 credits
ENGL 312	Shakespeare	3 credits
ENGL 320	Multi-ethnic Literature	3 credits
ENGL 326	Literature and Gender	3 credits
ENGL 336	Literature and Film	3 credits
ENGL 340	Creative Writing Harry Potter	3 credits
ENGL 345	Advanced writing	3 credits
ENGL 360	Harry Potter	3 credits
ENGL 361	*Eagle* newspaper	Up to 3 credits may be counted
ICOM and/or DMDS		
Choose 2 courses (6 credits) of 200 and/or 300-level ICOM and/or DMDS electives		

PROFESSIONAL WRITING MINOR

The Professional Writing minor will give students the tools to demonstrate a skill that employers value in any career—written communication. Students will take a wide variety of courses to hone their writing competence in different professional settings. This minor will help students in any major to enhance their marketable skills and increase their opportunities for employment.

The minor in Professional Writing minor consists of 19 credits:

Professional Writing Minor		
Required courses:		
ENGL 340	Creative Writing	3 credits

ENGL 345	Advanced Writing	3 credits
ENGL 361	*The Eagle* Newspaper	1 credit
Choose 2 courses (6 credits) from the following:		
ICOM 221	Journalism	3 credits
ICOM 325	Feature Writing	3 credits
ICOM 362	Public Relations Writing (Pre-requisite: ICOM 225)	3 credits
Choose 2 courses (6 hours) from the following:		
ICOM 364	Social Media Strategies	3 credits
DMDS 101	Digital Media and Graphics	3 credits
BUSI 241	Business Communication (Pre-requisite: ENGL 102)	3 credits

Dr. Tracy Bradley, Coordinator

Music Minor Mission Statement

The Music minor strives to promote music within the community and prepare graduates for continued engagement in music. It offers students the opportunity to mature as musicians.

Program Description

The music minor curriculum is designed to educate students interested in studying and practicing music as an avocation. The curriculum focuses on the development of content knowledge in popular and world music history in addition to performance skills as a soloist and member of an ensemble.

Music Minor Program Learning Outcomes

The student will:

1. Differentiate between stylistic periods in history and regions of selected music.

2. Identify general stylistic and structural features of selected music.

3. Perform with expression and technical accuracy a large and varied repertoire of music.

4. Demonstrate well-developed ensemble skills.

5. Demonstrate knowledge of vocal or instrumental pedagogy including how the instrument works, and the science of acoustics as it pertains to the instrument.

Requirements of the Minor

The minor in Music requires that the student complete 18 credits: 10 credits in course work; 4 credits in ensemble; and 4 credits in private instruction. The minor includes:

Music Minor		
Courses (10 credits total):		
MUSC 101	Music Theory I	3 credits
MUSC 11X	Aural Skills	1 credit
MUSC 231	Music History I	3 credits
MUSC 232	Music History II	3 credits
Ensemble (4 credits total): Concert Choir and/or Band		
MUSC 324	Concert Choir	1 credit
MUSC 327	Band	1 credit

Private Instruction (4 credits total):		
MUSC 3XXP	Applied Music (Private Lessons) 1 credit per semester per instrument; at least one credit must be in MUSC 351P (Applied Piano). Students may not take all four credits on a single instrument but must take a minimum of two credits on their primary instrument.	3 credits

DEPARTMENT OF NATURAL SCIENCES

Dr. Mark Watson, Department Chair

The Department of Natural Sciences strives to:

- Help the student understand common phenomena in nature;
- Appreciate the impact of science on the life of the individual and society;
- Consider, among other factors, the laws and processes of nature in developing a wholesome philosophy of life;
- Achieve proficiency in the use of the scientific method;
- Develop problem-solving skills; and
- Acquire sufficient knowledge of a specific field, or some part of it, for immediate vocational or professional use or as a basis for further study.

Programs within the department provide solid foundation through general courses in biological and physical science, and specialization through courses in each of the majors, with appropriate use of laboratory methods of instruction. Learning is viewed as a partnership between student and instructor, and students are expected to participate as active learners.

Majors in the Department

BIOLOGY

General Biology Concentration

Conservation Biology Concentration

Biomedical Sciences Concentration

CHEMISTRY

CHEMISTRY-BIOLOGY DUAL DEGREE

Support courses are offered in

Natural Science and Physical Science

Coursework

All students in the Natural Sciences must complete the courses outlined by the concentration of their specific major and demonstrate competency in the General Education as specified by the University. No online courses with online labs will be considered as part of the program requirements.

Courses with Labs

Courses with Labs: Lecture courses often have corequisite labs and thus must register for both in the same semester. These courses will have separate grades for the in-class lecture portion and the lab. However as co-requisite courses, to fulfill program requirements, students must pass both the lecture and the related lab with a grade of "C" or better.

Failure of courses with labs: Students failing either the lecture or lab by receiving a "D" or "F" or withdrawing without completing either course will have to repeat both in the same semester unless special permission is given.

Withdrawal from courses with labs: As corequisite courses: if a student withdraws from a lab or lecture that has a corequisite then they must withdraw from both courses. For example, if a student withdraws from the lecture then they must also withdraw from the lab.

Special Permissions: As co-requisite courses a student who fails or withdraws from the lecture or the lab or who transfers in credit for lecture without a lab may get approval from the instructor and the department chair to: 1) retake one without the other 2) drop one and not the other.

Special Permission will be based on one or more of the following:
1. course content, such as shared material in course and lab or lecture or lab materials on exams will put a student at a disadvantage by not being enrolled in both.

2. available lab or lecture seats (cannot overload a section). Permission may not be granted until the start of the semester.

3. Percentage of a course student previously passed (based on in class assessments)

    (Students passing less than 50% of a course will not be granted special permission.)

4. Transferred lecture or lab course has similar outcomes to the course of interest but missing a corequisite course. A student may be able to transfer credit for the missing corequisite if the course is approved by the registrar.

5. If retaking the lab or lecture course violates the "Course Repeat Rule"

    Requests for special permission should be made in writing (or email) by the student's academic advisor to the instructor and department chair.

Capstone Research Experience

To demonstrate proficiency of the Program Outcomes of each of the programs, majors must complete a hypothesis-based research project and Senior Seminar in their Senior Year

Required Research Timeline

To assure that graduation occurs within the student's expected time frame, care must be taken to fulfill the requirements for completing your major's capstone research seminar learning experiences. Breaking the sequence, skipping a requirement, or failing to complete events by required dates will delay graduation.

Biology Program

Complete BIOL 130 and NSCI 220 or MATH 240 prior to attaining 60 credits.

Research experience in Upper-level electives, BIOL 495 or independent research experience

BIOL 496 Senior Year

Chemistry Program*

Chemistry majors will take CHEM 494 in the fall of their junior year. Students may take CHEM 494 and 495 in the same semester as approved by their advisor.

The research project, CHEM 495 must be completed by the end of the fall semester of the senior year. Students will not be allowed to take CHEM 495 and 496 simultaneously.

*Chemistry-Biology Dual Majors will follow the Chemistry Capstone

NATURAL SCIENCES

Dr. Mark Watson, Program Director

Natural Sciences courses are offered to help students:

- Understand the scientific method and its application to the natural world
- Obtain a foundational understanding of biological principles, physical science, and environmental science
- Acquire research experience in the natural sciences
- Develop an understanding and respect for divergent ethical perspectives within scientific disciplines

No major or minor is offered in Natural Sciences.

PHYSICAL SCIENCES

Physical Science courses are offered to help students acquire:

- A clear and logical understanding of the basic concepts and principles of physical science
- An explanation of how the concepts can be applied to the real world; and
- A foundation in the principles and methods as a basis for professional or pre- professional study.

No major or minor is offered in Physical Sciences.

Bachelor of Science
Dr. Mark Watson, Program Director

Biology Program Mission Statement

The mission of the Biology Program is to educate each student in understanding the living world and fundamental life processes and to help them acquire the skills and knowledge base needed work as a biologist, pursue graduate work, professional school or to teach biology. Each student is encouraged to think critically using their acquired knowledge base to make informed decisions in their future career and life enabling the student to use their skills to productively contribute to their community.

Program Description

The Biology program at UC provides a rigorous curriculum grounded on a variety of biological disciplines (organismal biology, molecular biology, environmental science and biomedical science), along with intensive laboratory courses, field work, experiential learning, and research opportunities. By the time our students graduate, they will be equipped with the theoretical and practical skills necessary to be competitive and successful applicants for employment or admission to professional or graduate school in the biological, medical or conservation sciences.

We foster a student-centered atmosphere where student learning, discovery, and self-reflection are embedded throughout the curriculum. Innovation, analytics and critical thinking are cultivated by providing opportunities for independent research projects both inside and outside of the curriculum. Most of our upper division courses are inquiry- based courses which help in bridging the gap between understanding foundational biological concepts to practicing scientific inquiry. The biology core courses are complemented by foundational chemistry, physics and mathematics courses which ensure our graduates are not only well rounded in the natural sciences but have acquired the necessary requirements for any professional and graduate program.

Our diverse faculty is dedicated to excellent teaching, service in all areas and to research. Our departmental teaching philosophy is based on the belief that using a combination of passive and active learning activities in small class sizes will help develop self-regulated independent students who will be life-long learners. In addition, our facilities, laboratories and equipment support this teaching philosophy.

Biology Program Learning Outcomes

The graduate will:

1. The graduate effectively communicates ideas and presents results using proper English grammar, vocabulary, and conventional scientific format in both written and oral formats.

2. The graduate demonstrates comprehension of biological content knowledge from atoms to ecosystems through coursework.

3. The graduate demonstrates the application of science, evidence-based and grounded in observation, experimentation, hypothesis testing and data visualization. The graduate demonstrates the ethical use of

resources, data, and behavior.

4. The graduate demonstrates the ability to integrate content from math, chemistry, physics into biology.

Concentration Specific Outcomes

General Biology graduates integrate knowledge of general biology, including biological molecules, the cell, genetics, regulation, structure and function, interaction with the environment, and evolution.

Conservation Biology graduates demonstrate knowledge and understanding for the scope, unity and diversity of life in the biosphere, including the classification of plants and animals the ways species influence, and are impacted by, natural and human-altered ecosystems.

Biomedical sciences graduates evaluate, integrate and apply how the principles of science apply to human health and disease.

What You Will Study

Core Program of Study

The Bachelor of Science in Biology requires at least of 120 credit hours of coursework. The student must fulfill 27 credit hours in General education requirements for the University. Through thoughtful and intentional advising, we make sure the general education choices count toward the student's graduate or professional school requirements. Biology majors must take 46 credits which are a foundational set of Core courses listed below.

CORE Science courses – 46 CREDIT HOURS		
BIOL 130	Introductory Biology for Majors (with lab)	4 credits
BIOL 230	Introduction to Cell Physiology and Biochemistry (with lab)	4 credits
BIOL 331	Microbiology (with lab)	4 credits
BIOL 332	Genetics (with lab)	4 credits
BIOL 496	Biology Capstone	3 credits
NSCI 220 or MATH 240	Statistics for Science and Research or Probability and Statistics	3 credits
CHEM 101	General Chemistry I (with lab)	4 credits
CHEM 102	General Chemistry II (with lab)	4 credits
CHEM 201	Organic Chemistry I (with lab)	4 credits
CHEM 202	Organic Chemistry II (with lab)	4 credits
PHSC 201	Physics I (with lab)	4 credits
PHSC 202	Physics II (with lab)	4 credits

In addition, students take 24 credits in four keystone areas of biology: organismal biology, molecular biology, ecology, and biomedical sciences. All biology courses are classified into each of these categories. Every student in the major will be required to take courses in each keystone area, but they can choose from this pre-approved list. Some courses may be listed in more than one area but shall only count once. This flexible approach ensures that everyone who graduates with a Biology Degree from UC has taken courses in these keystone areas. This coursework better prepares graduates in current areas of biology, and it allows students to explore the areas of emphasis before they commit to one.

Major Requirements– 24 CREDIT HOURS		
Organismal Biology	**Select 3 from the following:**	
BIOL 215	Botany (with lab)	4 credits
BIOL 224	Zoology (with lab)	4 credits
BIOL 251	Anatomy and Physiology I (with lab)	4 credits
BIOL 252	Anatomy and Physiology II (with lab)	4 credits
Molecular Biology	**Select 1 from the following:**	
BIOL 333	Immunology (with lab)	4 credits
BIOL 451	Cell and Molecular Biology (with lab)	4 credits
BIOL 453	Virology (with lab)	4 credits
CHEM 410	Biochemistry	4 credits
Ecology	**Select 1 from the following:**	
BIOL 3xx	Sound Ecology	4 credits
BIOL 400	Ecology (with lab)	4 credits
BIOL 413	Systematic Botany (with lab)	4 credits
Biomedical Science	**Select 1 from the following:**	
BIOL 333	Immunology (with lab)	4 credits
BIOL 370	Physiology of Exercise	3 credits
BIOL 420	Pathophysiology I	3 credits
BIOL 421	Pathophysiology II	3 credits
BIOL 422	Embryology (with lab)	4 credits
BIOL 453	Virology (with lab)	4 credits

Concentrations

The biology program offers 3 concentrations listed below. Each area requires 12-16 credits hours. These credits are in addition to the core requirements, the major requirements and the General education requirements and count towards the 120 credit hours needed to complete the bachelor's degree. These concentrations help students to provide structure to

154

electives, develop in their fields of interest and provide expertise in a field within biology for students seeking admission to post-baccalaureate programs or employment.

The concentrations are:

General Biology

Biomedical Sciences

Conservation Biology

General Biology

The General Biology concentration is the most universal of the tracks, offering a flexible yet robust curriculum for students interested in a broader understanding of biology. The additional 16 credit hours required are chosen from the list of upper division courses shown above, one from each major category (organismal biology, molecular biology, ecology and biomedical sciences). Even though this concentration prioritizes breadth over focus, it is still appropriate for all professions that require a major in biology and will prepare students for graduate school, professional school or employment. If a student is unsure about what to do with their biology major and/or wants to take a wider variety of courses which are part of the Biology curriculum, then the General Biology concentration may be the best choice for them.

Students in this concentration take one additional course in each major area. Courses in the concentration must be different than those taken as part of the core major requirements.

One additional Organismal biology course with lab

One additional Molecular biology course with lab

One additional Ecology course with lab

One additional Biomedical sciences course with lab

Biomedical Sciences

This concentration is designed for the undergraduate student with an aptitude for the biological sciences and who plans to attend a professional school in the health sciences including but not limited to Medical school, Pharmacy school, Physician Assistant program, Dental school, Chiropractic school, and Physical Therapy school.

While many of the courses in our biology curriculum core ensure our graduates have acquired the necessary requirements for any professional and graduate program, this concentration allows students to take more specialized courses in areas of human health that will make them stand out as candidates. Students can explore topics such as pathophysiology, embryology, virology and more. Students may also consider taking approved classes from other departments to expand the breadth of their degree. For example, some courses in Health Sciences and Psychology may be used to fulfill the requirements of this concentration. This concentration also works well with the 3+1 pathway from UC Pharmacy school allowing students to graduate with a B.S. in Biology by completing year one of the professional program and using those courses as the biomedical science concentration courses.

Students in this concentration take four additional courses in the biomedical sciences area. Courses in the concentration must be different than those taken as part of the major requirements and are chosen in consultation with the student's academic advisor.

BIOL 333 Immunology (with lab)

BIOL 362 Adv Anatomy: The Nervous System

BIOL 370 Physiology of Exercise

BIOL 420 Pathophysiology I

BIOL 421 Pathophysiology II

BIOL 453 Virology (with lab)

EXER 370 Exercise Physiology

EXER 400 Exercise Metabolism and Energy Sources

PSYC 353 Physiological Psychology

PSYC 358 Health Psychology

PHAR 520 Pathophysiology*

PHAR 511 Drug Literature Evaluation*

PHAR 512 Immunology*

PHAR 513 Biochemistry*

PHAR 516 Medicinal Chemistry*

PHAR 524 Clinical Research Methods*

*PHAR courses are only available to UC Pharmacy students in the 3 +1 pathway. Students in the Pharmacy 3+1 pathway at UC cannot take BIOL 333 and BIOL 420 as part of their concentration electives because these courses will be part of the first year of pharmacy school.

Students who intend to apply to Pharmacy school, Physician Assistant school, Medical School or any other professional school after completing a Bachelor of Science in Biology degree or after completing the admissions requirements a are encouraged to discuss with their advisors which courses fit best with the requirements for admissions to these programs and take these courses among the electives for the concentration.

Conservation Biology

The Conservation Biology concentration is designed to provide students with a foundation in conservation sciences and population, organismal, and evolutionary biology. Students will explore regional organismal processes and the environments in which they thrive. Ecology, conservation and restoration of biodiversity are also a focus. Conservation and restoration field work and internships with local conservation agencies are some of the opportunities provided to students on this track. Course requirements for professional certification by several societies (e.g. Ecological Society of America) can be met within this concentration. Students with expertise in Conservation biology can work for local environmental agencies, Department of Environmental Protection, Department of Natural

Resources, The National Park Service, US Forestry Service, Department of Commerce, the Environmental Protection Agency, and many others. Students in this track will also be prepared for graduate school in biological and environmental sciences.

Students in this concentration take four additional courses in the organismal or ecology areas. Courses in the concentration must be different than those taken as part of the core major requirements and are chosen in consultation with the student's academic advisor.

BIOL 215 Botany

BIOL 224 Zoology

BIOL 3xx Sound Ecology

BIOL 350 Special Topics in Biology (by permission only)

BIOL 400 Ecology (with lab)

BIOL 413 Appalachian Flora (with lab)

BIOL 425 Tropical Ecology

BIOL 4xx Tropical Ecology of Costa Rica

BIOL 495 Research in Science (on demand and by permission)

*Electives to stay as full-time student may be other coursework of interest or of requirement for professional/graduate school. It may also be fulfilled by math coursework. Students may also consider a minor.

Courses in the concentration are chosen by the student in consultation with their advisor to meet total credit hour requirement for the degree.

Admission Requirements

Students must gain general admission to the University of Charleston.

Additional Requirements

In order to graduate, students must earn a C or better in all courses required for the major. Competencies for all students will be assessed each semester. Demonstration of competencies is viewed as a continuous process. Once achieved, competencies must be maintained and further refined as each student progresses toward graduation.

The University of Charleston comprehensive examination requirement for Biology majors is met through completion of the senior capstone in Biology BIOL 496.

BIOLOGY MINOR

The Biology Minor consists of at least 19 credit hours. Required classes include:

- BIOL 130 and BIOL 130L Introductory Biology for Majors and lab (4 credits)
- NSCI 220 Statistics in Science and Research (3 credits) or MATH 240 Probability and Statistics (3 credits)
- BIOL 224 and BIOL 224L General Zoology
  - **OR**
- BIOL 215 and BIOL 251L General Botany (4 credits)

The students must also take 8 additional credits from among the following courses:

Course	Title	Credits
BIOL 251/301L	A&P I and lab	4 credits
BIOL 252/302L	A&P II and lab	4 credits
BIOL 331/331L	Microbiology for Majors and lab	4 credits
BIOL 332/332L	Genetics and lab	4 credits
BIOL 333/333L	Immunology and lab	4 credits
BIOL 400/400L	Ecology and lab	4 credits
BIOL 419/419L	Microbial Ecology of Health and Disease	4 credits
BIOL 451/451L	Cell and Molecular Biology and Lab	4 credits
BIOL 453/453L	Virology and lab	4 credits

CHEMISTRY-BIOLOGY DUAL-MAJOR (BIOCHEM)

This specially designed BS degree plan allows interested students to obtain two majors: chemistry and biology, within a four-year timeframe. Students interested in pursuing this option should consult the section of this *Academic Catalog* describing the **Chemistry Program** for a full description of the coursework needed to complete the Dual Major.

Pathways for Admission to UC Physician Assistant Program (UCPAP)

Two admission pathways have been developed for the UC PAP. For more information, students should refer to the Biology student handbook and make an appointment with their advisor as soon as possible during their freshman year to discuss their choices.

Fast Track

The PA Fast Track is only available to full time students who are currently enrolled at UC. Students can apply as early as their freshman year and can apply during any spring semester until they graduate. Students accepted into the PA fast track program matriculate in the master's degree of Physician Assistant Studies (PA School) after completion of their pre-requisites.

Direct Admission

Students also have the option of earning their Bachelor's Degree and applying to the UC Physician Assistant Program, or other PA Programs across the nation, through the Direct Admissions Pathway.

Pathways for Admission to UC School of Pharmacy (SOP)

Two admission pathways have been developed for the UC SOP. For more information, students should refer to the Biology student handbook and make an appointment with their advisor as soon as possible during their freshman year to discuss their choices.

Fast Track Pathway

Students may choose to apply to pharmacy school after completing only those courses that are required for admission to the pharmacy school. Students can often finish these prerequisite courses in 2 or 3 years.

Traditional Admission Pathway

Students wishing to earn their undergraduate degree prior to applying to pharmacy school will be enrolled as a Biology, Chemistry, or Chemistry-Biology dual major. The student can then complete 4 years of pharmacy school to earn the Doctor of Pharmacy degree. Another option, the 3+1 degree pathway*, allows a student to combine 3 years of undergraduate coursework with an additional 1 year of pharmacy school coursework to earn a BS in Biology with an emphasis in Biomedical Sciences.

Only available to students who complete their undergraduate and graduate work at UC.

Bachelor of Science
Dr. Mark Watson, Interim Program Director

Chemistry Program Mission Statement

The mission of the chemistry program is to educate each student on the nature of chemistry and to prepare the student with sufficient knowledge and skills to pursue productive work in chemistry and to graduate students who are engaged citizens and scholars.

Program Description

Chemistry is the study of composition, structure and properties of matter. Our students are given a broad-based education to allow students to pursue a variety of careers. The Chemistry major prepares students to be successful in industry, pharmacy, government facilities and graduate or professional schools. The faculty encourage undergraduate research and students work closely with an academic advisor to provide a curriculum tailored to meet the needs of the student. Chemistry majors are in demand for local industry and their research experiment helps them be successful their future graduate education.

Chemistry Program Learning Outcomes

The graduate will be able to:

1. Apply the major concepts, principles and theories of chemistry to solve problems.

2. Demonstrate safe and ethical laboratory and synthesis skills to obtain accurate results.

3. Search the chemical literature, perform research, and create new scientific knowledge.

4. Evaluate data and communicate the findings of a chemical research project.

What You Will Study

The major in chemistry consists of 125-130 credits, including 46 credits of required and elective chemistry courses, 24 credits of required mathematics and physics courses, 7 credits in natural science and biology, and about 27credits of courses to achieve the General Education requirements.

The science and mathematics curriculum for the chemistry major is shown in the table below:

REQUIRED CHEMISTRY COURSES – 45 CREDIT HOURS		
CHEM 101	General Chemistry I and Lab	4 credits
CHEM 102	General Chemistry II and Lab	4 credits
CHEM 201	Organic Chemistry I and Lab	4 credits
CHEM 202	Organic Chemistry II and Lab	4 credits

REQUIRED CHEMISTRY COURSES – 45 CREDIT HOURS		
CHEM 251	Quantitative Analysis and Lab	4 credits
CHEM 362	Instrumental Analysis and Lab	4 credits
CHEM XXX	300 or 400-Level Electives	6 credits
CHEM 410	Biochemistry	4 credits
CHEM 412	Physical Chemistry I	3 credits
CHEM 413	Physical Chemistry II	3 credits
CHEM 494	Proposal Writing in Chemistry	1 credit
CHEM 495	Research in Chemical Science	3 credits
CHEM 496	Seminar in Chemical Science	1 credit
REQUIRED MATHEMATICS COURSES – 16 CREDIT HOURS		
MATH 123	Pre-Calculus	4 credits
MATH 201	Calculus I	4 credits
MATH 202	Calculus II	4 credits
MATH 203	Calculus III	4 credits
REQUIRED PHYSICS COURSES – 8 CREDIT HOURS		
PHSC 201	Introductory Physics I and Lab	4 credits
PHSC 202	Introductory Physics II and Lab	4 credits
REQUIRED BIOLOGY COURSE – 4 CREDT HOURS		
BIOL 130	Introductory Biology for Majors and Lab	4 credits
REQUIRED NATURAL SCIENCE COURSE – 3 CREDIT HOURS		
NSCI 220 or MATH 240	Statistics in Science and Research or Probability and Statistics	3 credits

An AP score of 4 or higher may be used to fulfill the CHEM 101 and CHEM 102 requirement. The initial course in MATH and eligibility to take CHEM 101 will be determined based on math course placement.

Please note that many chemistry and biology classes have a lab. Although the lab is registered for as a separate class, the credit hour totals above include the lab hours.

Additional Requirements

Students must meet all General Education Requirements required for graduation from the University of Charleston. Students should take care to fulfill prerequisites for upper division courses as noted in the course descriptions. In order to graduate, students must earn a C or better in all courses required for the major.

Successful completion of American Chemical Society (ACS) examinations may be required as part of the course assessments.

Chemistry majors should follow the Research Timeline described above in the section about Natural Sciences & Mathematics Department Requirements.

Admission Requirements

Students must gain general admission to the University of Charleston.

CHEMISTRY MINOR

Students can earn a minor in Chemistry by completing 18 credit hours of Chemistry classes (six of the 18 hours may be classes required for other degrees) in required classes. The required classes are:

CHEM 201, CHEM 202, CHEM 412, CHEM 414, CHEM 251, CHEM 251L, CHEM 496 and CHEM 410 or CHEM 411.

Majors outside the Natural Science department may be required to take additional hours as prerequisite or co-requisite classes.

Bachelor of Science
Dr. Xiaoping Sun, Program Director

Chemistry-Biology Dual Program Mission Statement

The mission of the chemistry-biology dual-major program is to educate each student about the nature of chemistry, biology and biochemistry, and to prepare the student with sufficient knowledge and skills to pursue productive work in chemistry, biology or biochemistry in a professional or graduate school, or in the workforce, and to pursue enlightened living and community involvement.

Program Description

This specially-designed BS degree program, not a double major, that allows interested students to obtain a degree combining courses in chemistry and biology within a four-year timeframe.   We believe Dual Major BS degree graduates possessing a strong knowledge base in both chemistry and biology are particularly competitive for professional schools.

Chemistry-Biology Dual Program Learning Outcomes

The graduate will:

1. Apply the major concepts, principles and theories of chemistry and biochemistry to solve problems.

2. Demonstrate safe and ethical laboratory and synthesis skills to obtain accurate results.

3. Search the chemical and biochemical literature, perform research, and create new scientific knowledge.

4. Evaluate data and communicate the findings of a chemical or biochemical research project.

What You Will Study

The Program consists of 39 credits of required chemistry courses, 30-32 credits of required and elective biology courses, 20 credits of required mathematics and physics courses, 3 credits in the Natural Science Sequence, and about 27 credits of General Education. The science and mathematics curriculum for this Dual-Major Program is as follows:

REQUIRED CHEMISTRY COURSES - 39 CREDIT HOURS		
CHEM 101	General Chemistry I and Lab	4 credits
CHEM 102	General Chemistry II and Lab	4 credits
CHEM 201	Organic Chemistry I and Lab	4 credits
CHEM 202	Organic Chemistry II and Lab	4 credits
CHEM 251	Quantitative Analysis and Lab	4 credits
CHEM 362	Instrumental Analysis and Lab	4 credits
CHEM 410	Biochemistry	4 credits

CHEM 411 **OR**	Advanced Organic Chemistry	3 credits
CHEM 420	Advanced Biochemistry	
CHEM 412	Physical Chemistry I	3 credits
CHEM 494	Proposal Writing in Chemistry	1 credit
CHEM 495	Research in Chemical Science	3 credits
CHEM 496	Seminar in Chemical Science	1 credit
REQUIRED BIOLOGY COURSES – 30 to 32 CREDT HOURS		
BIOL 130	Introductory Biology for Majors and Lab	4 credits
BIOL 215 **OR**	General Botany and Lab or General Zoology and Lab	4 credits
BIOL 224		
BIOL 251	Human Anatomy and Physiology I and Lab	4 credits
BIOL 252	Human Anatomy and Physiology II and Lab	4 credits
BIOL 331	Microbiology for Majors and Lab	4 credits
BIOL 332	Genetics and Lab	4 credits
BIOL XXX	300 or 400-level Electives and Labs	6-8 credits
REQUIRED MATHEMATICS COURSES – 12 CREDIT HOURS		
MATH 123	Pre-Calculus	4 credits
MATH 201	Calculus I	4 credits
MATH 202	Calculus II	4 credits
REQUIRED PHYSICS COURSES – 8 CREDIT HOURS		
PHSC 201	Introductory Physics I and Lab	4 credits
PHSC 202	Introductory Physics II and Lab	4 credits
REQUIRED NATURAL SCIENCE COURSE – 3 CREDIT HOURS		
NSCI 220 **Or** Math 240	Statistics in Science and Research or Probability and Statistics	3 credits

An AP score of 4 or higher may be used to fulfill the CHEM 101 and CHEM 102 requirement. The initial course in MATH and eligibility to take CHEM 101 will be determined based on math course placement.

Please note that many chemistry and biology classes have a lab. Although the lab is registered for as a separate class, the credit hour totals above include the lab hours. The student must pass both the lecture and lab portion of the class in order to receive any of the credit.

Admission Requirements

Students must gain general admission to the University of Charleston.

Additional Requirements

Students must meet all General Education required for graduation from the University of Charleston. Students should take care to fulfill prerequisites for upper division courses as

noted in the course descriptions. In order to graduate, students must earn a C or better in all courses required for the major.

DEPARTMENT OF SOCIAL SCIENCES

Dr. Michael Bayly, Department Chair

The Department of Social Sciences presents programs that develop students as participating and contributing members of society and who also develop capacity for aesthetic response. Students acquire knowledge that bears directly on life situations, and develop ideas, attitudes, and analytical skills that provide a sound basis for appreciation of people and society.

At the University of Charleston, the study of the Social Sciences is central to development of an understanding of one's everyday life, as well as an understanding of global culture.

The Multidisciplinary Studies major offer students the opportunity to design their own learning experience in an individualized way.

Bachelor of Arts
Dr. Susan Divita, Program Director

Education Program Mission Statement

The Education program at the University of Charleston prepares students who will be *committed educators, lifelong learners, and community servants*. Education faculty provide students with the opportunity to develop the knowledge, skills, and dispositions to become an effective educator.

Education programs are delivered at the Charleston location only.

There are two program tracks that lead to a bachelor's degree in Education:

1. Teacher Education Program (certification track, results in WV teaching certificate):

Elementary Education (K-6), BA

Elementary Education (K-6)/Special Education (K-6), BA

Elementary Education (K-6) Early Education (Pk-K), BA

Secondary Special Education (5- Adult), BS

Elementary Studies and Child Development

(non-certification, track-does not result in WV Teaching Certificate), BA

Admission to the Education Programs

Students who have gained general admission to the University of Charleston and wish to be admitted to the Education Programs take courses during the first two years at the institution to meet Institutional Learning Outcomes and satisfy Education core requirements. To be officially admitted to the Teacher Education Program, the student must:

Complete 60 credit hours of coursework by the end of the semester in which they apply

Have a **GPA of at least 3.00** in professional education courses, content area, and overall (for students pursuing a teaching certification area degree)

Have a **GPA of at least 2.75** in professional education courses, content area, and overall (for students pursuing Educational Studies)

Have a grade of B or better in MATH 121, ENGL 102, and a 200 level English Literature Elective. Alternate basic skills options are: passing *Praxis Core* (Reading, Writing and Math) scores on file (or an ACT score of 26; or above or revised SAT score of 1170 or above; or attained a single administration a New SAT score of 470 using the combined Evidence Based Reading and Writing and a score of 520 in Math effective May 2016) (*Core* n*ot required for Educational Studies).*

For Math exemption only a minimum individual ACT enhanced score of 21 (effective Nov. 1989) in mathematics during any administration or a single administration SAT score of 530 in Math (effective May 2016).

Sign the West Virginia Background Check policy statement

Complete all freshman-level portfolios (ENGL 101, 102, SPCH 103, UNIV 104, UNIV 105 or UNIV 203 if a transfer student) with passing grades

Participate in the Admission Process (Panels), which includes an interview conducted by Arts and Sciences faculty, public school educators, and community professionals.

Submit electronic portfolio prior to panel interview including:

- Letter of introduction
- Current resume
- Sample lesson plan and reflection
- Philosophy of education
- One field experience evaluation
- Professional learning experience reflection
- Technology work sample and reflection
- Work sample from an Arts & Sciences course and reflection
- Work sample connected to ACEI standards (Elementary Education/Special Education) or CEC standards (Secondary Special Education)

More detailed information concerning the ***Panels Process*** and *Admission Requirements* can be found at **https://www.ucwv.edu/academics/majors-degrees/education/.**

Upon completion of the ***Panels Process***, students are fully admitted, provisionally admitted, or denied admission to the program. Provisional or denied students have two semesters (including summer) to make up deficiencies. If deficiencies are not taken care of in that time, then students may be counseled or re-advised into other programs.

Eligibility for Residency (certification track) or Internship (non- certification track)

To be eligible to enroll in Residency or Internship, the teacher candidate must meet the following requirements:

a. Receive full admission to the Teacher Education program

b. Submit application approved by the Education Program Director within the six months prior to the planned student teaching / internship experience

c. Submit application for Residency Permit, including fingerprinting and consent to have your fingerprint results submitted to the West Virginia Department of Education (certification track only)

d. Complete a minimum of 96 semester hours of appropriate credit

with an overall **3.0** cumulative grade point average (2.75 GPA (Grade Point Average) for non-certification track)

e. Complete at least ¾ of the total course requirements in one's teaching content area plus EDUC 320 (Integrated Methods)

f. Complete all required professional education and most teaching specialization courses with no less than a **3.0** GPA and replace all D's, F's, or I's with a grade of "C" or better

g. Must have taken and passed the Praxis II subject area content test(s) **(Multi-Subjects or CKT)** required for their major (certification track only)

    • Students who take and fail Praxis II tests may be eligible for the WVDE Multiple Measure Waiver which allows students to enter residency without passing Praxis IIs with the understanding that the tests must be passed within a year of beginning student teaching in order to receive a WVDE full teaching permit. Additional information and requirements will be shared with students as needed.

Note: Candidates in either track cannot be enrolled in Residency or Internship and have recorded deficiencies in any academic course work; candidates in the certification track cannot be seeking to retake Praxis Core or Praxis II content exams that were previously failed.

For more information about Residency requirements, see the *Education Program* website at https://www.ucwv.edu/academics/majors-degrees/elementary- education/

The University of Charleston is a member in good standing of the Association for Advancing Quality in Educator Preparation (AAQEP), a national accrediting organization recognized by the Council for Higher Education Accreditation. The University of Charleston is working toward accreditation of its educator preparation programs under the AAQEP standards with an anticipated quality assurance review in spring 2024.

Association for Advancing Quality in Educator Preparation (AAQEP) Standards

Standard 1 Candidate/Completer Performance: Program completers perform as professional educators with the capacity to support success for all learners.

Standard 2 Completer Professional Competence and Growth: Program completers adapt to working in a variety of contexts and grow as professionals.

Standard 3 Quality Program Practices: The program has the capacity to ensure that its completers meet Standards 1 and 2.

Standard 4 Program Engagement in System Improvement: Program practices strengthen the P-20 education system in light of local needs and in keeping with the program's mission.

The Education Program faculty prepares candidates to meet the West Virginia Professional Teaching Standards (WVPTS):

Standard 1: Curriculum and Planning

Standard 2: The Learner and the Learning Environment

Standard 3: Teaching

Standard 4: Professional Responsibilities for Self-Renewal

Standard 5: Professional Responsibilities for School and Community

Education Program Learning Outcomes

The graduate will:

1. Apply and demonstrate discipline specific content knowledge, skills, and practices

2. Apply and creatively demonstrate developmentally appropriate pedagogical knowledge, skills, and practices to prepare K-12 learners for college or career readiness and to promote parental and community involvement.

3. Exhibit appropriate, professional dispositions and ethical practices required of educators

4. Demonstrate, analyze, and apply research skills to think critically about their effectiveness and impact on planning, instruction and assessment for K-12 learners during field work and clinical practice.

5. Pass all necessary Praxis exams and complete all required steps to apply for certification(s) from the WVDE.

Field Experience

All UC Education programs feature a strong field-experience component beginning in the freshman year and culminating with Residency or Internship. Students are placed in a variety of economically and ethnically diverse school placements featuring urban, suburban, and rural schools.

What You Will Study

Education degrees require at least 120 credits, including 24 credits of Professional Education Core courses, 20 credits of clinical practice component, specified credits of Institutional Learning Outcomes, and a variable (depending on major) number of credits in the student's chosen content area(s). The State of West Virginia Department of Education and the Education Program requires a minimum of 125 hours of field experience before beginning Residency.

Additional Requirements for Teacher Education Programs (Certification)

Students should monitor their programs of study carefully due to ongoing curricular changes in many programs. Due to changes made by the West Virginia Board of Education and West Virginia Department of Education, students may be required to complete additional curricular requirements to obtain their bachelor's degree and/or teacher certification.

Students graduating from certification track programs must be eligible for certification in West Virginia to graduate.

Praxis Requirements

Required Praxis exams in certification track programs are associated with particular courses and paid for by vouchers funded through course fees. Students will need to pay out-of-pocket if retakes are required. Study and preparation materials are available both within the Education Program and through the UC library. It is recommended that students also utilize online practice materials available at Learning Express, teacherstestprep.com, **https://study.com/**, or .

Education Program Handbook

The **Education Program Handbook** found under the Student Resources tab) is the authoritative document for specific, detailed descriptions of requirements, expectations, and conditions for admission to, participation in, and graduation from the Education Program. Students should consult that document, as well as his or her advisor, for complete information about the Education Program. Specific course requirements for each major are described in the 4-year degree plans above.

HISTORY-POLITICAL SCIENCE MAJOR

Bachelor of Arts
Professor Bradford W. Deel, Program Director

History-Political Science Program Mission Statement

The History-Political Science program prepares graduates for employment, scholarship, or further study in the areas of law, public policy, or history in service to their professional disciplines and social communities.

Program Description

The History-Political Science dual program produces graduates who lead our governmental and legal institutions. Students are prepared for a life of productive work in governmental agencies, in legal careers (after law school), and in higher education. They are prepared for a life of enlightened living through integration of the University's General Education Outcomes throughout the curriculum. They are prepared for a life of community involvement through an internship and a Senior Thesis tied to the internship.

History-Political Science Program Learning Outcomes

The graduate will:

1. Evaluate political phenomena using political science concepts and theories.

2. Apply historical and global perspectives to political problems and policy issues;

3. Formulate research hypotheses using current social science research tools; and

4. Demonstrate a breadth of historical knowledge with depth in a limited area.

What You Will Study

This course of study is a unique and interdisciplinary degree. A dual major in History and Political Science will focus on the development of institutions and ideas, the role of significant historical and political actors, and the cultural values and structures that shape society. Graduates will be prepared to engage and explore the problems that impact our global society.

All History-Political Science dual program students must satisfy the 120-credit hour requirement for graduation. Students must also, when constructing their plan of study, meet the University of Charleston general curriculum requirements. These additional hours may be used to earn a second major if the student so desires.

University requirements, the History-Political Science curriculum, and the minor in History are outlined in the tables below.

Bachelor of Arts in History-Political Science

History-Political Science Requirements - 45-54 Credit Hours		
HIST 211	World Cultures I	3 credits
HIST 212	World Cultures II	3 credits
HIST 251	Foundations of the American Republic	3 credits
HIST 252	Contemporary America	3 credits
HIST 354	Civil War and Reconstruction	3 credits
HIST 360	History of War	3 credits
HIST 371	History of the Middle East	3 credits
POLS 101	American National Government	3 credits
POLS 102	State and Local Government	3 credits
POLS 200	Foundations of Public Policy	3 credits
POLS 210 OR POLS 230	Comparative Government OR Introduction to Political Philosophy	3 credits
POLS 300	Political Science Research Methods	3 credits
POLS 400	Senior Thesis	3 credits
POLS 492	Internship	3-11 credits
MATH 120	Intermediate Algebra (or higher MATH)	3 credits
GEOG 303	World Geography	3 credits

Completing a Double Major

History-Political Science dual program majors are encouraged to double major with other programs in the broader university community. Double majors must complete all requirements for BOTH majors, with the exception that a single senior thesis is required. Students choosing a double major and who choose to do a senior thesis or project outside of the History-Political Science dual program, must consult with program faculty on the nature of the outside project. The Program expects that a senior thesis completed as part of a double major with a Program degree will engage the discipline in a meaningful way.

Internships

Consistent with the mission of the University of Charleston to educate each student for a life of productive work, enlightened living, and community involvement, faculty recognize that only part of a student's education occurs in the classroom. All History-Political Science dual program majors are required to complete an internship related to their area of interest. Students must receive a minimum of 3 Internship credit hours with a maximum limitation of 15 Internship credit hours. Internships are subject to the following guidelines:

40 hours of work in the internship = 1 hour of credit.

Students must maintain a daily journal of their activities.

Students must submit a 3 to5-page reflection for each 3 hours of credit received for internships.

Internships are also subject to general University of Charleston guidelines. Contact the History-Political Science Program Director for additional information regarding these guidelines.

Three Year Path

Students with exceptional academic qualifications and motivation can finish the History-Political Science dual degree program in only three years. Admission to the three-year path requires approval of the Program Director along with acknowledgement from the student that they will have a substantial academic workload from the first semester and will be required to maintain a substantial academic workload throughout the three years.

The Minor in History requires 18 credit hours. Students must choose three of four 200 level courses listed below and three of four listed 300 level courses listed below.

History Minor - 18 Credit Hours Available Courses		
HIST 211	World Cultures I	3 credits
HIST 212	World Cultures II	3 credits
HIST 251	Foundations of the American Republic	3 credits
HIST 252	Contemporary America	3 credits
HIST 354	Civil War and Reconstruction	3 credits
HIST 360	History of War	3 credits
HIST 371	History of the Middle East	3 credits
GEOG 303	World Geography	3 credits

Admission Requirements

Students must gain general admission to the University of Charleston.

Additional Requirements

Each graduating major in the program must complete and pass a comprehensive examination in their final semester before expected graduation. In order to graduate, students must earn a C or better in all courses required for the major.

Bachelor of Arts
Professor Bradford W. Deel, Program Director

Political Science Mission Statement

The mission of the Political Science program is to prepare graduates for employment, scholarship, or further study in the areas of law, public policy, or criminal justice in service to their professional disciplines and social communities.

Program Description

Students who major in Political Science choose one of three program concentrations:

The **Pre-Law Concentration** emphasizes course work appropriate for those who plan to attend law school upon completion of undergraduate studies.

The **Public Policy Concentration** emphasizes the interconnectedness of political science, policymaking, and specific policy areas. This concentration is appropriate for those who want to pursue positions working directly or indirectly with government. It is also appropriate for those who wish to continue their education with graduate studies in social sciences, such as Political Science, History, or Sociology.

The **Criminal Justice Concentration** focuses on developing the skills needed to pursue careers in law enforcement, criminology, homeland security, or corrections with a focus on those skills needed in management positions. Students are also prepared to pursue graduate studies in Criminal Justice.

The program structure encourages students to double major in other fields such as Psychology, English, or Business.

Prestigious internship opportunities with local, state, and federal government agencies provide valuable field-work experience in the discipline.

Opportunities to present student research at state, regional and national meetings provide students with real world skills and allow them to network with professionals in the field.

Students work with experienced and engaged faculty who are published authors and have taught at both the undergraduate and graduate levels.

Political Science Program Learning Outcomes

The graduate will:

1. Evaluate political phenomena using political science concepts and theories.

2. Apply historical and global perspectives to political problems and policy issues.

3. Formulate research hypotheses using current social science research tools.

Concentration Outcomes

In addition to the program outcomes for all students,

Pre-law graduates will be able to evaluate the relationship between society and legal institutions using legal reasoning skills

Public Policy graduates will be able to integrate knowledge of governmental and non-governmental actors to analyze public policy

Criminal Justice graduates will be able to evaluate societal responses to crime, terrorism and security

What You Will Study

The Political Science major focuses on the actors and institutions of government and the complex relationships that exist among those who seek to influence the process.

Introductory courses in policymaking and policy analysis are also included in this core. Coursework to explicitly promote critical thinking and logic are integrated throughout the curriculum. These requirements are important for all students in the major, but especially for those who intend to pursue a law degree or other graduate degree upon completion of their undergraduate education.

Beyond these requirements, all students seeking a Bachelor of Arts degree must earn at least 120 credit hours. Students must also, when constructing their plan of study, meet all of the University of Charleston general curriculum requirements. These additional hours may be utilized to earn a second major, if the student so desires.

Bachelor of Arts in Political Science

CORE REQUIREMENTS - 42 CREDIT HOURS		
HIST 212	World Cultures II: 17th Century to Present	3 credits
HIST 251	Foundations of the American Republic	3 credits
HIST 252	Contemporary America	3 credits
MATH 120	Intermediate Algebra (or higher math)	3 credits
POLS 101	American National Government	3 credits
POLS 102	State and Local Government	3 credits
POLS 210	Comparative Government	3 credits
POLS 200	Foundations of Public Policy	3 credits
POLS 300	Political Science Research Methods	3 credits
POLS 400	Senior Thesis	3 credits
POLS 490 OR POLS 492	E.A.G.L.E. Internship Internship	12 credits 1-11 credits

Pre-Law Concentration

PRE-LAW CONCENTRATION – 18 CREDIT HOURS		
POLS 230	Introduction to Political Philosophy	3 credits
POLS 260	Judicial Branch Politics	3 credits
POLS 280	Debating Political Issues	3 credits
POLS 314	Constitutional Law I	3 credits
POLS 316	Constitutional Law II	3 credits
POLS Elective	200 or 300-Level Political Science Elective	3 credits

Public Policy Concentration

PUBLIC POLICY CONCENTRATION – 18 CREDIT HOURS		
POLS 240	Legislative Branch Politics	3 credits
POLS 250	Executive Branch Politics	3 credits
POLS 380	Interest Group Politics	3 credits
POLS 390	Ethical Dilemmas in Policy Making	3 credits
POLS 314	Constitutional Law I	3 credits
POLS Elective	200 or 300-Level Political Science Elective	3 credits

Criminal Justice Concentration

CRIMINAL JUSTICE CONCENTRATION - 18 CREDIT HOURS		
CRJS 101	Introduction to Criminal Justice	3 credits
CRJS 242	Introduction to Law Enforcement	3 credits
CRJS 260	Terrorism and Homeland Security	3 credits
CRJS 331 OR POLS 314	Criminal Procedure Constitutional Law I	3 credits
CRJS 356	Criminal Law	3 credits
POLS 260	Judicial Branch Politics	3 credits

Internships

Consistent with the mission of the University of Charleston to educate each student for a life of productive work, enlightened living, and community involvement, faculty recognize that only part of a student's education occurs in the classroom. All students majoring in Political Science, regardless of their concentration, are required to complete 12 credit hours of internship related to their discipline. Most students will complete the 12-credit hour E.A.G.L.E. Internship (POLS 490).   The 12-credit hour requirement may also be met through multiple internships that carry fewer credit hours per internship. Students pursuing this option will register for POLS 492 rather than POLS 490. In extraordinary

183

circumstances, the Program Director can waive up to 9 hours of this requirement. This waiver is typically limited to students who have significant, relevant life experience prior to enrolling in the program. Internships are subject to the following guidelines:

40 hours of work in the internship = 1 hour of credit.

Students must maintain a daily journal of their activities.

Students must submit a 3 to5-page reflection for each 3 hours of credit received for internships.

Internships are also subject to general University of Charleston guidelines. Contact the Political Science Program Director for additional information regarding these guidelines.

Three Year Path

Students with exceptional academic qualifications and motivation can finish the Political Science program in only three years. Admission to the three-year path requires approval of the Program Director along with acknowledgement from the student that they will have a substantial academic workload from the first semester and will be required to maintain a substantial academic workload throughout the three years.

Completing a Double Major

Political Science students are encouraged to double major with other programs in the broader university community. Students pursuing a double major must complete all requirements for BOTH majors, with the exception that a single senior thesis is required. Students choosing a double major and who choose to do a senior thesis or project outside of Political Science must consult with program faculty on the outside project. The Program expects that a senior thesis completed as part of a double major with a Program degree will engage the discipline in a meaningful way. Possible double majors include:

Political Science and Business

Political Science and English

Political Science and Psychology

POLITICAL SCIENCE MINOR

The Minor in Political Science requires the student to complete 18 credits in Political Science.

POLITICAL SCIENCE MINOR - 18 CREDIT HOURS		
POLS 101	American National Government	3 credits
POLS 200	Foundations of Public Policy	3 credits
POLS 210 OR POLS 230	Comparative Government Introduction to Political Philosophy	3 credits
POLS 240	Legislative Branch Politics	3 credits
POLS 250	Executive Branch Politics	3 credits
POLS 260	Judicial Branch Politics	3 credits
Total		**18 credits**

CRIMINAL JUSTICE MINOR

The Criminal Justice Minor in Political Science requires the student to complete 18 credits from Political Science and Criminal Justice.

CRIMINAL JUSTICE MINOR - 18 CREDIT HOURS		
CRJS 101	Introduction to Criminal Justice	3 credits
CRJS 242	Introduction to Law Enforcement	3 credits
CRJS 260	Terrorism and Homeland Security	3 credits
CRJS 331 **OR** POLS 314	Criminal Procedure **OR** Constitutional Law I	3 credits
CRJS 356	Criminal Law	3 credits
POLS 260	Judicial Branch Politics	3 credits
Total		**18 credits**

Admission Requirements

Students must gain general admission to the University of Charleston. A visit to the campus to meet with Admissions personnel and program faculty is strongly encouraged.

Additional Requirements

Each graduating major in the program must complete and pass a comprehensive examination in their final semester before expected graduation. Students must also earn a C or better in all courses required for the major.

PSYCHOLOGY MAJOR

Dr. Michael Bayly, Program Director

Psychology Program Mission Statement

The Psychology program helps students understand the operation of behavior and mental processes of organisms, appreciate psychology as a discipline, science, and profession, and acquire skills necessary for advanced study or work within the discipline.

Program Description

This unique program, offered in two-degree tracks, helps students to better understand human behavior and the processes of organisms, and to learn to appreciate psychology as a discipline. Students will acquire the knowledge and skills necessary for advanced study or work within the discipline. The degree tracks are tailored to meet students' future career plans, whether that includes immediate employment or graduate studies.

Psychology Program Learning Outcomes

At the conclusion of this course of study, the graduate will:

1. Demonstrate the ability to understand, use, and apply the scientific method.

2. Demonstrate mastery of the core fields, paradigms, and theories of psychology.

3. Demonstrate innovation and expertise in the skills representative of academic and applied psychology that will culminate in the production of an undergraduate thesis project that is appropriate to their degree.

4. Demonstrate innovation and mastery of the written and oral communication skill standards of the American Psychological Association that will culminate in the production and presentation of a professional undergraduate thesis.

5. Demonstrate understanding and appreciation of the ethical standards in academic and applied psychology through the integration of ethics in their collective works.

What You Will Study

The Psychology major consists of two tracks, the Bachelor of Sciences (BS) and the Bachelor of Arts (BA). Students in the BS and BA tracks will complete a similar sequence of courses to achieve their respective degrees. Students following both tracks are required to complete a minimum of 120 credit hours. Both tracks prepare students for entering graduate studies. The BS track is more closely aligned with graduate programs that are primarily focused on psychology research. The BA track is more aligned with graduate studies that are primarily focused on practice. The primary distinction between the two tracks is that the BS is the completion of a research project. Students in the BS track, during their senior year, design and conduct their research with guidance and supervision from psychology faculty.

186

The Psychology BS Track

The BS track is intended for students who are interested in conducting research in psychology. It is structured to prepare students with the required skills in research methods, design, and analysis that provides a foundation for graduate education that involves research. Additionally, students will develop a firm foundation in the natural sciences. The BS track culminates in an independent, data-driven human participant research project that the student will have the opportunity to present to a professional audience. The BS track is offered at the Charleston campus.

B.S. Track Core Courses in Psychology		
PSYC 101	Introduction to Psychology	3 credits
PSYC 212	Lifespan Development	3 credits
PSYC 342	Social Psychology	3 credits
PSYC 352 or 360	Cognitive Psychology or Learning and Memory	3 credits
PSYC 351, 353, or 358	Biological Psychology Elective*	6-12* credits
PSYC 351, 353, 354, or 361	Ethics Elective*	
PSYC 355, 359, or 361	Oral Communication Elective*	
PSYC 357 or 498 or SOCI 221	Engagement Elective or 30 hours documented community service*	
Select from PSYC 300+, SOCI 221, and SOCI 322	Psychology Electives	6-12**credits
Total Psychology Core		**27**

*Some courses may fulfill more than one requirement

**Take enough electives to reach 27 hours of psychology core courses

B.S. Track Core Courses in Research Methods		
SSCI 203	Methods for Behavioral Sciences	3 credits
PSYC 315	Psychological Statistics	3 credits
SSCI 320	Computer Assisted Research	3 credits
PSYC 451	Experimental Psychology I	3 credits
PSYC 452	Thesis	3 credits
Total Research Methods Core		**15**

B.S. Track Math and Science Requirements		
MATH 120 or higher	Intermediate Algebra (or higher)	3-4 credits
BIOL 130, BIOL 215+, CHEM 100+, MATH 123+	Choose three courses from among: Biology (with lab), Chemistry (with lab), and/or Math courses	12 credits
Total Math and Science Requirements		**15-16**

Psychology BA Track

The BA track is structured for those students who desire a career in psychology or a related field, but are not particularly interested in conducting research. The BA track includes a cultural diversity requirement in order to expose the student to a wide array of unique experiences that they may encounter outside the classroom. The BA track also includes a research component. However, the final step is a senior research proposal. This project is intended to be more theoretical in nature and will not require the student to conduct human participant research. The BA track is offered at both the Charleston and Online locations.

B.A. Track Core Courses in Psychology		
PSYC 101	Introduction to Psychology	3 credits
PSYC 212	Lifespan Development	3 credits
PSYC 342	Social Psychology	3 credits
PSYC 352 or 360	Cognitive Psychology or Learning and Memory	3 credits
PSYC 351, 353, or 358	Biological Psychology Elective*	6-12* credits
PSYC 351, 353, 354, or 361	Ethics Elective*	
PSYC 355, 359, or 361	Oral Communication Elective*	
PSYC 357 or 498 or SOCI 221	Engagement Elective or 30 hours documented community service*	
Select from PSYC 300+, SOCI 221, and SOCI 322	Psychology Electives**	6-12** credits
Total Psychology Core		**30**

*Some courses may fulfill more than one requirement.

**Take enough electives to reach 30 total hours of psychology core courses.

B.A. Track Core Courses in Research Methods		
SSCI 203	Methods for Behavioral Sciences	3 credits
PSYC 315	Psychological Statistics	3 credits
SSCI 320	Computer Assisted Research	3 credits
PSYC 441	Psychology BA Capstone	3 credits

Total Research Methods Core		12
B.A. Track Math and Diversity Requirements		
MATH 120 or higher	Intermediate Algebra (or higher)	3-4 credits
HUMN 110	Unheard Voices	3 credits
	Choose two diversity electives from: Foreign Language electives (i.e.-SPAN 101, SPAN 102, SPAN 201, FREN 101, FREN 102, etc.), EDUC-204, ENGL-231, ENGL-307, ENGL- 309, ENGL-320, GEOG-303, HIST-212, HIST-360, HIST-371, HIST-373, MUSC-212, POLS-210, SSCI-105, SSCI-106	6 credits
Total Math and Diversity Requirements		**12-13**

Admission Requirements

Students must gain general admission to the University of Charleston.

Additional Requirements for BA and BS Degrees

Students must earn a C or better in all courses, including Psychology electives, that are taken to meet a requirement for the degree program in which they are enrolled. To satisfy graduation requirements, students must also take and pass a comprehensive examination, as determined by the Psychology Program Director.

PSYCHOLOGY MINOR

The minor in Psychology requires that the student complete 18 credits of courses in Psychology. These courses must be completed with a C or better to count toward the minor requirements.

Psychology Minor Must Include:		
PSYC 101	Introduction to Psychology	3 credits
PSYC 212	Lifespan Development	3 credits
PSYC 3XX	Electives*	12 credits
	Total Credits	**18**

*Nine of the 12 credits of electives must be at the 300 level or above and should be selected in conversation with a member of the Psychology faculty and the student's major advisor to ensure the student's educational objectives are met. Other relevant courses may be substituted with the Program Director's approval.

REGIONAL STUDIES IN APPALACHIA MINOR

Professor Hallie Chillag, Coordinator

Regional Studies Minor Mission Statement

The Regional Studies in Appalachia minor aims to connect insights across intellectual disciplines in a systematic and evidence-based manner to understand how and why the region exists as it does. Students will explore the literature, language, anthropology, sociology, geography, and demography of the region. Students will examine internal and external factors that determine and impact the region, historically and presently, and be empowered to best understand and work in the region.

Program Description

The Regional Studies in Appalachia minor comprises an interdisciplinary approach, ranging from a study of Appalachian language to an examination of social issues in Appalachia, to the art, culture, history, and community that make up the Appalachian region.

Regional Studies in Appalachia Minor Outcomes:

At the end of the Appalachian Studies minor, the graduate will:

1. Consider the way that "Appalachia" has been theorized in literature, art, music, and other forms of artistic production

2. Consider the socio-economic practices of Appalachia, both in terms of real- world economy and cultural productions that reflect such socio-economic conditions

3. Understand Appalachia in terms of its history from the 1600s to the present and develop a broad, diachronic approach to understanding its development

4. Have a broad, interdisciplinary background that will enable them to be flexible enough to adjust to jobs and changing economy in the region

What You Will Study

Choose six courses (18 hours):

REGIONAL STUDIES IN APPALACHIA MINOR - 18 CREDIT HOURS		
ENGL 307	Appalachian Literature	3 credits
SSCI 310	WV and Appalachian Region	3 credits
GEOG 303	World and Regional Geography	3 credits
UNIV 460	Behavioral, Social, & Cultural Problems in Appalachia	3 credits
	Other courses in consultation with Program Director	6 credits
Total		**18 credits**

190

MASTER OF ARTS IN MENTAL HEALTH COUNSELING

Dr. Jason Newsome, Program Director

Program Mission Statement

The mission of the Clinical Mental Health Counseling program is to provide quality instruction and training that produces competent professionals who provide effective mental health services to those in need.

Program Description

The Master of Arts degree in Mental Health Counseling is a 60-hour program of study designed to prepare students to enter the field of counseling. The primary objective of the program is to prepare ethical, compassionate professionals who are equipped with the knowledge, values, and skills to promote wellness in the area of mental health. In addition to traditional coursework, students are required to complete a 100-hour practicum and 600-hour internship to meet graduation requirements.

Program Learning Outcomes

At the end of this course of study Graduates will:

1. use assessment techniques and tools to diagnose mental disorders in accordance with the current edition of the *Diagnostic and Statistical Manual of Mental Disorders.*
2. demonstrate competence in the use of basic counseling skills.
3. integrate knowledge of the current version of the *American Counseling Association Code of Ethics* into clinical decision-making.
4. apply theoretical models of counseling and psychotherapy to client problems to develop and implement empirically-supported treatment plans that include consideration for related developmental, social, personality, and environmental factors.
5. evaluate clinical outcomes and use current research to inform revisions in practice of both individual practitioners as well as the related systems.
6. demonstrate competent application of counseling concepts and models that shows respect and appreciation for diversity.

What You Will Study

The program requires 60 hours with 15 required courses and a minimum of 4 elective courses. All courses in the table below are required for licensure and also meet the curricular requirements for The Council for Accreditation of Counseling and Related Educational Programs.

NOTE: The university cannot apply for accreditation until it has students in all phases of the program. The university must have students in their final semester at the time the application is submitted.

Number	Credit Hours	Course Title
COUN 500	3	Professional Counseling Orientation
COUN 501	3	Human Growth and Development
COUN 502	3	Multicultural Counseling
COUN 503	3	Counseling Theories
COUN 510	3	Introduction to Mental Health Counseling
COUN 511	3	Counseling Techniques
COUN 512	3	Theories and Techniques of Assessment
COUN 520	3	Diagnosis and Treatment Planning
COUN 513	3	Research and Program Evaluation
COUN 600	3	Group Counseling
COUN 601	3	Career Counseling
COUN 602	3	Substance Abuse Counseling and Prevention
COUN 603	3	Marriage and Family Counseling
COUN 698	3	Practicum
COUN 699	6	Internship
Total Hours	**48**	
	12	Electives
Total Hours	**60**	

Admission Requirements

Students must gain general admission to the University of Charleston and must:

- Have a bachelor's degree from an accredited institution with a minimum cumulative GPA of 2.5
  (NOTE: A GPA of 3.0 must be maintained while in the program.)

- Have at least 9 semester credit hours (or 12 quarter hours) in social sciences that includes Introduction to Psychology and Lifespan Development or their equivalent.
- Submit 2 letters of recommendation from professional and/or academic sources. Suitable examples include professors, employers, or organizational leaders who can address the applicant's ability to complete graduate-level coursework, motivation, and ethics.
- Applicants will compose a Statement of Purpose of 750 – 1,000 words that addresses the following:
  - Discuss why you desire to become a counselor, including factors that influenced you as well as professional goals.
  - Discuss your strengths and weaknesses in terms of academics as well as interpersonal relationships.
  - Describe your perspective on diversity and ways to show respect to individuals from cultural backgrounds different from your own.

Additional Requirements

Master of Arts in Clinical Mental Health Counseling majors must meet all University of Charleston graduation requirements, complete all program and course assignments, and must take and pass a comprehensive examination during the final semester.

The Counseling Program Handbook that students receive prior to their orientation is the authoritative document for specific, detailed descriptions of requirements, expectations, and graduation from the Counseling Program. The handbook also provides students with information related to licensure as a professional counselor. Students should consult that document, as well as his or her advisor, for complete information about the Counseling Program.

HERBERT JONES SCHOOL OF BUSINESS

Dr. Cedric Stone, Dean

The School of Business offers career-oriented undergraduate and graduate degree programs designed to provide students with a broad education, encompassing the knowledge base, analytical thought processes, ethical grounding, technology and communication skills, and professional preparation necessary to meet the challenges of today's business environment.

The Herbert Jones Undergraduate School of Business offers programs leading to the Bachelor of Science in Business Administration (BSBA), Associate of Science in Business, Master of Science in Business & Data Analytics (MBDA), and Master of Business Administration (MBA).

Undergraduate bachelor's degrees, associate degrees, minors, and concentrations are outlined below. The requirements for each can be found in the program descriptions that follow.

Bachelor of Science in Business Administration (BSBA) Degree with majors in:

ACCOUNTING*

BUSINESS ANALYTICS*

DIGITAL MARKETING*

ENTREPRENEURSHIP*

FINANCIAL PLANNING*

MANAGEMENT* (offered online)

PROFESSIONAL SELLING

SPORT ANALYTICS*

SPORT BUSINESS*

SPORT MEDIA*

*Accredited by the Accreditation Council for Business Schools & Programs

Early Degree Completion

Motivated students can complete the traditional/residential BSBA degree in fewer than four years by following – and successfully completing – a carefully designed curriculum plan prepared in consultation with their faculty advisor.

Accelerated BSBA/MBA Program

The Accelerated BSBA/MBA program enables students to earn both a Bachelor of Science in Business Administration and a Master of Business Administration in the time and cost it would traditionally take to complete just an undergraduate degree.

Motivated students can complete the undergraduate business degree in three years and then transition into the MBA program for the final summer, fall, and spring semesters. The program provides flexibility to shape an experience to fit personal goals and interests.

Qualified students will enroll in the program in the fall of their first year. They become part of a learning community with other students in the program, with a dedicated advisor to support them as they complete both degrees.

Associate of Science (AS) Degree:

BUSINESS ADMINISTRATION* (offered in-seat and online)

*Accredited by the Accreditation Council for Business Schools & Programs

Available Undergraduate Minors and Concentrations

Undergraduate Minors

BUSINESS ADMINISTRATION MINOR

DIGITAL MARKETING & SALES MINOR

ENTREPRENEURSHIP MINOR

SPORT BUSINESS MINOR

Undergraduate Concentrations

All students pursuing a BSBA degree have the option of completing one or more of the following concentrations:

ACCOUNTING CONCENTRATION

BUSINESS ANALYTICS CONCENTRATION

DIGITAL MARKETING CONCENTRATION

ENTREPRENEURSHIP CONCENTRATION

FINANCIAL PLANNING CONCENTRATION

MANAGEMENT CONCENTRATION

PROFESSIONAL SELLING CONCENTRATION

SPORT ANALYTICS CONCENTRATION

SPORT BUSINESS CONCENTRATION

SPORT MEDIA CONCENTRATION

Graduate Degree Programs in the School of Business

The Graduate School of Business offers two master's degree programs and three graduate certificates. Requirements for graduate degrees can be found in the program descriptions that follow.

Graduate degree programs (hybrid and online as indicated below):

MASTER OF BUSINESS ADMINISTRATION (MBA)* (hybrid & online)

With a concentration in:

BUSINESS ANALYTICS

HEALTHCARE MANAGEMENT

[MANAGEMENT](#)

[MASTER OF SCIENCE IN BUSINESS AND DATA ANALYTICS (MBDA)](#)
(in-seat and online)

Available Graduate Certificates

Master of Business Administration (MBA) Certificates:

[MANAGEMENT](#)

*Accredited by the Accreditation Council for Business Schools & Programs

Accreditation

The academic programs at the University of Charleston are accredited by the Higher Learning Commission (HLC). The School of Business received full accreditation from the Accreditation Council of Business Schools & Programs (ACBSP) for all programs offered in July 2021 with graduates when the ACBSP self-study was completed. The programs not yet eligible for ACBSP accreditation are the M.S. in Business & Data Analytics and the Professional Selling BSBA. The specialized ACBSP accreditation focuses on recognizing teaching excellence, achieving student learning outcomes, and incorporating a continuous improvement model.

Our financial planning BSBA curriculum is approved as a Registered Program by the CERTIFIED FINANCIAL PLANNER™ Board of Standards, Inc., 1425 K Street NW #800, Washington, DC 20005.

Professional Certifications, Continuing Education, and Leadership Training Programs

The School of Business offers a variety of degree and non-degree coursework that prepares students for professional certification exams, including the Certified Public Accountant (CPA), Microsoft Office Specialist (MOS), and CERTIFIED FINANCIAL PLANNER™ certification. The school also has the expertise to offer customized programs to help organizations fill gaps in employee training as organizations grow and change. Some non-degree workshops and seminars may allow participants to earn continuing education credits.

Dr. Melissa Farrish, Department Chair

The University of Charleston School of Business offers a Bachelor of Science degree in Business Administration (BSBA) on the Charleston campus with a choice of the following majors:

ACCOUNTING*

BUSINESS ANALYTICS*

DIGITAL MARKETING*

ENTREPRENEURSHIP*

FINANCIAL PLANNING*

MANAGEMENT* (also offered online)

PROFESSIONAL SELLING

SPORT ANALYTICS*

SPORT BUSINESS*

SPORT MEDIA*

*Accredited by the Accreditation Council for Business Schools & Programs

All majors under the BSBA degree will complete a common business core of 15 courses (45 credits) that provides students a foundation of knowledge in all functional areas of business and satisfies an undergraduate Common Professional Component (CPC) recognized by the Accreditation Council of Business Schools & Programs (ACBSP). The School of Business programs noted above are fully accredited by ACBSP. ACBSP accreditation focuses on recognizing teaching excellence, achieving student learning outcomes, and acknowledging rigorous quality standards. New programs yet to be recognized with ACBSP accreditation will be submitted for ACBSP accreditation once they have existed for two years and students have graduated from the major.

Beyond the business core, students gain additional specialized knowledge, skills, and abilities from coursework in their majors. The program's design gives students a common core of knowledge and the ability to choose a major that meets their unique educational goals. The Business Administration degree prepares broadly educated, analytical thinkers with the knowledge base, ethical grounding, professional preparation, and technology skills necessary to meet the challenges of today's business environment. The programs provide the professional preparation needed for productive careers in their chosen professions, a commitment to continuous learning, and a sense of responsibility to serve their communities.

The BSBA majors integrate professional preparation certifications and experiences throughout the core and major courses. The business administration core includes professional certification opportunities for Microsoft Office Specialist (MOS) certification, Google Analytics, and an Ethical Leadership Certification from the National Association of State Boards of Accountancy Center for the Public Trust.

Program Learning Outcomes

In addition to demonstrating the competencies associated with the University's institutional outcomes, graduates will demonstrate the achievement of learning outcomes in the BSBA core and their chosen major(s).

Business Administration Core Outcomes

The graduate will:

1. Develop technical, professional, and interpersonal skills to maximize effective communication in business and legal environments.

2. Apply ethical frameworks and evaluate global, economic, and cultural environments.

3. Apply and evaluate various critical thinking and decision-making models using appropriate analytical and quantitative techniques.

The BSBA degree programs require the completion of all business core outcomes and the major outcomes.

BSBA Core Program of Study

Students pursuing one of the majors under the BSBA degree complete a total of 45 credits in the business core plus additional credits within their major. The 45-credit core for the BSBA degree is as follows:

BS in Business Administration – Core Requirements for All Majors		
ACCT 201	Principles of Accounting I	3
ACCT 202	Principles of Accounting II	3
ECON 201	Principles of Microeconomics	3
ECON 202	Principles of Macroeconomics	3
BUSI 220X	Information Systems & Software Applications	3
BUSI 241	Business Communication	3
BUSI 316	Business Statistics I	3
BUSI 317	Business Statistics II	3
BUSI 407	Global Dimensions of Business	3
BUSI 450	Business Strategy	3
FINA 312	Business Finance	3
MGMT 311	Principles of Management	3
MRKT 321	Principles of Marketing	3
Legal Studies	Select one: BUSI 231 or SPBU 460	3
Ethics	Select one: BUSI 360, ACCT 462, or SPBU 435	3
BSBA Core:		**45**

Admission

Students must gain general admission to the University of Charleston.

Additional Requirements

Business students are required to take MATH 121 College Algebra or higher. Students who plan to pursue graduate study are strongly advised to take MATH 201 Calculus I.

All students in a BSBA degree program must complete an exit-level assessment in their major. BSBA degree program graduates must take and pass the Peregrine Business Administration exit assessment in the senior year with a final grade of C or above in the capstone class, BUSI 450 Business Strategy. To graduate, students must maintain an overall 2.0 cumulative grade point average, a 2.0 cumulative grade point average in the BSBA core, and a 2.0 in the major. Students must earn 30 hours of upper-division credits. The University requires a grade of C or higher for general education courses.

A PC laptop is required for students pursuing a BSBA major. Although non-PC devices (e.g., MacBook) can potentially meet the technical specifications, they will not work with all the required software, as we have experienced in several business classes and applications. Ultimately, the student must ensure that all devices are compatible with the necessary classroom software, including Power BI, Tableau, and R.

> Processor: Intel or AMD Quad Core Processor i7 or better
> Minimum Processor Speed: x64 Processor: 1.4 GHz
> Operating System - Microsoft Windows 10 or greater
> Memory: minimum RAM at least 4 GB (8 GB recommended)
> Minimum of 20 GB Hard Drive; Solid State Drive (SSD) preferred
> Webcam, microphone, speaker
> Appropriate connections: WIFI, Ethernet, USB-3

Students may consult the program director or IT Help Desk for assistance.

Internship Program

All undergraduate business students are strongly encouraged to participate in at least one internship work experience at the University; internship experiences are required in the curriculum for majors in business analytics, digital marketing, management, professional selling, sport analytics, sport business, and sport media. Internship experiences improve the marketability of graduates, often leading directly to offers of employment. Current students are enjoying placements with regional and national firms. The University's Center for Career Development (CCD) assists students when searching for internships or cooperative employment. Students should consult with their faculty advisor and the CCD for assistance.

BUSINESS ADMINISTRATION MINOR

The minor in Business Administration is offered both in-seat in Charleston and online. The minor allows students from other disciplines to develop business skills. Students must complete 21 credits consisting of the following courses:

Minor in Business Administration		
BUSI 151*	Introduction to Business	3
ACCT 201	Principles of Accounting I	3
ACCT 202	Principles of Accounting II	3
ECON 201	Principles of Microeconomics	3
FINA 312	Business Finance	3
MGMT 311	Principles of Management	3
MRKT 321	Principles of Marketing	3
Total for Minor:		**21**

*Students planning to enter UC's Master of Business Administration (MBA) program may substitute BUSI-316 for BUSI-151.

Completing a Double Major

Students earning a BSBA degree may choose more than one major or pursue a concentration in another field of study. Such combinations give the student a broader range of opportunities upon graduation. These options are especially attractive for majors in the three-year program or those who wish to complete the 150-credit hour requirements for the CPA examination.

Undergraduate students pursuing two BSBA majors in the School of Business may complete one 3-credit hour internship to satisfy both majors. The student must obtain prior approval from the academic advisor(s) of both majors before registration. The academic advisor(s) will assess the relevance of the internship and ensure that it meets each major's academic standards and learning objectives. If the internship is deemed suitable, the academic advisor(s) will waive one of the internship requirements for graduation.
Note: Students completing two majors (one BSBA and one BS or BA) must complete the required BSBA internship and should consult the academic advisor for details on the secondary major.

BSBA Concentrations

All students pursuing a BSBA degree have the option of completing one or more of the following concentrations:

Accounting
Business Analytics
Digital Marketing
Entrepreneurship
Financial Planning
Management
Professional Selling
Sport Analytics
Sport Business
Sport Media

Dr. Melissa Farrish Program Director

Business Administration Core Outcomes

The graduate will:

1. Develop technical, professional, and interpersonal skills to maximize effective communication in business and legal environments.

2. Apply ethical frameworks and evaluate global, economic, and cultural environments.

3. Apply and evaluate various critical thinking and decision-making models using appropriate analytical and quantitative techniques.

What You Will Study

The Associate of Science (AS) degree in Business Administration is offered both in-seat in Charleston and online and requires the following 30 credit hours of business courses:

Business Courses Required for the AS Degree in Business Administration	
BUSI 151 Introduction to Business	3
ACCT 201 Principles of Accounting I	3
ACCT 202 Principles of Accounting II	3
ECON 201 Principles of Microeconomics	3
FINA 312 Business Finance	3
MGMT 311 Principles of Management	3
MRKT 321 Principles of Marketing	3
Electives in the following: ACCT, BSAN, BUSI, ECON, ENTR, FINA, MGMT, MRKT, or SPBU	9
Business Total	**30**

Note: Candidates must complete the University's general education requirement that includes: UNIV 204, ENGL 101, ENGL 102, SPCH 103, two Humanities FLEX Electives, two STEM FLEX electives, two Social Science FLEX Electives, and two additional FLEX electives. All students must complete sufficient electives to achieve the 60 credits required to earn an associate degree.

Students who complete the two-year associate degree in business administration may continue to earn their BSBA with one of our undergraduate business majors.

Admission Requirements

Students must gain general admission to the University of Charleston.

Additional Requirements

An associate degree at UC requires 60 earned academic credits (15 of which must be residential credits), fulfillment of foundational requirements and outcomes of the academic program, a cumulative UC grade point average of at least 2.0, and demonstration of achievement of exit-level standards for discipline and program outcomes.

Professor Suzanne King, Program Director

Accounting Major Mission Statement

The mission of the Accounting Program is to prepare students with the knowledge and analytical skills specific to the accounting discipline, an understanding of the role of the accounting professional in serving the business community and the public, and the knowledge, skills, and attitudes necessary for adapting and responding to an evolving world.

Program Description

The Accounting Program prepares students for accounting positions in public accounting, industry, not-for-profits, and government. Students choosing public accounting can work in auditing, tax preparation and planning, forensic accounting, or management advisory services in a professional services firm. Those in the industry will work for business or government organizations as accountants, controllers, financial analysts, cost accountants, budget analysts, or internal auditors.

Program highlights include:

A Professionalism Program to help students develop professional skills and competencies.

An emphasis on accounting and business analytics and problem-solving to prepare students for today's business challenges.

Integration of ethical practice and critical thinking throughout the accounting curriculum.

Opportunity for students to complete the National Association of State Boards of Accountancy Ethical Leadership Certification Program.

Opportunity for students to complete the accelerated program in fewer than four years.

Opportunity for students to complete both the undergraduate Accounting program and the Master of Business Administration in fewer than five years.

The Accounting program has earned specialized business accreditation from the Accreditation Council for Business Schools & Programs (ACBSP).

The Accounting Program will help students develop the skills and competencies necessary to succeed in professional examinations. The requirements to sit for the CPA exam differ from state to state. Under current West Virginia law, CPA applicants may sit for the exam with a baccalaureate degree and completion of accounting and business courses. To become a licensed CPA, the candidate must pass the exam and meet the 150-hour education and the experience requirements. The specific requirements can be found on the West Virginia Board of Accountancy website. The requirements for all State Boards of Accountancy can be found on the National Association of State Boards of Accountancy website. Students should consult with their academic advisor. The Accounting major is offered as an in-seat residential program on the Charleston campus.

All BSBA students must fulfill the BSBA Core outcomes. In addition, Accounting graduates will:

1. Demonstrate an understanding of the accounting information system and accounting cycle: the ability to identify, gather, measure, summarize, report, and analyze financial data.

2. Analyze a variety of financial, managerial, and tax accounting problems and cases and apply the appropriate framework in problem solving.

Program Requirements

The Accounting major is a BS in Business Administration degree and requires a total of 120 institutional credits, including 45 credits of business administration core courses, 24 credits of accounting courses beyond the introductory courses included in the core, and completion of all general education requirements and additional coursework to total 120 credits. Successful completion of this program qualifies the student for a Bachelor of Science degree in Business Administration with a major in Accounting. A Professional Track requiring an additional 15 hours is available for students planning to sit for the CPA examination.

Accounting Major		
ACCT 301	Intermediate Accounting I	3
ACCT 302	Intermediate Accounting II	3
ACCT 322	Cost Accounting	3
ACCT 360	Accounting Information Systems	3
ACCT 412	Advanced Accounting	3
ACCT 423	Federal Taxes - Individual	3
ACCT 448	Auditing	3
Select one (1) course from the following:		3
ACCT 403	Intermediate Accounting III	
ACCT 424	Federal Taxes - Business	
	Total:	24

The Professional Track helps prepare students for the Certified Public Accounting (CPA) examination. The curriculum addresses the three required core exams (Financial Accounting and Reporting, Auditing and Attestation, and Regulation). Additionally, students must pass one discipline exam (Business Analysis and Reporting, Tax Compliance and Planning, or Information Systems and Controls). Students will work with their advisor to determine which accounting elective courses they should take based on their chosen discipline examination.

The Professional Track should also be selected by students planning to sit for other professional accounting examinations such as the CIA (Certified Internal Auditor), CISA (Certified Information Systems Auditor), and CMA (Certified Management Accountant).

Accounting Major Professional Track		
ACCT 301	Intermediate Accounting I	3
ACCT 302	Intermediate Accounting II	3
ACCT 322	Cost Accounting	3
ACCT 360	Accounting Information Systems	3
ACCT 403	Intermediate Accounting III	3
ACCT 412	Advanced Accounting	3
ACCT 423	Federal Taxes - Individual	3
ACCT 424	Federal Taxes - Business	3
ACCT 448	Auditing	3
BSAN 205	Introduction to Business Analytics	3
Accounting Electives		
Select three (3) courses from the following:		9
BSAN 315	Big Data Analytics	
BSAN 325	Predictive Modeling for Business Analytics	
DASC 250	Data Visualization	
FINA 205	Fundamentals of Financial Planning	
FINA 405	Investments	
FINA 410	Retirement Planning	
FINA 415	Estate Planning	
	Total:	39

Accounting majors are required to take MATH 121 College Algebra or MATH 123 Pre-Calculus. Students who plan to pursue graduate study are strongly advised to take MATH 201 Calculus I.

Accounting majors are encouraged to take ACCT 201 Principles of Accounting I and ACCT 202 Principles of Accounting II in the freshman year.

Additional Requirements

Accounting majors must meet all University of Charleston graduation requirements and must take and pass the Peregrine Exit Assessment during their senior year. Additionally, students must earn a C or above in Business Strategy (BUSI 450).

Completing a Double Major or Concentration

Accounting majors can double major or add a concentration in Financial Planning, Business Analytics, or another business-related major under the BSBA degree program.

Such a combination gives the student a broader range of opportunities upon graduation. This is especially attractive for majors in the three-year program or those planning to complete the 150-credit hour education requirement for the CPA examination.

Accounting Concentration

Students pursuing other BSBA majors can choose to add an Accounting concentration (12 credits). The Accounting concentration provides students with a foundation in financial, managerial, and tax accounting. Because accounting is the language of Business, majors with an Accounting concentration will develop a better understanding of financial information, providing them with enhanced analysis and decision-making skills in their specific business disciplines. The 12 credit hours required for a concentration in Accounting are:

Accounting Concentration		
ACCT 301	Intermediate Accounting I	3
ACCT 302	Intermediate Accounting II	3
ACCT 322	Cost Accounting	3
ACCT 423	Federal Income Tax – Individual	3
	Total for Concentration:	**12**

BUSINESS ANALYTICS MAJOR

Dr. Taiwo Ajani, Program Director

Business Analytics Major Mission Statement

</div>

The mission of the Business Analytics program is to equip students with the knowledge and skills necessary to collect, organize and analyze data, thereby enabling learners to effectively apply and communicate insights for business decision-making**.**

The Business Analytics program aims to motivate students for success in the Business Analytics domain, one of the most attractive domains, with very high industry demand, providing well above average salaries, excellent future employment opportunities, and intellectually rewarding work.

<div align="center">

Program Description

</div>

Our undergraduate Business Analytics major has all the important content, tools, processes, and intellectual resources necessary to prepare students for a successful Business Analytics career. The job market for business analytics candidates with the right skills is expected to remain lucrative for the next 10 to 20 years, so Business Analytics is an excellent direction for highly motivated students to move in. The program will help students develop quantitative data analysis skills and corresponding communication skills necessary for solving real-world business problems and communicating solutions. This is an interdisciplinary major that utilizes courses from computer science and data analytics programs.

The Business Analytics major is offered as an in-seat residential program on the Charleston campus. The program integrates professional exposure with an internship experience to better prepare students with the skills employers desire. Business Analytics majors will complete a 45-credit business core and have an opportunity to double major in complementary areas of Business or major/minor in fields outside the business area. The program uses industry-relevant tools to cover critical topics such as Data Visualization, Big Data Analytics, and Machine Learning. The program can be expected to be rigorous and intellectually stimulating. The Business Analytics program has earned specialized business accreditation from the Accreditation Council for Business Schools & Programs (ACBSP).

<div align="center">

Business Analytics Major Program Learning Outcomes

</div>

All BSBA students must fulfill the BSBA Core outcomes. In addition, Business Analytics graduates will:

1. Collect, organize, analyze, and apply data-driven tools and techniques to evaluate business decisions.

2. Communicate quantitative and qualitative information and demonstrate proficiency with the help of a variety of data analytic tools.

<div align="center">

What You Will Study

</div>

The Business Analytics major is part of the BS in Business Administration degree and requires a total of 120 institutional credits of academic work, including 45 credits of business administration core courses, 24 credits of major courses, and 51 credits of general education and other elective credits.

Business Analytics – Required Courses in Major		
Course	**Title**	**Credits**
BSAN 205	Introduction to Business Analytics	3
DASC 100	Introduction to Scientific Programming	3
DASC 250	Data Visualization	3

Total Credits for Major (45 BSBA Core + 24 Required):		**69**

Admission Requirements

Students must gain general admission to the University of Charleston.

Additional Requirements:

Business Analytics majors must meet all University of Charleston graduation requirements and must take and pass the Peregrine Exit Assessment in the last semester of the senior year. Additionally, students must earn a C or above in Business Strategy (BUSI 450).

Business Analytics Concentration

Students pursuing other BSBA majors can add a Business Analytics concentration (12 credits). The Business Analytics concentration trains students in the skills and competencies required to implement and oversee data-driven business decisions. This concentration builds and supports the ability to 1) collect, process, and describe datasets, 2) draw inferences from data, 3) understand and create useful models for business predictions, and 4) make sense of model outputs for optimal and robust decisions. It includes the development of skills in computer programming and software applications to analyze data in a variety of contexts and diverse industries. The 12 credit hours required for a concentration in Business Analytics are:

Business Analytics Concentration		
BSAN 205	Introduction to Business Analytics	3
BSAN 315	Big Data Analytics	3
BSAN 325	Predictive Modeling for Business Analytics	3
DASC 100	Intro to Scientific Programming	3
	Total for Concentration:	**12**

Dr. Rick Ferris, Program Director

Digital Marketing Mission Statement

In concert with the university mission to educate each student for a life of productive work, enlightened living, and community involvement, the mission of the Digital Marketing program at the University of Charleston is to develop students to be successful and ethical marketing professionals capable of making valuable contributions to organizations in the U.S. and around the world.

Program Description

The Digital Marketing major is designed to appeal to learners interested in applying marketing principles to digital technology to improve business and marketing decision-making. The digital marketing major studies the history of marketing as a discipline with special attention to 21st-century digital marketing trends. Foundational material, history, theory, applied simulation, and professional marketing certifications will combine to produce a skilled, market-ready marketing practitioner.

The Digital Marketing program produces a work-ready marketing manager for 21st-century employment. The students will research, create, and execute a digital marketing campaign through application. The rapid growth of social media and digital media fosters growth in employment opportunities for graduates with the skill set and experience in applying digital technology in marketing. This interdisciplinary program utilizes two courses in Digital Media Design and integrates professional preparation certifications, an internship experience, and a digital marketing strategy capstone experience to better prepare students with the digital marketing skills employers desire. The Digital Marketing program has earned specialized business accreditation from the Accreditation Council for Business Schools & Programs (ACBSP).

Digital Marketing Major Program Learning Outcomes

All BSBA students must fulfill the BSBA Core outcomes. In addition, Digital Marketing graduates will:

1. Create digital marketing campaigns.

2. Evaluate customer action attribution.

3. Evaluate marketing return on investment.

What You Will Study

The Digital Marketing major is part of the BS in Business Administration degree and requires a total of 120 institutional credits of academic work, including 45 credits of business administration core courses, 21 credits of major courses, and 54 credits of general education requirements and electives. This allows students to include a concentration or double major in complementary business areas or double major/minor in fields outside the business area, such as communications. Such a combination gives the student broader opportunities and increases marketability upon graduation.

Digital marketing majors will take a 45-credit business administration core, including professional certification opportunities for Microsoft Office Specialist certification (MOS), Google Analytics, and others.

Digital Marketing – Required Courses in Major		
Course	**Title**	**Credits**
MRKT 371	Digital Marketing	3
MRKT 401	Advertising	3
MRKT 402	Marketing Research	3
MRKT 420	Digital Marketing Strategy Capstone	3
MRKT 498	Marketing Internship	3
DMDS 202	Image Manipulation and Web Aesthetics	3
DMDS 302	Web & Social Media Design	3
Required Credits in Digital Marketing Major:		**21**
Total Credits for Major (45 BSBA Core + 21 Required in Major):		**66**

Admission Requirements

Students must gain acceptance to the University of Charleston.

Additional Requirements

Digital Marketing majors must meet all University of Charleston graduation requirements and must take and pass the Peregrine Exit Assessment in the last semester of the senior year. Additionally, students must earn a C or above in Business Strategy (BUSI 450).

DIGITAL MARKETING & SALES MINOR

The Digital Marketing & Sales minor provides students with a digital marketing and sales foundation and prepares graduates to work more effectively in a digitally connected world.

The minor complements non-business and business majors interested in launching a marketing, advertising, sales, public relations, or content creation career. The minor provides students with an understanding of successful search optimization techniques, professional selling strategies, and sales management knowledge. As part of the coursework, students will earn professional certifications to manage appropriate digital communication tools to engage target markets. The 18 credit hours required for the Digital Marketing & Sales minor are:

Digital Marketing & Sales Minor		
ECON 201	Principles of Microeconomics	3
MRKT 321	Principles of Marketing	3

MRKT 371	Digital Marketing	3
MRKT 401	Advertising	3
MRKT 240	Introduction to Sales & Personal Selling	3
DMDS 202	Image Manipulation & Web Aesthetics	3
	Total for Minor:	**18**

Digital Marketing Concentration

Students pursuing other BSBA majors can choose to add Digital Marketing as a concentration (12 credits). The concentration in Digital Marketing will prepare students to apply marketing principles to digital technology to improve business and marketing decision-making. Students will research, create, and execute a digital marketing campaign. Students will be skilled and market-ready through the completion of professional marketing certifications. The 12 credit hours required for a concentration in Digital Marketing are:

Digital Marketing Concentration		
MRKT 371	Digital Marketing	3
MRKT 401	Advertising	3
MRKT 402	Marketing Research	3
DMDS 202	Image Manipulation & Web Aesthetics	3
	Total for Concentration:	**12**

Dr. Lisa McCool, Program Director

Entrepreneurship Program Mission Statement

The mission of the Entrepreneurship program is to develop socially responsible entrepreneurs skilled in creating value by demonstrating innovative solutions to business formation and growth as the cornerstone of our economy.

Program Description

The Entrepreneurship major is an in-seat residential program on the Charleston campus. It is designed to appeal to learners at all life stages, including traditional freshmen students and adult learners seeking a flexible, efficient, and innovative learning experience. Students who major in Entrepreneurship will develop an understanding of business ventures in all phases, including conception, launch, and sustainability. Emphasis will be placed on innovative and interdisciplinary problem solving, identifying viable business opportunities, securing financial resources, and successfully identifying and reaching target markets using the Business Model Canvas.

The Entrepreneurship program has earned specialized business accreditation from the Accreditation Council for Business Schools & Programs (ACBSP). Students who graduate with this degree will develop skills that will prepare them for careers as either entrepreneurs who establish a business or intrapreneurs who utilize their innovative skills for another organization. These skills include:

- Design-thinking problem identification and innovation
- Methodologies for risk assessment and assessment of success and failure
- Identifying consumer behavior patterns
- Research skills
- Analysis of market data

Entrepreneurship Major Program Learning Outcomes

All BSBA students must fulfill the BSBA Core outcomes. In addition, Entrepreneurship graduates will:

1. Integrate marketing and communication skills to demonstrate innovative solutions to business formation and growth.

2. Demonstrate competency in developing and executing strategic approaches to business operations and challenges.

3. Apply financial, operational, and market knowledge to create business plans and presentations that identify paths to value creation.

Program Requirements

The BSBA degree program requires the completion of all business core outcomes and major outcomes. The Entrepreneurship major is part of the BSBA degree and requires 120 institutional credits of academic work, including 45 credits of BSBA core courses, 24 credits of required entrepreneurship courses, and 51 credits of other elective credits.

The program offers the opportunity for students to add a concentration, a double major in complementary areas such as business analytics, or major/minor in other fields such as communication or digital media and design.

Entrepreneurship – Required Courses in Major		
ENTR 201	Introduction to Innovation & Entrepreneurship	3
BUSI 232	Business Law II	3
MRKT 240	Introduction to Sales & Personal Selling	3
ENTR 320	Applied Entrepreneurship	3
MGMT 318	Small Business Management	3
MRKT 371	Digital Marketing	3
MGMT 445	Operations Management	3
ENTR 420	Finance and Strategy Capstone	3
Total Credits Required for Entrepreneurship Major		**24**
Total Credits for Major (45 Core + 24 Required)		

Admission Requirements

Students must gain general admission to the University of Charleston.

Additional Requirements

Entrepreneurship majors must meet all University of Charleston graduation requirements and must take and pass the Peregrine Exit Assessment in the last semester of the senior year with a C or above in Business Strategy (BUSI 450).

ENTREPRENEURSHIP MINOR

The Entrepreneurship minor is an in-seat residential program on the Charleston campus.

The Minor in Entrepreneurship is designed to encourage students from other disciplines outside the BSBA majors to develop entrepreneurial skills. The minor is founded on the understanding that a common process exists for realizing new ventures, whether start-up businesses, non-profits, artistic endeavors, or growth within existing enterprises.

The program focuses on developing the entrepreneurial mindset and the ability to think and act creatively, innovatively, opportunistically, and proactively. Skills learned in entrepreneurship classes will apply to any business – large or small, public or private, corporate or not-for-profit, local or global. Students will learn to recognize, create and shape opportunities, provide leadership, and build teams to create economic and social value.

The University of Charleston believes that experiential, active engagement is the most effective way to help students acquire the skills, knowledge, and mindset fundamental to entrepreneurship.

Entrepreneurship Minor Learning Outcomes

1. Integrate marketing and communication skills to demonstrate innovative solutions to business formation and growth.
2. Demonstrate competency in developing and executing strategic approaches to business operations and challenges.
3. **Apply financial, operational, and market knowledge to create business plans and presentations that identify paths to value creation.**

Minor Program Requirements

The Entrepreneurship Minor consists of 24 credit hours.

Entrepreneurship Minor Courses		
Course		**Credits**

	Total for Concentration:	**12**

Dr. Jacob Tenney, Program Director

Financial Planning Mission Statement

The mission of the Financial Planning Program is to prepare graduates to develop a marketable skill set involving theory-based financial knowledge and strong analytical tools. Students learn to create comprehensive financial plans to help clients reach financial and life goals.

Program Description

The Financial Planning curriculum is approved by the Certified Financial Planner Board of Standards, Inc. and prepares students to sit for the CFP® Certification Exam. The Financial Planning program has also earned specialized business accreditation from the Accreditation Council for Business Schools & Programs (ACBSP).

According to the Bureau of Labor Statistics, the median salary nationally for personal financial advisors in 2021 was just over $94,000 per year (somewhat lower locally), and the predicted number of job openings is about 21,500 per year. There is demand for financial planners as many current financial planners are close to retirement, and many baby boomers are approaching or are in retirement. Some of the career opportunities in Financial Planning include:

Registered Investment Adviser

Accounting and Tax Registered Investment Advisor

Banking, Credit Unions, Trust Companies

Brokerage Companies

Life & Disability Insurance Companies

Property and Casualty Insurance Companies

Independent Broker/Dealers

Government, Academia/Research

Financial Planning Major Program Learning Outcomes

All BSBA students must fulfill the BSBA Core outcomes.

In addition, Financial Planning graduates will:

1. Gather and analyze client data to design financial plans that help clients meet life and financial goals.

2. Effectively Communicate with clients regarding their financial situation throughout the process of creating and implementing a comprehensive financial plan.

What You Will Study

The Financial Planning degree program includes 120 credits of academic work. These hours include 45 credits of Business Administration core, 24 credits of Financial Planning core, and 51 credits of general education requirements and electives. The 51 credits of general education requirements and electives allow students to include a concentration, minor, or possibly double major with Accounting, Entrepreneurship, Management, or another applicable major. Such a combination gives the student a broader range of opportunities upon graduation.

Financial Planning Major Core		
Course	**Title**	**Credits**
FINA 205	Fundamentals of Financial Planning	3
FINA 305	Risk Management & Insurance	3
FINA 310	Client Communication & Counseling	3
FINA 405	Investments	3
FINA 410	Retirement Planning	3
FINA 415	Estate Planning	3
ACCT 423	Federal Income Taxes - Individual	3
FINA 420	Financial Planning Capstone	3
Total		**24**

Admission Requirements

Students must gain general admission to the University of Charleston.

Additional Requirements

Financial Planning majors must meet all University of Charleston graduation requirements, BSBA degree graduation requirements, including applicable exit exam(s), and Financial Planning Major graduation requirements, including a grade of C or better in the Financial Planning Capstone course. To graduate, students must have a cumulative GPA of at least 2.0 in the BSBA Core, the Financial Planning Major, the 30 upper division credits, and overall.

Financial Planning students are required to take MATH 121 College Algebra or MATH 123 Pre- Calculus. Students who plan to pursue graduate study are advised to take MATH 201 Calculus I. All Financial Planning majors are expected to complete the freshman writing courses (ENGL 101 and ENGL 102) before the beginning of the sophomore year.

Internships are strongly recommended to be marketable and better prepared for careers in Financial Planning. Internships can count for credit hours if the internship experience is approved and the required paperwork is completed.

Financial Planning majors must take and pass the Peregrine Exit Assessment in the last semester of the senior year. Additionally, students must earn a C or above in Business Strategy (BUSI 450).

Financial Planning Concentration

Students pursuing other BSBA majors can add a Financial Planning concentration (12 credits). The concentration in Financial Planning will prepare students to effectively plan for their financial future and opportunities in financial planning and advising. Note that this concentration does not have all the courses required to be prepared to sit for the CFP® certification exam. A major in financial planning is recommended to prepare to become a CFP® Professional. The 12 credit hours required for a concentration in Financial Planning are:

Financial Planning Concentration		
FINA 205	Fundamentals of Financial Planning	3
FINA 305	Risk Management & Insurance	3
FINA 310	Client Communication & Counseling	3
FINA 405	Investments	3
	Total for Concentration:	**12**

MANAGEMENT MAJOR

Dr. Melissa Farrish, Program Director

Management Major Mission Statement

The mission of the Management program is to prepare socially responsible, ethical, and insightful leaders with a vision to create positive change in their environment by applying management concepts and theories to solve organizational problems.

Program Description

The Management major is available online and as an in-seat residential program on the Charleston campus. The BSBA MGMT program provides a broad overview of the functional areas of Business with an emphasis in management. The management major focuses on planning, organizing, leading, and controlling an organization's resources.

The management major will appeal to learners at all life stages, including high school graduates, working adults, and military members seeking a flexible, efficient, and effective learning experience. The major prepares students for entry-level management positions in business, government, public service, and technical environments, as well as experienced managers or mid-career professionals wishing to advance their careers. The management major gives students a comprehensive understanding of the principles, processes, and practices of managing people and organizations. Areas of emphasis include organizational behavior, sales management, human resource management, small business management, leadership, operations management, and team development. The Management program has earned specialized business accreditation from the Accreditation Council for Business Schools & Programs (ACBSP).

Students graduating with this degree will develop skills in problem-solving and decision-making, leadership, team building, effective communication, and performance assessment. The Bureau of Labor Statistics projects 1.1 million openings in management occupations each year from 2022-2032. The growth is expected to be driven by the formation of new organizations and the expansion of existing ones, which will require more workers to manage these operations.

The major prepares students for a broad range of occupations. Career opportunities for program graduates include administrative services managers, advertising, promotions, marketing managers, compensation and benefits managers, management analysts, business consultants, operations managers, business development managers, human resource managers, retail managers, and training and development managers.

Management Program Learning Outcomes

All BSBA students must fulfill the BSBA Core outcomes.

In addition, Management graduates will:

1. Integrate various functional areas of Business to guide innovation, formulate strategy, and solve complex business problems.

2. Apply management concepts and approaches to lead employees through organizational change.

3. Evaluate management theories and practices in corporate, government, and small business settings.

Program Requirements

The Management major requires 120 credits, including 45 credits of Business Administration core courses, 24 credits of Management major courses, and 51 credits of general education requirements and electives. The 51 credits of general education requirements and electives allow students to pursue a concentration or double major in Accounting, Digital Marketing, Financial Planning, Entrepreneurship, Business Analytics, or another business-related field. Students can also consider a major/minor in communication, psychology, digital media design, or political science. Such a combination gives the student broader opportunities and increases marketability upon graduation. Management majors gain practical work experience through internships, student organizations, and community service.

MANAGEMENT Major Courses		
Course	**Title**	**Credits**

PROFESSIONAL SELLING MAJOR

Dr. Ross Murray, Program Director

Professional Selling Mission Statement

The mission of the Professional Selling program is to prepare students with professional selling strategies, sales management knowledge, and strategic selling processes to be successful and ethical sales professionals capable of making valuable contributions to organizations in the U.S. and worldwide.

Program Description

The Professional Selling major is focused on developing contemporary work-ready sales professionals for business-to-business and business-to-consumer selling. Our program concentrates on modern industries, products, services, and methodologies to address a growing national need for highly skilled sales professionals. The major provides students with a foundational understanding of sales processes combined with applied, practical learning opportunities via direct interaction with partner companies. Partner firms assist with sales curriculum development and delivery, ensuring the UC graduates are equipped and motivated to be high-performing sales professionals with the prerequisite knowledge, skills, and contacts to secure post-college sales roles.

Program Learning Outcomes

All BSBA students must fulfill the BSBA Core outcomes. In addition, Professional Selling graduates will:

1. Develop professional sales skills.

2. Apply appropriate sales processes to selling situations.

3. Demonstrate sales leadership potential.

What You Will Study

The Professional Selling major is part of the BS in Business Administration degree and requires 120 institutional credits of academic work, including 45 credits of business administration core courses, 24 credits of major courses, and 51 credits of general education requirements and electives. The major allows students to pursue a double major, such as Digital Marketing, Accounting, Financial Planning, Entrepreneurship, Management, or Business Analytics, or a minor in another area. Students can also double major in fields outside the business area, such as communications or digital media design. Such combinations give the student broader opportunities and increase marketability upon graduation.

Professional Selling majors will take a 45-credit business administration core that includes professional certification opportunities for Microsoft Office Specialist certification (MOS), Google Analytics, and others. Certifications in Professional Selling major courses may include Google Analytics, HubSpot, Salesforce, and certifications offered by the National Association of Sales Professionals.

PROFESSIONAL SELLING Major Courses

Professor Jess Baker, Program Director

Sport Analytics Mission Statement

The Sport Analytics Program prepares students to develop careers in the expanding sport analytics field. Students will progress through the program and understand how to develop and interpret analytical analyses within sport, including knowledge of developing, collecting, and analyzing data sets and business and sport business acumen.

Program Description

Sport Analytics is an interdisciplinary major incorporating computer science and data analytics courses, a 45-credit business core, and major courses in sports business and sports analytics. The major provides students with progressive learning opportunities that prepare them for possible career opportunities as a sport statistician, sport data analyst, sport sales analyst or market research analyst. In addition, students will be actively involved in experiential learning experiences that challenge their acquired skills and prepare them to contribute productively to their chosen communities.

Students complete an internship in Sport Analytics in their senior year.

Practical-based instruction from academic professionals with experience in the sport industry. Experiential opportunities are included to gain applied experience outside the classroom.

Class assignments that prepare students for the work that is required in the sport industry; in-class work is focused on the application of knowledge gained.

A 45-credit core for the Business Administration degree (BSBA) prepares students for successful management, administrative, and leadership roles in sport business and business administration.

An option for a Sport Business minor consisting of 18 hours in sport business courses as specified in the Sport Business Minor section.

The Sport Analytics program blends general education, Business, data analytics, computer science, and sport management courses in a curriculum designed to prepare graduates for positions in intercollegiate and interscholastic athletic programs, professional sport organizations, sport marketing agencies, and entrepreneurship development. Sport Analytics is a developing field in the sport industry and students are encouraged to pursue these new and exciting opportunities.

The Sport Analytics program has earned specialized business accreditation from the Accreditation Council for Business Schools & Programs (ACBSP). The Sport Analytics major is an in-seat residential program on the Charleston campus.

Sport Analytics Program Learning Outcomes

All BSBA students must fulfill the BSBA Core outcomes.

In addition, Sport Analytics graduates will:

1. Develop programming, analytical, and data analysis skills for utilization in statistical and analytical sport settings. Actively apply

written, public speaking and personnel management skills in sport industry environments.

2. Actively apply written, public speaking and personnel management skills in sport industry environments.

3. Demonstrate the ability to locate, evaluate and effectively utilize research information as a sport industry professional.

Program Requirements

The BS in Business Administration degree with a major in Sport Analytics requires a foundational business administration core of 45 credits, 29 credits of Sport Analytics major courses, and 46 credits of general education requirements and electives. The program includes experiential learning opportunities and a diverse selection of sport business classes to prepare the graduate for a sports industry career. Practicum and internship experiences are required to allow the student to work with a sport business organization.

The university's location in the hub of the region's business, financial, government, and medical center opens the door to many prospects for practical work experience. An internship in the sport industry is required for graduation. Students are encouraged to pursue regional, national and international sport business internship opportunities.

Students must meet all University General Education course requirements, BSBA core, and Sport Analytics major degree requirements for graduation, including applicable exit exam(s). In addition, students must achieve a "C" or higher grade in each Sport Business course.

Sport Analytics majors must meet all University of Charleston graduation requirements and must take and pass the Peregrine Major Exam in the last semester of the senior year with a C or above in Business Strategy (BUSI 450).

Completing a Double Major and/or an Associate Degree in Business

The design of the Sport Analytics major encourages students to complete a second major or a minor in another field through a selection of elective courses. For example, a student may decide to obtain a second major in a business or an outside field such as Communications. Sport Analytics majors will also complete all the requirements for a bachelor's degree in Business Administration (BSBA) while pursuing their major. Students should consult with program faculty to select all coursework supporting the Sport Analytics major.

Sport Analytics Concentration

Students pursuing other BSBA majors can add a Sport Analytics concentration (12 credits). The Sport Analytics concentration trains students to make data-based decisions within the sport industry. Students will gain familiarity with statistical software, knowledge of statistical methods, data collection, processing, and analysis, and experience in the research design process. The 12 credit hours required for a concentration in Sport Analytics are:

Sport Analytics Concentration		
SPBU 101	Intro to Sport Business	3
SPBU 220	Coaching Theory	3
SPBU 325	Sport Analytics I	3
SPBU 425X	Sport Analytics II	3
	Total for Concentration:	**12**

Professor Jess Baker, Program Director

Sport Business Mission Statement

The University of Charleston Sport Business program strives to provide our students with progressive learning opportunities to enhance their communication, critical thinking, creativity, and teamwork skills. In addition, students will be actively involved in experiential learning experiences that challenge their acquired skills and prepare them to contribute productively to their chosen communities.

Program Description

The Sport Business major will gain academic, experiential, and practical knowledge to prepare them for the growing sport industry. The Sport Business curriculum prepares graduates for positions in intercollegiate and interscholastic athletic programs, professional sport organizations, sport marketing agencies, municipal management, facility and event management, and entrepreneurship development. SPBU majors are encouraged to support UC athletics and the surrounding sports community actively. The program offers:

- An internship in the sports field anywhere in the United States or internationally.
- Practical-based instruction from academic professionals with experience in the sport industry.
- Experiential opportunities to gain applied experience outside the classroom.
- Class assignments that prepare students for the work that is required in the sport industry
- In-class work focused on the application of knowledge gained.
- A 45-credit core for the Business Administration degree (BSBA) that prepares students for successful management, administrative, and leadership roles in sport business and business administration.
- An option for a concentration in another business discipline.

The Sport Business program blends general education, Business, and sport business courses in a curriculum designed to prepare graduates for positions in areas such as intercollegiate and interscholastic athletic programs, professional sport organizations, sport marketing agencies, facility management, recreation management, and entrepreneurship development.

The Sport Business program has earned specialized business accreditation from the Accreditation Council for Business Schools & Programs (ACBSP). The Sport Business major is an in-seat residential program on the Charleston campus.

Sport Business Major Program Learning Outcomes

All BSBA students must fulfill the BSBA Core outcomes.

In addition, Sport Business graduates will:

1. Perform as a member of a team in varying capacities, environments, and levels of responsibility.

2. Exhibit developed creativity, design, management, and analytical skills.

3. Demonstrate the ability to locate, evaluate and effectively utilize research information as a sport industry professional.

Program Requirements

The Sport Business major is part of the BS in Business Administration degree. This major consists of a foundational business administration core of 45 credits and 26 credits of Sport Business major courses, including experiential learning opportunities and a diverse selection of sports business classes to prepare the graduate for a career in the sport industry. Practicum and internship experiences are required to allow the student to work with a sports business organization.

The University's location in the hub of the region's business, financial, government, and medical centers opens the door to many practical work experience prospects. An internship in the sport industry is required for graduation. Students are encouraged to pursue regional, national, and international sport business internship opportunities.

Sport Business Major – Required Courses		
Course	**Title**	**Credits**
SPBU 101	Introduction to Sport Business	3
SPBU 298	Practicum Experience	1
SPBU 301	Sport Sales/Marketing	3
SPBU 310	Recreation & Fitness Management	3
SPBU 320	Facility/Event Management	3

SPBU 360	Sport/Business Psychology	3
SPBU 490	Senior Seminar	1
SPBU 498	Sport Internship	3
SPBU	SPBU Elective	3
Required Credits in Sport Business Major:		**26**
Total Credits (45 BSBA Core + 26 SPBU Major):		**71**

Students must gain general admission to the University of Charleston.

Additional Requirements

Students must meet all General Education course requirements for graduation from the University of Charleston. In addition, students must achieve a "C" or higher grade in each Sport Business course.

Sport business majors must meet all University of Charleston graduation requirements. They must take and pass the Peregrine Major Exam in the last semester of their senior year with a C or above in Business Strategy (BUSI 450).

SPORT BUSINESS MINOR

The Minor in Sport Business is designed to encourage students from other disciplines outside the BSBA majors to develop sports industry skills. The minor in Sport Business requires the student to complete 18 credit hours of Sport Business (SPBU) coursework as follows:

Course and Title	Credits
SPBU 101 Introduction to Sport Business	3
Plus, Choose two (2) from the following:	6
SPBU 250 Social Issues in Sport/Business	
SPBU 225 Sport Media	
SPBU 220 Coaching Theory	
Plus, Choose two (2) from the following:	6
SPBU 301 Sport Sales & Marketing	
SPBU 340 Sport Economics	
SPBU 320 Facility/Event Management	
SPBU 360 Sport and Business Psychology	
Plus, Choose one (1) from the following:	3
SPBU 435 Sport Ethics	
SPBU 460 Sport Law	
Total Credits for SPBU Minor	**18**

Completing a Double Major and/or an Associate Degree in Business

The design of the Sport Business program encourages students to complete a second major or a minor in another field through a judicious selection of elective courses. For example, a student may decide to obtain a second major in a Business major or in an outside field such as Communications. Sport Business majors will also complete all the requirements for a Bachelor's Degree in Business Administration while pursuing their major. Students should consult with program faculty to select all coursework that will support the Sport Business major.

Sport Business Concentration

Students pursuing other BSBA majors can add a Sport Business concentration (12 credits). The concentration in Sport Business will provide students with a business acumen within the sport industry. Students will explore career paths within the Business of sport and obtain knowledge of the principles of marketing, finance, economics, and law as they pertain specifically to the sport industry, and their application to working within sport.

The 12 credit hours required for a concentration in Sport Business are:

Sport Business Concentration		
SPBU 101	Intro to Sport Business	3
SPBU 301	Sports Sales/Marketing	3
SPBU 320	Facility/Event Management	3
SPBU 340	Sport Economics	3
	Total for Concentration:	**12**

SPORT MEDIA MAJOR

Professor Jess Baker, Program Director

Sport Media Program Mission

The mission of the Sport Media Program is to provide students the ability to gain the competencies and knowledge related to the field of sport media. Students in this program will utilize experiential learning, case study analysis, and class projects in order to develop written and oral communication skills, the understanding of what role the media plays in both the sport industry and society, and the attributes needed to contribute to the industry upon graduation.

Program Description

Sport Media is an interdisciplinary major blending general education, communication, business administration, and sport business courses with internship/practicum experiences to prepare the graduate for media/communication opportunities in the sport industry. Classes also provide practicum opportunities, service learning and internship experiences that allow the student to work and gain experience with sport media organizations. The program will culminate in a bachelor's degree in Business Administration with a major in Sport Media. The program is closely aligned with UC athletics and the Sports Information Director (SID) in offering the student an experiential education throughout the four-year plan. The program offers:

- An internship in the field of Sport Media during the senior year.
- Practical-based instruction from academic professionals with experience in the sports industry.
- Experiential opportunities to gain applied experience outside the classroom.
- Class assignments that prepare students for the work that is required in the sport industry
- In-class work focused on the application of knowledge gained.
- A 45-credit core for the Business Administration degree (BSBA) that prepares students for successful management, administrative, and leadership roles in sport business and business administration.
- An option for concentration in another business discipline.

Graduates are prepared for sport-related career opportunities, including:

- Sport Information Director (SID)
- Assistant Athletic Director in Media and Communication
- Sport Broadcasting
- Sport Journalism
- Director of Sports Programming
- Media Relations Director
- Social Media Director
- Producer for Sport Programming

The Sport Media program has earned specialized business accreditation from the Accreditation Council for Business Schools & Programs (ACBSP). The Sport Media major is an in-seat residential program on the Charleston campus.

Sport Media Major Program Learning Outcomes

All BSBA students must fulfill the BSBA Core outcomes. In addition, Sport Media graduates will:

1. Develop, create and implement broadcasting, journalism and public relations skills for sport and event management.

2. Actively apply written, public speaking and personnel management skills in sport industry environments.

3. Demonstrate the ability to locate, evaluate and effectively utilize research information as a sport industry professional.

What You Will Study

The Sport Media major is part of the BS in Business Administration degree, requiring a foundational business administration core of 45 credits and 26 credits of Sport Media major courses. The program includes experiential learning opportunities and a diverse selection of sport business classes to prepare the graduate for a sports industry career. Practicum and internship experiences are required to allow the student to work with a sports business organization.

The university's location in the hub of the region's Business, financial, government, and medical center opens the door to many prospects for practical work experience. An internship in the sport industry is required for graduation. Students are encouraged to pursue regional, national, and international sport business internship opportunities.

Dr. Suvayan De, Program Director

John Finlayson, MBA, Associate Director of Development

Master of Business Administration Mission Statement

In concert with the University mission to educate each student for a life of productive work, enlightened living, and community involvement the mission of the Master of Business Administration program at the University of Charleston is to develop students to be successful and ethical business leaders capable of making valuable contributions to organizations in the U.S. and around the world.

Program Description

The University of Charleston's innovative MBA Program is designed for current and emerging professionals from diverse backgrounds who want to advance their careers. The MBA curriculum focuses on the practical application of theory to provide students with the business and problem-solving skills they need for decision making in a constantly changing economic world.

The MBA program has earned specialized business accreditation from the Accreditation Council for Business Schools & Programs (ACBSP). The program is offered fully online and in a hybrid format with class meetings in Charleston, WV. Each modality features six starts per year and rapid completion pathways. Our program is 33 credit hours and is divided into eleven seven-week courses designed to accommodate the following groups of students:

- Working and emerging professionals, and military members, with professional work experience

- Recent undergraduates and emerging professionals from all undergraduate majors

- UC PharmD or Physician Assistant (PA) students who are enrolled in the pharmacy or PA program take MBA coursework as a PharmD or PA student and complete their PharmD (or PA) and MBA degrees simultaneously.

- Medical students enrolled at the WV School of Osteopathic Medicine (WVSOM) may pursue the Master of Business Administration (MBA) degree in conjunction with the WVSOM's Doctor of Osteopathic Medicine (D.O.) degree through a partnership and memorandum of understanding.

The MBA program is designed to increase the analytical, decision-making and managerial business skills of students. Instruction involves cross-functional, cross- industry and boundary-spanning perspectives on management. Students are exposed to problems and solutions in human resource management, business law, managerial accounting and finance, applied marketing, forecasting, international business and trade, financial management, ethics, strategic management, and a concentration area.

Complex business cases are also utilized in MBA courses to provide students with additional experience in assuming the roles and responsibilities of organization leaders and managers. Students work in teams as they encounter organizational issues, problems, and opportunities in a simulated business environment. The challenges and tasks confronting students are modeled on those faced daily by managers in real-world situations.

Our MBA program is strategically designed to provide the flexible learning environment and quality learning experience adult learners need to balance life/work needs and compete in today's business environment. Flexibility is provided with a rapid admissions process; six starts per year; 7-week terms; an asynchronous delivery; and possible degree completion in one year for highly motivated students. The high quality of our program is evidenced by a technology and media-rich learning environment; world-class industry expert instructors and faculty; an applied learning environment; opportunities for engaging learning experiences with faculty, industry leaders, and classmates; and highly-valued concentrations.

MBA Program Learning Outcomes

At the conclusion of the MBA program, the graduate will:

1. Evaluate business problems by utilizing modeling and systems thinking to make informed decisions across functional areas.

2. Demonstrate effective written and verbal communication skills, including interpersonal interaction and team behavior.

3. Evaluate and apply principles of executive leadership and managerial development, including an understanding of legal and ethical decision making in a professional environment.

4. Evaluate the impact of contemporary business trends on business decision making.

5. Evaluate, select and apply principles of strategic planning to improve long-term business viability.

6. Appraise and select the various forms of economic systems and models used by world-class organizations in the global marketplace.

Program Structure

The MBA program is available fully online and in a hybrid format with weekly class meetings on the Charleston, WV campus. The online program also offers, but does not require, weekly check-ins to engage with instructors and classmates. The eight core courses in the program are in 7-week sessions and are three-credit hours each. The capstone experience of the MBA program is the Strategic Decision-Making course, which should be taken during the student's last semester. The program is designed to be completed in 12-16 months and students may choose from available concentrations. Highly motivated students interested in a fast-track may be able to complete our MBA in as little as one year.

Regional students, athletes, and graduate assistants should enroll in the hybrid sections of the MBA program. Students enrolled in the hybrid MBA program without 2+ years of relevant professional work experience will also enroll in six credit hours of MBA Professional Experience coursework that includes additional weekly meetings and professional practice in the Greater Regional Charleston community; these professional experience courses are three credit hours each for two semesters.

Professional experience coursework meets the needs of emerging business professionals in the central Appalachian region seeking to earn their MBA. Students will be paired with regional mentors, introduced to regional business networking opportunities, and

have two required internships. At least one of these internships is required to be off campus. All these activities enhance our students' ties to the region, opening professional opportunities during the program and after graduation.

Graduation from the MBA Program requires a minimum cumulative GPA of 3.0 in MBA coursework, calculated using the final grade for each course. Students should always maintain a minimum cumulative GPA of 3.0 in the program. Students falling below this level at the end of a course may be placed on academic probation and may be required to repeat a course(s) and/or do remedial work under the supervision of faculty members.

Students should achieve a cumulative GPA of 3.0 by the end of the academic term following the one in which the probation period was established, or they may be dismissed from the MBA Program. Should the student wish to appeal his/her dismissal, he/she must do so within fourteen calendar days from the date of receipt of the dismissal letter, unless the Program Director grants a delay due to extenuating circumstances.

MBA graduation requirement

Students must have an overall MBA program GPA of 3.0 in the 33 credit hours {MBA core plus concentration courses) with no D or F grades in courses.

MBA Core Courses (24 credit hours)

1. MBA 671 Management .... 3 credits
2. MBA 672 Managerial Accounting.. 3 credits
3. MBA 673 Applied Marketing.. 3 credits
4. MBA 674 Quantitative Methods for Business & Economics 3 credits
5. MBA 675 International Business & Trade............................. 3 credits
6. MBA 676 Managerial Economics... 3 credits
7. MBA 677 Managerial Finance.. 3 credits
8. MBA 678 Strategic Decision Making.................................... 3 credits

MBA Concentrations (9 credit hours each)

In addition to the MBA core courses, MBA students must choose one concentration (9 credits) from the following:

Management Concentration:

Demonstrate ability to apply management theories to improve performance of organizations.

1. MBA 711 Organizational Behavior .... 3 credits
2. MBA 712 Operations Management .... 3 credits
3. MBA 713 Leadership and Ethics.. 3 credits

Healthcare Management Concentration:

Develop solutions to operational issues in the management of healthcare systems.

1. MBA 721 Healthcare Informatics .... 3 credits

2. MBA 722 Healthcare Economics...................................... 3 credits

3. MBA 723 Healthcare Policy & Ethics .... 3 credits

Business Analytics Concentration:

Demonstrate ability to apply business analytics tools to find solutions to business problems.

1. MBA 731 Business Analytics for Managers............. 3 credits

2. MBA 732 Data Visualization & Data Mining .... 3 credits

3. MBA 733 Data Science Applications & Technologies...... 3 credits

Experiential Learning Track

Required for regional students, athletes, and GAs, enrolled in the hybrid program without two years of relevant professional work experience (defined as Exempt or Professional, e.g. nurse, by the Department of Labor).

1. MBA 591 Experiential Learning I - - 3 credits

2. MBA 592 Experiential Learning II - - 3 credits

Transfer Credit

Students must take a minimum of twenty-four (24) total credit hours from the University of Charleston, three of which must be the MBA 678 capstone course.

Transfer credit up to a maximum of 9 credit hours from a regionally accredited university may be accepted (subject to approval by the MBA Program Director). Students must take the MBA 678 capstone course and at least eight other MBA courses at the University of Charleston to receive their MBA from the University of Charleston.

Refunds

The weekly hybrid or online format may consist of weekly meetings in addition to required online work each week. Should an MBA student withdraw from the Program, the following policies and procedures pertain:

- **Death of the student, spouse, parent or child; job or position change, including job relocation:** Should any of these events transpire during a course, prorated tuition for that course will be reimbursed for each of the course lessons not yet completed.

- **Dissatisfaction with the Program or any personal reason beyond that listed above:** Should withdrawal of this nature transpire during a course the student will not be reimbursed for the unfinished course. If withdrawal occurs at the end of a course, the student will not be charged for the next course provided written notification is given to the Program Director in advance of registration for the next course. If the withdrawing student has

already participated in the International Practicum, he/she will be responsible for the remaining amount due for their prior participation.

- **<u>Withdrawal Procedure</u>**: Students withdrawing from the Program for any reason, must immediately provide the Program Director a written, signed and dated request with rationale. The student will be officially withdrawn when the required notification has been recorded in the Student Solutions Center. The student will be notified in writing once the withdrawal is official.

- **<u>For Students Using DOD Tuition Assistance</u>** Department of Defense Instruction (DoDI) 1322.25, "Voluntary Education Programs: The Department requires the return of unearned TA funds on a proportional basis through at least the 60 percent portion of the course regardless of the reason for withdrawal (service-related or otherwise). The return of any TA funds will be returned directly to the military service, not to the service member. The requirement to return unearned TA funds on a proportional basis applies to the TA portion only. Any calculation performed by the institution would consider only TA program funds. For example, the Service paid $250.00 and the student paid $30.00 out-of-pocket. In this scenario, if the student withdrew at the 60 percent point and the institution's return of unearned TA policy calls for a 10 percent return of TA funds at that point, the institution would return $25 (10 percent of $250) to the Service. The Department provided flexibility inherent in the use of the language "proportional" (vice pro-rated) to allow educational institutions to align their institutional refund policies with the return of unearned TA funds. The Department encourages educational institutions to particularly work with service members that stop attending due to a military service obligation in identifying solutions that will not result in a student debt for the returned portion. (Created: June 05, 2014)

Contact Information can be found at: http://www.ucwv.edu/academics/master-of-business-administration/

Admission Requirements

(Visit: https://www.ucwv.edu/academics/majors-degrees/master-of-business-administration-mba/)

To be considered for admission to the MBA program, students must submit the following to the Office of Admissions:

Completed MBA application;

Official transcripts showing the student has earned a bachelor's degree from a regionally accredited institution (unofficial, in-progress transcripts may be considered for a conditional admission decision) with a cumulative GPA of at least 2.50[1];

Undergraduate prerequisites in accounting, economics, and statistics[2];

[1]May be waived for qualified PharmD and PA students

[2]May be met with short-courses from McGraw-Hill and/or equivalent

professional work experience

Applications are reviewed on a rolling basis for fall, spring, and summer terms, including mid-semester start points.

MASTER OF BUSINESS ADMINISTRATION (MBA) CERTIFICATES

The School of Business offers graduate certificates for business professionals in business analytics, healthcare management, and management designed to provide skills and knowledge to complement experience or grow expertise in a specific subject. Courses are available fully online and in a hybrid format. The courses are in 7-week sessions and are three-credit hours each. Students may continue graduate study to earn the Master of Business Administration (MBA) as each certificate satisfies 12 of the required 33 hours for the MBA degree.

Students must earn a grade of "C" or better in each course in the certificate programs and maintain at least a 2.5 cumulative grade point average.

BUSINESS ANALYTICS CERTIFICATE

Program Mission Statement

The mission of the MBA Business Analytics certificate program is to provide business professionals with the understanding and capabilities required to do well in a data-focused business environment. Our certificate program will teach students how to apply business analytics for better decision-making. Students will be able to increase their analytical skills, enabling them to stay ahead of the business world's constant changes.

Program Description

The MBA Business Analytics Certificate Program gives business executives the skills and proficiency to accurately assess data and make judicious decisions to help their organizations expand and remain competitive in the present data-driven corporate realm. Students will develop an appreciation of business analytics and the capacity to carry out data analysis approaches to make informed business decisions.

Program Learning Outcomes

At the end of this course of study, graduates will be able to:

1. Develop recommendations and strategies based on insights gathered from data analytics.
2. Apply quantitative tools and perform analysis of business problems.
3. Demonstrate industry-relevant tools for data visualization & data mining.
4. Develop the capacity to download, filter, clean, manipulate, and manage large datasets.

HEALTHCARE MANAGEMENT CERTIFICATE

Program Mission Statement

The mission of the MBA Healthcare Management certificate program is to prepare students to excel in leadership positions within the healthcare sector. The program is intended to give students a strong base of business fundamentals and healthcare management, emphasizing the distinct challenges and possibilities available within the healthcare sector. This program is designed to give knowledge in different positions within the healthcare sector, so students in this certificate program should be proficient in effectively managing healthcare organizations. This program will also help to understand healthcare regulations and policies in depth and make decisions that can improve patient outcomes and increase organizational performance.

Program Description

The MBA Healthcare Management certificate program is a perfect choice for professionals considering a career in healthcare leadership and provides education and training for those seeking these roles. The program educates students on the fundamentals of healthcare management and in-depth knowledge of healthcare economics, informatics, policy, and ethics. Students will gain applied knowledge and be ready to take on challenging roles in healthcare organizations.

Program Learning Outcomes

At the end of this course of study, graduates will be able to:

1. Evaluate management models and trends influencing business operates in a global economy.

2. Apply economic principles and tools to better understand the healthcare sector and health policy.

3. Explore how using health informatics principles influences patient safety, disease management, and quality improvement.

4. Evaluate the role of government in health policymaking, including the legislation process, policy implementation at the federal level, and the role of the Center for Medicare and Medicaid services in health policy implementation.

MANAGEMENT CERTIFICATE

Program Mission Statement

The MBA Management certificate program aims to give students an extensive knowledge of management and leadership fundamentals, emphasizing moral decision-making and competent communication. This program helps students develop the skills necessary for leadership and management roles. The ultimate purpose of this program is to prepare graduates to contribute to the success of their organization and have a lasting, positive impact on their careers.

Program Description

The MBA Management certificate program incorporates many areas, including Leadership and Ethics, Organizational Behavior, and Operations Management. This certificate program will give participants a thorough comprehension of the principles and techniques of leadership and management. Students will acquire the necessary knowledge and abilities to apply their skills in the organization successfully.

Program Learning Outcomes

At the end of this course of study, graduates will be able to:

1. Evaluate management models and trends influencing how businesses operate in a global economy.

2. Evaluate the field of organizational behavior and its relevance to the workplace.

3. Effectively assess a well-managed and well-executed operations strategy.

4. Analyze foundational elements of leadership and ethical decision-making.

Dr. Taiwo Ajani, Program Director

Program Mission Statement

The MBSDA program prepares students with the strategic, quantitative and technological skills required by business leaders and managers to meet the demands of an increasingly dynamic work environment immersed in big data, advanced analytics and artificially intelligent technologies.

Program Description

The MSBDA program (offered in-seat and online) is designed to help prepare candidates for careers in management and leadership of business analytics. It aims to impart strategic thinking and conceptual understanding of big data, analytics for value creation, along with hands-on exposure to quantitative and technological skills. The MSBDA requires a total of thirty credit hours to complete the program. Students will be able to complete the program in one year (standard), or a two-year (flexible) completion option.

Program Learning Outcomes

At the end of this course of study, Graduates will be able to:

1. Create data driven insights into business scenarios using analytics methods and models.
2. Analyze structured and unstructured data and create effective data visualization.
3. Apply conceptual understanding to create applied predictive and business forecasting solutions.
4. Understand, apply and evaluate ethical principles for business and data analytics.

Program Structure

The MSBDA is a 30-credit-hour program consisting of ten 3-credit-hour courses delivered in 7-week sessions. The program is offered in two modalities: fully online with weekly synchronous meetings or in person with weekly meetings and web-enhanced course activities. The program starts each fall semester for new students and is designed to be completed in either a 10-month pathway (typically with two courses each 7-week term) or a flexible two-year pathway (typically with one course each 7-week term).

Graduation from the MSBDA program requires a minimum cumulative GPA of 3.0 in MBDA coursework, calculated using the final grade for each course. Students should always maintain a minimum cumulative GPA of 3.0 in the program. Students falling below this level at the end of a course may be placed on academic probation and may be required to repeat a course(s) and/or do remedial work under the supervision of faculty members.

Students should achieve a cumulative GPA of 3.0 by the end of the academic term following the one in which the probation period was established, or they may be dismissed from the MSBDA program. Should the student wish to appeal his/her dismissal, he/she must do so within fourteen calendar days from the date of receipt of the dismissal letter, unless the Program Director grants a delay due to extenuating circumstances.

Total Credits: 30

Transfer Credit

Students must take a minimum of twenty-four (24) total credit hours from the University of Charleston, three (credits) of which must be MBDA 790 - Business Analytics Capstone.

Transfer credit up to a maximum of 9 credit hours from a regionally accredited university may be accepted (subject to approval by the MSBDA Program Director).

<center>**Admission Requirements**</center>

Students must have an undergraduate degree from an accredited institution to be fully admitted to the MSBDA program. Applications will be accepted and reviewed from students who are in their final year of undergraduate study for conditional admission.

To be considered for admission, applicants must submit the following to the Office of Admissions:

Completed [MSBDA application](#);

Professional resume;

Official transcripts showing the student has earned a bachelor's degree from a regionally accredited institution with a minimum cumulative GPA of at least 2.50 (preference will be given to students with a 3.0 or higher cumulative GPA in a quantitative degree program (engineering, finance, computer science, mathematics/statistics, etc.);

Prior academic credentials and/or professional experience demonstrating acumen in statistics, analytics, and R-studio (may be satisfied with Udemy.com short course(s) as specified by program director);

GRE/GMAT scores are not required but may be submitted in support of the application.

Admissions decisions will be made on a rolling basis for fall-semester starts each year.

BERT BRADFORD SCHOOL OF HEALTH SCIENCES

Dr. Mindy M. Smith Dean

The purpose of the Bert Bradford School of Health Sciences is to prepare ethical, competent, safe, and compassionate health care professionals. Three departments make up the Bert Bradford School of Health Sciences:

Undergraduate Programs

Capito Department of Nursing

NURSING – ADN

NURSING – BSN

NURSING – RN-BSN

Department of Health Sciences

EXERCISE SCIENCE

HEALTHCARE ADMINSTRATION AND MANAGEMENT

PUBLIC HEALTH

OCCUPATIONAL THERAPY ASSISTANT

OCCUPATIONAL SCIENCES

RADIOLOGIC SCIENCE

RADIOLOGIC TECHNOLOGY

HEALTH SCIENCE MINOR

STRENGTH AND CONDITIONING MINOR

Graduate Programs

PHYSICIAN ASSISTANT

FAMILY NURSE PRACTICTIONER

DOCTOR OF NURSE ANESTHETIST PRACTICE

MASTER OF SCIENCE IN OCCUPATIONAL THERAPY

Students in the Bert Bradford School of Health Science programs enjoy on- campus clinical classrooms and access to a wide variety of excellent clinical settings. The School's faculty have developed a unique core of classes designed to give students a common understanding of important health care issues and an appreciation of collegial relationships among the health care professions.

Admission to all Health Science programs is competitive. Students must first be admitted to the University of Charleston and then apply to the Health Science program of interest. Each program has identified requirements and procedures for admitting students. Students who are interested in a given program should contact the program directly and follow the instructions for application. Program admission numbers may vary from year-to-year.

The curriculum for Health Science programs is intentionally designed to help students succeed in entering the profession of their choice. Students must consult closely with major advisors and program faculty to ensure they are following the required prerequisite courses and program sequence.

Professor Melissa A. Layne, Chair and Program Director

Capito Department of Nursing Mission Statement

The mission of the Capito Department of Nursing is to provide quality, evidence-based academic and clinical education that prepares graduates for careers of productive work, enlightened living, and life-long learning as Registered Professional Nurses who deliver safe, compassionate, and competent care to individuals and communities.

Capito Department of Nursing Department Description

The Capito Department of Nursing offers the Associate Degree in Nursing (ADN), Bachelor of Science in Nursing (BSN) and the RN-BSN Programs. Graduates completing the ADN and BSN programs are eligible to take the National Council Licensing Examination for Registered Professional Nurses (NCLEX-RN) exam and upon successful completion will be licensed as a Registered Professional Nurse (RN). The RN-BSN program is for individuals who have a current, unencumbered or an active temporary RN license and would like to attain his or her baccalaureate degree in nursing (BSN).

For more than 50 years the University of Charleston has offered nursing programs. The ADN program is delivered in a hybrid format that meets in-seat every other weekend (Friday, Saturday, Sunday). This program combines traditional, face-to-face class time with online and out-of-class course work. Students may complete the ADN program in sixteen months.

BSN students have the opportunity to attend a traditional nursing program. Students engage in collegiate life which includes academics, sports, the arts, student life, and other on campus experiences. The BSN program may be completed in four academic years.

Registered Professional Nurses (RN) who want to obtain a BSN degree may do so at the University Charleston. Registered Nurses (RNs) may continue to work full-time while they complete the degree through distance education. Recent graduates of an RN program who have an active temporary license may enroll in the program. The RN-BSN program may be completed within three semesters of full-time study.

The ADN and BSN programs prepare graduates to take the National Council Licensing Examination for Registered Professional Nurses (NCLEX-RN). Passing this examination allows the graduate to seek employment as an entry level registered professional nurse, who is competent to practice as a direct caregiver to diverse populations in a variety of health care settings. As health care delivery systems grow and change nursing graduates may choose to pursue higher degrees in preparation for advanced levels of practice.

Program Learning Outcomes

Modeled after, and congruent with, the mission, vision and values of the University, the programs, through combined nursing and liberal arts education, prepare graduates in all three of the University's mission-critical areas:

Graduates are prepared for a life of productive work as a registered professional nurse;

The program encourages enlightened living through emphasis on the need for life-long development of evidence-based nursing practice, and embeds information

literacy skills in courses delivering the Institutional Learning Outcomes (ILOs) of the University; and,

Finally, the programs promote community involvement through various projects and promotes service through interaction as registered professional nurses.

The nursing programs provide a solid foundation for advanced education. Nursing programs are guided by the Accreditation Commission for Education in Nursing (ACEN), the American Nurses Association (ANA) Standards and Scope of Practice, the National League for Nursing (NLN), Quality and Safety Education for Nursing (QSEN), and the West Virginia Board of Examiners for Registered Professional Nurses Nurse Practice Act.

Core Ethical Values

The educational philosophy of the University of Charleston's Nursing programs is based on the National League for Nursing (NLN) Educational Competencies Model and incorporates the seven core values of the National League for Nursing Competencies Framework including caring, diversity, ethics, excellence, holism, integrity, and patient centeredness (NLN, 2010). The nursing faculty believe "all nurses should display integrity, respect diversity in all forms, uphold given legal and ethical responsibilities and strive for excellence while promoting caring, holistic, patient centered care" (NLN, 2010).

Accreditation

The Accreditation Commission for Education in Nursing (ACEN) supports the interests of nursing education, nursing practice, and the public by the functions of accreditation. Accreditation is a voluntary, self-regulatory process by which non-governmental associations recognize educational institutions or programs that have been found to meet or exceed standards and criteria for educational quality (ACEN, 2016).

Accreditation is a voluntary peer-reviewed process intended to enhance quality improvement in nursing education (ACEN, 2016). According to ACEN nursing programs with specialized accreditation:

provide recognition that a nursing education program has been evaluated and periodically re-evaluated by a qualified, independent group of respected and competent peers;

are gateways to licensure, certification, and eligibility for entitlement programs;

foster ongoing self-examination, re-evaluation, and focus on the future;

aid in student recruitment and retention;

assists employers seeking graduates who are competent nurses;

facilitate career and educational decision-making;

promote professional and educational mobility of program graduates; and,

fulfill the eligibility requirement for applicants seeking advanced certification.

The ADN, BSN and RN-BSN nursing programs are accredited by the Accreditation Commission on Education in Nursing (ACEN). The West Virginia Board of Examiners for Registered Professional Nurses (WV RN Board) was established by the West Virginia Legislature to promote and protect public health, safety and welfare. Legal requirements for

registered professional nurses are found in the West Virginia Code or Law. Rules have been put into place to make the law more specific. The laws for the WV RN Board are found in WV Code 30-7-1.

It is mandatory all registered professional nursing programs, leading to initial licensure, maintain accreditation and approval by the WV RN Board. The ADN, BSN, and RN-BSN programs are fully approved by the WV RN Board.

For further information regarding accreditation please contact:

Accreditation Commission for Education in Nursing (ACEN):
3390 Peachtree Road, NE, Suite 1400
Atlanta, GA 30326
(404) 975-5000
www.acenursing.org

West Virginia RN Board:
5001 MacCorkle Ave., SW
South Charleston, WV 25309
(304) 744-0900
www.wvrnboard.com

Admission Requirements

All students must gain admission to the University of Charleston prior to applying for admission to the nursing programs (ADN, BSN, RN–BSN). Please note, individuals who have been convicted of a felony will not be admitted to the University of Charleston or the ADN, BSN, or RN-BSN programs.

Admission to the ADN and BSN programs *are competitive*. In order to be considered for admission the following documents **MUST** be submitted by the application deadline:

- Application to the nursing program;
- Official high school transcript, diploma, GED, or TASC Scores **MUST** be attached to the application to the nursing program.
- Successful completion of the ATI Test of Essential Academic Skills (TEAS) entrance exam with a score of 60% or higher.

Selection

A blind objective selection process has been developed for the ADN, BSN, and RN-BSN programs. Selection is based on a point system for qualified applicants focused on those who meet or exceed the admission criteria. Successful applicants will be conditionally admitted to the nursing program. Full admission is contingent upon the following:

1. A complete physical exam stating the applicant is physically and mentally able to function as a nursing student in a clinical setting. If currently undergoing treatment for a disease/disorder, a release from the prescribing physician is also required;

2. Proof of immunizations, and titers if applicable, following the Center for Disease Control guidelines for vaccinations for health care workers. A current list of required vaccines may be found at the following

website: https://www.cdc.gov/vaccines/hcp/index.html

3. Successfully pass a criminal background check and drug screen. Please note, clinical agencies may deny access to students who have a criminal background. Applicants with pending charges at time of application may be denied admission to the program after review by the program director and dean. Individuals convicted of a misdemeanor may or may not be allowed to take the licensing exam upon completion of the nursing program;

4. Meet the technical standards and skills required for nursing professionals. Reasonable accommodations which do not fundamentally alter the nature/scope of the nursing program and do not compromise the safety of clients will be made on an individual basis for students with verified disabilities; and,

5. Have a current American Heart Association BLS Provider CPR certification;

Once admitted to the nursing program the student must:

6. Continue to meet items 1-5 above and provide all documentation to the nursing administrative assistant by the deadlines set, or anytime there is a change in status;

7. Attend orientation to the nursing program;

8. Immediately notify the program director and the West Virginia Board of Examiners for Registered Professional Nurses of any criminal offense. Documentation must be provided to the nursing office immediately upon admission to the program or when the offense occurs; and,

9. Abide by the West Virginia Code and Legislative Rules for Registered Professional Nurses, specifically 19CSR10, Standards for Professional Nursing Practice. Failure to comply with the standards may result in disciplinary action as stated in 19CSR9, Disciplinary Action.

Throughout the program, all nursing students must meet departmental health requirements, criminal background checks, and drug screens. These requirements are congruent with the cooperating clinical agencies. The agencies have the option to make changes annually and as needed due to changing requirements from accreditation agencies and national patient safety standards.

Nursing students must meet all agency requirements in order to participate in clinical laboratory rotations. Students who do not meet the required criteria, or who fail to submit required documentation will not be eligible to participate in clinical rotations with the University's affiliating agencies; and thus, will be unable to meet requirements for graduation from the nursing program.

Transfer

The Capito Department of Nursing accepts transfer students for associate degree, bachelor's degree, and RN-BSN programs. Students attempting to transfer to the

Department of Nursing must first be accepted to the University of Charleston at which time the student must meet all requirements of the University admission office before applying to a nursing program. Students may transfer nursing courses where a 'C' or higher has been obtained. Individual consideration for course acceptance will be evaluated prior to transfer credit being confirmed. Students who have taken combination courses that do not have evidence of individual course completion (example: Mental Health, Pediatrics, and Obstetrics) will be required to complete course specific examinations to prove competency:

- Testing out includes using ATI Content Mastery exams (if a content mastery exam exists) or a course proficiency/exit exam.

- Students who are testing out will be given two (2) opportunities to take the ATI Content Mastery exam or the course/proficiency exit exam.

- Students who take the ATI Content Mastery Exam, must obtain a Level 2 or higher.

- Where an ATI Content Mastery Exam does not exist, and the student must take a course proficiency/exit exam, the student must achieve an 80%.

Consideration will be given for placement within the curriculum and evaluated by the Capito Department of Nursing Faculty upon evaluation of course work from another nursing program. Students may be asked to test out of subject areas based upon evaluation of coursework being transferred. Final determination of transfer is based on evaluation of transcripts. Transfer students may be required to take exams and/or demonstrate clinical skills in order to verify proficiency and placement. The nursing faculty will assess competency levels for placement in the program. All transfer students must be able to complete the program within 150% of time the first nursing course was taken.

Transfer students enrolled in the ADN program **MUST** complete a minimum of 15 credit hours at the University of Charleston. Students who transfer into the BSN and RN-BSN program **MUST** complete a minimum of 30 credit hours at the University.

Course Fees and Costs

Various courses have fees in addition to the standard tuition. These fees are non-refundable and are due at the time of registration. Course fees are assessed for things such as laboratory supplies, computer hardware and software specific to nursing students, and standardized mastery testing. This is not to be understood as a comprehensive list, but these examples are offered to the student for planning purposes. Course fees are subject to change on a yearly basis depending on vendor and program needs.

Initial out-of-pocket costs for admission to the nursing program include a physical exam, criminal background check, drug screens, immunizations, lab tests, titers, uniforms, lab coats, program specific hardware and software, and a lab supply kit that is purchased through the University's Bookstore. In the final semester, students must plan for costs of application and criminal background check for licensure as a registered professional nurse. These are expenses that are the responsibility of the student.

Clinical Laboratory Experiences

Nursing students will be assigned to various health care and community agencies for clinical rotations throughout the program. Clinical assignments will be changed each semester and may vary within a given semester. Students are expected to assume responsibility for transportation to the various agencies. Laboratory times are somewhat

inflexible due to agency constraints and coordination with other schools. Additional time in agencies to prepare for clinical rotations is expected in upper-division nursing courses and may not be reflected in scheduled clinical hours. Students must fulfill all clinical commitments.

Policies for Progression

Nursing students must achieve a minimum grade of "C" in the theory and a grade of "P" in clinical, laboratory, and/or simulation portion of all nursing courses in order to enroll in the next nursing course in the sequence. If a student fails one component of a nursing course (either theory or clinical, laboratory, and/or simulation) the student will receive the grade earned in each component. To progress to the next nursing course, both components of the course will have to be repeated with achievement of a minimum of "C" in the theory portion and a "P" in the laboratory portion. All courses must be taken in sequence.

To progress to subsequent semesters of study in nursing, a student must have a university based cumulative GPA of 2.0. Students must achieve a minimum grade of"C" in all courses in order to enroll in the next nursing courses. Successful performance in nursing courses is highly reliant upon content mastered in all previous courses. Students must earn a minimum grade of "C" in all courses. The faculty encourages students to earn the highest grade possible because all course content is integral to nursing course work and supports the development of the knowledge and skill necessary for assuming the role of a professional nurse.

Comprehensive Examination

The faculty of the nursing programs expect nursing students will demonstrate mastery of content before graduation. Standardized content specific exams will be administered throughout the program. These exams include, but are not limited to, the topics of pharmacology, pediatrics, maternity, psychiatric/mental health, medical- surgical, and critical thinking. Successful completion of all standardized exams is required.

To be eligible for graduation, all ADN and BSN students are required to pass a standardized comprehensive assessment during the final semester of the program. This exam is provided by a national testing service. The test is administered by the nursing faculty congruent with the standardized testing and comprehensive assessment of nursing knowledge policy in the *Nursing Student Handbook*.

Graduation Requirements

Graduation requires the achievement of all coursework with a "C" or higher. Additionally, graduation requires successful completion of the University of Charleston Institutional Learning Outcomes, a comprehensive exit examination within the major, and a cumulative GPA of 2.0 or higher for ADN and BSN students and a cumulative GPA of a 2.0 or higher for RN-BSN students.

In order to graduate from the ADN, BSN, or RN-BSN program students must satisfactorily complete all foundation and nursing courses as specified by the curriculum sequence. This requirement helps ensure that students have the knowledge and skills required for program completion.

Nursing students must complete all requirements of the program within 150% from time of enrollment in the first nursing course. Example: ADN students must complete the

program within six semesters of enrolling in the first nursing course. BSN graduates must complete the program within six years of enrolling in the first nursing course. In order to graduate from the University of Charleston the student must complete all graduation requirements outlined in the *University of Charleston Student Handbook.*

Licensure

Graduates of the ADN and BSN who meet eligibility requirements may apply to take the National Council Licensure Examination for Registered Nurses (NCLEX-RN) to become licensed as registered professional nurses. Please note, the West Virginia RN Board may deny licensure to individuals convicted of a felony, misdemeanor, or who do not meet the standards set forth by the Board.

Students are advised to seek information regarding licensure eligibility requirements directly from the Board of Nursing in the state where they plan to be licensed and/or work. The National Council of State Boards of Nursing (NCSBN) has comprehensive information about the roles and responsibilities of the board for all states and territories. Information regarding state boards of nursing may be found at www.ncsbn.org.

Applicants seeking admission to the RN-BSN program must have an active, unencumbered RN (or valid temporary) license. Students admitted with a temporary RN license must obtain an active, unencumbered license in their first semester to progress through the RN-BSN curriculum. Graduates of the RN-BSN program are not required to take a licensing exam as they already hold an active, unencumbered registered professional nursing license.

ASSOCIATE DEGREE IN NURSING

Features of Distinction

More than 50 years' cumulative experience educating over 3,000 nurses;

Curriculum based on current standards and evidence-based practices;

Faculty have professional nursing expertise in diverse health care settings;

Innovative and accessible courses intentionally designed to meet diverse health care needs of the community;

Small clinical/lab/simulation sections of 8-10:1 student faculty ratio;

Simulation lab with high-fidelity manikins on campus; Premier health care facilities utilized for on-going clinical experiences;

Extensive set of electronic libraries, books, journals, and databases accessible online and on mobile devices;

The ADN program is designed to provide the skills and knowledge necessary for graduates to seamlessly pursue RN-BSN completion education;

New student cohorts are accepted each semester; and,

Completion of 180-hour practicum at a local accredited facility.

End of Program Learning Outcomes (EPSLO)

The National League for Nursing (NLN) Educational Competencies Model revolves around four outcome areas: Human Flourishing, Nursing Judgment, Professional Identify and Spirit of Inquiry. The Nursing Department has identified End of Program Student Learning Outcomes for each outcome area.

Upon successful completion of the Capito Department of Nursing, Associate Degree in Nursing program the graduate will be able to:

Graduates of the ADN program will demonstrate achievement of the following:

Outcome 1: Human Flourishing: Advocate for patients and families in ways that promote his or her self-determination, integrity and ongoing growth as human beings.

Outcome 2: Nursing Judgement: Develop judgements in practice, substantiated with evidence, that integrate nursing science in the provision of safe, quality care and promote the health of patients within a family and community context.

Outcome 3: Professional Identity: Implement one's role as a nurse in ways that reflect integrity, responsibility, ethical practices, and an evolving identity as a nurse committed to evidence-based practice, caring, advocacy, and safe quality care for diverse patients within a family and community context.

Outcome 4: Spirit of Inquiry: Examine the evidence that underlies clinical nursing practice to challenge the status quo, question underlying assumptions, and offer new insights to improve the quality of care for patients, families, and communities.

Admission Requirements

Admission to the ADN program occurs three times per calendar year. Students must gain general admission to the University of Charleston based on the appropriate student type (freshman, transfer, readmit). After obtaining general admission to the University, ADN candidates must submit an ADN application along with copies of transcripts of all college credit attempted (if applicable), their high school transcript, and their scores on the TEAS entrance exam. Pre-Requisite courses which are required to be completed prior to application/acceptance into the ADN Program are as follows: BIOL 212/BIOL 212L, ENGL 101, ENGL 102, PSYC 212.. These courses must be completed with a 'C' or higher to apply to the ADN program. ADN selection is a competitive process in which applicants are scored on their cumulative college/ university GPA, their TEAS score, and holding health care licensure (e.g., EMT or LPN license). Applicants are ranked by their total scores and cohort seats are offered to the top scoring applicants until the cohort is full or the number of qualified applicants is exhausted, whichever occurs first.

Graduation Requirements

Graduation from the ADN program requires completion of all course work with a grade of "C" or better. Students must also maintain a cumulative GPA of 2.0 and successfully complete the ATI RN Comprehensive Predictor exam.

Curriculum

The Associate Degree Nursing program consists of 61 credit hours delivered in a hybrid format. This program combines traditional, face-to-face class time with online and out-of-class course work. In the ADN program hybrid courses replace face-to-face class

time with 49% online or out-of-class work. Students must attend face-to-face classes at the location designated on the course schedule. Students will be required to complete on-campus activities as designated by his or her instructor.

Students must maintain a cumulative GPA of 2.0 or better in all courses to progress to the next semester. All students must complete an Exit Level Assessment in their major (e.g., ATI RN Comprehensive Predictor exam).

BACHELOR OF SCIENCE IN Nursing

Features of Distinction

More than 50 years' experience educating over 3,000 nurses;

Innovative and accessible courses intentionally designed to meet diverse health care needs of the community;

Solid educational foundation for career mobility, graduate education and further academic study

Faculty have professional nursing expertise in diverse health care settings;

Small clinical/lab/simulation sections with an 8-10:1 student /faculty ratio;

Interdisciplinary education;

Interprofessional courses with clinical/laboratory experiences;

Extensive set of electronic library, books, journals and databases accessible online and on mobile devices;

High fidelity simulation lab on campus;

Assessment and skills laboratories on campus;

Premier health care facilities utilized for clinical rotations less than ten minutes from campus;

Clinical experiences in a wide variety of health care settings, including a Level I Trauma Center, premier cardiac center and the only free-standing Women's and Children's hospital in West Virginia;

Extensive nursing practicums in the senior year of the program under the supervision of faculty and clinical nurse preceptors;

NCLEX-RN passage rate above state and national average; and,

Nationally accredited by the Accreditation Commission for Education in Nursing (ACEN)

End of Program Learning Outcomes (EPSLO)

The National League for Nursing (NLN) Educational Competencies Model revolves around four outcome areas: Human Flourishing, Nursing Judgment, Professional Identify and Spirit of Inquiry. The Nursing Department has identified End of Program Student Learning Outcomes for each outcome area.

Graduates of the BSN program will demonstrate achievement of the following:

Outcome 1: Human Flourishing. Create a plan of care through collaboration with the patient or designee that respects the diversity of the patient's individual values and needs.

Outcome 2: Nursing Judgement. Analyze judgments made in practice, substantiating them with evidence that uses the nursing process to integrate nursing science with the provision of safe, effective care.

Outcome 3: Professional Identity. Implement their role as a nurse in ways that reflect integrity, responsibility, and ethical practice.

Outcome 4: Spirit of Inquiry. Apply current best practices to plan, implement, and evaluate safe and effective patient care.

Admission Requirements

Students must gain general admission to the University of Charleston. Freshman Direct Admit (FDA) applications will be considered for a limited number of seats for entering freshmen each fall. Contact the Office of Admissions for additional information. Regular application to the BSN program occurs during the Spring semester of the freshman year. Applicants must score 60% or higher on the TEAS entrance exam and have a cumulative Grade Point Average (GPA) of 2.0 or higher. Graduation from the BSN program requires completion of all course work with a grade of "C" or better.

Graduation Requirements

Graduation from the BSN program requires completion of all course work with a grade of "C" or better. Students must also maintain a cumulative GPA of 2.0 and successfully complete the ATI Comprehensive exam.

NURSING RN-BSN

Bachelor of Science in Nursing (NURSR)

Features of Distinction

More than 50 years' experience educating over 3,000 nurses;

Innovative and accessible courses intentionally designed to meet diverse health care needs of the community;

Associate Degree Nursing students may enroll in Health Sciences courses prior to graduation;

Up to 50 credit hours awarded for current active, unencumbered RN license;

May be completed in one calendar year (three academic semesters);

Solid educational foundation for career mobility, graduate education and further academic study;

Faculty have professional nursing expertise in diverse health care settings; and,

Extensive set of electronic libraries, books, journals and databases accessible online and on mobile devices.

End of Program Learning Outcomes (EPSLO)

The National League for Nursing (NLN) Educational Competencies Model revolves around four outcome areas: Human Flourishing, Nursing Judgment, Professional Identify and Spirit of Inquiry.

The Nursing Department has identified End of Program Student Learning Outcomes for each outcome area.

Graduates of the RN-BSN program will demonstrate achievement of the following:

Outcome 1: Human Flourishing. Create a plan of care through collaboration with the patient or designee that respects the diversity of the patient's individual values and needs.

Outcome 2: Nursing Judgement. Analyze judgments made in practice, substantiating them with evidence that uses the nursing process to integrate nursing science with the provision of safe, effective care.

Outcome 3: Professional Identity. Implement their role as a nurse in ways that reflect integrity, responsibility, and ethical practice.

Outcome 4: Spirit of Inquiry. Apply current best practices to plan, implement, and evaluate safe and effective patient care.

Admission Requirements

Students must gain general admission to the University of Charleston. Applicants must be a registered professional nurse (RN) with an active, unencumbered or temporary RN license, have a cumulative Grade Point Average (GPA) of 2.0 or better, and submit an application to the RN-BSN program along with a copy of all college transcripts. All transcripts will be reviewed by the university Registrar to determine transfer equivalency.

Graduation Requirements

Graduation from the RN-BSN program requires completion of all course work with a grade of "C" or better.

Curriculum

The RN-BSN program consists of 120 credit hours. This program requires completion of 30 hours of upper division credits. All predetermined coursework must be successfully completed prior to initiating NURSR courses.

RN-BSN Bachelor's Degree Nursing Program

120 Credit Hours

Active, Unencumbered RN License   **(Up to) 50 Credit Hours**

EXERCISE SCIENCE MAJOR

Professor Jody Mashinter, Program Director

Exercise Science Mission Statement

The mission of the Exercise Science Program is to prepare graduates entering health-related disciplines with the knowledge and skills needed to continue open-minded pursuits, including the development of human movement and the promotion of a healthy lifestyle in practice and throughout the community.

Program Description

The Exercise Science Program at the University of Charleston offers students interested in pursuing a career in fitness/wellness, strength & conditioning, and rehabilitation sciences as an interdisciplinary approach to healthcare. Academic coursework in biology, exercise physiology, motor development, movement analysis, fitness, kinesiology, psychology, and strength & conditioning provide students a strong educational foundation followed by real-world, hands-on experience.

- Exercise Science focuses on the understanding and promotion of human movement and a healthy lifestyle.

- A strong health science emphasis provides students with a robust Exercise science foundation.

- Students will have the opportunity to work in collaboration with Strength & Conditioning Coaches and Human Movement Specialists from the University of Charleston and the surrounding area during practicum experiences and immersed internships.

- Exciting and practical immersed internship experiences.

- Eligible for certifications through the American College of Sports Medicine (ACSM), the National Strength and Conditioning Association (NSCA), and the National Academy of Sports Medicine (NASM).

- Enrolled students have opportunities to work with clientele of all ages, athletic ability, and motivation.

Exercise Science graduates will acquire the skills and knowledge for a wide range of career opportunities. Sample jobs titles include:

Strength & Conditioning Coach/Specialist

Fitness Personal Trainer

Corrective Exercise Specialist

Health & Fitness Educator

Wellness Coordinator

Exercise Science graduates will have the foundation to pursue graduate programs in the following areas (additional prerequisites may be required)

Athletic Training

Exercise Physiology

Occupational Therapy

Health and Fitness

Physical Therapy

<div align="center">

Exercise Science Program Learning Outcomes

</div>

The graduate will:

1. Apply and examine a body of knowledge in exercise science and related fields.

2. Evaluate, develop, and implement programs addressing all paradigms of fitness and wellness.

3. Analyze basic human movement and design movement-oriented exercise prescriptions.

4. Select and apply appropriate strength and conditioning principles related to human movement and the promotion of a healthy lifestyle.

5. Develop and implement physical fitness/health assessment programs.

<div align="center">

Admission and Successful Progression

</div>

All undergraduate students are eligible to declare Exercise Science as their major. To progress in the Exercise Science Program and graduate, students must pass their required courses, including a 3-credit or 12-credit immersed internship, with a C or better and meet the institutional academic requirement of maintaining a minimum cumulative 2.0 GPA. Students must meet all Institutional Learning Outcomes required for graduation by the University of Charleston.

<div align="center">

What You Will Study

</div>

The following is a guide based on a 4-year completion period. **Students may accelerate their experience and complete the program in 3 ½ years if desired**. Every student is assigned an academic advisor who will assist with degree completion planning and career exploration.

Exercise Science – Required Courses in Major

Immersive Internship – Graduates are Ready for the Real World

Enrolled students will have the opportunity to develop hands-on client interaction through didactic classroom and practical-based community engagement. Exercise Science students will obtain knowledge in anaerobic and aerobic training as they matriculate through the program and will gain real-world experiences before graduation through interactive courses and internships. Graduates will develop an understanding and ability to practically apply concepts from fitness management, biomechanics, and nutrition to promote healthy living across the lifespan.

Professional Certifications

National Strength & Conditioning Association Certified Strength & Conditioning Specialist (CSCS)

National Strength & Conditioning Association Certified Personal Trainer (NSCA-CPT)

American College of Sports Medicine Certified Personal Trainer (CPT)

National Academy of Sports Medicine Corrective Exercise Specialist (CES)

National Academy of Sports Medicine Performance Enhancement Specialist (PES)

Athletics and Fitness Association of America Group Fitness Instructor (GFI)

Functional Movement Specialist (FMS)

Selective Functional Movement Assessment (SFMA)

Admission Requirements

Students must gain general acceptance to the University of Charleston.

STRENGTH AND CONDITIONING MINOR

The Strength & Conditioning minor at the University of Charleston will expand students' knowledge of performance enhancement through interdisciplinary coursework in Exercise Science.

Students completing the Strength & Conditioning minor can take recognized credentialing certification exams offered by the National Strength & Conditioning Association (NSCA), American College of Sports Medicine (ACSM) and the National Academy of Sports Medicine (NASM).

The Strength & Conditioning minor consists of 18 credit hours. Course requirements:

Strength & Conditioning Minor	
The following courses are required:	
EXER 201 Training Concepts	3
EXER 225 Medical Terminology in Exercise Science and Healthcare	3
EXER 275 Program Design & Implementation	3
HSCI 204 Nutrition	3
	12
Choose two (2) elective courses from the list below based on individual student goals for implementing this minor into their future career:	
EXER 252 Foundations of Injury Management	3
EXER 304 Sports Nutrition	3
EXER 325 Exercise Prescription	3
EXER 330 Special Populations	3
EXER 340 Exercise & Psychological Mindfulness	3
Total	**18**

Colleen Kirtley, Program Director

Program Mission Statement

The mission of the Healthcare Administration & Management program is to prepare graduates as health administrators who direct and coordinate health services, model life-long learning through continuing education, and are engaged in their profession and community.

Program Description

Healthcare Administration & Management incorporates planning, directing, and coordinating health services within a variety of health settings. At the University of Charleston, Healthcare Administration & Management is a baccalaureate degree program at either the Charleston location or completely online. Students can be either traditional or adult students and can choose to complete the program full-time or on a part-time basis. Students are both majors and/or pre-professionals who will complete the program in 4 years (full-time status) depending on whether they are needing pre-requisites for professional placement in the workforce or graduate school. Students will engage in a multidisciplinary curriculum with a strong health science and business emphasis that provides a robust health care foundation. The opportunity to gain real world skills in the professional environment of their discipline equips graduates with the work experience that employers and graduate schools desire. For example, students have the opportunity to do an immersed internship within their desired career area. Graduates can be employed in settings such as Hospital Administrators, Nursing Home Administrators, Human Resource Managers, Medical Practice Managers, or Social and Community Service Managers. Graduates will also have the education required for further study in graduate programs in Health Care Administration.

Program Learning Outcomes

At the end of this course of study the graduate will:

1. Demonstrate cultural sensitivity and interpersonal skills within the health-care profession.

2. Conduct and evaluate research related to health or health related field.

3. demonstrate core business knowledge as well as appropriate analytical & quantitative techniques to develop viable healthcare management solutions.

4. Analyze ethical and legal practices within a healthcare setting.

5. Model professional behaviors and attitudes that reflect the expectations of the health-care profession and the community.

What You Will Study

The Healthcare Administration & Management major consists of 124 credit hours that include a combination of major courses in Public Health & Health Sciences (37 credits) and Business/Management disciplines (42 credits), core courses (24 credits), and the availability of free electives that students can utilize to work towards completing a minor. (21 credits).

The following is a guide based on a 4-year completion period in-seat. **Students may accelerate their experience and complete the program in 3 or 3 ½ years if desired**. Students may also select to complete the program fully online. This will adjust the below pathway slightly to accommodate online class options. Every student is assigned an academic advisor who will assist with degree completion planning and career exploration.

Standard Four-Year in-seat Path

FIRST YEAR			
FALL SEMESTER		**SPRING SEMESTER**	
UNIV 104 College Motivation & Success	3	UNIV 105 Foundations of Character & Leadership	3
ENGL 101 Freshmen Writing I	3	ENGL 102 Freshmen Writing II	3
MATH 120 Intermediate Algebra	3	SPCH 103 Oral Communication	3
HUMN Elective	3	HUMN 1XX (HUMN Elective)	3
HSCI 110 History of Health Science	3	Flex Elective	3
PSYC 101 Intro to Psychology	3	MATH 121 College Algebra	3
	18		**18**

SECOND YEAR			
FALL SEMESTER		**SPRING SEMESTER**	
HSCI 230 Interprofessional Practice & Collaboration	3	EXER 225 Medical Terminology	3
BIOL 212 Intro to Anatomy & Physiology (STEM)	3	Elective	3
BIOL 212L Intro to Anatomy & Physiology Lab I	1	ACCT 202 Principles of Accounting II	3
ACCT 201 Principles of Accounting I	3	ECON 202 Principles of Macroeconomics	3
ECON 201 Principles of Microeconomics	3	PUBH 23X US Health Care Systems	3
Elective	3		
	16		**15**

THIRD YEAR			
FALL SEMESTER		**SPRING SEMESTER**	
Elective	3	BUSI 220X Info Systems & Software Apps	3

MGMT 320 Human Resources Management	3	Elective	3
	15		**15**

Admission Requirements

Students must gain general admission to the University of Charleston.

Additional Requirements

All undergraduate students are eligible to declare Healthcare Administration & Management as their major.

To progress in the program and graduate, students must pass their required courses, including a 3-credit immersed internship, with a C or better and meet the institutional academic requirement of maintaining a minimum cumulative 2.0 GPA to remain in good academic standing.

Professor Kristi Barnett, Program Director

Public Health Program Mission

The mission of the Public Health program is *t*o prepare graduates to promote healthy lifestyles and disease prevention, model life-long learning through continuing education, and are engaged in their profession and community.

Program Description

Public Health is defined as, "promoting and protecting the health of people and the communities where they live, learn, work and play. This is achieved by healthy lifestyle promotion, researching disease and injury prevention, and detecting, preventing, and responding to diseases. The goal of public health is to protect the health of entire populations in our local communities, countries, and regions of the world. Public health majors keep communities safe and healthy, protect workers, pursue social justice, assist and/or lead with disaster relief, ensure healthcare access, and so much more. According to the Bureau of Labor Statistics (BLS), this field will grow by 16 percent between 2016 and 2026.

Public Health at the University of Charleston is a baccalaureate degree program, that prepares graduates as public health professionals. Graduates can be employed in settings such as government, state and local health departments, health insurance agencies, corporate wellness programs, non-profit organizations, hospitals, and rehabilitation clinics. Graduates will also have the education required for further study in graduate programs such as Public Health, Exercise Science, and Health Care Administration.

Students will engage in a multidisciplinary curriculum with a strong health science emphasis that provides a robust health care foundation. In addition, there are offerings of complementary courses in natural sciences, psychology, and exercise science. The public health program can be completed in either 3 or 4 years, depending on the courseload the student takes. The 3-year track may require summer semesters. A public health internship is required as part of the course requirements. It is a chance for the public health major to gain real-world skills in their discipline's professional environment. Students will refine their ability to perform comprehensive program development in areas such as assessing health needs, planning, implementation, evaluation, and management.

In addition, graduates may be eligible for certifications through NCHEC as a Certified Health Education Specialist, or through the National Wellness Institute as a Certified Wellness Practitioner. Additionally, graduates can increase their marketability by seeking outside professional certifications such as Certified Health Education Specialist (CHES), American College of Sports Medicine certifications (ACSM), American College of Exercise Certifications (ACE), Performance Enhancement Specialist (PES), and First Aid/CPR/AED.

Public Health Program Learning Outcomes
The graduate will be able to:

1. Demonstrate cultural sensitivity and respect of individual differences within the healthcare profession.

2. Plan and implement health education and promotion.

3. Conduct and evaluate research related to health and health related fields.

4. Model professional behaviors and attitudes that reflect the expectations of the healthcare profession and the community.

5. Communicate and advocate for changing lifestyles progressing towards optimal health.

What You Will Study

The Public Health major consists of 121 credit hours that include a combination of major courses and related disciplines (81 credits), core courses (15 credits), and elective credit courses (28 credits).

The following is a guide based on a 4-year completion period. **Students may accelerate their experience and complete the program in 3 or 3 ½ years if desired**. Every student is assigned an academic advisor who will assist with degree completion planning and career exploration.

Immersed Internship -- Ready for the Real World!

Public Health majors have the opportunity to complete two internships while in the program. One is in the junior year and the other is the final semester before graduation. Students can apply and/or arrange to complete this experience in any location pending university approval. The opportunity to gain real world skills in the professional environment of their discipline equips graduates with the work experience that employers and graduate schools desire. Students will refine their ability to perform comprehensive program development in areas such as assessing health needs, planning, implementation, evaluation, and management.

Admission Requirements

Students must gain general admission to the University of Charleston and declare public Health as their major. Students must have a 2.2 GPA for admittance.

Additional Requirements and Successful Progression

To progress in the program and graduate, students must pass their required courses, including a 3 or 12 credit immersed internship, with a C or better and meet the institutional academic requirement of maintaining a minimum cumulative 2.0 GPA to remain in good academic standing.

Professor Jacqueline Hurt, Program Director

Occupational Therapy Assistant Program Mission Statement

In concert with the mission of University of the Charleston, the Occupational Therapy Assistant Program seeks to prepare its graduates to enter the global workforce as highly educated, productive individuals who have the knowledge and ability to embrace enlightened living through therapeutic use of self, and the technical skills and professional behaviors to be an involved member of the occupational therapy community. The OTA program seeks to maintain the highest ethical standards and to ensure dynamic curriculum development by thorough and ongoing assessment programs.

The Occupational Therapy Assistant Program is fully accredited by the Accreditation Council for Occupational Therapy Education (ACOTE). The next accreditation evaluation is scheduled for the academic year 2026-2027.

Occupational Therapy Assistant Program Goals

Our goal is to prepare entry-level Occupational Therapy Assistants:

Who are competent, compassionate, and ethical.

Who demonstrates a knowledge level and skill set indicative of securing national certification in Occupational Therapy Assisting.

Who understands and communicates effectively across disciplines.

Those who value lifelong learning are dedicated professionals and socially responsible citizens.

Faculty are committed to:

Providing a strong foundation in the skills and knowledge needed for entry-level OTA practice competencies.

Providing an environment to assist in understanding occupational therapy and practice.

Providing instruction in basic skills and a supportive learning environment that will encourage and motivate the student to complete the prescribed course of study and remain lifelong learners.

Providing an atmosphere that teaches respect for human life and demonstrates how that respect can be translated into client/patient care.

Provide an atmosphere that provides students with an environment to learn new and marketable skills.

Focusing on continuous improvement in the Occupational Therapy Assistant curriculum, allowing students access to the best evidence in the field of Occupational Therapy

Program Learning Outcomes

The graduate will:

1. Practice effective and professional communication skills with clients, families, and health care professionals to communicate the distinct value of occupation.

2. Demonstrate effective critical thinking skills to assist in developing innovative treatment ideas that are culturally sensitive, evidence-based, client-centered, and target meaningful occupations.

3. Demonstrate entry level competence by obtaining the knowledge and skills needed to be a generalist practitioner who provides services that are ethically sound, within the scope of practice of the profession, and in accordance with the accompanying state practice act.

4. Translate didactic work into application by applying previously learned materials into effective and safe treatment activities that promote client centered, occupation-based interventions.

Admission Requirements

Admission to the OTA program is selective, and acceptance to the University of Charleston does not guarantee admission into the OTA program. Application is limited to those who have successfully completed the prerequisites listed below and meet specific GPA requirements of at least a 2.5.

- Anatomy and Physiology – (BIOL 212/212L or 8 credit hours of A&P I and II with lab)
- Beginning algebra (3 credit hours)
- English I and II (6 credit hours)
- Social Science (3 credit hours)
- Developmental Psychology (3 credit hours)

Essential Functions for Occupational Therapy Assistant Students

These are standards for OTA students and applicants to the OTA program based on required abilities, capabilities and functions as interpreted by the OTA Program Director and are based on functions/abilities needed for a student to safely engage in educational, learning, and training activities in a manner that does not endanger themselves, other students, patients, or the public.

Function	Standard	Examples of Activities
Visual	Visual ability sufficient to see details at close and far range. Ability to observe, receive & obtain visual information from all relevant sources for assessment required in	• See and read course information, clinical forms, charts. • See and read computer screens and other equipment.

	patient/client care situations. Accurate color discrimination required.	• Oversee set up and implementation of treatment activities.
Hearing	The ability to listen to and understand information and ideas presented through spoken words, sentences and to hear and interpret loud, soft, and muffled sounds.	• Hear and Interpret alarms, machinery, and emergency alarms, cries for help. • Use call light and hear intercom speakers. • Use the telephone.
Tactile	Tactile sensation adequate for physical assessment, and sensory stimulation interventions inclusive of size, shape, temperature, texture, vibration, pressure.	• Palpate pulse rate, and muscle movement, anatomic structures. • Detect safe heat level on various tools, splinting and appliances.
Fine Motor	Ability sufficient to provide safe and effective care and documentation including operation of equipment.	• Write and document legibly. • Grasp and pinch • Cut and open containers • Repetitive hand use • Electronic documentation.
Gross Motor	Gross motor ability sufficient to provide safe and effective patient care. Physical strength to perform all types of patient transfers and lifts from a variety of surfaces and levels.	• Stand, bend, stoop, squat, crawl, kneel, reach, balance, sit, • Perform CPR and client evacuation. • Use safe body mechanics to lift, push, and pull.
Environmental	Able to tolerate environmental stressors.	• Work with chemicals and detergents • Inside and occasional outside • Tolerate exposure to fumes, odors, dust, temperature changes.

		• Work in areas that are close, crowded, and noisy. • Work in areas of exposure to infectious waste, body fluids, wet or humid conditions • Work in areas of potential physical violence
Communication	Communication ability in English sufficient for appropriate interaction in verbal, written, non-verbal and electronic forms. Ability needed for entering, transcribing, recording, storing, or maintaining information in written or electronic form.	• Read, understand, write, and speak English so that others will understand. • Explain treatment. • Perform health teaching. • Validate responses/messages with others. • Documentation
Mobility	Ambulatory capability to sufficiently maintain a center of gravity when met with an opposing force as in lifting, supporting, and /or transferring a patient/client.	• Propel wheelchairs and ambulate patients using a gait belt. • Move and obtain patient care equipment. • Aid patients in dressing, bathing, and grooming • Move freely from place to place.
Cognitive-Perception	The ability to perceive events realistically, to think clearly, rationally and to function appropriately in routine and stressful situations including recognizing that something is wrong.	• Recognize rapidly changing patient status. • Attend to multiple priorities in stressful situations.
Critical Thinking	Analyzing information and evaluating results to choose the best solution and solve problems.	• Ability to exercise sound clinical judgment. • Ability to apply general rules to specific

		problems to produce answers that make sense.
Interpersonal	Developing constructive and cooperative relationships with others.	• Manage a variety of patient expressions in a calm manner. • Behave in an ethical manner. • Establish rapport. • Ability to have insight and self-awareness in your own actions and their effect on others.
Activity Tolerance	Ability to tolerate lengthy periods of mental and physical activity over a period of time.	• Stand and or sit for long periods. • Selective attention without distraction • Move or attend frequently.

Students who feel they do not possess these essential abilities/functions should seek assistance from the Academic Success Center to determine if reasonable accommodation for a disability can be approached with the program. It is the student's responsibility to initiate the process and to assist in communication between the faculty and the Academic Success Center Disability Coordinator. Email: **ASC@ucwv.edu**

Additional Requirements for the OTA program Application Process

Full acceptance to the University of Charleston

2 Letters of recommendation from someone other than family members

GPA of 2.5 or higher

Must complete all General Education with a C or better before starting the OTA program.

All prerequisite (general education) courses may be taken only twice. After 2 failures of the same course the student cannot be admitted to the OTA program. The student must have all prerequisite courses successfully completed and an official transcript placed in the students OTA program file before full acceptance to the OTA program.

Transfer credits are subject to change with the registrar's office evaluation of your official transcripts.

Total Program Credit Hours 63

Observation or volunteer hours in occupational therapy are not required but are highly recommended.

Felony Conviction Information

A student may be admitted to the OTA program at University of Charleston-Beckley even if a felony has been committed. However, there may be instances where a student will not be permitted to test for licensure or admitted to a clinical setting depending on the guidelines of the outside Accrediting /Certifying Agency or the clinical affiliate. Each student is instructed to contact the National Board for Certification in Occupational Therapy (NBCOT) for pre-verification of testing and/or questions concerning felony convictions. Telephone: (301-990-7979) www.nbcot.org

Drug Testing Policy

Mandatory drug screenings will be performed. Students will not be notified in advance of a mandatory drug screening. The costs associated with the screening are the responsibility of the student.

A reasonable suspicion screening will be required based on personal, physical, or performance changes. The cost of the drug screening is the responsibility of the student.

In addition to "Mandatory Drug Testing" and "Reasonable Suspicion Drug Testing", students are subject to the drug testing policies at any clinical site they may be assigned to and are responsible for all costs related to a clinical site's drug testing.

Any Occupational Therapy Assistant student who has a positive drug screen will be subject to disciplinary action and immediate dismissal from the program.

Re-entry into the Occupational Therapy Assistant program will not be considered following a positive drug test.

Any Occupational Therapy Assistant student who refuses to perform or to pay for a mandatory drug screen, a drug screen requested due to reasonable suspicion, or a clinical site's drug screen will be considered in direct violation of the Occupational Therapy Assistant program drug testing policy and will be subject to disciplinary action and immediate dismissal from the program.

Policies for Progression and Graduation

Eligibility for a degree in Occupational Therapy Assisting requires successful completion of didactic courses, level I, level II fieldwork rotations and Clinical Competence for the OTA.

To be eligible for graduation a student must:

Achieve a minimum "C" in all prerequisite and OTA didactic courses

Complete a minimum of 63 combined academic and fieldwork credits

Complete level I and level II fieldwork rotations as assigned, with a passing grade

Successfully complete Clinical Competence for the OTA which includes a practice NBCOT exam.

Occupational Therapy Assistant Curriculum

First Year Fall		
BIOL 212	Introduction to Human Anatomy & Physiology*	3
BIOL 212L	Introduction to Human Anatomy & Physiology Lab*	1
ENGL 101	Freshman Writing, I	3
PSYC 212	Lifespan Development	3
OTA 201	Introduction to Occupational Therapy**	3
	Total	**13**

Bachelor of Science

Professor Kristi Barnett, Program Director

Radiologic Science Bachelor of Science Program Mission Statement

The primary mission/purpose of the Radiological Science Program is to provide challenging academic and clinical education for the development of the student as a compassionate, responsible, and multicompetent radiology professional. The faculty is committed to: 1)educating students, in a liberal learning environment, for a life of productive work as a practicing radiographer; 2) guiding students on their journey to becoming life-long learners by modeling continued education, and; 3) demonstrating the importance of service to the greater Charleston community.

Program Description

The Radiologic Science program offers a Bachelor of Science in Radiology. Our program is accredited by the Joint Review Committee on Education in Radiologic Technology (JRCERT). Graduates completing this program are eligible to apply to take the American Registry of Radiologic Technologists (ARRT) registry exam. Upon successful exam completion, students will be recognized as a registered radiologic technologist.

Students can choose from a 3 or 4-year track. The curriculum is the same for both tracks. Students that choose the 3-year track should expect to incorporate the general education classes and pre-requisite courses throughout the three years they are in the program. On occasion, a student on this track may need to take additional classes over the summer. In addition, the 3-year track requires that the student have a 3.5 GPA. Student athletes are not advised to choose the 3-year track. The 4-year track allows students to complete many of the general education and pre-requisite courses in the first year. Students in the 4-year track must complete a minimum of 90% of the first-year courses of the Radiologic Science Program.

There are two activated radiology laboratories on site which gives students many opportunities to practice radiology procedures. Students will attend various clinical rotations, including a Level I trauma center, a cardiac center, a pediatric hospital, outpatient imaging centers, and orthopedic offices. Students also have an opportunity to take courses in specialized imaging modalities such as computed tomography, magnetic resonance imaging, ultrasound, cardiac interventional, vascular interventional and mammography. In addition, we offer an AS to BS track which offers an advanced degree option for radiographers with an associate degree.

From the Faculty

"Radiologic Science is the health profession involved in the direct administration of ionizing radiation for disease diagnosis and injury assessment. Since their accidental discovery in 1895, x-rays have been recognized as an essential tool designed to assist physicians in medical diagnosis. Technological advances and the addition of new imaging modalities now place radiologic sciences among the most dynamic and high- demand fields in clinical medicine."

Accreditation

The Radiological Science Program is accredited by the Joint Review Committee on Education in Radiological Technology (JRCERT). Contact information on the JRCERT is available at:

JRCERT

Mail@jrcert.org

Licensure

Radiologic Science Program graduates meet the academic and clinical requirements to be eligible to apply to take the American Registry of Radiologic Technology (ARRT) examination. Graduates who pass the ARRT examination are eligible to apply for the West Virginia state license to practice radiology. Application for licensure can be made at the West Virginia Medical Imaging & Radiation Therapy Technology Board in Charleston, WV. Other states may have different criteria for licensure eligibility.

Please Note: Applicants should investigate his or her eligibility to take the American Registry of Radiologic Technologist Examination [ARRT - phone (651) 687- 0048] or website http://www.arrt.org before enrolling in the Radiologic Science program, or see the RADI Program Chair if they answer yes to the following questions:

Have you ever been convicted of a misdemeanor, felony, or similar offense in a military court martial?

Have you had any professional license, permit, registration, or certification denied, revoked, suspended, placed on probation, under consent agreement or consent order, voluntarily surrendered, or subjected to any conditions or disciplinary actions by a regulatory authority or certification board (other than ARRT)?

Have you ever been suspended, dismissed, or expelled from an educational program that you attended in order to meet ARRT certification requirements? The ARRT supports 23 ethical rules for RTs that are found on the website.

Admission

All students must gain admission to the University of Charleston before applying to the program. To be considered for admission to the program, the following requirements must be met:

1) Completion of a program application (after student has been accepted into the University). A visit to campus to meet with Admissions personnel and program faculty is strongly encouraged. The program accepts a new cohort of students once per year in the fall semester. Applications are due on or before May 1 and will receive full consideration. Prospective students applying by the May 1 deadline will be notified of acceptance or denial by May 30th. Applications received after that date will be reviewed first come, first served until the cohort is full.

2) 2.7 GPA or higher; 3.5 GPA for the 3-year track.

   Four-year track applicants to the BS Radiologic Science Program must complete a minimum of 90% (34 credits) of the freshman year courses of the Radiologic Science Program (see curriculum). Students must achieve a grade of "C" or higher in RADI 101. Introduction to Radiologic Science and RADI 102 Radiation Physics. If a transfer student is accepted into the program, they must complete RADI 101 & RADI 102 with a "C" or higher. Failure to receive a "C" or higher in either course as a transfer or sophomore student will result in termination from the program. Students are admitted to the Radiologic Science Program in the fall semester of the SOPHOMORE YEAR after completing the required 30-37 credits. Admission may be based on a competitive point scale if there are more applicants than open slots.

   Three-year track students must have a 3.5 GPA and have completed at least 4 dual credit high school courses. Students interested in the 3-year track should speak with the program director before opting for this track.

3) Each applicant is required to submit a satisfactory physical examination including select laboratory blood work, PPD documentation, proof of immunizations and titers following the Center for Disease Control guidelines for vaccinations for health care workers. A current list of required vaccines may be found at the following website: https://www.cdc.gov/vaccines/hcp/index.html. Students who fail to submit or meet the minimum standards of the health examination may not be admitted to the radiologic science program.

4) Applicants must have a current American Heart Association CPR certification at the time of admission to the clinical component of the program and must maintain CPR throughout their time in the program.

5) Applicants must pass a criminal background check and drug screen. Please note that clinical agencies may deny access to students who have a criminal background. Students who do not pass a background check may not be admitted to the radiologic science program.

   6) Students requesting to transfer into the Radiologic Science Program from other JRCERT accredited radiography programs (collegiate or certificate) will have all transcripts evaluated and advanced placement may be awarded. Additional departmental testing may be required to determine the student's retention level and placement. The Radiologic Science faculty will assess competency levels for advanced placement in the program. Contact the Department Chair for questions or more detailed information.

   Applicants to the Radiologic Science Program are evaluated utilizing a point scale. Points are awarded for GPA score (minimum 2.7), college credits completed, and for hours completed at the University of Charleston. Additional point consideration will be awarded to students who have completed an Associate or Baccalaureate degree.

All candidates who meet the program requirements will be reviewed by the admissions committee of the Radiologic Science Program and ranked based on the point scale.

The point scale is implemented if at the end of the first year, the qualified student population exceeds the number of clinical openings available. Students are encouraged to strive for high academic achievement and professionalism to help secure their acceptance into the clinical radiography component. The number of clinical openings scheduled to begin the sophomore year will vary with each class; however, the target number will be about 15 students. Please contact Kristi Barnett, (304) 357- 4971, E- mail: kristibarnett@ucwv.edu - Chair of Radiologic Science Department, or the University of Charleston, Office of Admissions for additional program information.

Successful completion of science courses in high school and or college such as mathematics, biology, chemistry, physics, and human anatomy and physiology help academically prepare the student for the radiologic science curriculum.

Applicants who read, write, and speak English as a second language must demonstrate proficiency in English skills. Additional testing of the applicant may be required before admission to the Radiologic Science Program.

A personal interview with the Department of Radiologic Science Chair is recommended for all applicants to ensure that applicants fully understand the program and its requirements.

Female applicants are required to review the radiography student pregnancy policy before entering the program.

Applicants to the Radiologic Science Program are encouraged to review the student Radiologic Science Handbook before entering the program. Contact the Program Chair for details about receiving a copy. The Radiologic Science handbook will be reviewed in RADI 101.

Students accepted into the Radiologic Science Program will be expected to attend clinical rotations during the shifts of 8:00 a.m. to 4:00 p.m. and 3:00 p.m. to 11:00 p.m. Students will not be scheduled on weekends or holidays observed by clinical facilities.

Students will be expected to pay any fees associated with clinical readiness obligations such as criminal background checks and lab fees. Any costs associated with uniforms, CPR certification, parking, and textbooks are the student's responsibility.

Admission Criteria and Technical Standards

5. A Radiologic Science student works directly with sick patients and is frequently exposed to communicable diseases and infections; therefore, the applicant should be in good physical condition and free of communicable disease.

6. A Radiologic Science student must be capable of lifting patients, manipulating heavy equipment, including portable x-ray machines, and handling radiography accessories; therefore, the applicant must have

full use of all four limbs and be able to grasp with at least one hand.

7. A Radiologic Science student must have the ability to remain mentally and physically alert to equipment malfunction, and safety hazard warning techniques such as, flashing lights, buzzers, fire alarm, smoke, emergency intercom, pages, monitoring the vital signs and assessing the patient; therefore, the applicant must have the ability to feel, see, hear, and smell.

8. A Radiologic Science student must be capable of extended periods of concentration in selecting correct techniques, equipment, and safety devices to assure maximum care and safety of the patient; therefore, the applicant should be able to exercise independent judgments under routine circumstances and stressful conditions.

9. Radiologic Science students will be exposed to minimal amounts of ionizing radiation. This may not cause biological changes in the individual but can harm the gestation of a human fetus. Radiographers should take care not to expose the unborn to radiation while pregnant. (See pregnancy policy). A person who is pregnant may not meet the above criteria; however, a pregnant woman may apply and be accepted into the Radiologic Science Program.

Program Learning Outcomes

To measure Radiologic Science Program effectiveness, the graduate will:

4. Demonstrate competence as an entry level radiographer.
5. Demonstrate effective communication skills.
6. Employ critical thinking skills in professional practice.
7. Model professionalism.

Program Data Benchmarks for the Joint Review Committee on Education in Radiologic Technology

Minimum quantitative outcomes are as follows:

1. Graduates will earn degrees within four (4) years or less from date of program entrance.
2. Five-year average credentialing examination (ARRT) pass rate must be 75% or higher.
3. Five-year average job placement rate must be 75% or higher within 12 months of graduation.
4. Program completion rate must be 60% or higher.
5. Employer and graduate surveys will indicate 85% or higher satisfaction.

ASRT(R) to BSRT(R) Concentration

This concentration is designed to allow Registered Radiographers to complete requirements for the Bachelor of Science in Radiologic Science degree. The curriculum is contingent upon the academic background of the individual.

The applicant must be eligible for admission to the University; hold a current American Registry in Radiologic Technology; earned a minimum GPA of 2.7 in previous college coursework; current CPR certification; show evidence of passing health care requirements; complete a criminal background check; and document practical work experience.

AS-BS Radiologic Science Required Courses		
MATH 120	Intermediate Algebra	3 credits
HSCI 201 &201L	Health Care Assessment (unless work experiences substitutes)	3 credits
HSCI 312	Statistics for Evidence Based Practice (or equivalent)	3 credits
RADI 302	Cross Section Anatomy (unless work experiences substitutes)	1 credit
RADI 320-323L	Professional Specialization/Lab (unless specialty reg.)	3 credits
HSCI 401	Health Leadership & Mgmt. (unless work experience substitute)	3 credits
HSCI 302	Health Ethics & Policy	3 credits
HSCI 402	Research I	3 credits
RADI 420-423L	Specialization Clinical Lab (unless work specialty reg.)	3 credits
RADI 498	Modality Internship	2-6 credits
Total		**28-31 Credits**
General Education and Electives as determined by the student's individual program evaluation		28+/-credits
Prior Credit for Associate Degree/Diploma – Decision of Program Chair*		**Approx. 60 credits**
		Total Credits: 120 credits

All other graduation requirements will be mandatory including the 30 credits of upper division coursework and resident coursework.

What You Will Study

The Bachelor of Science in Radiologic Science degree consists of 125 credits, including 72 credits of Radiologic Science, 15 credits of Health Science core, 11 credits of Science and Mathematics, and 27 additional credits. Students will also complete approximately 1200 hours of clinical experiences. Coursework is based on a structure of 1 contact hour per credit hour for lecture courses. Clinical experiences are part-time experiences directly associated with didactic material of a course. The student receives one credit for every three hours of actual experience per week during a 15-week semester.

Bachelor of Science Degree in Radiologic Science

Radiologic Science Required Courses		
Course	Course Title	Credit Hours
RADI 101	Introduction to Radiologic	2
RADI 102	Radiation Physics	3
RADI 201	Radiographic Positioning I	3
RADI 201L	Clinic Lab I	3
RADI 202	Osteology	3
RADI 211	Radiographic Positioning II	3
RADI 211L	Clinic Lab II	3
RADI 212	Radiographic Exposure	3
RADI 301	Radiographic Positioning III	3
RADI 301L	Clinical Lab III	6
RADI 302	Cross Sectional Anatomy	1
RADI 304	Imaging Equipment	3
RADI 311	Radiographic Pathology	2
RADI 311L	Clinical Lab IV/Pharmacology	6
RADI 320-RADI 325	Professional Specialization	2
RADI320L-RADI 325L	Professional Specialization Lab	2
RADI 401L	Clinical Lab V	5
RADI 405	Radiation Biology	3
RADI 407	Digital Processing and Quality Management	3
RADI 410	Radiologic Science Senior Seminar	3
RADI 411L	Clinical Lab VI	5
RADI 420L-425L	Specialization Lab	3
RADI 498	Clincal Internship	3
	Required Credit Hours in Major	**73**

Health Science Required Courses		
Course	Course Title	Credit Hours
HSCI 201/201L	Health Care Assessment and Lab	3
HSCI 302	Health Ethics and Policy	3
HSCI 312	Statistics for Evidence Based Practice	3
HSCI 401	Health Management and Leadership	3
HSCI 402	Research	3
	HSCI Required Credit Hours	**15**

Radiologic Science- Required Courses Outside the Major		
HUMN 1XX	Humanities Elective-2 Experiences	6
PSYC 101 Or PSYC 212	Intro to Psychology Life Span and Development	3
SSCI 1XX	Social Science Elective	3
BIOL 251 /251L	Anatomy and Physiology I with Lab	4
BIOL 252/252/	Anatomy and Physiology II with Lab	4
MATH 120	Intermediate Algebra	3
	Total Required Credit Hours Outside Major	**23**

*The curriculum is subject to change.
Grand total credits for graduation —126 credits. Total clinical hours – Approximately 1200 hours

Additional Requirements

Comprehensive Examination/Graduate Competencies

All students who plan to receive a baccalaureate degree must pass a comprehensive examination during the final semester of the year of expected graduation. The examination for the Radiologic Science major will be prepared and administered by the professor of the Radiologic Science Senior Seminar course. Additional examinations will be provided for students who do not pass the first examination with 85% or higher. Students must also complete all graduate level clinical competencies with 85% or higher. Students will not receive a diploma until this requirement has been achieved. Details of the written and practical examinations are available from the department chair.

Policy for Professional Specializations

Students will be required for graduation eligibility to select one major area of specialization, i.e., computed tomography (CT); magnetic resonance imaging (MRI); cardiovascular interventional radiography (CI/ VI); sonography (US or Mammography (M). The student may select mammography, in addition to one of the major areas listed above. Students will be enrolled in both didactic and clinical rotations courses as part of their other

professional specialization. The Radiologic Science Department **CANNOT** guarantee the offering of each modality listed above if a full-time RADI faculty member resigns from his/her position and a faculty member with the appropriate credentials is not available to teach the special modality.

The Radiologic Science faculty will try to grant students' requests for specialization selections. Due to limited availability of clinical facilities, the student is NOT guaranteed his or her first choice in specialized modalities. Selections may be determined by the student's overall University grade point average.

Competency requirements will vary depending on the specialized area selected. Additional classes and clinical education may be required after graduation from the bachelor's degree program at the University of Charleston to be job market prepared, state licensed, or eligible for certification in all specialized areas.

RADI Program Grading Scale:

A	92-100
B	85-91
C	84-84
D	75-79
F	< 75

Policies for Progression and Graduation

Radiography students must achieve a minimum grade of "C" in all radiologic science (RADI) courses to enroll in the next course in the sequence or to be eligible for graduation. In any radiologic science course (RADI) in which the student earns less than a "C" the entire course, lecture and laboratory must be repeated to achieve a passing grade. **NOTE: All students must complete the entire Radiologic Science Program within four years (48 months) from the time of the first enrollment in the curriculum's clinical component.** Candidates for the Radiologic Science degree who do not complete all requirements within a four-year period will be dismissed from the program.

At the conclusion of all semesters, except the semester immediately preceding graduation, radiography students with a grade point average below 2.0 will not be permitted to register for the next radiologic science course. Students with a grade point average between 2.0-2.2 will be placed on academic probation.

Policies for Holding Students

Students enrolled in the University who have completed portions of the clinical component of the Radiologic Science Program, but are currently not enrolled in radiologic science courses may be readmitted to the radiography clinical component under the following conditions:

1) The student must be academically admissible.
2) The student must take all radiologic science courses in the sequence published in the Catalog.

3) The student must have a minimum overall grade point average (GPA) of 2.0.
4) The student must have completed all deficiencies with a "C" or higher.
5) The student must otherwise meet all the conditions for any other student in the University.

Policies Governing Repeat of Radiologic Science Courses

Students requesting to repeat a radiologic science course must have a minimum overall grade point average of 2.0 before being re- admitted to a radiologic science course.

Students may repeat the same radiologic science course one time only.

Students must state in writing their request to repeat any radiologic science course to the director of the Radiologic Science Program.

Students must complete the Radiologic Science Program within four years (48 months) after admission to the clinical component of the Radiologic Science Program.

Students may only repeat two (2) radiologic science courses because of academic failure. After the third failure, ("D" or "F") in a radiologic science course, the student is dismissed from the Radiologic Science Program.

Uniforms

Students must purchase uniforms as designated by the Department of Radiologic Science. Information will be sent to students accepted into the clinical component and will be presented during student orientation. Addition information and dress code policies are contained within the RADI Student Handbook.

Insurance

For protection of the radiography student, all students enrolling in the radiologic science clinical component will be required to carry medical malpractice insurance for the entire period they are enrolled in the clinical courses. This insurance will be provided by a group policy written for the University. All arrangements are made by the administration. The student pays the allocated premium, which the University will collect.

Radiography students enrolled in the clinical component of the Radiologic Science Program are strongly encouraged to carry personal health and accident insurance.

Transportation

The Radiologic Science sophomore, junior, and senior students must provide their own transportation to and from all clinical education settings (hospitals). In addition, students should expect to pay for parking at the hospitals.

Other Expenses

Students in the Radiologic Science Program may incur expenses related to participation in state and national conferences, provided the program decides to participate; however, opportunities for fund raisers may be available to help offset the costs.

RADIOLOGIC TECHNOLOGY PROGRAM

Associate of Science

Professor Jason Wilcox, Program Director

The radiologic technology program develops competence in the knowledge and skills required for radiologic imaging. The integrated curriculum includes 16 hours of general studies credit and 47 hours of radiologic technology credits. Once pre-requisites are completed, students who are successful with all other program requirements may complete the degree in just 17 months. The curriculum incorporates both didactic and clinical education components. Students have the advantage of practicing most radiographic procedures on campus in a lab similar to those found in most hospital settings, as well as taking part in direct patient contact during the clinical components of the program.

Upon meeting program completion requirements, graduates are eligible to apply for the American Registry of Radiologic Technology (ARRT) examination. Successful completion of the ARRT exam grants certification required for licensure in West Virginia and most other states. Individuals with prior felony or certain misdemeanor convictions may not be eligible for certification by the ARRT and/or licensure by state agencies. Also, individuals with prior felony or certain misdemeanor convictions may not be permitted to attend clinical due to various clinical site policies. In such cases students would not be permitted to continue in the program or complete the degree. Contact the appropriate licensing agency and the program director for more information.

The program is accredited by the Joint Review Committee on Education in Radiologic Technology, 20 N Wacker Drive, Suite 2850, Chicago, IL 60606-3182, 312.704.5300, **mail@jrcert.org** or **http://www.jrcert.org**

Program Learning Outcomes

The graduate will:

1. Demonstrate effective verbal communication skills.

2. Demonstrate appropriate written communication skills.

3. Assess patient needs and adapt as required.

4. Identify anatomy and appropriate levels of quality on medical images.

5. Utilize equipment to produce quality images.

6. Utilize appropriate radiographic procedures.

7. Practice principles of radiation protection.

8. Conduct themselves in a professional and ethical manner.

9. Students will understand the importance of professional development activities.

Application and Admission

Admission to the program is selective. Acceptance to University of Charleston and meeting program admission requirements do not guarantee admission to the program. The program accepts one class a year for spring semester entry, with a maximum of 25 students admitted.

Applications received by August 15 will receive full consideration. Applications received after that date will be reviewed on a first-come, first-served basis if and until the spring cohort is full.

Criteria for admission are as follows:

High school graduate or equivalent

General admission to the University

Completion of all prerequisite coursework with a minimum grade of C in each course

Minimum GPA of 2.5 in all college-level study, preference will be given to students with the highest GPA

Although it is not required for program admission, students are encouraged to complete an ACT or SAT. In cases of a full class, preference will be given to students with the highest ACT/SAT scores.

Please note: In cases where qualified applicants exceed the program's capacity, a score card will be used for the selection process. Only the top scoring students will be admitted. The score card is available on the program's web page or upon request.

The final phase of admission requires a technical standards evaluation.

Students must be able to articulate that they are physically able to perform the following tasks to function competently in the field of radiologic technology:

Manipulate the x-ray tube in all directions

Insert and remove a cassette from the bucky tray

Lift 25 pounds of weight from the floor and carry to the exam table

Assist a simulated patient in moving from a wheelchair and stretcher to the exam table

Read a doctor's order/clinical requisition with accuracy

Observe a patient's respiration from a distance of 10 feet

Hear a patient's verbal request within an exam room

Reasonable accommodations are made for applicants with the proper documentation of a disabling condition.

RADT 230	Capstone Seminar	3
	Total	**12**

Students must maintain a minimum GPA of 2.5 throughout the entire course of study. Program progress requires a grade of C in all required courses. Failure to meet these requirements will result in dismissal from the program.

HEALTH SCIENCE MINOR

The minor in health sciences is designed for undergraduate students from a variety of disciplines across the University. Choosing a health science minor will provide the student with interdisciplinary healthcare knowledge, which will provide flexibility in their future career. Students will have a board-based overview of the health care industry, including the history of health science, healthcare management, communication, interprofessional practice, informatics, ethics, and innovation.

Any student across the university can add the health science minor to their major to enhance their knowledge in the health care industry, ultimately increasing their career opportunities. Courses needed for the minor in health sciences are available through an online format. Pursuing students can complete the course asynchronously, allowing for flexibility for classes within a student's minor. Students must earn a "C" or higher to fulfill the requirements.

Program Learning Outcomes

1. The graduate will apply the concepts of healthcare and healthcare professions.

2. The graduate will develop knowledge of healthcare society and how to participate within the society as a professional.

3. The graduate will analyze various healthcare professions and how those professions are incorporated into the healthcare system.

4. The graduate will evaluate healthcare and the impact of healthcare professionals on the delivery of healthcare to consumers.

HSCI 206	Health Communication	3
HSCI 230	Interprofessional Practice and Collaboration	3
HSCI 302	Health Ethics and Policy	3
HSCI 310	Health Informatics	3
HSCI 401	Health Leadership and Management	3
Total Credits		**18**

Dr. Teresa R. Preston, Department Chair and Program Director

Program Mission and Vision Statements

The mission of the University of Charleston Physician Assistant Program is to prepare competent physician assistants who value and provide comprehensive, patient-centered, culturally sensitive primary care, and are committed to lifelong-learning, professional growth, community health, and caring for underserved populations.

Our vision is to foster a culture of learning by employing innovative educational strategies and a team-based approach within a supportive environment and to provide an application-based curriculum centered on critical principles of health and disease.

Program Description

Physician Assistants (PAs) are highly trained medical professionals who practice medicine, valuing the team practice of medicine. They practice in all medical and surgical specialties, take histories, conduct physical exams, order tests, interpret tests, diagnose illness, treat illness, counsel on disease and preventive health, prescribe medications, and perform procedures. They are licensable to practice medicine and have prescription privileges in all 50 states. PAs are provided with a great breadth and depth of medical training, thereby providing the foundation for them to excel in all areas of medicine.

Our program is designed to train outstanding physician assistant clinicians, equipped to handle the challenges of practicing medicine in a multifaceted and complex health care system. Our program emphasizes an integrated approach, training students not only in the foundational domains of medical knowledge and patient care, but also to think critically, solve complex medical problems, utilize evidence to make excellent decisions at the point of care, and to communicate effectively with clinician colleagues, other healthcare professionals, and patients of diverse backgrounds.

The following are highlights of our program:

- **Cohort Size**: 33 students annually, matriculating in January each year.
- **Credits**: The program totals 110 credit hours
- **Program Length**: The program length is 7 contiguous semesters, (28 months).
- **Didactic Curriculum**: The didactic curriculum takes place on the Charleston campus and includes four semesters of coursework. During this time, students are introduced to foundational medical content to prepare them to see patients.
- **Clinical Curriculum**: Following the didactic semesters, students spend three semesters on clinical rotations, working side-by-side with physicians, physician assistants, and other healthcare practitioners. Rotations are central to developing primary care skills. There are seven five-week core rotations and one elective rotation. One or more rotations will be completed at rural medical sites.
- **Pass/Fail System**: The Physician Assistant profession is built on the concept of teamwork, mirroring the direction of medicine. The PA program reinforces this concept by utilizing a pass/fail grading structure, which facilitates a culture where students strive to elevate their classmates to provide the best care possible for patients, rather than work to outperform one another.

- **Active and Collaborative Learning**: The UC PA program strongly values utilizing innovative educational methods. As a result, a variety of approaches are employed beyond standard lecture, including case-based, problem-based, and team-based instruction. Through our Patient-Centered Care series of courses, students are challenged to develop clinical reasoning skills, think critically, enhance interpersonal and communication skills, apply evidence-based resources, and problem-solve as clinicians and as members of an interdisciplinary health care team. This is accomplished through simulated clinical experiences with standardized patients and mannequins.
- **Synthesized Medicine Curriculum**: Instead of courses addressing content separately in clinical medicine, diagnostic skills, and pharmacotherapeutics, the UC PA program has integrated these components together into specialty-based modules (e.g., Cardiovascular, Pulmonology) to enhance learning and retention.

The University of Charleston PA Program is accrediting by the **Accreditation Review Commission on Education for the Physician Assistant (ARC-PA)**. The purpose of accreditation is to establish and maintain standards of quality. ARC-PA is the agency authorized to accredit PA Educational Programs. Students graduating from a PA program that holds an *active accreditation status* at any time during the student's enrollment are considered graduates of an accredited program, and thus are eligible to sit for the **NCCPA** Physician Assistant National Certifying Examination (PANCE). Students must complete an accredited program at the time of matriculation to sit for the PANCE. PANCE Certification is required to be eligible for state licensure to practice as a Physician Assistant.

The Accreditation Review Commission on Education for the Physician Assistant (ARC-PA) has granted **Accreditation-Continued** status to the **University of Charleston Physician Assistant Program** sponsored by the **University of Charleston**. Accreditation-Continued is an accreditation status granted when a currently accredited program is in compliance with the ARC-PA Standards. Accreditation remains in effect until the program closes or withdraws from the accreditation process or until accreditation is withdrawn for failure to comply with the Standards. The approximate date for the next validation review of the program by the ARC-PA will be **September 2026.** The review date is contingent upon continued compliance with the Accreditation Standards and ARC-PA policy. Accreditation history of the UC PA Program can be found on the **ARC-PA website**.

To find out more about our program, visit the **PA Program website.**

<div align="center">

Program Goals

</div>

The goals of the University of Charleston PA Program are to:

Prepare students to competently provide medical care in the primary care setting

Foster a commitment to medically underserved populations

Promote active participation in the community

Prepare students to assume leadership roles within the PA profession

Cultivate an environment that encourages student involvement in supporting and sustaining the University of Charleston PA Program following graduation

Program Learning Outcomes

The PA Program learning outcomes are based on the following competencies:

1. Medical Knowledge and Skills: Demonstrate the medical, behavioral, and social science knowledge and skills necessary to promote health and effectively apply the principles of evidence-based medicine to recognize, assess, diagnose, and treat patients across the lifespan in the clinical practice of medicine.

2. Interpersonal and Communication Skills: Demonstrate and apply effective oral and written communication skills to accurately obtain, interpret, and utilize information to implement a patient-centered management plan in a culturally responsive manner.

3. Professionalism: Commit to continued professional growth and development, including the creation and maintenance of relationships that display respect, compassion, integrity, dependability, and accountability to patients and members of the healthcare team

4. Patient Care: Provide compassionate, competent, and equitable patient-centered care while performing physical exams, ordering and/or interpreting diagnostic tests, and making informed decisions about diagnostic and therapeutic interventions based on patient preferences, current evidence, and clinical judgment.

5. Practice-Based Learning and Improvement: Engage in critical analysis of their practice experience and the medical literature for the purposes of practice- and self-improvement.

6. Systems-Based Practice: Demonstrate an awareness of and responsiveness to the larger system of health care to provide patient care that balances quality and cost, while maintaining the primacy of the individual patient, as it relates to cost-containment, patient safety, medical error and quality, and risk management.

What You Will Study

Didactic – Spring Semester I		Credits
MPAS 501	Professional Development I	1
MPAS 691	Patient-Centered Care I	2
MPAS 550	Mechanisms of Disease	2
MPAS 560	Clinical Pharmacology	2
MPAS 570	Applied Human Anatomy	4
MPAS 580	Medical Physiology	3
MPAS 590	History and Physical Examination	2
MPAS 590L	History and Physical Examination Lab	1
	Total	**17**

Didactic – Summer Semester I		Credits
MPAS 502	Professional Development II	1
MPAS 692	Patient-Centered Care II	1
MPAS 692L	Patient-Centered Care II Lab	1
MPAS 600	Clinical Nutrition	1
MPAS 601	Behavioral Dynamics	3
MPAS 602	Clinical Medicine IA	4
MPAS 603	Clinical Medicine IB	4
	Total	**15**

Didactic – Fall Semester I		Credits
MPAS 503	Professional Development III	1
MPAS 693	Patient-Centered Care III	1
MPAS 693L	Patient-Centered Care III Lab	1
MPAS 604	Cardiovascular-EKG	4
MPAS 605	Geriatrics	1
MPAS 606	Clinical Medicine IIA	4
MPAS 607	Clinical Medicine IIB	4
MPAS 613	Principles of Rural Appalachian Medicine	1
	Total	**17**

	Total	**11**
	Clinical Curriculum Total	**43**
	Total Credit Hours for the Program	**110**

Medical Disciplines Covered by Clinical Medicine (CM) Courses
MPAS 602: CM IA – Hematology, Oncology, and Endocrinology
MPAS 603: CM IB – Infectious Disease, Ophthalmology, and Otorhinolaryngology
MPAS 606: CM IIA – Gastroenterology, Urology, Nephrology, and Men's Health
MPAS 607: CM IIB – Pulmonology and Neurology
MPAS 612: CM III – Musculoskeletal, Rheumatology, and Dermatology

Clinical Year Rotations
MPAS 701 Primary Care
MPAS 702 Internal Medicine
MPAS 703 Pediatrics
MPAS 704 Women's Health
MPAS 705 Emergency Medicine
MPAS 706 Surgery
MPAS 707 Psychiatry
MPAS 710 Elective

Admission Requirements

There are three admission pathways for the University of Charleston PA Program. General information about each pathway can be found below. Full admission requirement details for each pathway can be found on the **PA Program Admissions webpage**.

Traditional Admission Pathway

The Traditional Pathway is available to applicants who will have earned a bachelor's degree from an accredited institution of higher education prior to the matriculation date for which application is being made. Applicants can apply through the **Centralized Application Service for Physician Assistants (CASPA)**. Applicants must meet all Traditional Pathway admission requirements, including prerequisite course requirements.

Fast Track Admission Pathway

The Fast Track Pathway is available to applicants who are currently enrolled at UC, providing an opportunity for UC undergraduate students to gain early admittance into the PA program. Applicants who have completed over 30 hours or more of college credit from other institutions are not eligible and must apply for admission to the PA program through the Traditional Pathway. Applicants can apply through the **University's application portal**. Applicants must meet all Fast Track Pathway admission requirements, including prerequisite course requirements. A bachelor's degree is required if an applicant plans to practice in a state that requires a bachelor's degree for licensure; otherwise, a bachelor's degree is not required. Highly motivated students can earn a master's degree and become eligible to practice as a PA in as little as five years if a bachelor's degree is not required.

Transfer Admission Pathway

The Transfer Pathway is available to applicants enrolled in another ARC-PA recognized program who are unable to continue their education there. To be considered, applicants must be in good academic standing. Applicants can apply through the **University's application portal**. Applicants must meet all Transfer Admission Pathway admission requirements, including prerequisite course requirements. A bachelor's degree is required if an applicant plans to practice in a state that requires a bachelor's degree for licensure; otherwise, a bachelor's degree is not required.

International Applicants

For us to accurately determine United States educational equivalency, applicants who have completed coursework and/or obtained a degree from an educational institution outside the United States are required to have their educational credentials evaluated by World Education Services (WES) or Education Credential Evaluators (ECE). Evaluation reports should be submitted from WES or ECE directly to CASPA.

Successful Admission and Progression

Comprehensive information about the UC PA Program admissions process is available on the **PA Program website**. An interview will be offered to the academically strongest applicants. Applicants must meet minimum admissions criteria per the pathway they are entering to be considered for the program. Seat offers will be made to the strongest applicants based on academics, education history, community involvement, healthcare experience, leadership, a personal narrative essay, a propensity to work with the underserved, and references. Additional consideration will be given to those with ties to

West Virginia or its bordering state, UC students and alumni, and applicants considered to be a good fit for the program.

To progress through the program and graduate, students must earn a grade of "B" or better in all courses and be in good academic and professional standing. The Academic Performance and Progression Policy can be found on the **PA Program website**.

Dr. Betty Beimel, Graduate Nursing Program Director

Program Mission Statement

The mission of the Master of Science in Nursing (MSN) program is to prepare ethical, safe, and effective advanced practitioners of professional nursing across the lifespan.

Program Description

The Master of Science in Nursing program prepares students for their role as an advanced practice nurse who functions as the primary care practitioner to individuals across the lifespan in a variety of inpatient and outpatient clinical settings.

The degree offers an emphasis on practice as a Family Nurse Practitioner (FNP), to enable students to take their career to a higher level. Through this program, you can develop the knowledge and skills to assume advanced practice roles. The didactic courses provide the knowledge, theoretical concepts, and research that inform today's patient care and evidence-based practice. The clinical courses enable students to gain skills in clinical decision making and differential diagnosis, patient teaching, assessments, and interventions.

Our degree enables graduates with the knowledge and skills to sit for the FNP national certification board examination offered by the American Nurses Credentialing Center (ANCC) or the American Academy of Nurse Practitioners (AANP). There is a 1:7 credit-to-contact hour ratio for practicum which includes a combined total of 787.5 hours for the program. This comprises 750 direct care clinical hours across the three clinical courses and virtual simulation that are incorporated into courses. There are two annual starts: fall and spring. There are two program options: full- (five terms) and part-time (seven terms). MSN FNP majors must meet all University of Charleston graduation requirements and complete all program and course assignments.

Program Learning Outcomes

At the end of this course of study, the graduate will:

1. Deliver safe, high quality, patient-centered and population care through an advanced understanding of nursing and relevant sciences through health promotion and preventative measures.

2. Implement the role of the advanced practice registered nurse through lifelong learning, reflective practice, and enlightened living informed by evidence and research.

3. Advocate for policies that lead to change in quality health outcomes through interprofessional collaboration in the delivery of primary care.

4. Integrate ethical, critical thinking and decision making in the leadership role to plan, implement, and evaluate primary care interventions with culturally and age diverse populations.

5. Apply patient healthcare technologies and informatics in practice within a systems framework to promote effective communication and to organize care.

What You Will Study

The MSN FNP degree program includes 42 credits of academic work.

Master of Science in Nursing – Family Nurse Practitioner – Required Courses		
Course	Title	Credits
NURSM 501	Advanced Practice Roles	3
NURSM 502	EBP Research	3
NURSM 503	Advanced Leadership	3
NURSM 504	IT in Advanced Practice	3
NURSM 505	Healthcare Policy	3
NURSM 510	Advanced Pathophysiology	3
NURSM 515	Advanced Pharmacology	3
NURSM 520	Advanced Assessment	3
NURSM 525	FNP Capstone	3
NURSP 625	Primary Care I	5
NURSP 635	Primary Care II	5
NURSP 645	Transitions: Advanced Nursing	5
Total Required Credits for MSN FNP degree focus:		**42**

Admission Requirements

Students must gain general admission to the University of Charleston and must:

Have a BSN from an accredited institution and at least a minimum cumulative 2.5 GPA

Have a current, active, unencumbered US registered nurse (RN) license

Additional Requirements

MSN FNP majors must meet all University of Charleston graduation requirements, complete all program and course assignments, and must take and pass a comprehensive examination during the final semester.

Program Director
Nicole Scheiman, DrOT, OTR/L

Program Mission Statement

The mission of the Master of Science in Occupational Therapy Program is to prepare future occupational therapy professionals with a commitment to moral purpose and personal character, who embody and enable purposeful occupational engagement for all people who experience limitations in participation, promote health and well-being across the lifespan, and within diverse contexts. Students develop the knowledge, abilities and character to be life-long learners, use critical thinking and clinical reasoning to create innovative, evidence-based solutions to society's increasingly complex and ever-changing needs, and lead a life rich in productive work and community involvement.

Program Description

The Master of Occupational Therapy program is a twenty-four (24) month program designed to prepare qualified entry level occupational therapists. Freshman and transfer students enter an accelerated occupational therapy program completing an undergraduate degree and the Master of Science Degree in 5 years. Students must meet the outlined criteria in order to advance to the professional phase of the program. The program is structured as a hybrid curriculum combining online class instruction with hands on learning laboratories on campus. The curriculum interweaves 4 threads throughout the courses: Occupation, Clinical Reasoning, Evidence Based Practice, and Professional Identity. The Occupational Therapy Program has been granted candidacy status for the entry-level Master of Science in Occupational Therapy Program by the Accreditation Council for Occupational Therapy Education (ACOTE). The program is in the process of completing the self-study process and anticipates a pre accreditation review, an onsite visit in the fall of 2025, and accreditation being granted the spring of 2026. For information regarding accreditation, contact ACOTE at (301) 652-2682, or ACOTE, 7501 Wisconsin Avenue, Suite 510E Bethesda, MD 20814. The web address is **www.acoteonline.org**.

Program Learning Outcomes

Graduates from the Master of Science in Occupational Therapy program at the University of Charleston will:

1. Promote the distinct value of occupation and the importance of meaningful occupation to enhance the overall health and well-being of persons, groups, communities, and populations.
2. Analyze the constructs and contexts from the Occupational Therapy Practice Framework (OTPF) that promote and enhance engagement in meaningful occupations to identify and meet the needs of persons, groups, communities, and populations.
3. Demonstrate effective critical thinking skills to evaluate evidence, develop innovative practice ideas, use a variety of knowledge sources, and be intellectually flexible to meet the occupational demands of an ever-changing world.
4. Use clinical reasoning skills to develop and provide occupational therapy services that are appropriate, effective, culturally sensitive, theory-driven, evidence-based, client-centered, and target meaningful occupations.

5. Reflect on the outcomes of interventions and the therapy process to facilitate professional development and a zest for life-long learning.
6. Assess through standardized and non-standardized means the well-being and occupational engagement of oneself and those who may need occupational therapy services to determine unmet needs and develop a plan for intervention or programming that addresses these needs to promote health and well-being, remediation or restoration, health maintenance, disease and injury prevention, and compensation and adaptation for individuals, families, communities, and populations.
7. Communicate effectively in both intraprofessional and interprofessional contexts to promote the profession and the distinct value of occupation in meeting the needs of those we serve.
8. Develop a strong professional identity and deep understanding of the various roles of the occupational therapy practitioner (mentor, educator, practitioner, and researcher), increased self-awareness, and increased self-efficacy through consistent self-reflection.
9. Obtain the knowledge and skills needed to be a generalist practitioner with a commitment to moral purpose and personal character who provides services and supervision that are ethically sound, within the scope of practice of the profession, and in accordance with the accompanying state practice act.
10. Demonstrate cultural humility and ethical decision making necessary to provide compassionate care to all clients, members of the care team, stakeholders, and community partners to support human occupation regardless of the beliefs, practices, backgrounds, income, identity, of those we serve.

What You Will Study

The Master of Occupational Therapy program awards the MSOT degree at the successful completion of the twenty-four (24) months of study.

Plan of Study

Summer I

	Course Title	Credit Hour
MSOT 510X	Occupational Therapy Process and Evaluation	4
MSOT 511X	Foundations of Occupational Therapy	3
MSOT 512X	Ethics in Occupational Therapy Practice	1
MSOT 514X	Introduction to Practice Settings	1
MSOT 515X	Occupation Based Kinesiology	3
MOST 516X	Introduction to Evidence-Based Practice and Research	3
		15

Fall I

	Course Title	Credit Hour
MSOT 520X	Occupational Therapy Process and Evaluation – Pediatrics	5
MSOT 521X	Occupational Therapy Intervention – Pediatrics	4
MSOT 522X	Level I Fieldwork A – Pediatrics	1
MSOT 524X	Activity and Occupational Analysis	2
MSOT 525X	Assistive Technology in Occupational Therapy	2
MSOT 526X	Research – Data Analysis and Dissemination	3
		17

Spring I

	Course Title	Credit Hour
MSOT 530X	Occupational Therapy Process and Evaluation – Physical Disabilities	5
MSOT 531X	Occupational Therapy Intervention – Physical Disabilities	5
MSOT 532X	Level I Fieldwork B – Physical Disabilities	1
MSOT 535X	Administration, Management, and Leadership	2
MSOT 536X	Capstone	2
		15

Summer II

	Course Title	Credit Hour
MSOT 540X	Occupational Therapy Process and Evaluation – Mental Health	4
MSOT 541X	Occupational Therapy Intervention – Mental Health	5
MSOT 542X	Level I Fieldwork C – Mental Health	1
MSOT 544X	Communities and Populations	3
MSOT 545X	The Occupational Therapist as an Innovator	2
		15

Fall II

	Course Title	Credit Hour
MSOT 550X	Level II Fieldwork A	12
MSOT 552X	Culminating Competency and Fieldwork Preparation	2
MSOT 553X	Clinical Reasoning and Application in Practice Seminar I	1
		15

Spring II

	Course Title	Credit Hour
MSOT 560X	Level II Fieldwork B	12
MSOT 562X	Leadership and Transition to Professional Practice	2
MSOT 563X	Clinical Reasoning and Application in Practice Seminar II	1
		15

Admission Requirements

The program offers three tracks for admissions: high school, undergraduate, and graduate entry.

High School Track

Qualified high school students can apply for admission to the pre professional occupational therapy program. Once at the University of Charleston, students must take the designated prerequisites, complete the general education requirements, and the coursework related to their undergraduate major (e.g. exercise science). To transition into the professional phase of the program, they must demonstrate a 3.0 overall grade point average and earn a 'C' or higher in each prerequisite course and complete a minimum of 82 credit hours including 8 at the upper division level (300 – 400 level). Students who fulfill the general education requirements of the University of Charleston will earn a bachelor's degree after successful completion of the first year of the professional phase of the occupational therapy program.

Undergraduate Transfer Track

Students without an earned bachelor's degree can apply for admission to the pre professional occupational therapy program. Once at the University of Charleston, students must take the designated prerequisites, complete the general education requirements, and the coursework related to their undergraduate major (e.g. exercise science). To transition into the professional phase of the program, they must demonstrate a 3.0 overall grade point average and earn a 'C' or higher in each prerequisite course and complete a minimum of 82

credit hours including 8 at the upper division level (300 – 400 level). Students who fulfill the general education requirements of the University of Charleston will earn a bachelor's degree after successful completion of the first year of the professional phase of the occupational therapy program.

Graduate Track

Students with an earned bachelor's degree can apply for admission to the professional phase of the occupational therapy program. Applicants must demonstrate a 3.0 overall grade point average and earn a 'C' or higher in each prerequisite course.

Graduate admission and progression requirements to the professional phase of the MSOT program include:

1. Prerequisite coursework completed prior to starting the professional phase with the grade of a "C" or higher:

   - Statistics (3 credit hours)

   - Biology with Lab (4 credit hours)

   - Anatomy and Physiology with labs (8 credit hours)

   - Medical Terminology (1-3 credit hours)

   - Sociology (3 credits)

   - Introduction to Psychology (3 credit hours)

   - Life-Span Development (3 credit hours)

   - Abnormal Psychology (3 credit hours)

2. Cumulative GPA of 3.0

3. Students applying for direct admission to the professional phase of the program must include:
   a. A brief typed essay (300 words or less) responding to the prompt: *Describe your personal characteristics and experiences that you believe will lead to your success in the occupational therapy profession.*
   b. A resume documenting your academic and work experiences.

4. A bachelor's degree is not required for admission to the MSOT program. Students who are admitted to MSOT without a conferred undergraduate degree may work with their advisor to see if they are eligible for bachelor degree conferral after their first year of professional course work. If not, they will be awarded a Master of Science in Occupational Therapy after successful completion of the program.

Offers of acceptance will be provided based upon cohort space availability.

Preference for admission to the professional phase of the MSOT program is given to University of Charleston students and alumni who:

1. Demonstrate a minimum 3.0 cumulative grade point average in all major and general education requirements by the end of the spring semester of Year Three of the Pre-Professional phase of study.
2. Complete a minimum of 82 college credits including a minimum of 8 credit hours at the 300 and 400 level.
3. Demonstrate completion of all general education core and prerequisite courses.
4. Demonstrate a minimum 3.0 overall grade point average and a grade of 'C' or higher in each prerequisite course.

International student applicants to the MSOT program must follow the University of Charleston international student admissions processes and complete the prerequisite criteria.

The MSOT program utilizes a rolling admission process. Candidates are accepted until the classes start or until the class sizes reaches its maximum number. Applications open in July of each year.

Dr. Megan Orphanos, DMPNA, APRN, CRNA

Program Mission Statement

The CAMC/UC School of Nurse Anesthesia believes in the mission, philosophy, and goals of the CAMC Institute of Academic Medicine (IAM) as well as the University of Charleston, and we will strive, as a school and as individuals, to make them the foundation of our activities. We are committed to excellence in the education and development of selected Registered Nurses to become Certified Registered Nurse Anesthetists. We believe that education offered and received, in a positive environment, will have a positive impact on the quality of patient care, self-concept of the student, and the internal and external view of the institution.

Program Description

CAMC/UC School of Nurse Anesthesia: The Charleston Area Medical Center/University of Charleston School of Nurse Anesthesia offers a thirty-six (36) month program of theoretical instruction and clinical experiences planned to prepare qualified graduate registered nurses to render professional service in the field of nurse anesthesia. Nurse anesthetists at the practice doctorate level offer additional value to the health care system by their expertise in advanced leadership, policy, management, interdisciplinary practice, and evidence-based care. DNAP graduates will have a particularly high level of proficiency in the management of anesthesia care delivery. The missions of Charleston Area Medical Center, CAMC Institute of Academic Medicine (IAM), and University of Charleston (UC) set the stage for the Doctor of Nurse Anesthesia Practice (DNAP), degree program through their commitment to graduate education and improved patient care. The DNAP program mission is for Charleston Area Medical Center and University of Charleston School of Nurse Anesthesia to jointly offer a practice oriented Doctoral degree program in Nurse Anesthesia Practice.

Program Learning Outcomes

At the end of this course of study graduates will

1. The student will be able to personally clarify the importance of high individual ethical standards in the delivery of health care and nurse anesthesia services.
2. The student will be able to communicate appropriately, orally and in writing, within a professional healthcare delivery environment.
3. The student will demonstrate evidence-based research competence.
4. The student will demonstrate skills and knowledge required for advanced nurse anesthesia practice.
5. The student will collaborate within interdisciplinary teams to plan, provide, manage, and evaluate patient care.
6. The student will integrate health care policy into the departmental management of health care services.

The CAMC/ UC School of Nurse Anesthesia program awards the Doctor of Nurse Anesthesia Practice (DNAP), degree at the successful completion of the thirty-six (36) months of study.

Plan of Study

Fall I

Prefix	Course Title	Credit Hour
DNAP 700	Overview of Anesthesia Practice, Standards and Orientation	3
DNAP 716	Advanced Cellular Physiology for Nurse Anesthesia	2

Admission Requirements

Students must gain general admission to the University of Charleston.

Our student enrollment criteria ensure our students are appropriate for our profession and have the ability to benefit from our education. Enrollment requirements include:

1. Graduate from an approved baccalaureate or higher degree generic program in nursing or graduate from an approved associate degree with an appropriate baccalaureate degree.
2. Minimum overall undergraduate grade point average of 3.0.
3. A current, valid, professional registered nursing license in one jurisdiction of the United States, which satisfies the requirements of the West Virginia Board of Examiners for Registered Professional Nurses. Once admitted, the school requires all in state and out of state students to maintain licensure in the State of West Virginia or qualifying compact state licensure.
4. A minimum of one-year full time work experience (two years preferred) or its part time equivalent, as an RN in a critical care setting. The applicant must have developed as an independent decision-maker, capable of using and interpreting advanced monitoring techniques based on knowledge of physiological and pharmacological principles.
5. Completion of admissions forms.
6. Resume detailing education and work experience.
7. A personal interview may be requested.
8. Transcripts from all universities attended must be sent.

Additional Requirements
1. Satisfactory completion of didactic requirements.
2. Satisfactory completion of all clinical requirements.
3. Demonstrate satisfactory completion of Core Competencies
4. Meet minimum required score on the Self-Evaluation Examination (SEE)
5. Satisfactory completion of all records.
6. Payment in full of all tuition and fees.
7. Recommendations of the faculty.
8. Have a minimum DNAP GPA of 3.0.
9. Complete all program requirements within 5- years of matriculation into the DNAP program. Extenuating circumstances may be considered on a case-by-case basis.
10. Must be in good academic and professional standing with the program.

SCHOOL OF LEADERSHIP

Dr. Kristen Dugan, Dean

The School of Leadership builds a thriving community of learners and practitioners in a world of accelerating change and complexity. The School of leadership offers undergraduate, graduate and doctoral programs. Program requirements can be found in the program descriptions that follow.

Accreditation

The University of Charleston has maintained regional accreditation by the Higher Learning Commission since 1958. The Accreditation Council of Business Schools and Programs (ACBSP) recognizes programmatic accreditation for the A.S., B.S. and M.S. degrees with Cybersecurity and Leadership majors, and the Doctor of Executive Leadership.

ASSOCIATE OF SCIENCE IN CYBERSECURITY MAJOR

Dr. Adam Beatty Program Director

Associate of Science Cybersecurity Program Mission

The mission of the (ASCS) Associates of Science in Cybersecurity provides the problem solving technical competencies and security practitioner skills to defend the security domain as competent members in the field of cybersecurity.

Program Description

The Associates of Science in Cybersecurity is a 2-year, online degree-program that can be taken full time or part time and is designed for entry level students and working adults. Graduates will be prepared to contribute to and lead others in the quickly evolving dimensions of Information Technology (IT) related to cybersecurity. The Program provides opportunities for students to acquire the knowledge, skills, and experience necessary for demonstration of competency in the field of cybersecurity at the associates level.

Graduates will be prepared to contribute to the evolving dimensions of Information Technology (IT) related to cybersecurity.

Lab and hands on activities with the use of industry related certification material is utilized throughout the curriculum.

Graduates will be prepared to conduct the seven main categories of cyber operations as defined by the National Cybersecurity Workforce framework. They will be able to: (1) securely provision, (2) operate and maintain, (3) protect and defend, (4) investigate, (5) collect and operate, (6) analyze, and (7) provide oversight and development. Simplified, graduates will be prepared for a variety of careers in the rapidly growing industry of cybersecurity.

The National Cybersecurity Workforce Framework and U.S. Department of Labor have identified potential job opportunities for graduates of cybersecurity programs that include, but are not limited to:

- o   Information Security Analyst
- o   Information Systems Security Engineer
- o   Intrusion Detection System (IDS) administrator, engineer, or technician
- o   Network Administrator
- o   Computer Crime Investigator
- o   Cyber Trainer

Program Outcomes

The graduate will:

1. Identify security vulnerabilities, protection methods, and tools to help mitigate security risks.

2. Provide input for cybersecurity operational plans for individuals, corporations, governmental services and/or the national community.

3. Utilize tools to help detect security risks, threats and vulnerabilities.

4. Collaborate with teams to communicate cyber threats and technical

remediation strategies in both verbal and written formats.
5. Integrate technical skills with operational plans to inform organizational security awareness activities, based on proven industry practices, for people, processes, and systems

Curriculum

33 Hours Cybersecurity Major Courses

27 Hours (+/-) Foundational Courses

A.S. Cybersecurity Major Courses (33 credits)*	
Course	**Credits**
ORGL 150: Intro to Professional Development	3
CYBR 100: Intro to Computers (or A+ Certification)	3
CYBR 110: Intro to Networking (or Network + Certification	3
CYBR 120: Intro to Security (or Security + Certification)	3
CYBR 130: Introduction to Programming	3
CYBR 200: Introduction to Databases	3
CYBR 210: Network Security Architecture	3
CYBR 220: Security Vulnerability Analysis	3
CYBR 230: Offensive Security Exploitation	3
CYBR 240: Security and Data Privacy	3
CYBR 250: Cloud Computing	3
Total	**33**
Foundational Courses (27 credits)*	
Course	**Credits**
ENGL 101: Freshman Writing I	3
ENGL 102: Freshman Writing II	3
SPCH 103: Oral Communication Fundamentals	3
ENGL 224: American Literature Survey	3
HIST 211/212: World Cultures I/II	3
SSCI 105: Issues in Social Science	3
HUMN 110: Unheard Voices	3
NSCI 117: Why Science Matters	3
MATH 120: Intermediate Algebra	3
Total	**27**

* Some foundational course requirements may be met with transfer credits; this will vary by student.

Transfer Credit

Undergraduate students enrolled in an undergraduate degree or certificate program must complete at least 25% of the total credits required for the program while in residence at the University of Charleston. The minimum residency requirement for an associate degree is 15 credits. The minimum residency requirement for a bachelor's degree is 30 credits. The minimum residency requirement for a certificate program is 3 credits

Admission Requirements

Students must gain general admission to the University of Charleston.

Additional Requirements

Minimum requirements include:

Decisions on the acceptance of transfer equivalencies within the major are made by the program faculty;

60 earned academic credits;

Fulfillment of all general education requirements;

15 resident credits;

Fulfillment of all requirements and outcomes of the academic program;

Cumulative University of Charleston grade point average of 2.0; and

Demonstration of achievement of exit-level standard on discipline and program outcomes

Dr. Adam Beatty, Program Director

Cybersecurity Program Mission

The mission of the B.S. in Cybersecurity is to prepare graduates with the ability to apply learned skills and experiential knowledge of security technology to make a significant contribution to the information security of individuals, corporations, governmental services and the national community.

Program Description

The Bachelor of Science in Cybersecurity is a 2-year, online degree-completion program that can be taken full time or part time and is designed for working adults who already have some college credit. Graduates will be prepared to contribute to and lead others in the quickly evolving dimensions of Information Technology (IT) related to cybersecurity. The Program provides opportunities for students to acquire the knowledge, skills, and experience necessary for demonstration of competency in the field of cybersecurity at the baccalaureate level.

Graduates will be prepared to contribute to and lead others in the quickly evolving dimensions of technology related to cybersecurity.

Graduates will be prepared to conduct the seven main categories of cyber operations as defined by the National Cybersecurity Workforce framework. They will be able to: (1) securely provision, (2) operate and maintain, (3) protect and defend, (4) investigate, (5) collect and operate, (6) analyze, and (7) provide oversight and development. Simplified, graduates will be prepared for a variety of careers in the rapidly growing industry of cybersecurity.

The National Cybersecurity Workforce Framework and U.S. Department of Labor have identified potential job opportunities for graduates of cybersecurity programs that include, but are not limited to:

- Information Security Analyst
- Information Systems Security Engineer
- Intrusion Detection System (IDS) administrator, engineer, or technician
- Network Administrator
- Computer Crime Investigator
- Cyber Trainer
    - Chief Information Security Officer (CISO)

Program Outcomes

The graduate will:

1. Establish and supervise legal and ethical practices in the cybersecurity arena;
2. Develop and implement a comprehensive cybersecurity strategic plan

for individuals, corporations, governmental agencies, or the national community;

3. Detect, assess, and remediate ongoing cybersecurity threats and vulnerabilities;

4. Effectively communicate cybersecurity threats and remediation strategies across organizational levels in both verbal and written formats; and

5. Integrate knowledge, software and hardware capabilities, and threat and vulnerability awareness across varying technology formats, such as operating systems, networking, social media, mobile and handheld devices.

What You Will Study

Students in the Cybersecurity program complete foundational courses (24 credits), Cyber required courses (33 credits), Organizational Leadership required courses (18 credits), and general electives (45 credits), for a total of 120 credits.

Foundational Courses (24 credits)*	
Course	**Credits**
ENGL 101: Freshman Writing I	3
ENGL 102: Freshman Writing II	3
SPCH 103: Oral Communication Fundamentals	3
SSCI 105: Issues in Social Science	3
HIST 211 or 212: World Cultures I or World Cultures II	3
HUMN 110: Unheard Voices	3
NSCI 117: Why Science Matters	3
MATH 116 or 120: Intermediate Algebra	3
Total	**24**

* Some foundational course requirements may be met with transfer credits; this will vary by student.

Transfer Credit

Undergraduate students enrolled in an undergraduate degree or certificate program must complete at least 25% of the total credits required for the program while in residence at the University of Charleston. The minimum residency requirement for a bachelor's degree is 30 credits.

Admission Requirements

Applicants must gain general admission to the university, have a 60-credit associate degree in Cybersecurity or another technology-related field from a regionally accredited college or university **or** have a minimum of 60 semester credit hours with the primary focus on technology. **The 60 credits must include 9 credits of prerequisite courses or certifications as noted below.** Applicants must have a minimum GPA of 2.0.

Additional Requirements

- Completion of all University of Charleston Foundation Course Outcomes;
- Completion of 120 credits, including transfer credit;
- Completion of 24 credits of Foundational Courses;
- Completion of 33 credits within UC's cybersecurity curriculum;
- Completion of 18 credits within UC's organizational leadership curriculum;

Dr. Adam Beatty, Program Director

Security Analysis Certificate Mission Statement

The mission of the Security Analysis Certificate (SAC) is to provide security analysis skills to defend the security domain as competent members in the field of cyber security.

Program Description

The Security Analysis Certificate is a program that consists of four courses and can be obtained in two semesters. Futhermore, the Security Analysis Certificate allows students to transfer into the University of Charleston's Associate of Science in Cybersecurity with the four courses transferring into their Associate of Science in Cybersecurity degree program. The program is designed to introduce learners to the foundational concepts of cybersecurity at the analysis level.

Unique Strengths of the Program

Graduates will be prepared to contribute to the evolving dimensions of Information Technology (IT) related to cyber security as an analysis.

Lab and hands-on activities with the use of industry-related certification material is utilized throughout the curriculum.

The National Cyber security Workforce Framework and U.S. Department of Labor have identified potential job opportunities for graduates of cyber security programs that include, but are not limited to:

- o   Information Security Analyst
- o   ]Intrusion Detection System (IDS) technician
- o   Network Administrator or Technician
- o   Cyber Trainer

Program Outcomes

The graduate will:

1. Identify security vulnerabilities, protection methods, and tools to help mitigate security risks.

2. Provide input for cyber security operational plans for individuals, corporations, governmental services and/or the national community.

3. Utilize tools to help detect security risks, threats, and vulnerabilities.

4. Collaborate with teams to communicate cyber threats and technical remediation strategies in both verbal and written formats.

5. Integrate technical skills with operational plans to inform organizational security awareness activities based on proven industry practices, for people, processes, and systems

Curriculum

12 Hours Cyber Major Courses

Program Cyber Security Courses (12 credits)*	
Course	Credits
CYBR 100: Intro to Computers (or A+ Certification)	3
CYBR 110: Intro to Networking (or Net + Certification	3
CYBR 120: Intro to Security (or Security + Certification)	3
CYBR 250: Cloud Computing	3
Total	12

The SAC requires a total of 12 credit hours. An academic certificate is awarded upon completion of the designated four courses with a grade of "C" or better for a total of 12 graduate credit hours. Students who obtain the SAC have the option to transfer their 12 hours towards the completion of their Associate of Science in Cybersecurity program at the University of Charleston.

Admission Requirements

Students must gain general admission to the University of Charleston.

Dr. Sarah Hess, Program Director

Mission Statement

The mission of the Workforce Leadership program is to develop workforce-ready leaders who have knowledge, skills, and experience in leading small groups and teams in their communities and organizations by preparing adults who seek to enter the workforce or to enhance their employment opportunities through upskilling.

Program Description

The Workforce Leadership degree develops leadership, workforce readiness, soft and technical skills and provides career development experience for employment in high demand sectors. The program creates a foundation for those looking to enter the workforce or upskilling for current employees looking to improve employment opportunities by developing skills in high demand by today's employers.

Workforce Readiness courses focus on personal and professional development skills for communication, technology, and career development. Contemporary Leadership courses develop foundational and ethical leadership skills for teamwork and small group leadership. Workforce Transitions courses focus on soft skills and foundational technical knowledge in a selected career path and include an internship in a targeted career path.

The WKLD program, which employs the cohort-learning model, helps students develop a network for learning and collaborating professionally long after the students have finished the last class. The program is designed in a convenient format combining online meetings, facilitated weekly discussions, team projects, and individual assignments. The courses include dynamic "real world" applications and develop the personal and professional characteristics needed to be successful in any work environment.

Workforce Leadership Program Learning Outcomes

The graduate will:

1. Develop and employ a development plan and strategies for personal and professional development and apply self-leadership and career skills in personal, professional and community engagement.

2. Assess and apply theories, styles, and practices of communication, ethical leadership and management as they contribute to creating a positive workplace culture, motivation, teamwork, and functional areas of business & management in diverse organizations.

3. Demonstrate awareness and application of current skills and terminology for entry-level employment including leading projects and improvement initiatives and contributing to healthy and safe environments for employees' well-being in a selected career sector.

4. Diagnose workplace challenges and design ethical and innovative solutions in diverse environments through analysis and use of data.

5. Effectively use digital and improvement tools individually and in teams to address personal and workplace issues and productivity.

What You Will Study

The Workforce Leadership program is a 60-credit-hour Associate of Science degree program targeted to adults who seek to enter the workforce or to enhance their employment opportunities through upskilling

Students may transfer in up to 45 credit hours. Note: for an Associate degree, all students must complete at least 15 hours with the University of Charleston, 10 of which must be earned during the year of graduation.

The required 60 credit hours include 21 credit hours in Workforce Readiness, 21 credit hours in Contemporary Leadership, and 18 credit hours in Workforce Transitions. Development of the University's institutional competencies for Analytics, Communication, Technology, Innovation, Values, and Engagement (ACTIVE) is embedded in courses distributed across the program.

The Workforce Leadership degree requires completion or Transfer Equivalency of the following courses:

Workforce Readiness Courses	Cr Hr	Contemporary Leadership Courses	Cr Hr	Workforce Transitions Courses	Cr Hr
WKLD 120 Technology for Workforce Success	3	FLDR 150 Leadership Journeys	3	WKLD 290 Health, Well-being, and Safety in the Workplace	3

Total Credits	**21**	**Total Credits**	**21**	**Total Credits**	**18**

Admission Requirements

Students must gain general admission to the University of Charleston.

Additional Requirements

Graduation requirements include a cumulative University of Charleston grade point average of 2.0 and demonstration of achievement of program outcomes.

Dr. Sarah Hess, Program Director

Program Mission

The mission of the Workforce Readiness certificate is to prepare individuals to enter or advance in the workforce by developing communication capabilities, personal and interpersonal skills, capability with improvement and technology tools, and actionable awareness to ethically address workplace issues and trends, to contribute to communities and organizations. Workforce Readiness courses focus on personal and professional development skills for communication, technology, and career development.

Program Learning Outcomes

Upon completion of the certificate, the student will:

1. Develop and employ a development plan and strategies for personal and professional development and apply self-leadership and career skills in personal, professional and community engagement.

2. Diagnose workplace challenges and design ethical and innovative solutions in diverse environments through analysis and use of data.

3. Effectively use digital and improvement tools individually and in teams to address personal and workplace issues and productivity.

Delivery & Pricing:

$380 per credit hour/ Discounted rate $250 per credit hour for military and first responders

Typical Course Schedule:

21 Credit Hours – 2 courses per term

Semester	Cr. Hrs	Course ID	Course Title
1	3	WKLD 120	Technology for Workforce Success
1	3	FLDR 240	Performance Improvement Initiatives

2	3	FINA 201	Financial Literacy

Dr. Sarah Hess, Program Director

Program Mission

The mission of the Contemporary Leadership certificate is to prepare emerging leaders capable of self- and small group leadership in their communities and organizations, demonstrating ethical responsibility, creating a positive workplace culture, and communicating data-driven decisions.

Program Learning Outcomes

Upon completion of the certificate, the student will:

1. Develop and employ a development plan and strategies for personal and professional development and apply self-leadership and career skills in personal, professional and community engagement.

2. Assess and apply theories, styles, and practices of communication, ethical leadership and management as they contribute to creating a positive workplace culture, motivation, teamwork, and functional areas of business & management in diverse organizations.

3. Demonstrate awareness and application of current skills and terminology for entry-level employment including leading projects and improvement initiatives and contributing to healthy and safe environments for employees' well-being in a selected career sector.

4. Effectively use digital and improvement tools individually and in teams to address personal and workplace issues and productivity.

WORKFORCE TRANSITION CERTIFICATE

Dr. Sarah Hess, Program Director

Program Mission

The mission of the Workforce Transition certificate is to develop workforce-ready leaders to enter the workforce or to enhance their employment opportunities through upskilling and to employ soft and technical skills in a selected career path while leading small groups and teams in their communities and organizations.

Program Learning Outcomes

Upon completion of the certificate, the student will:

5. Demonstrate awareness and application of current skills and terminology for entry-level employment including leading projects and improvement initiatives and contributing to healthy and safe environments for employees' well-being in a selected career sector.

6. Diagnose workplace challenges and design ethical and innovative solutions in diverse environments through analysis and use of data.

7. Effectively use digital and improvement tools individually and in teams to address personal and workplace issues and productivity.

ORGANIZATIONAL LEADERSHIP

Bachelor of Science
Dr. Dale Retzlaff, Program Director

Organizational Leadership Program Mission Statement

The Organizational Leadership program develops individuals for departmental and team leadership using a foundation of liberal education, applying personal and professional knowledge and skills in core leadership competencies to improve effectiveness and teamwork to get results, create change and make a difference for a life of productive work, enlightened living and community involvement and service.

Program Description

The Organizational Leadership degree completion program develops individuals with the skills they need to join the next generation of global leaders by using a foundation of education and applying personal and professional knowledge and skills in core leadership competencies. The courses are designed to develop scholar-practitioners for application of knowledge through dynamic real-world, innovative learning applications and encourage collaboration, team building, critical thinking, and accountability while learning ethical and principle-centered leadership skills. Students may transfer credit from accredited community colleges and post-secondary schools as well as earn additional credit for military training, certifications and other training, which can be used toward your four-year degree.

This adult degree completion program is created for the working professional who needs to finish a bachelor's degree to progress in his or her career. It is designed to fit the needs, academic interests, and existing schedule of the adult learner. The Organizational Leadership program employs the cohort-learning model, not only accomplishes these goals; it provides its students with a network to learning and collaborating professionally long after the students have finished the last class. The program is designed in a convenient format combining online meetings, facilitated weekly discussions, team projects, and individual assignments.

The Bachelor of Science in Organizational Leadership (ORGL) program takes advantage of our skilled students' experience. Recognizing that our students are adult learners with very busy lives and richness of "real-world" experience, we create a learning environment that builds on such. Through dynamic "real world" innovative learning applications, our students learn to bring new ideas and energy as leaders to solve leadership and organizational challenges. Thus, this program continually and consistently reinforces the value of life-long learning by specifically accommodating the unique needs of the adult learner. The ORGL program has an experiential foundation based on the belief that our students are mature learners who know how to learn, accept the responsibility for their learning experience, and demand challenge from their program. You will learn from dedicated and student-oriented faculty members, who share a wealth of professional experience, giving them a unique perspective on the nature and dynamics of organizations, and who are committed to your success. The Organizational Leadership program has earned specialized business accreditation from the Accreditation Council for Business Schools & Programs (ACBSP).

Organizational Leadership Program Learning Outcomes

ORGL graduates will be prepared to lead teams and departments in a wide array of business and organizations in the private and public sector.

The graduate will:

1. Evaluate his or her own performance for self-improvement.
2. Analyze the qualities of a successful team.
3. Analyze and apply leadership styles in various contexts.
4. Implement effective approaches to organizational change.
5. Apply leadership skills to communicate with a variety of audiences in various contexts.

What You Will Study

The Organizational Leadership program is a 120-hour degree completion program targeted to working adults with two years of work experience, who have at least 40 hours of transfer, prior learning, or equivalent credit.

The ORGL program requires completion of 120 credit hours which includes the 48 Core Leadership credits, 45 hours of Electives, and 27 hours of Foundation Courses.

The Organizational Leadership degree requires completion of the following courses:

CORE REQUIREMENTS - 48 CREDIT HOURS		
FIRST SEMESTER		
ORGL 150	Introduction to Professional Development	3 credits
ORGL 151	Introduction to Business	3 credits
ORGL 301	The Adult Learner	3 credits
ORGL 302	Principles and Issues of Management	3 credits
SECOND SEMESTER		
ORGL 305	Principles and Issues of Human Resources	3 credits
ORGL 307	Leadership	3 credits
ORGL 309	Collaborative Leadership	3 credits
ORGL 316	Ethics	3 credits
THIRD SEMESTER		
ORGL 401	The Learning Organization	3 credits
ORGL 402	Organizational Behavior	3 credits
ORGL 408	Action Research	3 credits
ORGL 430	Developing Teams	3 credits
FOURTH SEMESTER		
ORGL 406	Organizational Development and Change	3 credits
ORGL 413	Human Resource Development	3 credits

| ORGL 415 | Leadership Communication | 3 credits |
| ORGL 435* | Organizational Leadership Senior Capstone | 3 credits |

*Students must earn an overall grade of "C" or higher in ORGL-435 to receive credit for the ORGL senior capstone course.

Program Elective Courses

Organizational Leadership Electives		
ORGL 441	Coaching and Mentoring	3 credits
ORGL 442	Leading Change	3 credits

Admission Requirements

To qualify, students must be admitted to the University of Charleston, transfer at least 40 semester hours of college credit and have two years of work experience. Students can transfer in up to 90 credit hours. Note: all students must complete at least 30 hours with the University of Charleston. Only students completing 50% or more of their coursework with us at UC (at least 60 hours) and meeting the necessary GPA requirements are eligible to graduate with honors. Academic Distinction: The title of Academic Distinction is awarded to transfer students with a 3.9 GPA or above who do not meet the 50% coursework requirement for honors.

Organizational Leadership Minor

The Minor in Organizational Leadership requires the student to complete 18 credits in ORGL. The Minor in Organizational Leadership is delivered online.

ORGANIZATIONAL LEADERSHIP MINOR - 18 CREDIT HOURS		
ORGL 151	Introduction to Business	3 credits
ORGL 309	Collaborative Leadership	3 credits
ORGL 401	The Learning Organization	3 credits
ORGL 402	Organizational Behavior	3 credits
ORGL 430	Developing Teams	3 credits
ORGL 406	Organizational Development and Change	3 credits

Mr. Anthony Giaimo, Program Co-Director

Dr. Dale Retzlaff, Program Co-Director

Program Vision

To empower and enrich current and future leaders who are in the field of criminal justice.

Program Mission Statement

To develop dynamic and ethical leaders in the field of criminal justice who possess the knowledge, skills, and values necessary to navigate the complex challenges of this ever-evolving field. Through comprehensive education, practical experiences, and a dedication to community service, we are committed to facilitating graduates who are equipped to successfully lead with integrity, compassion, and a solid commitment to social justice in the pursuit of a safer and more just society.

Program Description

The Criminal Justice Leadership Bachelor of Science program offers a unique educational perspective and experience that seeks to empower and enrich current and future leaders in the criminal justice field. Through a comprehensive curriculum, students will gain a strong understanding of the criminal justice system and its role in society's forma leadership perspective. With a focus on developing critical thinking skills, effective communication, and problem-solving methodologies, students will be prepared to engage the challenges and complexities in the field of criminal justice. The program also offers opportunities for firsthand learning, networking with other professionals, and engaging in real-world scenarios. Upon completion of the program, graduates will have gained the necessary knowledge and skills to not only effectively lead but to make a positive impact in their communities as ethical criminal justice leaders.

Program Learning Outcomes

CJLD graduates will be well-equipped to make a positive impact within the criminal justice field and address the ongoing challenges and issues within the system.

1. Comprehensive understanding of leadership dynamics including critical thinking, problem-solving and collaboration with agencies and other professionals.

2. Effective communication, team management, and conflict resolution skills.

3. Cultural competence with sensitivity, awareness of diversity, and global perspectives

4. Commitment to continuous learning, ethical principles, and social responsibility.

5. Mental resilience, stress management, and a commitment to lifelong service with a positive societal impact.

Program Values

B – Beyond expectations, ethical decision-making

U – Unrivaled effective communication skills

I – Innovative critical thinking and problem-solving abilities

L – Leadership and management skills

D – Diverse perspectives and technology in criminal justice

I – Impactful victim advocacy and support

N – Navigate complex crisis situations

G – Geared towards promoting human rights

-

L – Logical conflict resolution and mediation techniques

E – Engaging community and public relations skills

A – Accurate risk assessment and crisis management

D – Dynamic research and writing skills

E – Ethical Leadership

R – Resourceful budgeting, planning, and risk management

S – Strategic policy development and analysis

What You Will Study

The Criminal Justice Leadership program is a 120-hour degree completion program targeted to working adults with two years of work experience, who have at least 40 hours of transfer, prior learning, or equivalent credit.

The CJLD program requires completion of 120 credit hours which includes the 48 Core Leadership credits, 45 hours of Electives, and 27 hours of Foundation Courses.

The Criminal Justice Leadership degree requires completion of the following courses:

CORE REQUIREMENTS - 48 CREDIT HOURS		
FIRST SEMESTER		
CJLD 150	Leadership in Criminal Justice Organizations	3 credits
CJLD 300	Principles of Criminal Justice Leadership	3 credits
CJLD 302	Principles of Criminal Justice Management	3 credits
CJLR 304	Planning and Organizational Decision Making	3 credits
SECOND SEMESTER		
CJLR 306	Leadership Health, Wellness and Morale	3 credits
CJLD 308	Criminal Justice Leaders: Ethics and Moral Values	3 credits
CJLD 310	Leadership Skills for Escalation Prevention & Management	3 credits
CJLD 400	Resilient Leadership in Crisis Situations	3 credits

THIRD SEMESTER		
CJLD 402	Human Resource Development for Leaders	3 credits
CJLR 404	Cross Cultural Leadership and Diversity	3 credits
CJLD 406	Criminal Justice in Media	3 credits
CJLD 408	Leadership and Innovation: Emerging Criminal Justice Perspectives	3 credits
FOURTH SEMESTER		
CJLD 410	Managing Civil Unrest	3 credits
CJLD 412	Performance Evaluation & Assessment	3 credits
CJLD 416	COMPSTAT: Data and Accountability	3 credits
CJLD 425 *	Capstone: Global Perspectives in Criminal Justice Leadership	3 credits

*Students must earn an overall grade of "C" or higher in CJLD-425 to receive credit for the CJLD senior capstone course.

Admission Requirements

Admission requirement to the program include:

1. **Admission to the University of Charleston**: Students must first be admitted to the university to be eligible for any programs or honors.

2. **Transfer of College Credits**: Students must transfer at least 40 semester hours of college credit to the University of Charleston. They can transfer in up to 90 credit hours.

3. **Work Experience**: Students must have at least two years of work experience.

4. **Minimum Completion Requirement**: All students must complete at least 30 credit hours with the University of Charleston, regardless of transferred credits.

5. **Graduation with Honors**: To graduate with honors, students must meet the following criteria:

   - Complete at least 50% of their coursework with the University of Charleston, which equates to at least 60 credit hours.
   - Meet necessary GPA requirements.

6. **Academic Distinction**: The title of Academic Distinction is awarded to transfer students with a 3.9 GPA or above who do not meet the 50% coursework requirement for honors.

These criteria provide a structured pathway for students to qualify for various programs and honors at the University of Charleston.

CJLD Minor

The Minor in Criminal Justice Leadership requires the student to complete 18 credits in CJLD. The minor in CJLD is delivered online:

Criminal Justice Leadership Minor (18 credits)		
CJLD 300	Principles of Criminal Justice Leadership	3 credits
CJLD 308	Criminal Justice Leaders: Ethics and Moral Values	3 credits
CJLD 310	Developing Leadership Skills for Escalation Prevention and Management	3 credits
CJLD 408	Leadership and Innovation: Emerging Criminal Justice Perspectives	3 credits
CJLD 416	COMPSTAT: Data and Accountability	3 credits
CJLD 425	Capstone: Global Perspectives in Criminal Justice Leadership	3 credits

FRONTLINE LEADERSHIP MAJOR

Associate of Science
Dr. Dale Retzlaff, Program Director

Frontline Leadership Program Mission Statement

</div>

The Frontline Leadership degree completion program is designed to prepare professionals carrying out daily organizational small group and team-leading functions. Graduates develop foundational levels of leadership skills and practices for supervising, coaching, and mentoring, goal and priority setting, motivating, and planning and managing resources. Course activities lead to personal development of self-awareness, positive self-regard, accountability, and responsibility necessary for individual success and team participation.

<div align="center">

Program Description

</div>

This adult degree completion program is created for the working professional who needs to finish an associate degree to progress in his or her career. It is designed to fit the needs, academic interests, and existing schedule of the adult learner.

Students may transfer credit from regionally accredited community colleges and post-secondary schools and earn additional credit for military training, certifications, and other training, which can be used toward your four-year degree. The FLDR program, which employs the cohort-learning model, not only accomplishes these goals, it provides its students with a network to learn and collaborate professionally long after the students have finished the last class. The program is designed in a convenient format combining online meetings, facilitated weekly discussions, team projects, and individual assignments.

The Frontline Leadership Associate of Science (FLDR) program takes advantage of our skilled students' experience. Recognizing that our students are adult learners with very busy lives and a richness of "real-world" experience, we create a learning environment that builds on such. Through dynamic "real world" innovative learning applications, our students learn to bring new ideas and energy as leaders to solve leadership and organizational challenges. Thus, this program constantly and consistently reinforces the value of life-long learning by specifically accommodating the unique needs of the adult learner. The FLDR program has an experiential foundation based on the belief that our students are mature learners who know how to learn, accept the responsibility for their learning experience, and demand challenges from their program. You will learn from dedicated and student-oriented faculty members, who share a wealth of professional experience, giving them a unique perspective on the nature and dynamics of organizations, and who are committed to your success.

<div align="center">

Frontline Leadership Program Learning Outcomes

</div>

The graduate will:

1. Recognize examples of leadership skills and practices from real-life scenarios.
2. Prepare a goal setting and achievement plan for individual or team performance.
3. Identify strategies to facilitate effective team dynamics appropriate for the project objectives and context.
4. Construct and present an organizational or operational opportunity for

<div align="center">

338

</div>

performance improvement integrating innovation, technology, and evidenced based decision making.

5. Relate theories, styles, and practices of leadership and management as they contribute to motivation, teamwork, and functional areas of business.

<div align="center">**What You Will Study**</div>

The Frontline Leadership program is a 60-credit-hour Associate of Science degree completion program targeted to working adults with foundational knowledge and work experience. Transfer credit may be awarded; however, at least 15 credit hours must be completed at the University of Charleston, 10 of which must be earned during the year of graduation.

Students can transfer in up to 45 credit hours. Note: for an associate degree, all students must complete at least 15 hours with the University of Charleston. Only students completing 50% or more of their coursework with us at UC (at least 30 hours) and meeting the necessary GPA requirements are eligible to graduate with honors.

The required 60 credit-hours includes the 24 Foundational Leadership credits, 24 credit hours meeting the University's Foundation Courses, and 12 hours of Electives.

The Frontline Leadership degree requires completion or Transfer Equivalency of the following courses meeting the University's Foundation Course requirements:

Leadership Courses	Credits	Foundational Courses	Credits
FLDR 150: Leadership Journeys	3	SSCI 105 Issues in Social Science	3
FLDR 220: Growing Leaders	3	HIST 211, 212, or SSCI 105	3
FLDR 240: Performance Improvement Initiatives	3	ENGL 101 Freshman Writing I	3
FLDR 260: Leading Project Teams	3	ENGL 102 Freshmen Writing II	3
ORGL 150: Introduction to Professional Development	3	MATH 120 College Algebra	3
ORGL 301: The Adult Learner	3	HUMN 110 Unheard Voices	3
ORGL 302: Principles & Issues of Management	3	SPCH 103 Oral Communication Fundamentals	3
ORGL 316: Ethics	3	NSCI 117 Why Science Matters	3
		Electives	12
Total FLDR Credits	24	Total Foundational & Elective Credits	36

Admission Requirements

Students must gain general admission to the University of Charleston.

Additional Requirements

Graduation requirements include a cumulative University of Charleston grade point average of 2.0 and demonstration of achievement of program outcomes.

Mr. Frank Bowyer, Director of Military Programs

The Military Science Program is operated cooperatively with West Virginia State University. The program has two components: the Basic Course and the Advanced Course.

Basic Course

The Basic Course is designed for students who either want to try Military Science without obligation for military service, or those who want to qualify for entry into the Advanced Courses. A number of popular and challenging extracurricular activities are associated with these courses.

Reserved Officers Training Corps (ROTC) – Basic Course (Pre-commissioning and Leadership Development Curriculum)	
Course	**Credit**
MSCI 101 Introduction to Military Science	2
MSCI 102 Introduction to Leadership	2
MSCI 103 Military Leadership Laboratory I	1
MSCI 201 Military Leadership Laboratory II	1
MSCI 150 Basic Physical Fitness and Conditioning (Repeatable – Co-requisite with MSCI 201)	1
MSCI 202 Military Leadership Laboratory III	1
MSCI 150 Basic Physical Fitness and Conditioning (Repeatable – Co-requisite with MSCI 202)	1
MSCI 203 Military Leadership Laboratory IV	1
Total:	**10**

Advanced Course

The Advanced Course is open only to students who have completed the Basic Course, or to those who have earned placement credit for the Basic Course through various methods – typically through prior military service or MSCI 210 Camp Challenge, also known as the Leadership Training Course (LTC).

Students enrolled in the Advanced Course receive a stipend of $200 or more per month during the academic year, or as otherwise indicated when contracting with the military.

The Advanced Course sequence is designed to qualify a student for a commission as an officer in the United States Army. Students must complete MSCI 310 ROTC Advanced Camp during the summer, usually between the junior and senior years. The courses must be taken in sequence unless otherwise approved by the Professor of Military Science.

Students who participate in the Military Science Program (Army ROTC) may count all 20 credits taken in the program as elective credit toward the minimum credits required for graduation. Students who are not participants in the Military Science Program may also take Military Science courses, which may be applied as elective

credits toward the minimum credits required for graduation. Courses in Military Science shall not be used to satisfy major or allied field requirements. Military Science courses are not included in the calculation of semester credit limitations.

The course sequence is shown in the table below

Reserved Officers Training Corps (ROTC) – Advanced Course	
Course	**Credit**
MSCI 210 Camp Challenge (LTC)	0-6
MSCI 250 Basic Physical Fitness and Conditioning	1
MSCI 251 Basic Physical Fitness and Conditioning	1
MSCI 301 Leading Small Organizations I	2
MSCI 302 Leading Small Organizations II	2
MSCI 303 Advanced Course Leadership Laboratory I	1
MSCI 304 Advanced Course Leadership Laboratory II	1
MSCI 310 ROTC National Advanced Leadership Course (NALC)	6
Total:	**14-20**

Dr. Kevin Harris, Program Director

Program Mission

The mission of the Master of Science in Cybersecurity is to educate graduates to make a significant contribution, with a commitment toward moral purpose and productive work, within the information security community in support of individual, corporation, governmental services and organizational strategic goals.

Program Description

The Master of Science in Cybersecurity program is built to expand upon the undergraduate Cybersecurity program, while providing bachelor's degree prepared individuals the opportunity to gain additional knowledge, skill and experience, and establish competency in the field of Cybersecurity at the graduate level. The M.S. in Cybersecurity has earned specialized business accreditation from the Accreditation Council for Business Schools & Programs (ACBSP).

Graduates will be prepared to contribute to and lead others in quickly evolving areas of Cybersecurity, including strategy, intelligence, and information assurance.

The Cybersecurity program covers seven main categories of cyber operations, in alliance with The National Cybersecurity Workforce Framework. Graduates will be prepared to conduct the following Cybersecurity roles in organizations: (1) securely provision, (2) operate and maintain, (3) protect and defend, (4) investigate, (5) collect and operate, (6) analyze, and (7) oversight and development.

Graduates will focus strongly on the oversight and development of Cybersecurity initiatives preparing them for a variety of managerial and leadership careers in the rapidly growing industry of Cybersecurity.

The National Initiative for Cybersecurity Careers and Studies indicates immediate demand for this profession. Graduates can anticipate employment in corporate, government and military organizations.

Program Learning Outcomes

The Master of Science in Cybersecurity will provide leaders of public and private organizations with the ability to:

1. Evaluate and defend the mission of an organization requiring security defense by analyzing the needs and costs of creating security related programs and strategies.

2. Analyze the demands of systems security and practiced methodologies for protecting data integrity and confidentiality through ethical practices.

3. Synthesize a variety of challenging policy, legal, and technological concepts in relation to cybersecurity.

4. Evaluate security theories, apply experiential lessons learned, evaluate new research and generate new research and security models for

organization's who require security related and information management strategies.

Transfer Credit

</div>

Students enrolled in the MSCS program, or certificate program, must take a minimum of 21 total credit hours from the University of Charleston, and may transfer a maximum of 9 credit hours from a regionally accredited university (subject to approval by the Program

Director). Three of the required 21 credit hours must include the CYBR 660 capstone course.

<h2 style="text-align:center">Admission Requirements</h2>

Applicants to the program must have completed a Bachelors degree in Business, Information Technology, or a related Information Sciences field at a regionally accredited institution of higher education. Technological literacy gained from prior coursework is imperative for success in the program. No entrance examinations are required, as proof of prior performance and recommendations are used as entrance assessments.

<h2 style="text-align:center">Satisfactory Academic Progress</h2>

A final grade of C, or better, is required for the CYBR 660 capstone course to complete the degree requirements.

Level I Probation – Students who obtain a term GPA less than 3.0 must meet with the program director to discuss plans for better performance. If appointments are not made or kept, the student may not be permitted to register for subsequent semesters. Students who obtain a term GPA less than 3.0 will be limited to a maximum of 6 credits in the following semester.

Level II Probation– Students who obtain a term GPA less than 3.0 a second time are placed on Level II probation. Students on Level II Probation may be required to repeat a course(s) and complete remedial work under the supervision of faculty members. Students may only be on Level II Probation for one semester over their time at the University. Students will meet with program director to discuss plans for better performance. If appointments are not made or kept, the student may not be permitted to register for subsequent semesters.

Failure to obtain a cumulative GPA of 3.0 or higher while on Level II Probation or demonstrate satisfactory progression per plans for better performance will result in dismissal from the Program. The final decision on dismissal will be made by the Program Director and Associate Dean considering the following factors: significant improvement of the term GPA and an improvement in the cumulative GPA. Students must have a minimum cumulative GPA of 3.0 to graduate from the Master of Science in Cybersecurity program from the University of Charleston.

Should the student wish to appeal his/her dismissal, he/she must do so within fourteen calendar days from the date of receipt of the dismissal letter, unless the Program Director grants a delay due to extenuating circumstances. Students can petition for readmission one year after dismissal but not before that time.

Dr. Sarah Hess, Program Director

Strategic Leadership Program Mission Statement

The M.S. in Strategic Leadership prepares motivated adult learners for strategic leadership roles as scholar-practitioners engaged in productive work, enlightened living, and community service.

Program Description

Graduates are prepared to strategically and purposefully lead others as they engage in leadership roles in a variety of organizational settings. More specifically, the degree is designed for learners with an undergraduate degree in any discipline from a regionally accredited institution. They are fully enabled for a life of productive work, enlightened living, lifelong learning and community involvement and service by using the foundation of a liberal education and having earned a competency-based master's degree in strategic leadership.

The University of Charleston's program in strategic leadership (SL) has earned specialized business accreditation from the Accreditation Council for Business Schools & Programs (ACBSP). The program is targeted for adults working in leadership positions and is based on the proposition that leadership relates closely to the ability of one to influence the behavior of others to affect organizational outcomes. The SL program is designed to enhance the participant's ability to solve real problems, in real time and for real organizations. Throughout the program, participants will be asked to analyze and make recommendations about actual organizational events. Our hope is that the program's participants will approach these challenges and problems the same way they would at their organization.

Master of Strategic Leadership Program Leadership Outcomes

The program will develop your ability to lead through a combination of leadership theory and practice. The graduate will:

1. Assess, develop, and articulate reasoned judgments on strategic issues

2. Design integrated strategic plans for organizations, communities, or institutions related to the graduate's area of specialization

3. Develop processes for sustainment of strategic capacity of organizations, communities or institutions

4. Create processes for ensuring engagement and accountability in implementation of strategic initiatives

5. Synthesize learning from program and personal experiences to create a plan for continued growth as a strategic leader in your area of specialization for organizations, communities or institutions.

What You Will Study

This research-based professional degree focuses on leadership across disciplines and boundaries in a global environment. Students can expect to understand the leadership competencies that are informed by (1) research in the current literature on leadership, social and behavior sciences, business, (2) the leadership competency lists developed by government, not-for-profit organizations, institutions of higher learning, and (3) analyses of the impact of societal changes on organizations and their challenges for leadership in the future. Throughout the program, students will use an organizational assessment tool to observe and evaluate organizational leadership, strategy, customer focus, knowledge management, workforce, operations, and results. The capstone course focuses on analyzing and interpreting the findings and making recommendations for future actions based on strategic leadership theories and the research.

Number of Credits

The SL major requires a total of 36 credit hours which consists of 27 credit hours in SL core courses and 9 credit hours from one of the specialization areas. Student learners may not earn and transfer more than 9 credit hours of course equivalencies into the SL program. Students must earn a minimum of a "C" in all courses within the SL degree program. A cumulative GPA of 3.00 is required for graduation.

Required Core Courses:

GSL 510 Art and Science of Strategic Leadership	3 Credits
GSL 610 Strategic Thinking	3 Credits
GSL 506 The Human Side of Organizations.........................	3 Credits
GSL 507 Reframing Leadership	3 Credits
GSL 615 Leading Across Boundaries...................................	3 Credits
GSL 630 Strategic Project Management...............................	3 Credits
GSL 601 Organizational Theory	3 Credits
GSL 629 Research Methods..	3 Credits
GSL 64X Strategic Issues in (concentration choice)............	3 Credits
GSL 65X Strategic Decision Making in (concentration choice)	3 Credits
GSL 66X Strategic Innovation in (concentration choice)	3 Credits
GSL 690 Strategic Leadership Capstone..............................	3 Credits

Concentration Options:

Strategy as Practice

GSL 641 Strategic Issues in Strategy as Practice	3 Credits
GSL 651 Strategic Decision Making in Strategy as Practice.	3 Credits
GSL 661 Strategic Innovation in Strategy as Practice	3 Credits

Business Leadership

GSL 642 Strategic Issues in Business Leadership	3 Credits
GSL 652 Strategic Decision Making in Business Leadership	3 Credits
GSL 662 Strategic Innovation in Business Leadership	3 Credits

Healthcare Leadership

GSL 644 Strategic Issues in Healthcare Leadership	3 Credits
GSL 654 Strategic Decision Making in Healthcare Leadership	3 Credits
GSL 664 Strategic Innovation in Healthcare Leadership	3 Credits

Logistics and Supply Chain Leadership

GSL 643 Strategic Issues in Logistics and Supply Chain Leadership	3 Credits
GSL 653 Strategic Decision Making in Logistics and Supply Chain Leadership	3 Credits
GSL 663 Strategic Innovation in Logistics and Supply Chain Leadership	3 Credits

Crisis Leadership

GSL 645 Strategic Issues in Crisis Leadership	3 Credits
GSL 655 Strategic Decision Making in Crisis Leadership	3 Credits
GSL 665 Strategic Innovation in Crisis Leadership	3 Credits

Students in the SL program can choose one of the above concentrations. The concentration consists of 9 credit hours (three courses) from the choice concentration then culminating with the GSL 690 Strategic Leadership Capstone experience (3 credit hours).

Strategy as Practice Specialization

Designed for those who want to focus as a strategic leader practitioner on how strategy is integrated into daily actions across all levels of an organization, including military and former military members having completed at least the Command Sergeants Major or Captains Career Courses or equivalent. Strategy as Practice students are prepared to lead strategic planning and execution within an organization; critically analyze strategy as practice literature; and assess opportunities for improved strategy.

Business Leadership Specialization

Designed for those who want to focus as an entrepreneurial leader on how strategy is integrated into daily actions across all levels of an organization. SLBM students are prepared to lead strategic design, planning and execution within an organization, likely their own or another small business; critically analyze entrepreneurship, startup and business management literature; and assess opportunities for growth.

Designed for mid to upper-level healthcare leaders with three or more years of experience. The specialization prepares the student to analyze the present and future healthcare context to design strategic goals and action plans for healthcare organizations.

GRADUATE CERTIFICATE IN STRATEGIC LEADERSHIP

The Strategic Leadership Certificate (SLC) explores principles of leadership theory and examines elements of strategic leadership required to navigate complex environments, influence others, build teams and support networks, manage change and set strategic organizational direction. Participants work through an integrative framework for problem-based and action learning to identify strategic challenges within their organization and apply strategic foresight to develop and articulate reasoned judgments on strategic issues and facilitate strategic excellence within and outside their organization.

Graduate Certificate in Strategic Leadership Program Mission

To educate leaders through strategic engagement and accountability by applying strategic foresight to develop and articulate reasoned judgments on strategic issues and facilitate strategic excellence within their organization.

Certificate Objectives (PLOs):

1. Design integrated strategic plans for organizations, communities, or institutions related to the student's area of specialization.

2. Develop processes for sustainment of strategic capacity of organizations, communities, or institutions.

3. Create processes for ensuring engagement and accountability in implementation of strategic initiatives.

4. Synthesize learning from program and personal experiences to create a plan for continued growth as a strategic leader in one's area of specialization for organizations, communities, or institutions.

Number of Credits

The SLC requires a total of 12 credit hours. Students will complete the regular admissions process for the MSSL program, as this is an academic credit-bearing certificate. An academic certificate is awarded upon completion of the designated four courses with a grade of "C" or better for a total of 12 graduate credit hours.

Required Core Courses:

GSL 510 Art and Science of Strategic Leadership	3 Credits
GSL 610 Strategic Thinking	3 Credits
GSL 506 The Human Side of Organizations	3 Credits
GSL 507 Reframing Leadership	3 Credits

Admission Requirements

To be admitted to the Strategic Leadership program candidates must possess a bachelor's degree from a regionally accredited college or university, with a minimum GPA of 3.0 for full admission or 2.5 to be considered for provisional admission. A GPA of less than 2.5 will require additional supportive documentation to be considered for provisional admission. There is no GRE or GMAT score requirement.

Academic Probation and Academic Dismissal Policy

Level I Probation – Students who obtain a term GPA less than 3.0 must meet with the program director to discuss plans for better performance. If appointments are not made or kept, the student may not be permitted to register for subsequent semesters. Students who obtain a term GPA less than 3.0 will be limited to a maximum of 6 credits in the following semester.

Level II Probation– Students who obtain a term GPA less than 3.0 a second time are placed on Level II probation. Students on Level II Probation may be required to repeat a course(s) and complete remedial work under the supervision of faculty members. Students may only be on Level II Probation for one semester over their time at the University. Students will meet with program director to discuss plans for better performance. If appointments are not made or kept, the student may not be permitted to register for subsequent semesters.

Failure to obtain a cumulative GPA of 3.0 or higher while on Level II Probation may result in dismissal from the program. The final decision on dismissal will be made by the Program Director and Associate Dean considering the following factors: significant improvement of the term GPA and an improvement in the cumulative GPA. Students must have a minimum cumulative GPA of 3.0 to graduate from the Master of Science in Cyber Security program from the University of Charleston.

Should the student wish to appeal his/her dismissal, he/she must do so within fourteen calendar days from the date of receipt of the dismissal letter, unless the Program Director grants a delay due to extenuating circumstances.

If a student wishes to be re-admitted after dismissal, he/she can submit a written request to the Program Director after one year from the date of dismissal but not beforehand. Requests for readmission are not guaranteed to be granted.

DOCTOR OF EXECUTIVE LEADERSHIP

Dr. Kristen Dugan, Program Director

Doctor of Executive Leadership Program Mission Statement

The mission of the DEL is to develop leaders capable of integrating theory with practice at the executive level for sustainability and service in organizations, communities or institutions in an increasingly complex world.

Program Description

DEL graduates generate, conserve, and transform leadership knowledge and practice while developing other aspiring leaders to become scholar-practitioners. The DEL creates an intellectual community which promotes critical thinking and deep reflection, facilitates both creativity and rigor, and develops the research skills necessary for executive leadership, scholarly integration and lifelong learning and community service.

The DEL is premised on the groundbreaking research done by the Carnegie Foundation's Center for the Advancement of Teaching on the current state of doctoral education in the United States. The purpose of the DEL is to produce the next generation of senior-level leaders who are both scholars and practitioners and can integrate theory and practice in the field of leadership. Such future leaders are necessary to ethically guide institutions, organizations, and communities in an increasingly complex, dynamic, and diverse world. These scholar-practitioners will be capable of generating, conserving, and transforming leadership practice and knowledge and developing other aspiring leaders to become leadership scholar-practitioners. The DEL program has earned specialized business accreditation from the Accreditation Council for Business Schools & Programs (ACBSP).

Doctorate of Executive Leadership Program Learning Outcomes

In order to achieve the desired program outcome of producing scholar practitioners capable of leading at the executive level the following DEL individual student learning outcomes are established:

1. Sense and shape opportunities for, and threats to, future growth and development through embedding scanning, creative, and learning processes into organizations, communities, or institutions.

2. Make timely judgments to seize opportunities and to bring about those decisions by a) developing and rewarding creative action and b) diminishing assets and processes that no longer add value.

3. Assemble, align, and reconfigure tangible and intangible assets to sustain organizations', communities', or institutions' viability for the future.

4. Model, design, and implement scholar-practitioner practices and processes to develop ethical leadership in organizational, community, or institutionalcontexts.

5. Assess existing research and practices and design, conduct, and interpret research to contribute to the theory and practice of leadership within one's discipline and in interdisciplinary, multidisciplinary, or transdisciplinary contexts.

6. Generate and critically evaluate new knowledge, conserve the most important ideas and findings that are a legacy of past and current work and engage in the transformational work of communicating knowledge responsibly to others.

<div align="center">**What You Will Study**</div>

The Doctor of Executive Leadership is a 58-credit-hour course of study that focuses on leadership in context across disciplines and boundaries in a global environment. The program sequence includes 27 leadership core credits, 12 research credits, 10 credits for pro-seminars and portfolio and 9 credits for the dissertation. Students are required to attend three residency sessions as scheduled for the course of study. Continuous enrollment is required to maintain doctoral candidacy, although a request for a leave of absence may be requested. The Dissertation Continuation course is 3 credits for the first semester enrollment and 1 credit each semester thereafter until degree completion. The program is delivered 100% online with an annual on campus Residency.

International students with an F1 visa must complete a contract for each course which specifies meeting dates for the course. Transfer credits may be applied toward the degree requirements depending on evaluation of transfer equivalence. Transfer students may transfer up to 15 credit hours into the DEL program.

For a detailed list of courses, please see the Course Listing section of this catalog under "Doctor of Executive Leadership Courses."

DEL 930 Pro-seminar III: Generating, Conserving & Transforming ....   3 Credits

Academic Progress:

The Doctor of Executive Leadership program requires students to complete all coursework, earning no more than two 'C' grades. Students must also maintain a cumulative GPA of 3.0 or higher. Students who do not meet these requirements will be placed on academic probation and complete a contract and plan for improvement. The Program Director and Dean will work with the student to create an appropriate plan for returning to good academic standing. A student may be required to repeat courses according to university policy until the student achieves compliance with the above requirements. Students who continue to fail to meet the GPA and grade requirements may be dismissed from the program. Students must have a minimum cumulative GPA of 3.0 to graduate from the DEL program.

Doctoral Candidacy:

A student achieves candidacy when the following requirements are met:

1. Completion of all 700- and 800-level coursework with a GPA of 3.0 or higher and no more than two C grades.

2. Successful defense of the Professional Portfolio, including a dissertation prospectus.

3. Successful defense of Dissertation Proposal.

Upon achieving Candidacy, the student is permitted continued enrollment in dissertation coursework.

A DEL student should normally complete all Leadership Core courses, successfully defend the Professional Portfolio, and successfully defend the dissertation within three (3) years of entry into the doctoral program. With endorsement by the Chair, a student may request an extension for one additional academic year. That extension must be approved by the Program Director. A student requesting an extension of one academic year must have demonstrated progress in dissertation work and submit a plan for completion within the extension period.

If the student fails to complete the degree requirements for the program by the end of the first extension period, the student may request a second extension of on additional academic year. Any student requesting a second extension must provide evidence of extenuating circumstances which prevented the completion of the dissertation during the first extension period. A second extension period requires the endorsement of the Chair and Program Director and the approval of the Associate Dean. A student requesting a second extension must have demonstrated significant progress in dissertation work and submit a plan for completion within the extension period.

Under extraordinary circumstances, a student who fails to complete the degree requirements for the program by the end of the second extension period may appeal to the Dean for one additional academic year extension. The Dean will review the request, which must include evidence of extenuating circumstances, endorsement from the Program Director and Dean, and a plan for completion during the final extension period.

Students who receive an extension will be enrolled in dissertation continuous courses until the dissertation assessment is passed. The first dissertation continuation course enrollment is equivalent to three (3) credit hours in the first semester of the extension. Subsequent dissertation continuation courses are equivalent to one (1) credit hour per semester.

A student who fails to complete the program within three (3) years of entry, or during approved leave of absence and extension periods not to exceed six (6) academic years from the time of entry (exclusive of approved leave of absence), will be dismissed from the program. Failure to maintain continuous enrollment in at least one credit hour from the achievement of candidacy until the dissertation is accepted will result in loss of candidacy and possible dismissal from the program.

Leave of Absence:

Events may occur that make it necessary for a student to interrupt his or her progress toward a degree. A leave of absence may be granted to students for personal illness or injury or to provide care for a family member experiencing illness or injury, military service obligations, or other extenuating personal reasons by recommendation of the Program Director and approval of the Dean. A leave of absence enables a student to not register for dissertation continuation hours and remain in compliance with the continuous enrollment requirement. The leave of absence is designed to allow students the time necessary to focus on the reasons for leave. Students on an approved leave of absence may not engage in regular contact with dissertation committee members or conduct research associated with the dissertation. Dissertation committee members will be made aware of any approved leave of absence and should direct the student to the Program Director for any questions or concerns. A leave of absence may be approved once for no more than twelve consecutive months. Failure to re-enroll at the end of the approved leave period will result in loss of candidacy and possible dismissal from the program.

No tuition and fees are charged for the period during which a student is on a leave of absence. A leave of absence may have implications for a student's federal financial aid and loans. Students should consult with the Financial Aid Office to understand how a leave status might affect their aid and eligibility to defer loan repayment.

An approved leave of absence is not counted toward the maximum completion time of six (6) years from the time of entry.

Admission Requirements

To apply for admission to the program, candidates must complete an application packet that includes the application for admission, official transcripts from all colleges and universities attended for graduate coursework, a written paper, a resume detailing a minimum of five years of professional experience in a leadership role, and two letters of academic and professional recommendation. Applicants are required to have a master's or first professional degree from a regionally accredited institution with at least a 3.00 GPA. Applicants with less than a 3.0 may be considered upon request to the Program Director and Dean. Once the application is complete, the DEL program admissions committee interviews prospective students for acceptance into the program. There is a $50 application fee which is waived for military applicants.

SCHOOL OF PHARMACY

DOCTOR OF PHARMACY (PHARM.D.)

Dr. Kristy Lucas, Dean

Dr. Julie Testman, Associate Dean for Academic Affairs (Program Director)

Program Mission Statement

The mission of the University of Charleston School of Pharmacy is to prepare pharmacy leaders committed to a life of positive impact on the community through advocacy, education, scholarship, and innovation, providing the highest level of culturally sensitive interprofessional patient care, with an emphasis on underserved populations.

Program Description

The University of Charleston School of Pharmacy curriculum provides a student-centered approach to learning to ensure the development of professional knowledge, skills, abilities, behaviors, and attitudes necessary to enter advanced pharmacy practice experiences (APPE-ready), provide direct patient care in a variety of healthcare settings (practice-ready), and contribute as a member of an interprofessional collaborative patient care team (team-ready). It features a longitudinal approach, bridging the gap between the foundational sciences and clinical practice allowing students to build upon knowledge and skills each year. Co-curricular requirements are included in each program year to support the professional development of students relevant to the program mission and learning outcomes (goals). Experiential education requirements offer diverse learning opportunities, are intentionally designed to demonstrate progression throughout the program, and allow students to demonstrate competency by the end of the P4 year. The program transitions students from dependent to independent learners and prepares graduates for a lifetime of continuous professional development.

Program Learning Outcomes (Goals)

The School of Pharmacy has six program outcomes (goals) that describe the graduate of the program. These end of program learning outcomes (goals) reflect the University of Charleston Institutional Learning Outcomes as well as the Center for the Advancement of Pharmacy Education (CAPE) Outcomes of 2013. Achievement of these outcomes is evaluated for each student as they progress through the curriculum.

The graduate of the University of Charleston School of Pharmacy will:

1. Use scientific principles of inquiry to design, implement and evaluate evidence-based practices to provide complete pharmacotherapy and medication counseling for individual patients and diverse populations.
2. Demonstrate critical thinking skills by transitioning foundational knowledge into a patient-centered practice, ensuring safe and effective medication management leading to promotion of improved health, sustained wellness, and prevention of disease.
3. Collaborate and communicate effectively with patients, caregivers, other healthcare members, policy makers, and members of the community to effectively participate in a team approach to patient care.

4. Engage in innovative activities when evaluating and implementing medication distribution and related management systems.
5. Demonstrate legal, ethical, and professional principles and judgment in pharmacy practice.
6. Demonstrate advocacy, cultural awareness, interprofessional activities, leadership, public health strategies, and innovation and entrepreneurship as revealed in the individual's completion and defense of a personal and professional development plan.

What You Will Study

The Doctor of Pharmacy degree program includes 147-150 credits of academic work throughout 4 professional program years (P1-P4). Students are required to complete 3 distinct elective courses (2 or 3 credit hours each) by the end of the third professional program year; this accounts for the range of total program credit hours required. The first three years of the program consist primarily of didactic coursework, co-curricular requirements, and introductory pharmacy practice experiences. The fourth program year consists primarily of the advanced pharmacy practice experiences, longitudinal board preparation courses, and the final ePortfolio defense. Multiple certificate programs are embedded throughout the P1 – P4 years to enhance student learning and practice-readiness.

Total credit hours for each program year are:

First Professional Year (P1): 34 or 35 credits (dependent on elective choice)

Second Professional Year (P2): 36 or 37 credits (dependent on elective choice)

Third Professional Year (P3): 32 or 33 credits (dependent on elective choice)

Fourth Professional Year (P4): 45 credits

Standard Four-Year Path

First Year			
Fall Semester		Spring Semester	
PHAR 501L: Prof. Awareness Prep. Sem.	nc	PHAR 506: Immunization Cert.	1
PHAR 510: Intro. Pharm. Pract. & Law	3	PHAR 516: Medicinal Chemistry	3
PHAR 511: Drug Lit. Eval.	1	PHAR 520: Bas. Prin. Patho.	4
PHAR 512: Immunology	3	PHAR 522: Pharmaceutics II	3
PHAR 513: Biochemistry	3	PHAR 523L: Pharm. Skills Lab II	1
PHAR 514: Pharmaceutics I (Calc.)	2	PHAR 525L: IPPE I	1*
PHAR 515L: Pharm. Skills Lab I	1	PHAR 527: Lifestyle Mod. Dx. Prev.	3
PHAR 555: Strategies Pos. Health Out.	3	P1 Elective	2-3
PHAR 598: P1 ePortfolio	nc	PHAR 599: P1 ePortfolio	

*Students may be enrolled in PHAR 525L during the Fall or Spring semester.

Second Year			
Fall Semester		Spring Semester	
PHAR 610: PK Prin. & Clin. App.	3	PHAR 611L: Pharm. Skills Lab III	1*
PHAR 612: Basic Prin. PCOL I	3	PHAR 629: Healthcare Comm.	3
PHAR 615L: IPPE II	4*	PHAR 641: Basic Prin. PCOL II	3
PHAR 640: Pharmacotherapy 1	3	PHAR 660: Pharmacotherapy 3	3

PHAR 644: Clin. Res. Meth. & Biostats.	3	PHAR 670: Pharmacotherapy 4	3
PHAR 650: Pharmacotherapy 2	3	P2 Elective	2-3
PHAR 698: P2 ePortfolio	nc	PHAR 699: P2 ePortfolio	nc
Summer Semester			
PHAR 626L: IPPE III**	2		

*Students may be enrolled in PHAR 611L and PHAR 615L during the Fall or Spring semester.

**Students are assigned to a 2-week block the summer following the P2 Spring semester.

Third Year			
Fall Semester		Spring Semester	
PHAR 716L: IPPE IV	1*	PHAR 700L: Pharm. Skills Lab IV	1*
PHAR 728: Pharmacy Law	3	PHAR 718: Pharmcogen. & Med. Gen.	3
PHAR 740: Pharmacotherapy 5	3	PHAR 725: Pharm. Mgmt. Marketing	3
PHAR 741: Pharmacoeconom. Out. Res.	2	PHAR 742: Adv. Drug. Lit. Eval.	2
PHAR 750: Pharmacotherapy 6	3	PHAR 760: Pharmacotherapy 7	3
PHAR 751: PCOL III	3	PHAR 770: Pharmacotherapy 8	3
PHAR 798: P3 ePortfolio	nc	P3 Elective	2-3
		PHAR 799: P3 ePorfolio	nc

*Students may be enrolled in PHAR 700L and PHAR 716L during the Fall or Spring semester.

Fourth Year					
Summer Semester		Fall Semester		Spring Semester	
PHAR 812: MTM Cert.	2	PHAR 823: APPE 3*	5	PHAR 826: APPE 6**	5
PHAR 821: APPE 1	5	PHAR 824: APPE 4	5	PHAR 827: APPE 7	5
PHAR 822: APPE 2	5	PHAR 825: APPE 5	5	PHAR 828: APPE 8	5
PHAR 870: Board Prep	nc	PHAR 880: Board Prep	1	PHAR 891: Board Prep	1
				PHAR 899: ePortfolio***	1

*Students may be enrolled in PHAR 823 during the Summer or Fall semester.

**Students may be enrolled in PHAR 826 during the Fall or Spring Semester.

***Students may be enrolled in PHAR 899 during the Fall or Spring Semester.

Admission Requirements

The University of Charleston School of Pharmacy seeks to identify talented, qualified, and committed individuals through a competitive admissions process. Admission to the program is based on academic ability, active participation in leadership and/or community service activities, and personal characteristics that reflect a commitment to the practice and profession of pharmacy. Prospective applicants must complete 56 credit hours of pre- requisite course work (see pre-requisite requirements below). All pre-pharmacy course work must be completed prior to beginning the professional program. Applicants are strongly encouraged to complete all course work by the end of the spring semester prior to the start of the professional program.

To be considered for admission, an applicant must submit a PharmCAS application and successfully complete, with a C- or above, the required prerequisite course work. While a GPA of 2.75 or above and scores on standardized exams in the 50th percentile and above are considered competitive, all applications are individually reviewed. Applicants are strongly encouraged to submit their application materials early in the fall semester prior to the year they plan to enroll in the pharmacy program.

The School of Pharmacy reviews applications through a rolling admissions process beginning each August and admits students into the program until the maximum class size is reached. However, students are encouraged to apply by the PharmCAS Priority Deadline of November 1st for additional benefits. Students who are successful in the initial screening process are required to complete an interview with School of Pharmacy faculty.

Prospective applicants may obtain application materials and additional information on policies, procedures, and fees from the School of Pharmacy's website at www.ucwv.edu/pharmacy or by contacting the:

Office of Enrollment and Admissions
University of Charleston School of Pharmacy
2300 MacCorkle Ave, SE
Charleston, West Virginia 25304
304-357-4889

Applicants must utilize the online Pharmacy College Application Service (PharmCAS) application. An additional Supplemental Application is not required. Information regarding PharmCAS can be obtained at http://www.pharmcas.org.

Prerequisite Coursework

The pre-pharmacy course requirements have been established to ensure that students who enter the professional program will have the knowledge necessary to succeed in our program. The pre-pharmacy coursework must be completed prior to the beginning of the professional program.

Potential applicants may submit their application materials to the Office of Enrollment and Admissions without completing all pre-requisite math, science and social science requirements. However, students must successfully complete all pre- requisite

coursework with a grade of "C" or higher prior to beginning the professional program. Applicants are strongly encouraged to complete all math and science requirements by the end of the spring semester prior to beginning the first professional year. In instances when students must complete pre-pharmacy coursework in the summer prior to the start of their first professional year, it is strongly suggested that only social science coursework be completed during summer sessions.

Pre-Requisite Course	Credits	Comments
Math Requirements		
Calculus	3	
Statistics	2	
Science Requirements		
General Biology with lab	8	
Human Anatomy & Physiology*	8	See asterisk below.
Microbiology with lab	4	
General Chemistry with lab	8	
Organic Chemistry with lab	8	
Social Science Requirements		
Economics	3	Microeconomics or Macroeconomics
English Composition	6	
History or Political Science	3	
Psychology or Sociology	3	

*Acceptance of a 300 or 400 level biology course may be eligible for substitution for anatomy and physiology laboratory only if applicant's home institution does not offer anatomy laboratory and/or physiology lab courses. This is applicable only for anatomy and physiology pre-requisite requirements. Request for this consideration must be submitted in writing using the official Pre- Requisite Course Substitution form.

Tuition and Fees

Tuition for the 2024-2025 academic year is $36,900. Student program fees for each year (P1-P4) are $1700. Incoming pharmacy students who completed their undergraduate pre-requisites at an articulation agreement school or regionally accredited institution in West Virginia will be eligible to receive a $6,000 scholarship – renewable each year. Pharmacy students who completed the majority of their prerequisites at or graduated from the University of Charleston will receive an annual 20% tuition discount. All other incoming pharmacy students are eligible for a merit scholarship that ranges from $3,000 - $6,000 based on their PharmCAS GPA – renewable each year.

Included within the fees is membership to one professional pharmacy student organization. Students in their final year are also required to pay a $200 graduation fee.

Fourth year students will also have year-long access to a licensure board preparatory course which is covered by the student program fees. The technology portion of program fees covers a laptop computer, the necessary software, and other items required to create a technology-mediated learning environment. The software can only be accessed on the provided computer and petitions to use other equipment are not permitted. Students attending the School of Pharmacy are responsible for securing appropriate housing and transportation while in school and for the costs of books or other learning expenses outside of those included within tuition and fees. More financial information can be found on the UCSOP website at

https://www.ucwv.edu/academics/school-of-pharmacy/affording-your-degree/).

Transfer Admission Policy

Students currently or previously enrolled in a Doctor of Pharmacy degree program who wish to transfer into the University of Charleston School of Pharmacy (UCSOP) Doctor of Pharmacy degree program under Advanced Standing (P1 spring semester, P2, P3, or P4) will be evaluated in accordance with the criteria as outlined in the Transfer Admissions Policy section of the UCSOP Student Handbook. Prospective transfer students should direct inquiries to the Executive Director of Enrollment and Admissions at **pharmacy@ucwv.edu** for additional information.

Transfer Credit Policy

The UCSOP will evaluate the transfer of credit on a case-by-case basis, subject to approval by the Office of Academic Affairs. The Transfer Credit Policy in the UCSOP Student Handbook outlines the process and requirements for requesting and receiving transfer credit.

Readmission

Students who withdraw or who are dismissed from the School of Pharmacy for any reason may re-apply for consideration to re-start the program by following all admission procedures and requirements. If a student is readmitted to the program, they will be required to repeat and/or complete all school of pharmacy required courses and graduation requirements. Course outcomes prior to re-admission will not be counted toward the student's semester or cumulative GPA calculations for the purposes of academic standards, annual progression, Dean's list, academic probation, academic dismissal, and graduation requirements. Previous program attempts will not be included in the 6-year requirement for program completion (i.e., the date of readmission will be the date of enrollment).

Additional Requirements

University of Charleston School of Pharmacy Student Handbook

The University of Charleston School of Pharmacy Student Handbook outlines responsibilities, expectations, requirements, policies, and procedures specific to the professional pharmacy program. The UCSOP Student Handbook is updated annually prior to the start of the fall semester and is subject to change. Students will be notified of updates via email and during UCSOP Convocations. The UCSOP Student Handbook is available on the UC School of Pharmacy webpage and internally on the UC SharePoint.

Pharmacy students are required to read, be knowledgeable of, and adhere to all content, expectations, and policies of the UCSOP Student Handbook, UC Student Handbook, and UC Academic Catalog.

PharmD/MBA and Pharm/D MSSL Dual Degree Programs

Students accepted to and/or enrolled in the PharmD program may apply to complete the PharmD/MBA or PharmD/MSSL dual degree program. The enrollment procedures and academic expectations for both dual degree programs are outlined in the UCSOP Student Handbook. Academic Standards and all associated policies as outlined in the UCSOP Student Handbook will apply to cross-listed PHAR concentration courses for either dual degree program.

Annual Progression

Students who fail a course will not progress to the next year of the pharmacy curriculum until they have successfully remediated or repeated all courses in their current year. Meaning, all P1 courses must be completed and passed before enrolling in classes/experiences provided in the P2 curriculum, all P2 courses must be completed and passed before enrolling in classes/experiences provided in the P3 curriculum, and all P3 courses must be completed and passed before enrolling in classes/experiences provided in the P4 curriculum. Additionally, all students must pass a high-stakes progression assessment prior to beginning classes/experiences provided in the next program year.

*Exceptions and additional information are outlined in the UCSOP Student Handbook.

Course Re-Take Policy

Students within the School of Pharmacy may retake courses within the professional program in which they have received a grade of "C" or lower at the discretion of the Associate Dean for Academic Affairs or the Dean of the School of Pharmacy. The second course attempt will be designated on the official university transcript with an "R" to indicate that course was repeated. Courses may only be repeated once.

Academic Appeals Process

Any student in the School of Pharmacy can appeal to the Dean of the School of Pharmacy, a decision made by the Associate Dean for Academic Affairs in following the pertinent policies as outlined in the Academic Standards section of the UCSOP Student Handbook. Written notification of a student's intent to appeal the decision must be received by the Dean within three (3) business days of the student's receipt of the Academic Standing and Student Success Plan or Academic Dismissal Letter. The student's appeal must be in writing and received no later than two (2) business days after notification of the intent to appeal. The appeal letter should be succinct and contain the student's rationale for requesting the appeal and justification for an alternative decision.

Although students may continue with any current/on-going academic coursework during an appeal period, they are not permitted to progress to the next program year (or participate in any courses in the next program year) until all requirements of the current program year are met.

Grade Point Average (GPA)

For the purposes of remediation eligibility, academic probation, academic dismissal, Dean's list, and graduation requirements, only pharmacy courses (including cross-listed PHAR concentration courses for the PharmD/MBA or PharmD/MSSL dual degree programs) will be considered for semester and cumulative GPA calculations. GPAs will be rounded to the nearest hundredth (second decimal place).

Dean's List

The School of Pharmacy has two Dean's Lists: one per semester and one for the academic year.

The Semester Dean's List includes the names of pharmacy students who are pursuing the PharmD degree and have attained a semester pharmacy GPA of 3.50 in their final grades for at least 12 semester hours. Appropriate entries regarding inclusion on the Dean's List are made on the student's permanent academic record.

The Annual Dean's List is recorded on the academic transcript of graduate pharmacy students who are pursuing the PharmD degree and have achieved a semester pharmacy GPA of 3.50 in 12 or more semester credit hours each semester of the academic year. Appropriate entries regarding inclusion on the Dean's List are made on the student's permanent academic record. Students who are on the Annual Dean's List receive a certificate of recognition.

Graduation Requirements

- To graduate, all students must:

- earn a minimum grade of "C" or "P" in all credit-bearing courses.

- successfully complete or pass all non-credit bearing courses and co-curricular requirements.

- achieve a minimum score of "3" on every APPE outcome at least once during the APPE coursework (PHAR 821 – PHAR 828).

- have a minimum cumulate pharmacy GPA of 2.30 following completion of all pharmacy coursework.

- complete all program requirements within 6 years of matriculation into the pharmacy program. (Note: For advanced transfer students, matriculation into the previous pharmacy program will be the starting point for the 6-year timeframe.) Extenuating circumstances may be considered on a case-by-case basis.

- be recommended for graduation by vote of the faculty.

Academic Honors

Academic Honors for the purposes of recognition at the University of Charleston School of Pharmacy Hooding Ceremony and University of Charleston Commencement

Ceremony will include all graduate coursework completed at the University of Charleston. Therefore, academic honors recognized at these ceremonies may not reflect the pharmacy-only coursework/GPA for dual degree students. The following criteria are used for the designation of Academic Honors and are applied as of the fall semester immediately preceding spring graduation:

Summa Cum Laude (3.90 - 4.00)

Magna Cum Laude (3.75 - 3.89)

Cum Laude (3.50 - 3.74)

West Virginia Board of Pharmacy Internship Hours and Notifications

The West Virginia Board of Pharmacy requires fifteen-hundred hours of internship experience for a student to be considered for licensure. Students are required to obtain an Intern License from the Board of Pharmacy to accrue intern hours. It is the student's responsibility to obtain and keep current, active Intern Licensure while enrolled at UCSOP. Any hours accrued before becoming a registered intern do not apply toward the intern hours needed to be considered for licensure. Credit will be given for experiential coursework during the Doctor of Pharmacy degree. To determine the specific number of hours that can be applied, please check the website for the West Virginia Board of Pharmacy http://www.wvbop.com or the Board of Pharmacy in the state in which you are seeking to become licensed.

The Board of Pharmacy holds final authority over the internship rules and regulations and students are advised to check the West Virginia Board of Pharmacy website for updates or changes to any requirements. Board of Pharmacy requirements vary from state-to-state and it is the student's responsibility to verify the requirements of the state in which they intend to become licensed. Information regarding the various states can be found via the National Association of Boards of Pharmacy website http://www.nabp.net/.

Only current students in the School of Pharmacy will be verified with the West Virginia Board of Pharmacy for intern licensure verification. If a student is dismissed or withdraws from the program, the West Virginia Board of Pharmacy will be notified.

Programmatic Changes

The School of Pharmacy reserves the right to make changes as needed to the academic program, School of Pharmacy policies and other program requirements. Notification of such changes will be provided via the website www.ucwv.edu/pharmacy and electronic communication as well as reflected in the subsequent year's UCSOP Student Handbook.

Accreditation

The University of Charleston Doctor of Pharmacy program is accredited by the Accreditation Council for Pharmacy Education, 190 South LaSalle Street, Suite 2850, Chicago, IL 60603, 312/664-3575; FAX 866/228-2631, website www.acpe-accredit.org. http://www.acpe-accredit.org/

ACCT 201. Principles of Accounting I   **3 credits**
A study of basic concepts, principles and procedures for accounting for business entities. Topics include the accounting cycle, basic accounting systems, preparation of financial statements, and accounting for cash, receivables, inventories, operational assets, and liabilities. (offered in fall and spring)

ACCT 202. Principles of Accounting II   **3 credits**
Continuation of the study of basic concepts, principles, and procedures of accounting. Topics include accounting for partnerships and corporations, bonds, statement of cash flows, financial statement analysis, budgeting, cost volume profit analysis, and managerial accounting with emphasis on decision making. Prerequisite: ACCT 201. (offered in fall and spring)

ACCT 280. Introduction to Forensic Accounting   **3 credits**
An introduction to the practice of forensic accounting. Topics include an overview of forensic accounting concepts, including fraud theory, types of engagements, methodologies and ethical considerations. Prerequisites: ACCT 202, BUSI 231.

ACCT 301. Intermediate Accounting I   **3 credits**
A study of generally accepted accounting principles with emphasis on the application of accounting theory, standards, and procedures to financial accounting problems. Topics include conceptual framework, statements of income, stockholders' equity, financial position, and cash flows, time value of money, current assets, and operational assets. Prerequisite: ACCT 202 with a grade of C or better. (offered in fall)

ACCT 302. Intermediate Accounting II   **3 credits**
Continuation of the study of financial accounting theory and practice. Topics include accounting for intangible assets, current liabilities, bonds payable and long-term liabilities, long-term investments, stockholders' equity, and statement of cash flows. Prerequisite: ACCT 301. (offered in spring)

ACCT 322. Cost Accounting   **3 credits**
A study of the fundamentals of cost behavior and estimation in manufacturing and service establishments from an accounting perspective, with emphasis on the significance and interpretation of cost data, cost- volume-profit analysis, budgeting, and variance analysis. Prerequisite: ACCT 202. (offered in spring)

ACCT 350. Special Topics   **1-3 credits**
Advanced study of topics not covered in regularly scheduled courses through directed study or specially scheduled courses, depending upon the topic. Variable credit 1-3 credits; may be repeated a maximum of two semesters. Prerequisite: Consent of instructor.

ACCT 360. Accounting Information Systems   **3 credits**
A study of business process modeling, database implementation and querying, evaluation of internal control systems, risk mitigation, and application of data analytics tools. Prerequisite: ACCT 301. (offered in spring)

ACCT 403. Intermediate Accounting III   **3 credits**

Continuation of ACCT 302, with concentration on the more technical areas of financial accounting. Topics include revenue recognition, dilutive securities and earnings per share, accounting for deferred income taxes, pensions, leases, accounting changes, disclosure, financial statement analysis. Prerequisite: ACCT 302. (offered in fall)

ACCT 412. Advanced Accounting   **3 credits**

A study of advanced specialized areas of financial accounting. Topics include business combinations, consolidated financial statements, intra-entity transactions, foreign currency translation, and accounting for partnerships and governmental and not for profit entities. Prerequisite: ACCT 302. (offered in fall)

ACCT 423. Federal Taxes – Individual   **3 credits**

A study of income tax law as it affects individuals including filing status, exemptions, taxable income, deductions, credits, gains and losses on capital assets, and retirement income. Prerequisites: ACCT 301 or consent of instructor (offered in fall)

ACCT 424. Federal Taxes – Business   **3 credits**

A study of the effects of tax laws on corporations, partnerships, estates and trusts. Prerequisite: ACCT 301 or consent of instructor. (offered in spring of even numbered years)

ACCT 425. Tax Research   **3 credits**

A study of the techniques of tax research with emphasis on library research of tax laws, regulations and court cases. Prerequisite: ACCT 423 or 424.

ACCT 448. Auditing   **3 credits**

A study of generally accepted auditing standards and techniques of auditing financial information. Analysis and application of auditing concepts and standards will be emphasized. Topics include professional ethics, professional judgment, audit risk analysis, internal control study and evaluation, evidence, legal liability, and audit processes and procedures. Prerequisite: ACCT 302 and senior status. (offered in spring)

ACCT 462. Accounting Ethics   **3 credits**

A study of ethics, independence, professional responsibility, professional codes of conduct, corporate governance, and sustainability accounting. Ethics cases will be analyzed using an ethical decision-making model. Students complete the NASBA Ethical Leadership Certification Program as part of the course. Prerequisite: ACCT 302 and senior status. (offered in spring)

ACCT 498. Accounting Internship   **1-12 credits**

Application of accounting concepts and theories in the workplace. Prerequisite: Junior or senior status.

ART (ART)

ART 101. Character Design   **3 credits**

The character design drawing course is designed to show students how non-verbal communication is used through the medium of freehand drawing. Students will explore the art of visually expressing thoughts, emotions, and observations through the language of drawing. Emphasis is placed on objective and subjective drawing, through the depiction of models and nature.

ART 223. Art History: Modern Art   **3 credits**
Designed as a survey of the development of painting, sculpture, photography, and architecture beginning with post-Impressionism and extending through the major schools of art to present innovators and independents of world cultures.**ART 231. Innovation in Art and Business**   **3 credits** This course is intended for business majors who want to enhance their creative thinking and ability to innovate. The course will explore and examine various theories, methods, and modes of creativity and how they relate to increasing these skills in business domains. The course provides many opportunities to apply these new ways of thinking through individual and group exercises and a final capstone project, where the major will develop creative concepts for an assigned project/topic.

ART 250. Photography   **3 credits**
Designed as a study of basic skills and techniques of photography and equipment. Emphasis on photography as an art form. Students must have their own camera.

ART 341. Art Education and Instruction   **3 credits**
The course introduces ways to effectively integrate art into the K-6 classroom and allow teacher candidates and other future educators to develop a deep understanding of artistic methods and techniques, art media and materials, effective classroom procedures, and the National and State content standards. Candidates discover the importance of integrating arts across the curriculum through a hands-on approach in developing personal artistic skills, proper classroom procedures, and interdisciplinary art lesson plans and activities.

BIOLOGY (BIOL)

BIOL 130. Introductory Biology for Majors   **3 credits**
An introductory course in General Biology. It is intended for science majors. It is directed toward an understanding of the scientific method, the chemical basis of living organisms, the structure of cells (eukaryotic and prokaryotic), and the processes of life that constitute the functions of cells. Throughout the course the practical significance of material is highlighted to demonstrate the applications of basic knowledge and emphasize those components necessary for further study in the sciences. Required of all Biology majors. Offered every fall and spring semesters. Co- requisite: BIOL 130L

BIOL 130L. Introductory Biology for Majors Lab   **1 credit**
The lab emphasizes practical understanding of the chemistry of life, cell functions and structures as well as broad practical applications of ecology. Offered every fall and spring semesters. Laboratory fee: $50. Co- requisite: BIOL 130.

BIOL 212. Introduction to Human Anatomy and Physiology   **3 credits**
A science course designed for students pursuing an Associate's degree in the allied health sciences. The course will cover all body systems. Systems will be covered on a molecular, cellular, tissue, and organ level. There will be heavy emphasis on anatomy with an overview of key physiological processes. Anatomy and physiology is essential for students preparing for a career in any of the allied health sciences. Offered online every fall, spring, and summer. Offered in-seat every fall and spring on the Beckley campus only. Inclusive Access Book Fee: $92.50 Co- requisite: BIOL 212L

BIOL 212L. Introduction to Human Anatomy and Physiology Lab   **1 credit**
A science laboratory course designed for students pursuing an Associate's degree in the allied health sciences. The course will cover all body systems. Systems will be covered on a molecular, cellular, tissue, and organ level. There will be heavy emphasis on anatomy with an overview of key physiological processes. Anatomy and physiology is essential for students preparing for a career in any of the allied health sciences. Offered online every fall, spring, and summer. Offered in-seat every fall and spring on the Beckley campus only. Laboratory fee: $50. Co-requisite: BIOL 212.

BIOL 215. General Botany   **3 credits**
A study of the structure and function of plant systems; reproduction, heredity, physiology, characteristics of the various plant groups, and ecological relationships. This learning experience is designed to foster a basic understanding of the concepts of biology as they relate to plants as model systems. Offered every fall semester. Category: Organismal course. Pre-requisites: BIOL 130 and 130L; Co-requisite BIOL 215L.

BIOL 215L. General Botany Lab   **1 credits**
The lab emphasizes plant structure, propagation, secondary metabolites, cell structure, physiology and genetics. Students are required to develop a basic research project and prepare a research paper on a topic relating to plants. Offered every fall semester. Laboratory fee: $50. Co-requisite: BIOL 215.

BIOL 224. General Zoology   **3 credits**
An introduction to the structure and function of animals, including a survey of the natural history of the important phyla. This learning experience is designed to foster a basic understanding of the concepts of biology as they relate to animals. Students are required to develop a basic research project and prepare a research paper on a topic relating to animals. Required of all Biology majors. Offered every spring semester. Category: Organismal course. Pre-requisites: BIOL 130 and 130L; Co-requisite BIOL 224L

BIOL 224L. General Zoology Lab   **1 credit**
The lab emphasizes the identification of common vertebrates and the application of broad ecological processes. Offered every spring semester. Laboratory fee: $50. Co-requisite: BIOL 224.

BIOL 230. Biochemistry and Cellular Physiology   **3 credits**
An introductory course in Biochemistry and Cell Physiology intended for science majors. It is directed toward an understanding of the key biochemical processes that are important in cellular function. Topics covered include enzyme kinetics; metabolic pathways related to carbohydrates, fats, and proteins; and key cell signaling pathways. This course serves to provide a basis for higher level biology courses while providing knowledge on important biological topics not covered in detail in other core courses. Required of all Biology majors. Offered every spring semester. Pre-requisites: BIOL-130 and BIOL 130L and CHEM 102; Co-requisites: BIOL 230L

BIOL 230L. Biochemistry and Cellular Physiology Lab   **1 credit**
An introductory laboratory course in Biochemistry and Cell Physiology intended for science majors. This lab will introduce techniques used in a biochemistry lab while reinforcing content covered in the corresponding lecture course related to enzyme kinetics, metabolic processes, and cell signaling. Offered every spring semester. Laboratory fee: $50. Co-requisites: BIOL 230.

BIOL 251. Human Anatomy and Physiology   3 credits

An in-depth study of human anatomy and physiologic processes. The course will include, but not be limited to, the integumentary, skeletal, muscular, and nervous systems. These systems will be covered on a cellular, tissue, organ, and system level. Offered every fall. Inclusive Access Book Fee: $87.25. Pre-requisite: none; Co-requisite: BIOL 251L.

BIOL 251L. Human Anatomy and Physiology Lab   1 credit

The lab emphasizes the anatomy while reenforcing the physiology presented in lecture. The course will include, but not be limited to, the integumentary skeletal, muscular, and nervous system. These systems will be covered on a cellular tissue, organ, and system level. The lab will include dissection of select organs. Offered every fall semester. Laboratory fee: $50. Pre-requisite: none; Co-requisite: BIOL 251

BIOL 252. Human Anatomy and Physiology   3 credits

A continuation of BIOL 251. The remainder of the course will include, but not be limited to, the endocrine, cardiopulmonary, gastrointestinal, urinary, and reproductive systems. These systems will be covered on a cellular, tissue, organ, and system level. Offered every spring. Pre-requisite: BIOL 251 and BIOL 251L; Co-requisite: BIOL 252L.

BIOL 252L. Human Anatomy and Physiology Lab   1 credit

A continuation of BIOL 251L. The course will include, but not be limited to, the endocrine, cardiopulmonary, gastrointestinal, urinary, and reproductive systems. These systems will be covered on a cellular, tissue, organ, and system level. The lab will include dissection of select organs. Offered every spring. Pre-requisite: BIOL 251 and BIOL 251L; Co-requisite: BIOL 252L.

BIOL 303. Medical Terminology   3 credits

Medical Terminology for the Biology Major is designed for those students entering in any discipline in the healthcare field. This course will teach the students the language of medicine which will facilitate their post graduate education. The course covers medical terminology by covering the various systems of the body such as integument, cardiac, pulmonary, etc.. Offered every spring semester online. Pre-requisites: None

BIOL 304. Physical Assessment   3 credits

This course will introduce students to physical exam techniques. Content areas will include: Taking a health history, clinical reasoning, documentation of findings, health promotion and counseling, and a comprehensive system-based overview of physical exam techniques. This course is designed for Pre-Medicine, Pre-Physician Assistant, Pre- Pharmacy students, and/or any other student interested in pursuing a patient contact medical career. Offered on demand. Pre-requisites: BIOL 171 and BIOL 251L or BIOL 301 and BIOL 301L; Co-requisite: BIOL 304L.

BIOL 304L. Physical Assessment Lab   1 credit

This lab will include the practical demonstration of foundational physical exam techniques. Content areas will include: Taking a health history, clinical reasoning, documentation of findings, health promotion and counseling, and a comprehensive system-based overview of physical exam techniques. This course is designed to complement content from BIOL 304 and serves Pre-Medicine, Pre-Physician Assistant, Pre-Pharmacy students, and/or any other student interested in pursuing a patient contact medical career. Offered on demand.

BIOL 321. Animal Parasitology   **4 credits**

This class is the study about the lifecycles of animal parasites. The course emphasizes biological, physiological, morphological and ecological principles of human and domestic animal parasites. Other parasites of biological interest will also be covered. This course will include a 2-hour lab each week. The lab will include in part the dissection of select mammals and will serve to supplement and enhance lecture material. Offered on demand. Laboratory fee: $50. Pre-requisites: BIOL 224 and BIOL 224L.

BIOL 331. Microbiology for Majors   **3 credits**

This course is a general introduction to microbiology with a focus on prokaryotic organisms. Microorganisms to be examined include bacteria, viruses, and fungi. This class will cover a wide variety of topics in Microbiology including physiology, genetics, diversity, pathogens, biotechnology, and ecology. Required of all Biology majors. Offered every fall semester. Pre-requisites: BIOL 130 and BIOL 130L, CHEM 102 and CHEM 102L; Co-requisite: BIOL 331L.

BIOL 331L. Microbiology for Majors Lab   **1 credit**

The laboratory will include microscopy, staining, microbial identification and independent research projects. Offered every fall semester. Laboratory fee: $50. Offered every fall semester. Co-requisite: BIOL 331.

BIOL 332. Genetics   **3 credits**

A study of Mendelian genetics, the laws governing inheritance, congenital human defects, and the statistical analysis of data collected. Discussions also include molecular genetics, and population genetics. Required of all Biology majors. Offered every spring semester. Pre-requisites: NSCI 220 or MATH 240, BIOL 224 and BIOL 224L or BIOL 215 and BIOL 215L. Co-requisites: BIOL 332L

BIOL 332L. Genetics Lab   **1 credit**

Laboratory investigations include classical Mendelian genetics, probability and molecular biological techniques such as gel electrophoreses and PCR. Long term Drosophila experiments provide students with opportunities to test various hypotheses. Offered every spring semester. Laboratory fee: $50. Co-requisites: BIOL 332,

BIOL 333. Immunology   **3 credits**

A study of the principles of immunity, pathogenicity, virulence, and toxicities. Cellular and humeral immunity and the interaction of the two will be discussed and a thorough study of antigens, antibodies, and their reactions in vitro and in vivo are considered. Category: Biomedical sciences course. Offered spring semester as needed. Pre-requisites: BIOL 331 and 331L. Co-requisite BIOL 333L

BIOL 333L. Immunology Lab   **1 credit**

The laboratory will emphasize the study and analysis of these reactions, their application to diagnosis, systematics, and principles of immunity. Offered spring semester as needed. Laboratory fee: $50. Co-requisite BIOL 333.

BIOL 361. Advanced Anatomy: The Circulatory System   **2 credits**

Advanced Anatomy of the Circulatory System is an in-depth study of the heart and blood vessels. The course will cover details of the circulatory system not included in standard undergraduate Anatomy and Physiology courses. The course is designed to be preparatory for students entering medical school. Offered on demand. Pre-requisites: BIOL 302 and BIOL 302L.

BIOL 362. Advanced Anatomy: The Nervous System   **3 credits**
This course will focus on the anatomical and physiological relationships between the nervous and musculoskeletal systems. The structure and function of the central and peripheral nervous system will be reviewed with further emphasis on structures and processes related to movement. Major disease states affecting these processes will also be analyzed. Course is offered every fall semester. Pre-requisites: BIOL 301 and BIOL 301L OR BIOL 212 and BIOL 212L OR BIOL 171 and BIOL 171L. Co-requisites: BIOL 362L

BIOL 362L. Advanced Anatomy: The Nervous System Lab   **1 credit**
This lab will focus on the practical application of concepts related to the anatomy and physiology of the nervous system as it relates to movement. Disease states will also be discussed focusing on what the health practitioner will observe from the patient and test results to help in diagnosing the disease states. Course is offered every fall semester. Laboratory fee: $50. Pre-requisites: BIOL 301 and BIOL 301L OR BIOL 212 and BIOL 212L OR BIOL 171 and BIOL 171L. Co-requisites: BIOL 362.

BIOL 363. Advanced Anatomy: The Musculoskeletal Systems   **2 credits**
Advanced Anatomy of the Musculoskeletal System is an in-depth study of the muscles and their origin, insertion, innervation, blood supply, and action. The course will cover details of the nervous system not included in standard undergraduate Anatomy and Physiology courses. The course is designed to be preparatory for students entering medical school. Category: Biomedical sciences course. Offered Fall of odd years. Pre-requisites: BIOL 302 and BIOL 302L.

BIOL 400. Ecology   **3 credits**
A study of living organisms in their natural environment, including their biological productivity, their effects on the environment, and its effect on them. Field trips are an essential part of this course. Students should be aware that this course may be physically demanding and may require overnight work and extended periods away from campus. Category: Ecology course. Offered fall semester. Pre-requisites: BIOL 215 and 215 L or 224 and 224 L.

BIOL 400L. Ecology Lab   **1 credit** The
lab emphasizes the practical application of ecological concepts in a laboratory and field setting. Offered fall semester. Laboratory fee: $50. Co-requisite: BIOL 400.

BIOL 413. Systematic Botany   **3 credits**
A study of the development and application of current systems of vascular plant classification. Laboratory emphasis is on classical taxonomic methods of plant identification, collection, and preservation. Category: Ecology course. Offered spring semester in odd numbered years. Pre-requisites: BIOL 215 and BIOL 215L; Co-requisite BIOL 413L.

BIOL 413. Systematic Botany Lab   **1 credit**
Laboratory includes field trips to local areas, collection and preservation of botanical specimens. Offered spring semester in odd numbered years. Laboratory fee: $50 Co-requisite BIOL 413.

BIOL 419. Microbial Ecology of Health and Disease   **3 credits**
Students will learn about the diversity and function of the microbial communities associated with eukaryotic hosts. Themes include (1) overview of the microbial communities living in close association with animals, plants, and humans, (2) emergent theories about how both

beneficial and negative interactions with the microbiome affect the overall health, growth and development of the hosts, (3) the ecological concept of disease (dysbiosis) as it pertains to human health and (4) the microbiological, molecular, bioinformatics and statistical approaches used to study microbial communities. Perspectives on these topics will be explored via the current primary literature on each theme. Category: Molecular biology or Ecology course. Offered every spring semester. Pre-requisites: BIOL 331 and 331 L, NSCI 220; Co-requisite: BIOL 419 L.

BIOL 419 L. Microbial Ecology of Health and Disease Laboratory   **1 credit**
Students will use classic and current laboratory techniques to study and to learn about the diversity and function of the microbial communities associated with animals, plants and humans. Techniques include culture dependent methods such as selective and enrichment cultures and community level physiological profiles as well as molecular based methods. Students will carry out a project to characterize the microbiome of a healthy or diseased host. Students will also explore the current bioinformatic and statistical approaches used to analyze the data generated on these studies. Offered every spring semester. Laboratory fee: $50. Co-requisite: BIOL 419.

BIOL 420. Pathophysiology   **3 credits**
A study of the changes in normal function that occur in response to stress. The patterns of development of a diseased state will include the etiology of the disease and the ability of the human structure to maintain its homeostasis. Category: Biomedical sciences course. Offered fall semester in even numbered years. Pre-requisites: BIOL 302 and 302 L; Co-requisite: BIOL 420 L.

BIOL 420L. Pathophysiology Lab   **1 credit**
Students will practically apply information about the diseases being studied in lecture to case studies or experiments that will further their knowledge on symptoms and signs of the disease and treatments to cure or control the disease. Students will also learn about common medical tests used to evaluate disease states studied to better understand how physiology of disease states can be examined and how diagnoses and treatments can be determined. Offered fall semester in even numbered years. Laboratory fee: $50. Co-requisites: BIOL 420.

BIOL 421. Introductory Pathophysiology II   **3 credits**
A continuation of BIOL 420. A study of the changes in normal function that occur in response to stress. The patterns of development of a diseased state will include the etiology of the disease and the ability of the human structure to maintain its homeostasis. (Note: BIOL 420 is not a prerequisite) Pre-requisites: BIOL 302 and BIOL 302L. Offered on demand.

BIOL 422. Embryology   **3 credits**
The morphology, developmental patterns, and mechanisms of cellular differentiation in human fertilization, implantation and embryo and fetus formation will be explored. Human reproductive systems will be reviewed and hormonal control mechanisms leading to gamete development will be discussed in depth. Offered fall semester in odd numbered years. Offered fall semester in odd numbered years. Category: Biomedical sciences course. Offered fall semester in odd numbered years. Pre-requisites: BIOL 224 and 224L, BIOL 302 and 302L; Co-requisite: BIOL 422L

BIOL 422L. Embryology Lab   **1 credit**
Laboratory exercises will examine the morphology of developing embryos and discussions of congenital malformations. Laboratory fee: $50. Co-requisite: BIOL 422.

BIOL 425. Tropical Ecology   **3 credits**
This course is a study of living organisms in tropical environments. It is taught during semester break at biological research stations in Brazil and Costa Rica. Special emphasis is on tropical ecosystems and their unique niche in the biosphere. In addition to the science aspects of the learning experience, students will interact and work with university professors, students, and various native cultures from the respective area. Offered on demand. Prerequisite: Consent of the instructor.

BIOL 430. Limnology   **4 credits**
A course designed for upper-level students in Biology and Natural Sciences. Limnology is the study of freshwater rivers, lakes, streams, and ponds. In the course students will investigate the physical, biological, and anthropogenic factors influencing aquatic systems. Students will be engaged in small group research projects applying the tools of limnology research. As part of this project students will be engaged in projects that will include field data collection, statistical analysis, and bio-assessment of water quality and a presentation of the final results. This is a field and lab work intensive course. At least one overnight field trip will be required. Offered as needed. Category: Ecology course. Laboratory fee: $50. Pre-requisites: BIOL 130 and BIOL 130L, CHEM 102 and CHEM 102L, .

BIOL 451. Cell and Molecular Biology   **3 credits**
An upper level class devoted to the study of molecular aspects of genetics and cell biology. In addition to basic cell biology, the course will introduce molecular genetics and regulation of prokaryotic and eukaryotic gene expression. Special consideration will be given to structure and function of genes and regulatory proteins. Offered fall semester in even numbered years. Category: Molecular Biology course. Pre-requisites: BIOL 332 and BIOL 332L, BIOL 331 and BIOL 331L,

CHEM 102 and CHEM 102L, NSCI 220. Co- requisite: BIOL 451L

BIOL 451L. Cell and Molecular Biology Lab   **1 credit**
Laboratory emphasis will include basic techniques of gene technology such as: restriction mapping, cloning, polymerase chain reaction (PCR), electrophoresis and bacterial transformation. Offered fall semester in even numbered years. Laboratory fee: $50. Co-requisite: BIOL 451.

BIOL 453. Virology   **3 credits**
The course is a general overview of the biology of viruses. Topics will include an introduction to the major classes of viruses, their distinct features, life cycles, and applicable diseases. The course will also investigate molecular aspects of viral replication and host's role during virus infection. Major emphasis will be placed on animal viruses. The course will include detailed investigation of current topics in the scientific literature including discussion of case studies. Category: Molecular Biology course. Offered fall semester in odd numbered years. Pre-requisites: BIOL 331 and BIOL 331L, CHEM 102 and CHEM 102L. Co-requisite: BIOL 453L

BIOL 453L. Virology Lab   **1 credit**
Laboratory emphasis on manipulation of prokaryotic viruses as model systems including

isolation, quantitative, reproduction, and burst techniques. Offered fall semester in odd numbered years. Laboratory fee: $50. Co-requisite: BIOL 453

BIOL 495. Research in Science   **3 credits**
The independent investigation of a topic in science. Can be used to satisfy the departmental research requirement of all science majors. This research experience allows the student to receive credit for conducting their research. Students taking this course will work with a faculty research mentor and will complete a formal research paper upon completion of the project. Offered as needed. Pre-requisites: Consent of the instructor and NSCI 220 or MATH 240.

BIOL 496. Seminar in Science   **3 credit**
This is a course designed to coalesce the different BIOL concentration areas of emphasis into a capstone experience where students have an opportunity to apply, integrate, and demonstrate the knowledge and skills they have acquired during their undergraduate biology education. Required of all Biology majors. The course focuses on three areas of interest and emphasizes career applications in: Conservation Biology and Environmental Science, Application of molecular biology and transgenic organism, and Anthropogenic impacts on the environment and health. The course uses primary literature in the areas of emphasis. Students will present representative papers to demonstrate communication skills and knowledge and application of appropriate biological content. Students are required to demonstrate proficiency in communicating science to an audience of peers, faculty and general public in various modalities. During their presentation, students may be questioned concerning all levels of outcomes in the Biology Program as part of a summative assessment of the student's progress. This course is taken during the spring semester of a student's senior year. Students are not permitted to take BIOL 496 until they have achieved a minimum of 90 credit hours in the major AND have taken and passed with a C or better at least one other 400 level BIOL course. Offered each Spring semester

BUSINESS ADMINISTRATION (BUSI)

BUSI 151. Introduction to Business   **3 credits**
An overview of the major business disciplines. Topics include the business environment, forms of business ownership, entrepreneurship, management and leadership, finance, human resource management, production, entrepreneurship, marketing, global markets, accounting, economics, business ethics, and personal finance. (offered in fall; offered online in spring).

BUSI 152. Business Careers   **3 credits**
This course will allow students to gain knowledge of real-world experiences and working conditions from speakers and mentors who are top executives from local, regional, and national organizations. This course will be a bridge that relates theory to practice in different areas of business administration and leadership.

BUSI 215. Business Software Applications   **3 credits**
A focus on business productivity software applications including word processing, spreadsheets, electronic presentations, and databases designed to prepare students to pursue Microsoft Office Specialist certification. Students will study the visual representation of information and will be introduced to various tools to aid in creatively expressing ideas. (offered fall and spring).

BUSI 220X. Information Systems & Software Applications   **3 credits**
Introduces essential information management systems concepts, including artificial intelligence, data and information, internal and external networks, software and hardware, and telecommunications. Students will develop skills with productivity software applications, including word processing, decision-making using spreadsheets, communication with electronic presentations, and data management using database software to prepare students to pursue Microsoft Office Specialist certification. (offered in fall and spring)

BUSI 231. Business Law I   **3 credits**
A study of the history of the American legal system; introduction to the courts, dispute reconciliation, and functions of law; Constitutional law; criminal law; tort law and products liability; warranty law; contract law, offer and acceptance, consideration, contractual capacity, legality of object, public policy, third-party rights and remedies; and agency law. (offered in fall and spring)

BUSI 232. Business Law II   **3 credits**
Forms of business organizations, partnerships, limited liability companies and corporate governance; employment law, worker protection, immigration law, labor law, sexual harassment, employment discrimination and retaliation, and human resources; real and personal property; bailments; landlord-tenant relations; insurance law; UCC Article 3 – commercial paper and negotiable instruments, holder in due course and liability and discharge; UCC Article 9 - secured transactions; and bankruptcy. (offered spring odd)

BUSI 241. Business Communication   **3 credits**
A survey course designed to address key topics in professional and work- related communication. During the course, students will strengthen their knowledge and enhance their skills in verbal and nonverbal communication, including key areas of career preparation, listening, teamwork, culture, ethics, writing, and presenting. Prerequisite: ENGL 102. (offered in fall and spring)

BUSI 316. Business Statistics I   **3 credits**
An introduction to the theory and application of quantitative techniques in the fields of business and economics. The major areas of emphasis will be probability and statistical theory, decision-making models, statistical process control, and data description in respect to graphic presentation and calculation of measures of central tendency and dispersion. Prerequisite: MATH 121. (offered in fall and spring).

BUSI 317. Business Statistics II   **3 credits**
A study of the foundations of statistical analysis of data. The primary areas of emphasis include sampling theory, summation of data (central tendency, variance, skewness), natural distribution of data (normal, binomial, Poisson), and statistical inferences from data (confidence intervals, hypothesis testing). The course will also examine relationships among paired data (regression, correlation) and non- parametric statistical measures. Prerequisite: MATH 121 and BUSI 316 or consent of instructor. (offered in fall and spring)

BUSI 350. Special Topics   **1-3 credits**
Advanced study of topics not covered in regularly scheduled courses. Delivered through directed study or specially scheduled lectures, depending on the topic. May be repeated a maximum of two semesters. Prerequisite: Consent of instructor.

BUSI 360. Business Ethics
3 credits

Illustration and discussion of the problems and practices of contemporary management through application of ethical concepts and guidelines utilizing case studies and assignments. The course aids in student recognition of ethical behavior and in distinguishing deviant behaviors; providing the foundation for making ethical decisions in business, government, and society. Students complete the NASBA Ethical Leadership Certification Program as part of the course. (offered in fall and spring).

BUSI 407. Global Dimensions of Business
3 credits

Exploration of the various factors influencing the global business environment. Pitfalls to be avoided and suggestions for effective management of international and multinational enterprises will be discussed. Prerequisites: MRKT 321 and FINA 312. (offered in fall and spring).

BUSI 450. Business Strategy
3 credits

A capstone course focusing on integrating the various areas of business functions. Emphasis will be placed on decision-making, corporate policy and strategy formulation and implementation, and the relationship between the corporate and socioeconomic setting. *Students must earn a C or better in BUSI 450 to graduate. Transfer credit is not accepted for BUSI 450. The course must be completed at UC.* Prerequisite: Senior status, MGMT 311, MRKT 321, FINA 312. (offered in fall and spring)

BUSI 498. Business Internship
1-6 credits

An opportunity to apply the knowledge and skills developed in various business courses in a real-world business setting. Prerequisites: BUSI 215, BUSI 241, and 90 credit hours or approval of advisor. (offered in fall, spring, and summer)

BUSINESS ANALYTICS (BSAN)

BSAN 205. Introduction to Business Analytics
3 credits

An introduction to Business Analytics with topics related to big data – volume, velocity, veracity and variance, review of tools and techniques, business applications and industry demand. Students will gain a clear overview of the business analytics domain. (offered in spring).

BSAN 315. Big Data Analytics
3 credits

The Big Data Analytics course will provide students with the knowledge and skills, including industry level tool exposure, required for acquiring, cleaning, processing and managing structured and unstructured data. (offered in fall).

BSAN 325. Predictive Modelling for Business Analytics
3 credits

The Predictive Modelling for Business Analytics course will provide students with the knowledge and skills, including industry level tool exposure, required for developing predictive models with diverse data. Prerequisite: BUSI 101 (offered in fall).

BSAN 415. Business Analytics Capstone
3 credits

The Business Analytics Capstone will provide students with an opportunity to conduct research on personalized academic and industry data driven big data initiatives. (offered in fall).

BSAN 475X. Machine Learning   **3 credits**

The Machine Learning course will teach students to the concepts of statistical learning, optimization, feature selection, training and testing classification models, supervised and unsupervised Machine Learning techniques and associated visualization and interpretation from business domains perspectives. Prerequisite: BUSI 316 and BUSI 325X.

CHEMISTRY (CHEM)

CHEM 101. General Chemistry I   **3 credits**

An introduction to the quantitative study of the physical and chemical behavior of matter. Major topics include: matter and measurement, atoms, ions and molecules, chemical formulas, equations, and moles, reactions in aqueous solution, periodicity and atomic structure, ionic and covalent bonding, molecular structure, chemical energy, and gases and their behavior. Three 50-minute lectures plus one three-hour lab (CHEM 101L) per week. Prerequisite: MATH 120. Taught Fall Semesters. Co-requisite MATH 121, CHEM 101L

CHEM 101L. General Chemistry I laboratory   **1 credit**

CHEM 101L provides a laboratory that compliments an introduction to the quantitative study of the physical and chemical behavior of matter. Major topics include: matter and measurement, atoms, ions and molecules, chemical formulas, equations, and moles, reactions in aqueous solution, periodicity and atomic structure, ionic and covalent bonding, molecular structure, chemical energy, and gases. Taught each Fall Semester, Co-requisite MATH 121, CHEM 101. Laboratory fee $50

CHEM 102. General Chemistry II   **3 credits**

A continuation of CHEM 101 with the major topics being liquids, solids, intermolecular forces, solutions, rates of chemical reactions, chemical equilibrium acids, bases, aqueous equilibrium, electrochemistry and nuclear chemistry. These topics, in addition to the material covered in CHEM 101, will provide students with a very good chemistry background for graduate entrance exams such as the PCAT, MCAT, DAT, and GRE. Three 50-minutes lecture plus one three-hour lab (CHEM 102L) per week . Prerequisite: MATH 121, CHEM 101 or AP score of 5. Taught each spring semester Co-requisite CHEM 102L

CHEM 102L General Chemistry II Laboratory   **1 credit**

CHEM 102L provides a laboratory that compliments an introduction to the quantitative study of the physical and chemical behavior of matter. Major topics include: liquids, solids, intermolecular forces, solutions, rates of chemical reactions, chemical equilibrium acids, bases, aqueous equilibrium, electrochemistry and nuclear chemistry. Co-requisite CHEM 102 Laboratory Fee: $50

CHEM 201. Organic Chemistry I   **3 credits**

A study of the principles of organic chemistry focusing on structure and fundamental chemical properties of the common types of organic compounds. Prerequisite: CHEM 102 or AP score of 5. Taught each fall. Co-requisite CHEM 201L

CHEM 201L. Organic Chemistry I laboratory   **1 credit**

CHEM 201L provides a laboratory that complements the study of the principles of organic chemistry focusing on structure and fundamental chemical properties of the common types of organic compounds. Prerequisite: CHEM 102 or AP score of 5.. Taught each fall. Co-requisite CHEM 201, Laboratory fee $50

CHEM 202. Organic Chemistry II   3 credits
A continuation of CHEM 201, which is a pre-requisite. The emphasis is placed on reaction mechanisms and synthetic methods. Three lecture hours and three lab hours per week. Prerequisite: CHEM 201.. Taught each spring. Co-requisite CHEM 202L

CHEM 202L. Organic Chemistry II laboratory   1 credit
CHEM 202L complements the study of reaction mechanism and synthetic methods. Co-requisite CHEM 202. Laboratory fee $50

CHEM 251. Quantitative Analysis   3 credits
The course consists of the study of chemical quantitative analysis techniques of "real world" samples. Topics include measurements, gravimetric and combustion analyses, a deeper look at acids and bases, buffers, chemical equilibria, acid-base, compleximetric, and redox titrations, and electrochemical probes. Prerequisite: CHEM102.. Taught each fall. Co-Requisite CHEM 251L

CHEM 251L Quantitative Analysis Laboratory   1 credit
CHEM 251L consists of a laboratory complement that consists of a study of wet chemical quantitative analysis techniques of "real world" samples. Topics include practical laboratory techniques and calculations, errors, laboratory equipment for chemical analysis, gravimetric and combustion analyses, titration chemistries (acid-base, redox, precipitation, compleximetric, conductimetric), acids and bases, buffers, electrochemistry, and electrochemical probes. The theory underlying the experimental techniques sample preparation, methods of recording data, and calculations are considered. Co-requisite CHEM 251, Laboratory fee: $50.00

CHEM 322. Inorganic Chemistry   3 credits
A systematic study of selected topics in inorganic chemistry including an introduction to material of a mathematical-theoretical nature. Three lecture hours per week. Prerequisites: CHEM 102. Taught spring semester.

CHEM 325L. Laboratory Analysis Techniques   2 credits
This laboratory seminar will provide students the opportunity to gain hands-on experience. Students will independently develop an analytical method using chemical instrumentation available in the Chemistry Program. The student will then present their research project at the University of Charleston's Academic Showcase. One 90-minute seminar and one to two lab sessions per week. Lab time is flexible and scheduled to meet student availability. Pre-requisite: CHEM 251 or CHEM 362. Co-requisite: CHEM 362. Laboratory fee $50.

CHEM 362. Instrumental Analysis   3 credits
A study of the advantages and the limitations of the use of laboratory instrumentation for solving "real world" problems using chemical analysis. Included are UV-Vis spectrophotometry, FTIR spectrophotometry, atomic spectroscopy, gas chromatography, liquid chromatography, and mass spectrometric techniques. Real-world analysis issues of sampling, calibration, and quality assurance will be discussed. Prerequisite: CHEM 102. Taught each spring. Co-requisite CHEM 362L

CHEM 362L. Instrumental Analysis Laboratory   **1 credits**

CHEM 362L is a laboratory complement of the study of the advantages and the limitations of the use of laboratory instrumentation for solving "real world" problems using chemical analysis. Included are UV-Vis spectrophotometry, FTIR spectrophotometry, atomic spectroscopy, gas chromatography, liquid chromatography, and mass spectrometric techniques. Real-world analysis issues of sampling, calibration, and quality assurance will be discussed. Laboratory fee: $50, Co-Requisite CHEM 362.

CHEM 410. Biochemistry   **4 credits**

This course provides an overview of biochemistry which stresses the organic and physical chemical basis for biological reactions, beginning with amino acids and building an understanding of protein structure. The course content expands to cover enzyme catalysis and kinetics, metabolism, carbohydrate and protein biosynthesis and the structure and function of DNA and RNA. Four lecture hours per week. Prerequisite: CHEM 202. Taught fall semester.

CHEM 411. Advanced Organic Chemistry   **3 credits**

A review of the fundamental reactions of some of the main types of aliphatic, aromatic, alicyclic, and heterocyclic compounds and the solution of a variety of problems with emphasis on structural theory and reaction mechanisms. Three lecture hours per week. Prerequisite: CHEM 202. Taught spring semester.

CHEM 412. Physical Chemistry I   **3 credits**

A study of the properties of matter, thermodynamics, thermochemistry, chemical equilibria, chemical reactions and solutions. Prerequisites: CHEM 202, PHSC 202, and MATH 201. Taught fall semester.

CHEM 413. Physical Chemistry II   **3 credits**

A study of chemical kinetics, quantum theory, molecular spectroscopy and its applications to atoms and molecules, and statistical mechanics. Prerequisites: MATH 201. Taught spring semester.

CHEM 420. Advanced Biochemistry   **3 credits**

An in-depth study of biochemistry in the following topics: Biophysical and bioinorganic chemistry, ultrafast dynamics of proteins and heme proteins and their physiological consequences, special enzymes and enzymatic regulation, metabolism of special biomolecules and related medical applications, NO (nitric oxide) biochemistry, cytochromes-mediated electron transportation, and effect of free radicals on living systems. Three lecture hours per week. Prerequisite: CHEM 410. Taught in spring.

CHEM 494. Proposal Writing in Chemistry   **1 credit**

This course prepares a student to complete a research proposal in chemical science and is used to satisfy the program requirements in the chemistry major and the chemistry- biology dual major. Students should register for this course in the fall semester of their junior year. CHEM 494 must be completed before a student will be allowed to take CHEM 495. Students taking this course will consult with a faculty research advisor on the project prior to their proposals. This course, along with CHEM 495, 496, and 497, represents the capstone learning experience for the chemistry major and the chemistry- biology dual major. Prerequisite: CHEM 202 and CHEM 251. Taught fall semester.

CHEM 495. Research in Chemical Science   **3 credits**

The investigation of a topic in chemical science under the supervision of a chemistry

faculty member. Used to satisfy the program research requirement of the chemistry major and the chemistry-biology dual major. Students must complete CHEM 495 before enrolling in CHEM 496. Registration for CHEM 495 requires the signature of the individual in charge of the CHEM 495 learning experience and cannot be completed online. This research experience allows the student to receive credit for conducting their research. Students taking this course will work with a faculty research advisor and will complete a formal research paper upon completion of the project. The completed research papers will be published on the school's web page. This course, along with CHEM 494, and 496 represents the capstone experience for the chemistry major and the chemistry- biology dual major. Co-requisite: CHEM 494. Taught fall semester.

CHEM 496. Seminar in Chemical Science **1 credit**
The presentation of a seminar about a student's chemical research experience. This course is taken during the spring semester of a student's senior year. Students are required to demonstrate proficiency in communicating their research project orally to an audience, using electronic presentation software. This course, along with CHEM 494, 495, and 497, represents the capstone learning experience for the chemistry major and the chemistry-biology dual major. Students are not permitted to take CHEM 496 until they have passed CHEM 495. Taught spring semester.

COMPUTER SCIENCE (COSC)

COSC 100. Introduction to Applied Computer Science **3 credits**
Provides a comprehensive overview of the field of Computer Science in areas such as machine architecture, data storage, data manipulation, operating systems, algorithms, programming languages, data structures, database structures, computational complexity, and artificial intelligence; includes a brief introduction to programming. Lab fee: $30

COSC 110. Computer Science I **3 credits**
An Introductory programming course, using a modern language that covers algorithm development and basic programming techniques with applications in the sciences. Students learn the principles of computer programming and how to use programming to solve scientific problems. This course is a prerequisite for all core courses and electives in data and computer science programs. Pre-requisite MATH 121 or ACT Math score of 24 or better or Department Consent; Co-requisites: COSC 110L. Lab fee: $30

COSC 110L. Computer Science I **1 credit**
This is the companion laboratory for COSC 110.Co-requisites: COSC 110. Lab fee: $10

COSC 120. Computer Science 2 **3 credits**
A continuation of COSC 110 with Object Oriented Programming principles and techniques emphasized. Topics include: file IO, Arrays and their applications, abstract data types, classes, Inheritance and composition. Prerequisite: COSC 110; Co-requisites: COSC 120L. Lab fee: $30

COSC 120L. Computer Science 2 LAB **1 credit**
This is the companion laboratory for COSC 120. Prerequisite: COSC 110 & COSC 110L; Co-requisites: COSC 120. Lab fee: $10

COSC 200. Applied Computer Science II **3 credits**
A continuation of COSC 100 with an introduction to web scripting languages, client/server-side technologies, and data structure principles. Pre-requisite: COSC 100. Lab fee: $30

COSC 245. Internet of Things   **3 credits**
A study of the combination of software, hardware, sensors, and other technologies that connect to the internet or other networks. Focus will be on privacy, security, analytics, and applications of these technologies such as "smart home" devices. Prerequisite: COSC 120. Lab fee: $30

COSC 250. Computer Architecture and Organization   **3 credits**
A study of the functional organization of digital computers. Fundamental principles of control and data path units, program counter, ALU, multiplexers, registers, and memory. Introduction to assemblers, linkers, and loaders. Programming with assembly language. Prerequisites: COSC 120

COSC 280. Data Structures   **3 credits**
Design and implementation of abstract data structures including stacks, queues, doubly-linked and circularly-linked lists, binary search trees, heaps, priority queues and graphs; algorithmic analysis and asymptotic notation; binary search, heapsort, merge sort, quicksort, and radix sort. Prerequisites: COSC 120

COSC 305. Hardware Solutions   **3 credits**
This course focuses on the design and implementation of hardware solutions for computing systems. Students will learn selection, installation, and configuration of hardware components. The course will also cover the concepts of reliability, maintainability, and availability in hardware design, as well as the principles of power management and cooling in computing systems. Prerequisite: COSC 120 or COSC 200. Lab fee: $30

COSC 310. Software Engineering   **3 credits** An
introduction to requirements management and best practices in eliciting, documenting, and verifying requirements for programming systems. Topics include writing effective use cases, constructing UML-compliant models (including class, state, and activity diagrams), specification of user interface and data layers, testing, and integration. Prerequisite: COSC 120.

COSC 315. Database Systems   **3 credits**
Data models, data description and data manipulation languages. Schemas, query processing, database system architecture. Integrity, concurrency, and security techniques. Implementation of data models in a real database. Prerequisite: COSC 120. Lab fee: $30

COSC 330. Embedded Systems   **3 credits**
Design and implementation of small embedded microcomputer based systems. Examination of peripheral control registers, firmware development in C or Python language. Peripherals including serial, parallel, timers, simple LoRa, and interrupts. Design of basic interface circuitry. A course hardware/firmware project will be required. Prerequisite: COSC 120. Lab fee: $30

COSC 340. Operating Systems   **3 credits**
Computer system software organization; operating system concepts including processes, threads, memory management, inter process communications, and virtual machines. Prerequisite: COSC 120. Lab fee: $30

COSC 345. Computer Networks   **3 credits**
Computer network analysis and design. Fundamentals of data communications: media, transmission, encoding, error detection and handling, link control, packet switching.

Network architecture and topology. Network, Transport, and Application layer protocols, services, design issues and performance. Programming assignments using TCP/IP. Prerequisite: COSC 120. Lab fee: $30

COSC 350. Special Topics   1-4 credits
Introduction of topics not covered in regularly scheduled courses. Department consent

COSC 355. Mobile Computing   3 credits
Study of the fundamental design concepts and software principles underlying mobile and pervasive computing, including mobile interface design, data management, mobile networks, location aware computing, and mobile security. Involves significant programming on modern mobile platforms. Prerequisite: COSC 120. Lab fee: $30

COSC 360. Web Application Development   3 credits
Website development emphasizing presentation layer with client side and server side technologies. Topics covered include scripting languages, cloud services, server-side programming. Prerequisite: COSC 120. Lab fee: $30

COSC 365. Problem Solving for IT Professionals   3 credits
This course is designed to provide IT professionals with the necessary problem-solving skills required in the fast-paced and ever-changing IT industry. Students will learn various problem-solving techniques and methodologies that can be applied in real-world situations. The course will focus on the different phases of problem-solving, including problem identification, analysis, solution design, implementation, and evaluation. Prerequisite: COSC 120 or 200. Lab fee: $30

COSC 390. CS Workshop 1   1-2 credits
This is a one hour internal based internship that allow students to develop skill sets in the IT area. Students will be assigned work based projects in the DACS department, IT group, or special institutional projects. Prerequisite: Junior Status or Instructor Consent.

COSC 420. Advanced Computer Science Math   3 credits
Numerical methods, statistical computing techniques, data smoothing and filtering. Emphasis will be placed on design and implementation. Students will utilize software packages such as MatLab, SciLab, or Python. Prerequisite: Math 201 & Math 240.

COSC 430. Cryptology   3 credits
An applied mathematics and computer science course designed to cover algorithmic number theory and applications with a focus on cryptography. Topics to be covered include prime numbers, divisibility algorithm, modular arithmetic, Fermat's Little Theorem, simple cryptosystems, and public-key cryptography. Prerequisite: MATH 225. Lab fee: $30

COSC 440. Co-op Experience   1-12 credits
Students utilize their knowledge of coding and computer science skills in an applied setting by working directly for a company, government agency or non-profit organization. Prerequisite: Senior status or permission of the instructor.

COSC 450. Capstone   1-12 credits
Drawing upon their co-op experience, students develop and implement an applied research or development project by working directly with a company, government agency or non-profit organization. Prerequisite: COSC 440.

CRIMINAL JUSTICE (CRJS)

CRJS 101. Introduction to Criminal Justice   3 credits
Students learn the history, organization, and functions of various components of the criminal justice system. The focus is on the interrelationships among law enforcement agencies, prosecution, courts, correctional processes and institutions, probation, parole, juvenile justice, and other officials and their agencies.

CRJS 242. Introduction to Law Enforcement   3 credits
This course discusses the philosophical and historical background, constitutional limitations, objectives, and processes in the enforcement of the law. Students discuss and evaluate the nature and responsibilities of policing, including police accountability, civil liability, and multicultural issues.

CRJS 260. Terrorism and Homeland Security   3 credits
This course provides a definition, overview, and analysis of terrorism and examines the causes of terrorism, including religious, political, and social overtones. It also provides an overview of domestic and international terrorism, responding to terrorism, and efforts to prevent terrorism.

CRJS 331. Criminal Procedure   3 credits
This course studies the historical development and court interpretations of the Bill of Rights as each relates to the issues of arrest, search, and seizure. It includes legal theories and practices of the criminal justice system from arrest through release of the criminal offender.

CRJS 356. Criminal Law   3 credits
This course examines the history and development of criminal law, elements of a crime; parties to a crime; types of offenses; and scope, purpose, and definition of criminal offenses. Students also study general principles of substantive criminal law through analysis of judicial opinions and text.

CRIMINAL JUSTICE LEADERSHIP (CJLD)

CJLD 150 Leadership in Criminal Justice Organizations -   3 credits
This course is designed to provide students with a comprehensive understanding of leadership in criminal justice organizations. Students will explore the multifaceted roles of leaders in law enforcement, corrections, and the court systems. Through in-depth lectures, case studies, and real-world examples, students will gain a deeper understanding of the fundamental principles of effective leadership within a criminal justice context. This includes developing the skills necessary to lead teams, make critical decisions, and fostering a positive and inclusive work environment. Students will also examine different types of leadership styles commonly found in criminal justice organizations and the impact they have on the overall efficiency, functioning and success of these organizations.

CJLD 300 Principles of Criminal Justice Leadership   3 credits
- This course explores the principles of leadership in the field of criminal justice. Students will examine the role of leadership in maintaining law and order, protecting the community, and promoting justice. Through a combination of theoretical perspectives and practical applications, students will develop a critical understanding of leadership styles, strategies, and techniques within the criminal justice context. They will explore the traits and skills necessary for effective leadership in law enforcement, corrections, and court systems. By the end of the course, students will have a comprehensive understanding of the principles of criminal justice leadership and be able to apply their knowledge in real-world scenarios.

CJLD 302 Principles of Criminal Justice Management -   **3 credits**

This course is designed to provide students with a comprehensive understanding of the principles of criminal justice (CJ) management approach vs. the doctrine of leadership. It combines theoretical knowledge with practical skills to equip students with the tools necessary to effectively manage in the field of criminal justice. Throughout the course, students will examine the various components of CJ management, including organizational structures, human resources, budgeting, and policy development. They will also explore the latest theories and practices in leadership, and how they can be applied to different CJ settings. Students will gain insight into the challenges and complexities of managing and leading in a diverse and constantly evolving field.

CJLR 304 Planning and Organizational Decision Making -   **3 credits**

This course will provide students with a comprehensive understanding of criminal justice leadership in the context of planning and organizational decision making. Students will learn how to effectively lead and manage within the complex and dynamic criminal justice system, with a focus on updating legal frameworks, policy development, and achieving accreditation. Students will explore the dynamics of leadership in the criminal justice system, including the roles, responsibilities, and challenges faced by leaders at various levels. Through an interdisciplinary approach, students will analyze the key factors that influence organizational decision making in the criminal justice context, including legal, ethical, political, and social considerations.

CJLR 306 Leadership Health, Wellness and Morale -   **3 credits**

This course explores the integration and relationship of criminal justice and leadership, with a focus on promoting health, wellness, and morale within law enforcement organizations. This includes examining the unique challenges and stressors that law enforcement personnel face in their roles, and how these can impact their overall well-being and effectiveness as leaders. Additionally, the course will delve into the way mental health, particularly post-traumatic stress disorder (PTSD), can impact the well-being of law enforcement professionals and the steps that can be taken to prevent and address it. Strategies for promoting a culture of wellness, resilience, and self-care within law enforcement organizations will be discussed and explored, as well as techniques for improving overall morale while creating a positive work environment.

CJLD 308 Criminal Justice Leaders: Ethics and Moral Values -   **3 credits**

This course is designed to provide students with an in-depth understanding of the role of ethics and moral values in the criminal justice system. As leaders in the field of criminal justice, it is crucial to have a strong moral compass and make ethical decisions in the face of complex and challenging situations. This course will explore the concept of the "slippery slope" and the potential consequences of unethical behavior in the criminal justice system. Through a combination of lectures, case studies, and class discussions, students will examine the principles of ethics and moral values as they apply to different aspects of the criminal justice system. This course will also delve into the various codes of ethics and professional standards that govern the behavior of criminal justice leaders, such as law enforcement officers, lawyers, and judges.

CJLD 310 Leadership Skills for Escalation Prevention & Management -   **3 Credits**

This course will equip students with the necessary skills to effectively prevent and manage situations of conflict and escalation within the criminal justice system. Through a comprehensive curriculum, students will learn about the principles of conflict prevention

and how to apply them in real-life scenarios. One of the key components of this course is mediation training, where students will learn techniques to de-escalate tense situations and find peaceable resolutions. They will also gain an understanding of the different types of conflicts that may arise in the criminal justice field and how to handle them in a professional and ethical manner. Furthermore, the course will emphasize the importance of emotional intelligence in effective leadership within the criminal justice system. Students will learn how to understand and manage their emotions and those of others to make sound and rational decisions in high-pressure situations.

CJLD 400 CJLD 400 Resilient Leadership in Crisis Situations - 3 credits
This course focuses on equipping students with necessary skills and strategies to effectively lead during times of crisis and navigate through challenging situations in the criminal justice system. Throughout this course, students will explore various theories and models of crisis leadership, gaining a deeper understanding of the core concepts and principles. Emphasis will be placed on developing critical thinking skills to analyze different crisis situations and make informed decisions to manage them effectively. The course will also cover the essential qualities of a crisis leader, including efficient communication, effective decision-making, and rapid problem-solving skills, as well as the ability to remain calm under pressure and inspire others to do the same.

CJLD 402 Human Resource Development for Leaders - 3 credits
This course is designed for students who are currently in leadership positions as well as those interested in pursuing leadership roles in the criminal justice field. It focuses on the crucial role of human resource development in creating effective and efficient leaders in this industry. Through a thorough examination of recruiting, retention, promotions, and training processes, students will gain the necessary knowledge and skills to become successful leaders in the criminal justice system. The course will begin with an exploration of recruitment strategies, including identifying and attracting top talent and ensuring diversity in the workforce. Next, students will delve into the critical topic of retention. This section of the course will cover various strategies for creating a positive work environment, promoting employee satisfaction, and addressing organizational issues that may lead to high turnover rates. Promotional opportunities, processes and training will also be emphasized in this course, as these are key aspects of human resource development for leaders in the criminal justice field.

CJLR 404 Cross Cultural Leadership and Diversity - 3 credits
This course provides a comprehensive overview of cultural diversity and its impact on the criminal justice system. The course reviews topics such as the history of diversity, understanding the impact of cultural differences, developing policies to promote cultural understanding and respect, and promoting diversity within the criminal justice system. Other topics include understanding the impact of cultural bias on the criminal justice system, analyzing the impact of cultural diversity on crime and law enforcement, and understanding the dynamics of cross-cultural communication. The course also explores the importance of leadership and diversity in the criminal justice system, and the application of principles learned to enhance the effectiveness of criminal justice organizations.

CJLD 406 Criminal Justice in Media - 3 credits
This course is designed to explore the ways in which the elements of the criminal justice system are portrayed in different forms of media, including films, social media, and blogs. The course will examine the various stereotypes, themes, and issues that arise in the

portrayal of criminal justice in films and social media. This media review course will look at the representation and depiction of police, courts, prisons, and other elements of the criminal justice system. In addition, students will explore the way in which film media as well as social media has influenced public opinion on criminal justice issues. Students will analyze films and social media excerpts from a variety of genres and historical periods, including current films and classic films as well as subject media posts. They will also be encouraged to discuss and integrate their own experiences and perspectives on criminal justice and how they are affected by the way it is portrayed in media. At the conclusion of the course, students will have a better understanding of how criminal justice is portrayed in media and how this has a definitive impact on the public perception of criminal justice.

CJLD 408 Leadership and Innovation: Emerging Criminal Justice Perspectives - 3 credits

This course will explore the emerging trends and perspectives in criminal justice leadership, with a focus on the new innovative approaches and strategies being implemented in the field. Students will examine the changing landscape of the criminal justice system and the challenges faced by leaders in this dynamic environment. They will analyze the role that leadership plays in driving successful and sustainable outcomes in law enforcement, corrections, and other criminal justice agencies. Drawing on real-life examples and case studies, students will critically evaluate different leadership styles and their effectiveness in responding to the evolving needs and demands of the criminal justice system.

CJLD 410 Managing Civil Unrest - 3 credits

This course will provide students with the necessary knowledge and skills to effectively navigate and address civil unrest situations in the field of criminal justice. As society continues to grapple with social and political issues, it is crucial for criminal justice professionals to be equipped with the tools to prevent and manage potential unrest. Throughout the course, students will learn strategies for preventing social unrest and minimizing public unrest, including effective communication and conflict resolution techniques. They will also examine the factors that contribute to civil unrest and learn methods for predicting and analyzing potential conflicts. This course will challenge students to think critically and ethically about the complex issues surrounding civil unrest and develop strong leadership skills upholding human rights and promoting justice for all.

CJLD 412 Performance Evaluation & Assessment - 3 credits

This course is designed to provide students with the methods and tools used to evaluate and assess the performance of criminal justice personnel. Students will learn about the relevant theories of personnel evaluation and assessment, as well as the techniques and strategies used to measure and evaluate performance. This course also covers topics such as the legal, ethical, and social implications of evaluating and assessing personnel. Additionally, students will learn about the role of performance appraisal in organizational development, as well as its relationship to motivation, job satisfaction, and organizational culture.

CJLD 416 COMPSTAT: Data and Accountability - 3 credits

This course introduces students to the role of data and accountability in criminal justice. It will cover a range of topics including the analysis of data in criminal justice decision-making, the use of data to evaluate criminal justice outcomes, and the importance of accountability in criminal justice. Students will be introduced to the methodologies in which data and accountability can be used to guide criminal justice practice and policy. Students will also learn how to utilize data to evaluate and improve criminal justice

agencies, systems, and services. Students will gain an understanding of the role of data and accountability in criminal justice and gain practical skills in the utilization of data to inform criminal justice practices.

CJLD 425 Capstone: Global Perspectives in Criminal Justice Leadership - 3 credits

 In this course, students will explore the various roles and challenges of criminal justice leadership in a global context. They will examine the similarities and differences of criminal justice systems in different parts of the world and the impacts on leadership practices. This course will also focus on understanding current global issues, such as terrorism, human trafficking, and cybercrime, and the role of leadership in addressing these challenges. Through case studies, discussions, and research, students will develop a global perspective on criminal justice leadership and gain insights into the skills required to lead in a world of increasing interconnectedness and complexity.

<div align="center">

CYBERSECURITY (CYBR)

</div>

CYBR 100. Introduction to Computers   3 credits
This course provides students with the ability to utilize and implement computer hardware and software into their cybersecurity and information technology endeavors. Students will analyze the principles of building, repairing, upgrading, and the common operating system principles of computers. The course will also emphasize the need for proper recording of documentation needed when working and making changes to a computer. Students will learn the integration, troubleshooting, and maintenance techniques of combining hardware and software. This also includes how the hardware is relevant towards the operation of computer's operating system. The importance of safety, privacy, and professionalism needed when working with computers and the individual that operate them. Lab fee: $129

CYBR 110. Introduction to Networking   3 credits
This course provides students with the ability to utilize and implement computer networking into their cybersecurity and information technology endeavors. Students will analyze the principles of the OSI model, protocols, hardware, device configuration, management, security, and troubleshooting methods of networking. The course will also emphasize the need for proper recording of documentation needed when working and making changes to an organization's network. Students will explore and critically examine networks and the network's functions. Students will obtain the importance of safety, privacy, and professionalism needed when working with networks. Lab fee: $129

CYBR 120. Introduction to Security   3 credits
This course provides students with the ability to utilize and implement computer and network security into their cybersecurity and information technology endeavors. Students will analyze the principles of the threats, policies, penetration testing, Bring Your Own Device (BYOD) security, security architecture, securing data, and troubleshooting methods of computer and networking security. The course will also emphasize the need for proper recording of documentation needed when working and making changes to enhance an organization's network. Students will obtain the importance of safety, privacy, and professionalism needed when working with computers and networks and the individuals that adhere towards the need of its security. Lab fee: $129

CYBR 130. Introduction to Programming
3 credits This course provides students with the ability to utilize and implement computer programming into their cybersecurity and information technology endeavors. Students will analyze the principles of computer programming variables, statements, user inputs, and computer and network recording and manipulation. The course will also emphasize the need for proper recording of documentation needed when working and making changes to an organization's network. Students will obtain the importance of safety, privacy, and professionalism needed when working with and implementing computer coding techniques.

CYBR 200. Introduction to Databases   **3 credits**
This course provides students the knowledge necessary to apply cybersecurity threat mitigation and remediation strategies to database systems at the design and operational levels. The major areas of study and practice delivered by the course includes core database theory and concepts, creating databases and database objects, and operational issues associated with data security, data integrity and information privacy. The learners will participate in lecture and discussion activities, complete study assignments, and accomplish practical application exercises. Prerequisite or Corequisite: CYBR 130

CYBR 210. Network Security Architecture   **3 credits**
This course provides students with the ability to utilize and implement network security architecture into their cybersecurity and information technology endeavors. Students will analyze the principles of the analyzing of networks and security, architecture of networking data, and the hardware and software implemented to secure networks and its data. The course will also emphasize the need for proper recording of documentation needed when working and making changes to an organization's network. Students will explore and critically examine networks, its data, and the network's and data's functions. Students will obtain the importance of safety, privacy, and professionalism needed while in a network security architect role. Lab fee: $179

CYBR 220. Security Vulnerability Analysis   **3 credits**
This course provides students with the ability to utilize and implement vulnerability assessments and practices into their cybersecurity and information technology endeavors. Students will analyze the principles of the security weaknesses, security strengths, and generating an analysis of their data and networking vulnerabilities. The course will also emphasize the need for proper recording of documentation needed when working and making changes to an organization's network. Students will explore and critically examine network's and data's vulnerabilities. Students will obtain the importance of safety, privacy, and professionalism needed when conducting a cybersecurity analysis. Lab fee: $129

CYBR 230. Offensive Security Exploitation   **3 credits**
This course provides students with the ability to utilize and implement offensive security exploitation practices into their cybersecurity and information technology endeavors. Students will analyze the principles of legal and ethical compliances, session hijacking, cryptanalysis, and cryptographic attack countermeasures. The course will also emphasize the need for proper recording of documentation needed when working and making changes to an organization's network. Students will explore and critically examine networks and the network's offensive security functions. Students will obtain the importance of safety, privacy, and professionalism needed implementing offensive security exploitation tactics. Lab fee: $179

CYBR 240. Security and Data Privacy   **3 credits**
This course examines an overall understanding of Security and Data Privacy including fundamental elements of computer security and information assurance. Students will learn to identify and implement general information assurance concepts including confidentiality, integrity and availability, risk management, authentication, ethical issues, and principles of cryptology. The course further examines the legal, personally identifiable information, policy, and compliance challenges raised by efforts to protect networked environments. Lab fee: $416

CYBR 250. Cloud Computing   **3 credits**
This course provides students with an overall understanding of Cloud computing concepts and services independent of specific technical roles. Students will learn to identify and implement general Cloud concepts with a focus on cybersecurity principles. Students will identify key cloud concepts and principles including deployment models, categories and services, security, architecture, and will be able to describe the main benefits and challenges of cloud computing, including managing costs. Students will deploy services and features based on Amazon's AWS platform. The course includes several hands-on laboratories that present the student with a real–time cloud environment. Prerequisite: CYBR 110

CYBR 310. Cybersecurity Strategy   **3 credits**
This course is designed to cover the strategic, operational, and tactical aspects of the conflicts in cyberspace today. This course will provide a valuable resource to those involved in cyber warfare activities regardless of whether their focus is policy maker, CEO, CISO, doctrinal development, penetration testers, security professionals, network and systems administrators, or college instructors. The information provided on cyber tactics and attacks can also be used to assist in engineering better and more efficient procedures and technical defenses.

CYBR 320. Ethical Hacking & Countermeasures   **3 credits**
The Certified Ethical Hacker program is the pinnacle of the most desired information security training program any information security professional will ever want to be in. To master the hacking technologies, you will need to become one, but an ethical one! The accredited course provides the advanced hacking tools and techniques used by hackers and information security professionals alike to break into an organization. As we put it, "To beat a hacker, you need to think like a hacker". This course will immerse you into the Hacker Mindset so that you will be able to defend against future attacks. The security mindset in any organization must not be limited to the silos of a certain vendor, technologies or pieces of equipment.

CYBR 330. Incident Handler   **3 credits**
The Incident Handler program is designed to provide the fundamental skills to handle and respond to the computer security incidents in an information system. The course addresses various underlying principles and techniques for detecting and responding to current and emerging computer security threats. Students will learn how to handle various types of incidents, risk assessment methodologies, and various laws and policy related to incident handling. After attending the course, they will be able to create incident handling and response policies and deal with various types of computer security incidents.

CYBR 340. Security Analysis   **3 credits**
The Security Analyst training program is an information security training class designed to enable Security Professionals the advanced uses of the available methodologies, tools and techniques expected from a premier vulnerability assessment training and are required to perform comprehensive information security pen tests. Students will learn how to design, secure and test networks to protect any organization from the threat hackers and crackers pose. By enabling the Penetration Tester methodology and groundbreaking techniques for security and penetration testing, this will help you perform the intensive assessments required to effectively identify and mitigate risks to the security of organization's infrastructure. As students learns to identify security problems in this vulnerability assessment training certification course, they also learn how to avoid and eliminate them, with the class providing complete coverage of analysis and network security-testing topics.

CYBR 410. Certified Information Systems Security Professional – Phase I   **3 credits**
The CISSP course helps individuals who have the ability, knowledge, and experience to implement solid security practices, perform risk analysis, identify necessary countermeasures, and help the organization protect its facility, network, systems, and information. The CISSP course also provides security professionals with the credential that represents the skill set they want to offer to employers. Today, a greater demand is put on security as an integral part of corporate success. This, in turn, increases the demand for highly skilled security professionals. This course, broken down into a phase 1 and subsequent phase 2 course, is aligned to the eight (8) domains of Information System Security Certification Consortium (ISC2).

CYBR 415. Certified Information Systems Security Professional – Phase II   **3 credits**
This is Part II of The CISSP course helps individuals who have the ability, knowledge, and experience to implement solid security practices, perform risk analysis, identify necessary countermeasures, and help the organization protect its facility, network, systems, and information. The CISSP course also provides security professionals with the credential that represents the skill set they want to offer to employers. Today, a greater demand is put on security as an integral part of corporate success. This, in turn, increases the demand for highly skilled security professionals. This course, broken down into a phase 1 and subsequent phase 2 course, is aligned to the eight(8) domains of Information System Security Certification Consortium (ISC2). The course contained, here-in, is the second phase. Prerequisite: CYBR 410.

CYBR 440. Advanced Security Trends   **3 credits**
This course provides students with the ability to explore and examine emerging trends and technology in cybersecurity. Students will analyze organizations and review the feasibility of adopting new cybersecurity policies to provide competitive advantages in the workplace. This course also evaluates how policies and procedures continue to evolve as technology workplace data security requirements change.

CYBR 450. Cybersecurity Capstone   **3 credits**
The cyber capstone course aims to give students hands-on experience, building on what they have learned during the specialization courses. The task of the Capstone is to design and build a secure system and expose weaknesses in systems built by other teams. The capstone follows the format of the Build-it Break-it Fix-it security contest. The Build it - Break it -Fix it security contest aims to teach students to write more secure programs. The contest evaluates participants' abilities to develop secure and efficient programs. The

contest is broken up into three rounds. During the Build It round, builders write software that implements the system prescribed by the contest. In the Break It round, breakers find as many flaws as possible in the Build It implementations submitted by other teams. During the Fix It round, builders attempt to fix any problems in their Build It submissions that were identified by other breaker teams. Students are also supposed to submit a comprehensive case study pertaining to current IT cybersecurity policy. Participating in the course gives learners the chance to be part of research on understanding how to better build secure software. Lab fee: $179

DATA SCIENCE (DASC)

DASC 100. Introduction to Scientific Programming   **3 credits**
An introductory programming course designed primarily for computational and data sciences majors and business analytics where students learn how to use programming principles to solve numerical and scientific problems. Prerequisite: MATH 120 or ACT Math score of 21. Lab fee: $30

DASC 101. Introduction to Data Science   **3 credits**
A course that covers the basic principles of data science and the tools and skills that are essential in data science. Topics to be covered include: data acquisition, cleaning, processing, and drawing inference from such data. Lab fee: $30

DASC 200. Data Mining   **3 credits**
Students learn basic principles of data mining which include methods for locating, extracting, processing, determining appropriate methods for handling and ultimately extracting useful knowledge from raw data. Topics to be covered include: data extraction, cleaning, and other preprocessing tasks of data, classifications, clustering, transformation, pattern recognition, anomaly detection, and overall knowledge discovery. Prerequisite: MATH 240 or equivalent course in statistics.

DASC 250. Data Visualization   **3 credits**
The study of the basic principles of presenting (visual format) data in multiple ways from any source with applications in multiple disciplines. Prerequisite: MATH 240 or equivalent course in statistics

DASC 310. Machine Learning   **3 credits**
Principles and techniques of statistical learning (machine learning) for dimensionality reduction, classification, clustering, and regression. Students learn how machine learns which can be divided into supervised and unsupervised learning. Such learning is accomplished through advanced statistical methodology. Prerequisite: MATH 240 or equivalent course in statistics. Lab fee: $30

DASC 330. Modelling and Simulation   **3 credits**
Statistical models for data analysis and discovery in big-data settings, with primary focus on linear regression models. The challenges of building meaningful models from vast data are explored, and emphasis is placed on model building and the use of numerical and graphical diagnostics for assessing model fit. Interpretation and communication of the results of analyses is emphasized. Prerequisite: MATH 240 or equivalent course in statistics

DASC 350. Special Topics   **1-4 credits**
Introduction of topics not covered in regularly scheduled courses. Prerequisite: Department consent.

DASC 375. Natural Language Processing 3 credits

The course provides fundamental skills and knowledge needed to use computer software/algorithms to process and extract knowledge from large data sets. Topics to be covered include syntax and parsing, statistical parsing, syntactic analysis. Prerequisite: MATH 240 or equivalent course in statistics

DASC 450. Internship 3 credits

Content varies based on student's background and needs. Prerequisite: Senior status or instructor consent.

DASC 475. Data Science Capstone 3 credits

An independent research project done at the junior or senior level. It involves a project supervised by a faculty. The number of hours depends on student interest, standing, and background. Prerequisite: Senior status or instructor consent.

DIGITAL MEDIA DESIGN (DMDS)

DMDS 101. Intro to Digital Media Design 3 credits

The course will provide students with an introduction to visual communications and the principles and elements of design. Students will practice applying the principles and elements in several visual communications exercises. Flex Course, Pre-requisites None.

DMDS 201. Graphics I 3 credits

The course will introduce the principles and elements of digital media design utilizing Adobe Suites Photoshop and Illustrator. Students will focus on the development of concepts and ideas relating to digital and social media. Flex Course, Pre-requisites None, $100 Lab Fee

DMDS 202. UI Web Design 3 credits

The course will focus on the development of the user interface (UI) in Web Design. Students will learn the principles of web design and how to apply them to projects throughout the course. Flex Course, Pre-requisites None, $100 Lab Fee

DMDS 210. 3D Product Design 3 credits

The course will introduce 3D design programs to enhance student's knowledge of digital media. Students will focus on product development and prototyping to print using 3D printing technology. Students will be introduced to Design Thinking and how it can be applied to the course exercises. Flex Course, Pre-requisites None, $100 Lab Fee

DMDS 301. Motion Graphics 3 credits

The course will focus on motion graphics and how it can be used for clients to create work based on briefs. Students will learn techniques and skills using Adobe After Effects. Pre-requisite: DMDS 201; $100 Lab Fee

DMDS 302. UX Web Design 3 credits

The course will focus on the development of the user experience (UX) in Web Design. Students will apply the principles of web design to projects and gain knowledge about HTML and CSS. Pre-requisite: DMDS 202; $100 Lab Fee

DMDS 303. Graphics and Video Editing   **3 credits**

The course will reinforce the students understanding of graphics from previous courses. Students will focus on the application of concepts and ideas to apply skills to visual communication and video editing projects. Pre-requisite: DMDS 201; $100 Lab Fee

DMDS 310. Visual Communications Studio   **3 credits**

The course focuses on the development of visual skills for print media, packaging, and data. Students will apply their knowledge of the principles of layout design and color psychology to assigned projects. Pre-requisites: DMDS 101, 201, and 303; $100 Lab Fee

DMDS 311. Product and Motion Graphic Studio   **3 credits**

The studio will focus on the creation of motion graphics and product development based on Design Thinking. Students will story board ideas to develop products that solve a problem and create motion graphics to enhance it. Pre-requisites: DMDS 101, 201, 210, and 301; $100 Lab Fee

DMDS 312. UI & UX Web Design Studio   **3 credits**

The studio will focus on the process of creating UI and UX web sites and social media applications. The students will enhance their interview skills with clients to help gain information to produce publishable sites. Pre-requisites: DMDS 101, 202, and 302; $100 Lab Fee

DMDS 390. Professional Practice   **3 credits**

The course will address opportunities in Digital Media to prepare students for their internship and senior capstone. Students will research, create documents, and address issues for the professional setting. Students will begin developing the senior capstone project based on the focus areas.

DMDS 410. Digital Media Design Senior Capstone   **3 credits**

The course will be centered around projects to prepare students for their future. Students will complete a comprehensive capstone project designed for an appropriate audience. Students may work with local businesses on the project to enhance their portfolios. Pre-requisites: DMDS 310, 311, and 312

DMDS 490. Digital Media Design Internship   **3 or 6 credits**

The course will provide students the opportunity to obtain practical work experience. Students will focus on honing their skills as it relates to digital media and specified interests. Pre-requisite: DMDS 410

DMDS 499. Independent Study   **3 credits**

ECONOMICS (ECON)

ECON 201. Principles of Microeconomics   **3 credits**

A study of the fundamental principles of microeconomic theory as applied to consumers, producers, and government. This includes how market demand and supply operate to determine price and output in various competitive and non-competitive conditions. Related topics include elasticity, consumer choice, production and costs, economic functions of government, externalities, and public goods. (offered in fall and spring; offered online in spring)

ECON 202. Principles of Macroeconomics   3 credits
A study of macroeconomic principles as they relate to national economic goals. Topics include international trade, national income accounting, economic growth, inflation, employment, macroeconomic models of aggregate demand and supply, federal budget deficits, public debt, and an analysis of fiscal and monetary policy. (offered in fall and spring; offered online in spring)

ECON 370. Issues in Capitalism   3 credits
An introduction to the philosophy of objectivism and the contrasting philosophy of subjectivism and will include, but will not be limited to, the study of capitalism, socialism and communism. Discussions and reading and writing about conflicting ideas will be emphasized throughout the course. The course will also encompass major economic and social issues within the political framework, both national and international.

EDUCATION (EDUC)

EDUC 100. Introduction to Education   3 credits
This course is an introduction to the education profession and is designed to familiarize prospective educators with the work of the K-12 teacher and community educator. The content of the course provides students with a comprehensive examination of three main factors that affect the work of an educator: (1) students and the social issues they bring with them to schools, (2) curriculum and instruction, and (3) organizational structures, governance and school law. Candidates will explore their own interests in the field of education by relating it to their personal educational experiences. Public school field experiences (20 hours) introduce students to a range of educational levels, a variety of multi-cultural and socio-economic settings, and diverse student populations. Course fee: $150

EDUC 203. Survey of Students with Exceptionalities   3 credits
This in-seat course provides an overview of historical perspectives and current practices in special education. Units of study include definitions, characteristics, prevalence, assessment, and placement issues for specific disabilities and giftedness. The course also emphasizes multicultural, age, and familial considerations for students with exceptionalities. Strategies for improving the learning and behavior of students with exceptionalities are introduced. Candidates spend 20 hours in a special education setting.

EDUC 204. The Inclusive Classroom   3 credits
This blended online course emphasizes procedures and strategies for including students with exceptionalities and culturally diverse learners in the general education classroom and other learning settings. Candidates are introduced to the concepts of universal design for learning, understanding by design, and culturally responsive teaching. Candidates also create lesson plans that include all learners. The course emphasizes collaborating effectively with professionals and family members to meet individualized education plan goals and objectives in the general classroom. As a service-learning intensive course, students spend 20 hours in public school and/or community inclusive settings.

EDUC 250. Technology in the Schools   3 credits
Candidates learn computer and other technology applications for the field of education. The course emphasizes integrating iPads, multimedia, and the internet to improve teaching and learning, providing assistive and adaptive technology for the inclusion of students with

exceptionalities and culturally diverse learners, and making ethical decisions for technology usage. This class is taught in an online format only.

EDUC 253. Physical Education Methods   3 credits
This course focuses on preschool and elementary instructional strategies that emphasized developmentally appropriate skills, physical activity and motor skill development, management skills and self-discipline, lifetime personal health and wellness, cooperation, responsibility, and sensitivity to diversity. In addition, the course emphasizes how the classroom teacher can introduce physical movement in the classroom to energize thinking and enhance academic skills. Students will teach and work with students in a 10-hour field experience in an elementary school setting and create lesson and/or skills plans related to physical movement and/or wellness as part of the teaching experience.

EDUC 299. Theories of Learning and Teaching   3 credits
This course is an examination of developmental, cognitive, motivational, social, psychological, and constructivist theories of learning. Units of study adapt the principles of educational psychology to the learning-teaching concepts related to understand students and effective instruction. Pre-requisite: PSYC 212. Course fee: $209

Only students who have been formally accepted into the Education Department or who have special permission from the Chair of the Education Department may enroll in the courses listed below.

EDUC 300. Children's Literature   3 credits
This online course focuses on exploring and evaluating a variety of authors, illustrators, and books related to children's literature. Candidates will become familiar with different genres, evaluate and select appropriate literature to meet individual student needs, and recognize how children's literature can be implemented across the curriculum. Candidates will develop and implement a variety K-6 learning events to engage and motivate students to become lifelong readers.

EDUC 31X. Early Childhood Fundamentals   3 credits
This course focuses on the foundation and fundamentals that support early childhood education, including the guiding principles used to establish early childhood procedures, key ethical standards and guidelines, plus current practices and policies that affect early childhood services. Offered online.

EDUC 311. Assessment and Diagnosis   3 credits
This course examines the design, production, application, and scoring of teacher-made and standardized tests with norm-referenced and criterion-referenced measurements. Attention is given to planning assessments for units, incorporating technology for assessment and scoring, and developing authentic assessments and rubrics. The course includes fundamental descriptive statistics needed for interpreting tests scores of students with and without exceptionalities. Multicultural issues in assessment are emphasized.

EDUC 316. School Health   3 credits
A general overview of practices and issues related to school health programs including philosophy, organization, school health services, curriculum, instruction and evaluation. Candidates also teach and work with students during a 10- hour field experience in a health setting. Pre-requisite or Co-requisite: EDUC 320. Only students who have been formally accepted into the Education Department or who have special permission from the Chair of the Education Department may enroll in this course.

EDUC 32X. Developmentally Appropriate Practices and Inclusive Classrooms
3 credits
A study of developmentally appropriate practices grounded in research on how young children develop and learn, with a focus on a framework designed to promote young children's optimal learning and development. Includes a 20-hour field placement in a PK/K classroom.

EDUC 320. Integrated Methods **3 credits**
This course is a detailed analysis of instructional planning, teaching methodologies and classroom management as they apply to the learner, content, and context of classrooms. Emphasis is given to integrated planning, meeting the needs of diverse students, and the use of appropriate methods, materials and evaluation instruments. An extensive field experience in a public-school setting (20 hours of teaching and observation) is coordinated with the course. Pre-requisite or Co-requisite: EDUC 299. Course fee: $156

EDUC 325. Reading in the Content Area **3 credits**
This course is an exploration of how students comprehend and learn with text and how teachers can assist them in these processes. Topics covered include the meaning of comprehension, assessment of student reading skills, study skills, and specific teaching strategies for disciplines in middle and secondary schools. Candidates will be given the opportunity to explore, model and practice various strategies. A 20-hour public school field experience is required. Note: This course is required only for Secondary Special Education majors. Pre-requisite or Co-requisite: EDUC 320

EDUC 33X. Early Childhood Environments and Interactions **3 credits**
This course focuses on supportive environments and positive interactions in early education classrooms for children with a variety of abilities and needs; focus on how well-arranged environments help meet children's needs during pay routines using a variety of activities, modalities, and equipment. Includes a 20-hour field placement in a PK/K classroom. Prerequisites: EDUC 31X, EDUC 32X

EDUC 330. Positive Behavioral Support **3 credits**
Candidates discover how and why students experience issues with inappropriate behavior and identify behavioral needs through functional behavioral assessment. Candidates learn the significance of a supportive classroom environment that encourages positive behavior, enhances self-esteem, and provides clear, consistent behavioral expectations. The course provides instruction in problem solving, conflict resolution, social skills, and behavior modification. The course also highlights the importance of including family and others in planning behavioral interventions. During this course, candidates create an Eligibility/Evaluation of Services, Individualized Education Program, a Social Skills Unit, a Functional Behavior Assessment, and a Behavior Modification Portfolio. Candidates also spend 20 hours in a special education setting working with students who have behavioral disorders. Pre-requisites: EDUC 203 and EDUC 204. Offered fall of odd years in rotation with EDUC 340 and EDUC 360.

EDUC 34X. Curriculum and Assessment for Young Children **3 credits**
A study of early childhood curriculum and assessment and how they link together, including factors that affect the child's physical, social, emotional, intellectual, and language development. Includes a 20-hour field placement in a PK/K classroom. Prerequisites: EDUC 31X, EDUC 32X

EDUC 340. Collaboration in the Schools   **3 credits**

Candidates learn strategies for encouraging collaboration among professionals, families, and students. The course provides instruction in active listening, problem solving, conflict resolution, cooperative learning, and understanding multicultural perspectives. Principled living and ethical decision-making are emphasized as foundational to effective collaboration. During this course, candidates create an Eligibility/Evaluation of Services, Individualized Education Program, Social Skills Plans, Assistive Technology Checklist, and Collaboration Plan. Candidates will have the opportunity to teach and assess students with high incidence disabilities during this 20-hour field experience. Knowledge of disability characteristics and inclusion strategies is assumed. Pre-requisites: EDUC 203 and 204.

EDUC 350. Special Topics   **3 credits**

The course is offered in response to departmental needs. The content may vary depending on the education topic selected.

EDUC 360. High Incidence Disabilities   **3 credits**

This course addresses the academic and behavioral needs of students with high incidence disabilities, including those with learning disabilities, attention-deficit/hyperactivity disorder, mild mental impairments, and behavioral disorders. Emphasis is placed on developing reading, oral and written language, and mathematical skills. During this course, candidates create an Eligibility/Evaluation of Services, Individualized Education Program, 504 Plan, Ideal Inclusive Environment Case Study, Assistive Technology Checklist, and Collaboration Plan as well as a Behavior Modification Plan and Social Skills Lesson Plan. Candidates will have the opportunity to teach and assess students with high incidence disabilities during this 20-hour field experience. Knowledge of disability characteristics and inclusion strategies is assumed. Pre-requisites: EDUC 203 and 204. Cost $156.

EDUC 372. Fundamentals of Reading Instruction   **3 credits**

This course focuses on the physiological, psychological, educational, and sociological factors underlying the development of reading skills. In addition to an examination of curriculum, instructional strategies, methods, and materials used for teaching reading, the course provides a background of the Saxon phonics methodology. The course is taken concurrently with EDUC 374. Pre-requisite or Co-requisite: EDUC 320.

EDUC 374. Clinical Practice/Reading Diagnosis   **3 credits**

The course focuses on the identification of reading difficulties, diagnostic techniques, preventive and prescriptive methods and materials for reading instruction. This course is a supervised teaching field experience in a local elementary school which provides candidates with the opportunity to learn and demonstrate the understanding of diagnosis of reading skills, test administration, and interpretation and evaluative follow up. The course is taken concurrently with EDUC 372.

EDUC 378. Elementary Integrated Methods   **3 credits**

The course focuses on curriculum, instructional methods, assessment, and materials needed for effective instruction in language arts, social studies, and science. All learning experiences are connected to state and national standards and to Praxis content outcomes in each of the content areas. Teacher candidates will participate in both class sessions and on-site field experience learning. Candidates complete 20 hours or more of field experience during this course. Pre-requisite or Co-requisite: EDUC 320.

EDUC 494X. Residency I   **6 credits**

Part one of a full year clinical placement, Residency 1 is a part-time placement that is taken in conjunction with final Education courses and is devoted to co-teaching in an accredited school. Initial activities include classroom observations with responsibilities for planning and teaching gradually integrated into the experience. Offered every fall semester, residents spend 14 weeks in a public school setting with a teacher who has at least 3 years teaching experience. Pre-requisite: EDUC 320.

EDUC 495X. Residency II   **12 credits**

Part two of a full year clinical placement, Residency 2 is a full-time placement taken in conjunction with EDUC 496 and is devoted to co-teaching in an accredited school. Activities include classroom observations with responsibilities for planning, co-teaching, and full time teaching gradually integrated into the experience. Offered every spring semester, residents spend 14 weeks in a public school setting with a teacher who has at least 3 years teaching experience. Pre-requisite: EDUC 494X.

EDUC 496. Seminar for Student Teaching/Internship   **2 credits**

This seminar course is a senior capstone experience that includes weekly meetings. Its purpose is to guide student teacher/interns in fulfilling senior capstone assessment requirements, compiling student teaching/internship portfolios, and completing the West Virginia Teacher Performance Assessment. It is taken in conjunction with EDUC 422, 497 or 498. As a capstone experience, these combined courses provide a venue for creating and presenting professional projects that demonstrate student abilities to meet UC Department of Education outcomes while reflecting in a collaborative manner.

EDUC 498. Internship in Educational Studies   **12 credits**

This full semester, full-time practicum taken in conjunction with EDUC 496 is devoted to an internship at a school, community, social or educational service agency or organization. Initial activities include observations with responsibilities for planning and teaching or training gradually integrated into the experience. Responsibility for service/skills plans, lesson plans, instruction, training, and/or workshops is gradually assumed until the candidate has complete responsibility of the professional's role (according to the policies of the school, agency or company) full time for at least four weeks.

EDUC 499. Independent Study   **1-6 credits**

This course is an independent study of some aspect of professional education that is open only to Education majors who have completed 12 semester credits of professional education courses. Approval of the Chair of the Education Department is required.

ENGLISH (ENGL)

ENGL 101. Freshman Writing I   **3 credits**

ENGL 101, or Freshman Writing 1, is focused on developing and improving academic writing skills for use in college and professional writing. Students will be expected to write daily to improve sentence structure, review language skills, and build a strong vocabulary. We will use the writing process to discover topics, compose drafts, revise and edit drafts, conference with peers on essay writing, and use online resources for writing improvement on all levels. Students are expected to read, discuss, and think critically as part of the development of academic communication.

ENGL 102. Freshman Writing II   **3 credits**
Advanced skills in written communication. Emphasis on the development of a fluent, precise, and versatile prose style. Continued instruction and practice in reading critically, thinking logically, responding to texts, developing research skills, writing substantial essays through systematic revision, addressing specific audiences, expressing ideas in standard and correct English. *Pre-requisite: ENGL 101*

ENGL 202. British Literature Survey: Beowulf to 1798   **3 credits**
A survey of British literature beginning with Beowulf and ending at the end of the eighteenth century, focusing on major authors, trends and genres, including lyric poetry, sonnets, drama, epic, essay, and fiction.

ENGL 203. British Literature Survey: Romantics to 20th Century   **3 credits**
A survey of major authors, themes, and genres of British literature of the nineteenth and twentieth centuries, beginning with the Romantic poets. Themes include class, race, and post-colonial issues. The course includes female authors.

ENGL 223. American Literature Survey I   **3 credits**
A survey of American Literature from the colonial period to the American Renaissance in the 19th Century, focusing on major trends and genres, including poetry, travel narratives, captivity narratives, and early fiction. The course includes female authors, African- American authors, and Native American authors.

ENGL 224. American Literature Survey II   **3 credits**
A survey of American literature from the Civil War to the 21st Century, focusing on major trends and genres, including Realist and Naturalist novels, modern fiction, and experimental poetry. The course includes female authors, African-American authors, and Native American authors.

ENGL 230. Western World Literature   **3 credits**
A survey of the major works of the Western literary tradition, including Homer, Ovid, and Dante. The course focuses on the development of poetry, drama, epic, and short fiction through the early twentieth century.

ENGL 231. Non-Western World Literature   **3 credits**
A survey of the major literary traditions of several non-western cultures, including Africa, Asia, India, and the Middle East from ancient times to the present. The course focuses on the development of poetry, the novel, drama, epic, essay, and short fiction.

ENGL 302. Literary Criticism   **3 credits**
Students will learn the major concepts and terms of literary criticism and theory and learn to analyze a wide variety of texts, including literary works (poetry, drama, novels), nonliterary texts, film, advertisement, and prints.

ENGL 307. Appalachian Literature   **3 credits**
A concentrated study of Appalachian literature from the 17th Century to 20th Century, including frontier literature, mountain poetry, and nature writing. The course includes Native American stories from Appalachia and female authors.

ENGL 309. Poetry of War   **3 credits**
The course consists of a focused study of the way that war has been put into poetry throughout time and in multiple wars. The course includes a focused study of long books of

poetry by Walt Whitman and Herman Melville, as well as shorter, individual poems by Chinese, American, and British writers.

ENGL 312. Shakespeare   **3 credits**
Provides the student with an overview of Shakespeare's life and works. Students will develop close reading skills, analyzing language and themes in specific plays.

ENGL 315. Linguistics   **3 credits**
An introduction to the field of Linguistics with particular attention given to the history of the English language, dialect analysis, and an analysis of how language structures meaning in society

ENGL 320. Multi-ethnic Literature   **3 credits**
An in-depth study of the fiction and poetry of minority writers of the United States, including Asian-American, Native-American, African-American, Hispanic, Jewish-American, and gay and lesbian writers.

ENGL 326. Literature and Gender   **3 credits**
Focuses on women writers or images of women in literature. The course may also address the issue of gender in an interdisciplinary format that allows students to understand how gender shapes our identity in larger social structures.

ENGL 335. Drama   **3 credits**
A survey of dramatic writing in the context of its historical development, with special attention given to recurring themes, such as tragedy, styles, and characters. A variety of British, American, World, female, and minority authors will be covered.

ENGL 336. Literature and Film   **3 credits**
The course examines the way in which literature has been adapted to film and the ways in which audience, purpose, and the language of the written text are adapted, changed, or reworked to reflect certain social, political, or economic contexts.

ENGL 340. Creative Writing   **3 credits**
An introduction to the elements and form of creative fiction, including plot and character development, style, tone, and point of view.

ENGL 345. Advanced Writing   **3 credits**
An advanced composition course in which students will develop and practice their writing skills using a variety of rhetorical modes, including narration, argument, compare/contrast, and exposition. Students will learn that by controlling the writing process itself, they can shape their ideas and participate in various cultural conversations. Students will learn how notions of literacy are evolving in our technological age and how they can adapt to meetthese challenges.

ENGL 350. Special Topics   **3 credits**
An in-depth study of a literary movement, writer, theme, or genre of current or special interest.

ENGL 360. Harry Potter   **3 credits**
In this course, we will examine and analyze several themes in all seven novels, including coming of age, ethical issues, imagination and personal freedom, the nature of evil, aspects of race, class, and gender, and the cultural impact of the series.

ENGL 361. The Eagle   1 credits

This course is a practicum course that is centered on students creating the school newspaper, 'The Eagle.' Students work on writing and editing while also learning the expectations of journalistic writing.

ENGL 405. Senior Capstone in English   3 credits

The Senior Capstone course is a directed study with the student's English advisor. The Capstone is designed to be a flexible experience that can include a research project, portfolio, or creative project.

ENGL 499. Independent Study   3 credits

An in-depth study of a period, author, or topic. Open only to English majors who have completed 12 credits of 300-level or above courses in English. Requires approval of advisor, program coordinator, and department head. Cannot be used as a substitute for required English courses.

ENGLISH AS A SECOND LANGUAGE (ENSL)

ENSL 096. Advanced English   4 credits

In this course, students practice listening, speaking, reading, and writing to become more fluent in spoken English. The course addresses improvement in oral skills needed for class discussions and presentations and aims to give students practice in writing clear and effective college-level English. Students also develop academic vocabulary and lecture note-taking skills. Students will be placed in this course based upon results from an English Placement Test, and a written essay. *This course is limited to students whose first language is not English.*

ENTREPRENEURSHIP (ENTR)

ENTR 201. Introduction to Innovation and Entrepreneurship   3 credits

An introduction of the concepts, methods, and strategies involved in starting a successful business that is based upon new technology, products, and services. The course will introduce design thinking and creative problem-solving techniques and will assist in identifying new opportunities for existing markets, understanding how investors look at technology companies, managing intellectual property, financial and legal issues, commercializing real technologies, and preparing a business model to guide the new enterprise.

ENTR 320. Applied Entrepreneurship   3 credits

This practicum experience is designed to expose students to a project-based opportunity linked to local business. Additionally, through a series of guest presenters, students will learn from area leaders within Charleston's business develop eco-system. The course will allow the student to explore professional options in a practical work setting and understand the community support framework for entrepreneurial endeavors. Pre-requisite: ENTR 201

ENTR 350. Special Topics   1-3 credits

Presents coverage of special interest topics in entrepreneurship such as social entrepreneurship and nonprofits, sustainability, family business management, crowd funding, digital media marketing, and tax law for entrepreneurs.

ENTR 420. Finance & Strategy Capstone   3 credits

A study of growth and exit strategies for entrepreneurial ventures, including negotiation, acquisition, and succession planning. This includes a study of startup and early-stage

ventures from a financial perspective, including private equity and private debt markets that service small entrepreneurial firms Students will discover the meaning of expansion through organizational planning. Students will explore exit strategies including sale, transfer and closure. Prerequisites: ENTR320x, MGMT 318

ENTR 498. Entrepreneurship Internship   **3 credits**
An immersive experience that allows students a practical opportunity to apply the knowledge they have developed in various courses to a real-world entrepreneurship setting. Prerequisites: ENTR 318, ENTR 301 or permission of instructor.

<div align="center">

EXERCISE SCIENCE (EXER)

</div>

EXER 101. Introduction to Exercise Science   **3 credits**
This course will provide an introductory overview of the fundamentals necessary in exercise science. Students will focus on basic skills such as the assessment of height, weight, blood pressure, heart rate, and respiration rate. Additionally, this course will begin to introduce students to a variety of career possibilities with a degree in exercise science.

EXER 113. Structural Kinesiology   **3 credits**
An introductory course on the study of human movement, including the structures of the body, including planes of movement, anatomical terms and directions, bony landmarks, and muscle identification.

EXER 201. Training Concepts   **3 credits**
This, theory-based foundational course, focuses on the development and implementation of strength training concepts, activities, and beginning foundational program planning for different segments of the physically active population.

EXER 212. Practicum I   **3 credits**
A clinical/practicum course designed for students in their sophomore year of Movement Science. This supervised practical experience will provide students the opportunity to gain supervised experience in the field of exercise science while working with an active population.

EXER 225. Medical Terminology in Exercise Science and Healthcare   **3 credits**
This course emphasizes etymology, definition, pronunciation and correct utilization of medical terms, enabling the student to develop a vocabulary essential to the understanding of and communication within the various health areas in which allied health professionals will serve

EXER 252. Foundations of Injury Management   **3 credits**
This course provides an introduction to the identification, prevention, assessment, and management techniques of sports-related injuries and illnesses for sports medicine professionals. Students receive OSHA training in the handling of blood borne pathogens, advanced first aid, CPR and AED instruction, and professional responsibilities of the healthcare personnel.

EXER 275. Program Design & Implementation   **3 credits**
This is a scientific and applied course focusing on strength training activates and design concepts for different segments of the population. The course focuses on the understanding and measurement of human performance through the development of aerobic and anaerobic

program delivery, including sport periodization, plyometric training, flexibility and speed-endurance development.

EXER 304. Sports Nutrition   **3 credits**
This course is designed to study nutrition as it specifically relates to physical and sport performance. This course examines the evidence-based nutritional needs and use of fuels for various types of physical activity, from review of body composition, energy balance, and roles specific nutrients to evaluation of nutritional claims and performance enhancing products.

EXER 325. Exercise Prescription   **3 credits**

A "hands-on" approach that applies basic exercise testing principles of cardiovascular fitness, muscular strength and endurance, flexibility, nutrition, and body composition to specific populations. Screening and testing devices, physical activity, disease, aging and psychological health will be studied. Implications of basic exercise testing principles will be investigated within a diverse population.

EXER 330. Special Populations   **3 credits**
This course is designed to help the student examine and apply the principles of exercise prescription for neurotypical and special population individuals. Development of exercise strategies for the apparently healthy; elderly, obese, hypertensive, and cardiac patient will be discussed. In addition, exercise considerations for diabetes, asthma, arthritis, osteoporosis, behavioral disabilities and intellectual disabilities will be explored.

EXER 333. Pharmacology & Psychosocial Issues   **3 credits**
This course is designed to educate students on the pharmacokinetics and pharmaco-dynamics of medications used in the physically active individual and the psychological response to injury and interventions for the physically active individual, including substance abuse, mental health, and catastrophic injuries.

EXER 340. Exercise & Psychological Mindfulness   **3 credits**
This course is to promote greater awareness, understanding, and ownership of the multiple dimensions of mindfulness and well-being. It provides students with a wholistic and dynamic approach to understanding self in order to then provide more mindful services to clients in the healthcare or physical fitness realms. Through dialog, experiential activities, and reflection, students explore theory and practice while encompassing mental, emotional, physical, spiritual, environmental, social, and vocational issues.

EXER 355. Motion Analysis   **3 credits**
This course will allow the student to study joint structure and motion as it relates to movement, strength training/conditioning, prevention and rehabilitation of injuries. The students will apply basic concepts to scenarios in the exercise science field. Students are encouraged to sit for the Corrective Exercise Specialist (PES) exam through the National Academy of Sports Medicine (NASM) upon successful completion of the course. Prerequisite course: EXER 113 Structural Kinesiology

EXER 370. Physiology of Exercise   **3 credits**
This course will provide the student with a base of knowledge on the physiological effects of exercise on the human body and its application across a variety of activities and disciplines.

EXER 400. Exercise Metabolism and Energy Sources   **3 credits**

Exercise Metabolism and Energy Sources is an advanced course designed to explore the intricate relationship between metabolism, energy sources, and exercise performance. Students will have a large focus on energy production, utilization, and regulation. This course emphasizes the metabolic pathways involved in supplying energy to working muscles and examines the role of various energy substrates such as carbohydrates, fats, and proteins. Through a combination of theoretical knowledge and practical applications, students will gain a comprehensive understanding of how metabolism influences exercise performance and adaptation. Students will learn to effectively evaluate, analyze, and investigate bioenergetics, metabolic pathways, and regulatory mechanisms that affect exercise and performance. This course will equip students with knowledge and skills necessary to face complex challenges in the field of exercise science. Prerequisites: BIOL-251, BIOL-251L, BIOL-252, & BIOL-252L. Corequisites: N/A

EXER 452. Organization & Administration in Exercise Science   **3 credits**

This course is designed to for students related to the administration and organizational responsibilities in healthcare. Topics and experiences include management theories, human resource management, financial resources management, facilities design/planning, information management, healthcare reimbursement, legal considerations, ethical practice, cultural competency, public relations, and professional development.

EXER 475. Exercise Science Capstone   **3 credits**

A capstone course for Exercise Science majors that focuses on the application and demonstration of skills needed to plan, implement, and evaluate strength training and conditioning in a variety of settings. Students must be academically be a senior exercise science major to register.

EXER 497. Exercise Science Internship   **3 credits**

Students acquire professional experience in their chosen field. Internship arrangements between the student and instructor must be solidified prior to enrolling in this course. Students must be academically be a junior or senior exercise science major to register.

EXER 498. Exercise Science Internship   **12 credits**

Students acquire professional experience in their chosen field. Internship arrangements between the student and instructor must be solidified prior to enrolling in this course. Students must be academically be a junior or senior exercise science major to register.

EXER 499. Independent Study in Exercise Science   **1-4 credits**

Students will be individually supervised in research or field experience. Prerequisite: Junior or Senior academically standing in the Exercise Science Program or Strength & Conditioning minor.

<div align="center">

FINANCE (FINA)

</div>

FINA 201. Financial Literacy   **3 credits**

Introductory course in financial literacy including goal setting, cash management, the time value of money, taxes, credit, housing, investment alternatives, retirement planning, and insurance planning. This course is ideal for individuals seeking to prepare for financial decisions they will face throughout life. (offered in seat in fall and spring; offered online in fall, spring, and summer)

FINA 205. Fundamentals of Financial Planning   **3 credits**
This course is designed to introduce the student to the foundations of financial planning.
The student will gain a basic understanding of the financial planning profession. This
course will focus on time value of money calculations, personal financial statement
analysis, cash and debt management, housing and mortgage options and education funding.
This is one of the required courses in the Financial Planning Major that prepares students
desiring to take the CFP® certification examination. Prerequisites: Math 121 and ACCT
201 or consent of instructor (offered spring)

FINA 305. Risk Management & Insurance   **3 credits**
This course is a study of the various types of insurance products and services. The student
will study and analyze life, health, property, long-term care and disability insurance options
among other risk management topics to understand how they are a vital component of an
overall personal financial plan. This is one of required courses in the Financial Planning
Major that prepares students desiring to take the CFP ® Certification examination. (Offered
fall of odd-numbered years)

FINA 310. Client Communication and Counseling   **3 credits**
This course prepares future financial planners and other finance professionals to effectively
interact with clients and the public. The course explores and applies theories and proven
techniques to help professionals communicate financial information and address
individuals' financial difficulties. (Offered fall of even-numbered years)

FINA 312. Business Finance   **3 credits**
A study of the theory and practices of financial management in the modern business firm.
Special emphasis is placed on the application of time-value-of-money, valuation of
securities, analysis of financial statements, weighted average cost of capital calculations
and investment/budgeting decisions. Prerequisites: ACCT 202 and ECON 201. (Offered in
fall and spring; offered in fall and spring online).

FINA 313. Advanced Business Finance   **3 credits**
A problem-based course covering a broad spectrum of corporate financial management
decisions. Emphasis is given to case study involving capital acquisition and structure.
Strategic issues such as corporate reorganizations, mergers and acquisitions are explored in
cases and "real world" research. Prerequisite: FINA 312.

FINA 350. Special Topics   **3 credits**
The course will include topics devoted to the study of Finance.

FINA 361. Money and Banking   **3 credits**
A study of the major concepts of money, credit, and financial institutions. Consideration is
given to the structure of global financial markets, the determination of interest rates and the
allocation of capital. Emphasis will be placed on understanding the role of the Federal
Reserve System in interest rate strategy and monetary policy. Students will increase their
understanding of several categories of financial institutions including commercial banks,
thrifts, mutual funds, securities firms, investment banks, insurance companies and pension
administrators. Prerequisite: ECON 202

FINA 405. Investments   **3 credits**
This course is a theory and problem-based study of investment methodology, investment
risks, and security selection. The curriculum includes an introduction to security analysis &
valuation and portfolio management. The course includes an applied study of security

behavior and simulated securities trading. This is one of the required courses in the Financial Planning Major that prepares students desiring to take the CFP ® Certification examination. Prerequisites: FINA 312 or consent of instructor. (Offered spring of even-numbered years)

FINA 410. Retirement Planning   3 credits
This course is designed for the student interested in acquiring knowledge of retirement planning and the various types of retirement plans typically available as part of a company sponsored employee benefit plan. Real world case studies are an integral and ongoing component of the course. Prerequisite: FINA 205 or consent of instructor. (Offered spring of even-numbered years)

FINA 414. Security and Portfolio Analysis   3 credits
An advanced study of asset pricing theories, valuation models and security analysis. Topical coverage will include stocks, bonds, and derivative securities from a portfolio manager's perspective. The course includes a "mock" Certification examination. Prerequisites: FINA 205, FINA 305, FINA 405, ACCT 423, FINA 410, FINA 415, (offered spring of odd-numbered years)

FINA 415. Estate Planning   3 credits
This course is designed for the student pursuing a career in financial services, taxation, or law in which estate planning and estate and gift taxation are part of the practice. This is one of the required courses in the Financial Planning Major that prepares students desiring to take the CFP ® Certification examination. (Offered fall of even-numbered years)

FINA 420. Financial Planning Capstone   3 credits
This course is designed as the capstone course for students pursuing a major in Financial Planning. It is designed around a case study that combines the outcomes of the prior courses within the Financial Planning major. The student will produce in both written and oral forms a fully developed comprehensive financial plan. This is one of the required courses in the Financial Planning major that prepares students desiring to take the CFP® Certification examination. Prerequisites: FINA 205, FINA 305, FINA 405, ACCT 423, FINA 410, FINA 415. (Offered spring of odd-numbered years)

FINA 498. Finance Internship   3 credits
This course provides an opportunity to apply the knowledge and skills developed in various finance, financial planning, and business courses in a real-world business setting. Prerequisites: BUSI 215, BUSI 241, and 90 credit hours or approval of advisor.

FRONTLINE LEADERSHIP (FLDR)

FLDR 150. Leadership Journeys   3 credits
The leadership journey begins with developing awareness of who leaders are and what they know and do. Through biographical analysis, observations, and networking, the action and reflective learning approach in this course challenges one to develop self- awareness and a personal leadership model. The model must reflect the importance of context, adaptability, and social skills. *Online – OE Resources*

FLDR 220. Growing Leaders   3 credits
This course introduces the foundations for leadership development at the individual and team levels within an organization. The connection of an organization's vision, mission, values and goals to one's growth and advancement is explored. Recognition of strengths

and weaknesses serve as the baseline for goal setting and creating a leadership development plan. *Online*

FLDR 240. Performance Improvement Initiatives   **3 credits**
This course focuses on the identification, planning and presentation of an initiative to improve performance related to a strategic intent. Tools introduced include quality improvement, financial budgeting and resourcing, digital tools for search, analysis, and collaboration, turning data into evidence-based decisions. Course activities culminate in a presentation of the initiative. *Online*

FLDR 260. Leading Project Teams   **3 credits**
This course focuses on developing an understanding team dynamic and the team skills required to accomplish a project. Experiential activities include giving and receiving feedback, listening, motivating, establishing trust, valuing differences and perspectives, using strengths, promoting creative thinking, and planning and conducting meetings. *Online*

<div align="center">

GAME DEVELOPMENT (GAME)

</div>

GAME 101. Introduction to Games   **3 credits**
This course provides students with a broad overview of the games industry. It covers the state of the industry, the societal impact of games, and the fundamentals of game creation. Additionally, students will explore the different genres of games and improve their understanding of the heuristics and aesthetics of play. This course is created in accordance with the Unity Curriculum Framework and the IGDA 2020 education guidelines. This course requires no prior knowledge of game design or programming. Prerequisites: None

GAME 102. Content & Systems Design   **3 credits**
The experience of a game is driven by four major components: content, systems, narrative, and user experience. This class provides students with a working understanding of all four of said components, as well as a deeper understanding of the game development process and an introduction to concepts in scripting. This course was developed using the Unity Curriculum Framework, and IGDA 2020 guidelines. Prerequisites: GAME 101 Introduction to Games

GAME 201. Unity I: Working with Unity   **3 credits**
This course grows students' familiarity with the Unity engine and editor. Students will explore a variety of concepts, tools, and frameworks, with the ultimate goal of building the skills necessary to create a game in Unity. These topics will include interfaces, environments, physics, animation, lighting and sound. Students will be prepared to sit for the Unity Certified User and Unity Certified Associate Certificate after completing this course. Prerequisites: GAME 101 Introduction to Games; COSC 100 Applied Computer Sciecne I or COSC 110 Computer Science I

GAME 300. C# Programming   **3 credits**
C# is a modern, general purpose, object-oriented programming language with a range of uses, most notably creating desktop applications, web applications, web services and building games using the Unity engine. This course is intended to give students a working knowledge of the C# (v8.0) programming language and the .NET framework, as well as an understanding of C#'s application to the Unity Game Development Engine. Please note that while this course does not presuppose any knowledge of C#, it is paced with the expectation that students have a working understanding of fundamental programming concepts and the

functioning of object-oriented languages. Prerequisite: COSC 200 Applied Computer Science or COSC 120 Computer Science II

GAME 301. Unity II: Advanced Unity Programming   **3 credits**
This course is intended to provide students with the skills and knowledge to bring their mastery of the Unity game engine and C# programming up to a professional standard. Students will learn how to perform a range of vital code-based tasks within the Unity platform and will grow their skills in building core gameplay functionality, supporting systems and platform-specific optimizations. This course was built in collaboration with Unity. Upon successful completion, students will be prepared to sit for the Unity Certified Programmer exam. Prerequisite: GAME 300 C# Programming and GAME 201 Unity I

GEOGRAPHY (GEOG)

GEOG 303. World Geography   **3 credits**
The course provides a regional study of various countries with an emphasis on the interrelationships of social and physical aspects as well as major trends within areas of the world. Specific topics include population, culture, economy, and social issues within each region.

HISTORY (HIST)

HIST 211. World Cultures I – To the 17th Century   **3 credits**
An interdisciplinary survey of major world cultures up to the Renaissance. Emphasis will be given to social, economic, political, religious, intellectual and artistic achievement in selected areas and historical periods to help students develop a world perspective of civilizations.

HIST 212. World Cultures II – 17th Century to Current   **3 credits**
An interdisciplinary survey of major world cultures from the Renaissance to modern times. Emphasis will be given to social, economic, political, religious, intellectual and artistic achievement in selected areas and historical periods to help students develop a world perspective of civilizations.

HIST 251. Foundations of the American Republic   **3 credits**
American history from the discovery through Reconstruction. Emphasis is placed on the transplanting of European culture, the development of American political institutions, the rise of democratic capitalism, and the conflicts surrounding the Civil War and Reconstruction.

HIST 252. Contemporary America   **3 credits**
American history from 1870 to the present. Emphasis is placed on the American response to industrialism, imperialism, and the First World War, the crisis of the 1930s, World War II, the Cold War, and post-industrial America.

HIST 350. Topics in History   **3 credits**
This course is designed to offer the student a broad selection of in-depth topics or special periods in history. Some of the topics offered will focus upon building the skills needed by those pursuing a career in history and related fields.

HIST 354. The American Civil War and Reconstruction   **3 credits**
A survey of political, social, and economic issues from the late antebellum period through Reconstruction. Emphasis is placed on the causes of the rebellion, the course and nature of the Civil War, and the problems of postwar America.

HIST 360. History of War   **3 credits**
This course traces the history of Western warfare. It begins with the Greek Phalanx and continues through the Roman Legions, the knights of the Middle Ages, the Napoleonic Era, the transition to industrialized warfare, and the rise of unconventional war. It concludes with an examination of whether or not the Western way of war will dominate the geo-political landscape for the foreseeable future. The intimate connection between societies and their armed forces will be examined throughout the course.

HIST 371. History of the Middle East   **3 credits**
A history and geography of the Middle East that focuses on the development of the Islamic state, the culture of the Umayyad, Abbasid, and Ottoman periods, the impact of the West, Arab nationalism and modern crises and conflict in an interdependent world.

HONORS COLLEGE (HNRS)

HNRS 101-102. Honors Seminar   **1 credit each**
In this course, Honors College students explore career goals and develop professional skills beyond those presented in UNIV 104 and 105. Students have enhanced opportunities for intellectual engagement and increased participation in integrative multidisciplinary activities.

HNRS 200X. Community Development Academy   **1 credit**
In the Community Development Academy, students are empowered to understand change in local structures and functioning and identify these within a community. Students are also exposed to the comprehensive needs of the community and vulnerable population. The course explores the services that are delivered outside of traditionally recognized institutions.

HNRS 201X. Innovative Leadership Academy   **1 credit**
The Innovative Leadership Academy focuses on developing skills related to a range of leadership styles and the ability to adopt tools such as influence, persuasion, negotiation, motivation, recognition, appreciation, and collaboration for the collective good.

HEALTH SCIENCES (HSCI)

HSCI 110. History of Health Science   **3 credits**
History of Health Science focuses on the general survey of medical knowledge chronologically arranged from ancient times to present day. The class will spend time examining topics such as: race, social class, gender, economics, politics, education and mass media and their role in the history of medicine. Students will learn how the history of medicine has affected and changed society.

HSCI 112. Drug Calculations   **1 credit**
This course will examine multiple methods to calculate drug dosages. Students will use multiple mathematical equations in order to calculate medication dosages, medication preparations, and medication infusions. Students will learn the appropriate Joint Commission approved abbreviations for measurement.

HSCI 201. Assessment   **2 credits**
This course is designed to enable health science students to assess the health status of individuals across the life cycle. Students will collect and interpret data using basic skills of communication, observation and physical examination. Co-requisite: Biology 251.Enrollment limited to radiologic science students or by permission of the Instructor.

HSCI 201L. Assessment Lab   **1 credit**
This course is taken concurrently with HSCI 201 to provide students with opportunity to collect and interpret data using basic skills of communication, observation, physical examination, and documentation. Co-requisite: BIOL 251. Enrollment limited to baccalaureate nursing or radiologic science students, or by permission of the Instructor.

HSCI 204. Nutrition   **3 credits**
Introduces students to the role of nutrition in maintaining and promoting a healthful life style. Students completing the total course will have a beginning orientation to applied diet therapy as it pertains to management of the athlete and to individuals with common nutrition-related problems.

HSCI 206. Health Communication   **3 credits**
Students focus on communication with clients while applying principles of therapeutic communication and group process. Students are introduced to multidisciplinary principles and techniques of documentation, including medical terminology. Use of technology to identify resources and enhance communication is encouraged. Course is open to health science majors or by permission of the faculty.

HSCI 212. Drug and Dosage Calculation   **3 credits**
This course will examine multiple methods to calculate drug dosages. Students will use multiple mathematical equations in order to calculate medication dosages, medication preparations, and medication infusions. Students will learn the appropriate Joint Commission approved abbreviations for measurement.

HSCI 230. Interprofessional Practice and Collaboration   **3 credits**
This course provides knowledge regrading teamwork across the different health care disciplines. Students will develop an understanding of different members of the health care team and how those members collaborate to form an efficient team that improves client outcomes. The course will analyze Interprofessional leadership skills, collaborative practice and best practice as a team member. Students will perform as a team to apply leadership skills to improve patient outcomes through complex scenarios and case studies.

HSCI 302. Health Ethics and Policy   **3 credits**
This course is a multidisciplinary bioethics course designed to teach ethical problem-solving to future health care professionals. Current policy issues are posed as ethical dilemmas for discussion and review. Open to junior/senior health science majors or by permission of the instructor.

HSCI 310. Health Informatics   **3 credits**
This course will examine Health Informatics as it applies to the healthcare team; including terminology, theory, technologies, workflow, evidence-based practice, regulations, and common tools.

HSCI 312. Statistics for Evidence Based Practice   **3 credits**
This course prepares the student to evaluate statistical concepts, technology, statistical models, and skills necessary to interpret data to build evidence-based practice (EBP).

HSCI 401. Health Leadership and Management   **3 credits**
This is an interdisciplinary health science course designed to teach leadership and management principles and process. Open to junior/senior health science majors or by permission of the instructor.

HSCI 402. Research I   **3 credits**
Explores the process and methods of scientific inquiry and interpretation of research findings in health sciences. The learner should have a basic understanding of conducting library and Internet information searches prior to enrolling in this course. Open to junior/senior health science majors or by permission of the instructor.

HUMANITIES (HUMN)

HUMN 110. Unheard Voices: Native Americans, Latinos, and African-Americans in the Humanities   **3 credits**
This course is designed to help students explore the importance of the work of American Indian, Latino, and Black-American artists in the humanities. The course strives to analyze literature, poetry, film, music, and the visual arts to see how artists in these groups have expressed their identity and cultural experiences.

COMMUNICATION (COMN)

ICOM 151. Human Communication   **3 credits**
Exploration of the fundamental elements, characteristics and processes of communication, including communicating in a multicultural society, interpersonal and intrapersonal communication and communicating in the context of small groups.

ICOM 200. Media and Society   **3 credits**
This course explores the mass media and their roles in contemporary society. Students examine divisive issues raised by the pervasive influence of mass media, such as the concentration of media ownership, media violence, gender and ethnic representation in advertising, and how the media affects the process of political persuasion.

ICOM 201. Public Speaking   **3 credits**
Students will learn theories of rhetoric and speech, including the use of language, structure, and context. Students will practice speaking in various rhetorical situations. Emphasis will be given to honing student skills in informative and persuasive speaking. Prerequisite: SPCH 103.

ICOM 221. Introduction to Journalism   **3 credits**
A study of the field of journalism with emphasis on the print media and its role in American society, while giving a basic introduction to the various phases of journalistic work.

ICOM 225. Introduction to Public Relations   **3 credits**
This course, which introduces the student to communication between an organization and its public, focuses on definition and on historical development and challenges, as well as on techniques of management in public relations.

ICOM 305. Public Relations Campaigns   3 credits
In this course, the class will serve as a public relations agency to plan and execute public relations campaigns. Students will apply the four-step public relations process to the campaigns, using a planning matrix to develop each campaign element from conception to development to implementation. Prerequisite: ICOM 225.

ICOM 314. Persuasive Communication   3 credits
This course provides a comprehensive view of persuasion by analyzing how persuasion operates at an interpersonal and social level. Students will learn theories and principles of social influence and how to apply strategies and techniques of persuasion related to a variety of real-life situations. Prerequisite: ICOM 151.

ICOM 325. Feature Writing   3 credits
In this course, the class will create feature stories for newspapers, magazines, and internet publications. Students will have the opportunity to write profiles, trend stories, and human-interest stories.

ICOM 364. Social Media Strategies   3 credits
This course will help students develop skills in managing social media tools. It will show them how to use various social media channels to publish and circulate branded content in order to engage an audience and to increase social impact, influence, and value. Students will also learn how to create and implement a strategic social media plan.

ICOM 350. Special Topics in Mass Communications   1-3 credits
This course allows students to explore a specific aspect or area of mass communication. It may be repeated on different topics with departmental approval.

ICOM 361. Practicum in Communication   1-3 credits
Students acquire professional skills through service learning in the UC community. Students may write for the school newspaper, *The Eagle,* or assist the university's Office of Communication or another ancillary service, as appropriate for their program concentration.

ICOM 362. Public Relations Writing   3 credits
A survey of public relations writing techniques for formats such as press releases, public service announcements, memorandums, media alerts, features, newsletters, and public relations presentations. Prerequisite: ICOM 225.

ICOM 400. Communication Theory and Research   3 credits
A detailed examination and application of theories relevant to the practices and issues of communication.

ICOM 403. Advanced Videography   3 credits
This course is an exploration of the techniques and aesthetics of narrative digital film production. It focuses on industry terminology and equipment operations such as cameras, lighting, audio recording, and editing. Each student will write, produce, direct, and edit and original digital film.

ICOM 405. Senior Project in Communication   3 credits
Each student will develop and complete a significant project of professional quality for a nonprofit organization. Students must produce an original publication, plan an event, or assist with rebranding efforts. Prerequisite: senior standing as a Communication major.

ICOM 441. Communication Law and Ethics
3 credits

The course provides examination of the theory and application of law and the media, with special attention to copyrights, contracts and torts, liabilities, FCC requirements and ethics.

ICOM 480. Seminar in Professional Development
3 credits

The development and evaluation of professional credentials for entry into the communication industry. This capstone seminar course focuses on the preparation of cover letters and resumes, as well as portfolio development and interview techniques. Prerequisite: Senior standing within Communication major.

ICOM 498. Internship in Communication
3 credits

Students acquire professional experience in their chosen field. Internship arrangements between the student and instructor must be solidified prior to enrolling in this course. Prerequisite: Senior standing as a Communication major.

MATHEMATICS (MATH)

MATH 116. Survey of Mathematics
3 credits

A survey course in mathematics designed for prospective elementary school teachers. Emphasis is on the nature of mathematical knowledge, its language, methodology, and its applications. Topics are selected from critical thinking skills, set theory, logic, systems of numeration, geometry, consumer mathematics, probability, and statistics.

MATH 120. Intermediate Algebra
3 credits

This course helps prepare students for College Algebra, providing a basic background in number theory and algebra. Topics are selected from the real number system, linear equations, problem solving, polynomials, exponents, rational expressions, roots and radicals.

MATH 121. College Algebra
3 credits

This course helps prepare students for Precalculus and the two-semester general chemistry sequence. Topics are selected from polynomials, rational expressions, linear and quadratic equations, functions, linear systems, matrices and determinants, and conics. Prerequisite: C or better in MATH 120 or Math ACT score of 21 or higher (Math SAT of 530 or higher).

MATH 123. Precalculus
4 credits

This course helps prepare students for the three-semester calculus sequence. Emphasis is on the study of functions, their inverses, and their graphs. The functions investigated include polynomial, rational, exponential, logarithmic, and trigonometric. Algebraic and graphical methods will be used to solve equations and inequalities. Applications of the concepts developed are a fundamental part of this course. Prerequisite: C or better in MATH 121 or Math ACT score of 24 or higher (Math SAT of 580 or higher).

MATH 201. Calculus I
4 credits

An introductory course dealing with limits, derivatives, anti-derivatives, and their applications. Prerequisite: C or better in MATH 123 or Math ACT score of 27 or higher (Math SAT of 640 or higher)

MATH 202. Calculus II
4 credits

This course covers the differentiation and integration of elementary types of function, their application to problems in analytic geometry, physics, and related sciences. Techniques of integration, improper integrals, and infinite series are discussed. Prerequisite: C or better in MATH 201.

MATH 203. Calculus III   4 credits

This course includes the study of functions of more than one variable, partial derivatives, total differentials and the chain rules, surfaces and curves in space, directional derivatives, and double and triple integrals. Prerequisite: C or better in MATH 202.

MATH 225. Discrete Mathematics   3 credits

This course covers basic proof techniques, counting, graphs, trees, relations, analysis of algorithms; and recursion. Prerequisite: C or better in MATH 201.

MATH 230. Linear Algebra   3 credits

This course covers linear systems, matrices and determinates, vector and inner product spaces, eigenvalues and eigenvectors, and linear transformation. Prerequisite: C or better in MATH 201.

MATH 240 Probability and Statistics   3 credits

This course covers the definition and elementary properties of probability, random variables, expectation, distributions, estimation, hypothesis testing, and linear regression. Prerequisite: C or better in MATH 121 or higher.

MATH 241 Probability and Statistics II   3 credits

Review of Introductory Statistics, Data Transformations, Multiple Regression, Stepwise Regression, Binary Logistic Regression, ANOVA, ANCOVA, MANOVA, and Principal Component Analysis/Factor Analysis. Emphasis will be placed on application and use of statistical packages. Prerequisite: C or better in MATH 240.

MATH 324. Fundamentals of Mathematics Instruction   3 credits

This methods course provides various experiences in manipulative materials and modes, motivational techniques, and methods of teaching mathematics in grades K-6. An understanding of mathematical concepts, including numeration, operations, fractions, geometry, measures, and measurements will be developed throughout the course. Prerequisites: MATH 116 and Admission to the Education Department.

MANAGEMENT (MGMT)

MGMT 311. Principles of Management   3 credits

A study of the major functions of management with emphasis on planning, organizing, leading and controlling the organization's resources. Management theory, global management, and ethics are also addressed. (offered fall and spring)

MGMT 318. Small Business Management   3 credits

A study of how to effectively create, manage, and analyze a business plan and how to start, manage, grow, and harvest a business. Major areas of concentration will be franchising, site location, physical facilities, financing, profit planning and control, record keeping and management. Prerequisites: ACCT 201, MGMT 311, and MRKT 321. (offered every fall)

MGMT 319. Seminar in Small Business Problems   3 credits

Student experiences working with small business problems and helping to solve them. Prerequisite: MGMT 318 or consent of instructor.

MGMT 320. Human Resource Management   3 credits

A study of planning, organizing and controlling the performance of various activities concerned with procuring, developing, maintaining and utilizing a labor force so that the objectives and purposes for which the company is established are attained as effectively and

economically as possible, and that those of labor itself are served to the highest possible degree. Prerequisite: MGMT 311. (offered every fall)

MGMT 343. Sales Management   **3 credits**
A study of the varying approaches to personal and institutional selling including support systems and servicing of customers. The processes involved in planning and administering the selling efforts for firms are discussed in detail. Prerequisite: MGMT 311 and MRKT 321. (offered every spring)

MGMT 350. Special Topics   **3 credits**
An advanced study of topics not covered in regularly scheduled courses. Delivered through directed study or specially scheduled lectures, depending on the topic. May be repeated a maximum of two semesters. Prerequisite: Consent of instructor

MGMT 355. Free Enterprise   **3 credits**
An experiential course in which students develop and conduct outreach programs to teach and promote free enterprise with a focus on the triple bottom line – people, profit, planet - to various publics. Students will develop greater understanding of and appreciation for the concept of freedom as it applies to the marketplace. The course provides students with unique opportunities to learn about and teach the principles of free enterprise. Students learn to work both individually and as a group to develop and complete projects designed to teach the principles of a market economy to a level of understanding and appreciation.

MGMT 365. Labor Relations   **3 credits**
A survey course of the economic forces generating modern labor problems. Consideration is given to the labor force, the labor market, the development, the operations and policies of organized labor and collective bargaining. Prerequisite: MGMT 311.

MGMT 372. Self-Management & Leadership   **3 credits**
An exploration of leadership concepts and theories and practice to examine such topics as strengthening emotional intelligence, motivating people to achieve strong results, managing conflict, leading change, aligning teams, and eliciting support from colleagues. Increases leadership capacities by providing opportunities to apply theory to develop leadership skills, conduct a self-reflection of personal experiences, and develop a personal philosophy of leadership. Prerequisite: MGMT 311. (offered every fall)

MGMT 416. Managing Individuals & Teams   **3 credits**
An examination of the principles of building highly effective teams by analyzing the variety of interrelated practices underlying group dynamics. Combines learning through hands-on situations and experiences in a team-based exercise. Emphasis is placed on critical theories, concepts, and framework used by successful managers to diagnose team performance and the threats and opportunities teams face. Prerequisite: MGMT 311 and 75 or more credit hours. (offered every spring)

MGMT 420. Organizational Behavior   **3 credits**
A study of the behavioral science concepts and research findings directed toward understanding human behavior within organizations. This behavior is considered as a function of the individual, the groups within which they interact and the structure of the larger organization within which they operate. Prerequisites: MGMT 311 and 75 or more credit hours. (offered every fall)

MGMT 445. Operations Management   3 credits

A study of the basic fundamentals of management underlying the problems of organization and operation of business enterprises. Application of those principles to specific industrial problems such as plant location and layout; quality, production and cost controls; time studies, job analysis, wage studies; industrial safety and industrial relations. Prerequisite: MGMT 311 and BUSI 316 or equivalent. (offered every spring)

MGMT 498. Management Internship   3 credits

An opportunity to apply knowledge and skills acquired in the classroom to a real-world business setting and to gain professional skills and experiences necessary to prepare for a successful career in management. The experience allows students to explore career interests and build professional networks. Prerequisite: BUSI 215, BUSI 241, MGMT 311, and 90 credit hours or approval of an advisor.

<div align="center">

MARKETING (MRKT)

</div>

MRKT 240X. Introduction to Sales & Personal Selling   3 credits

Introduces students to the practical application of buying motives and selling techniques, including personal selling and the preparation, closing, and post-purchase phases of selling. Prerequisite: None (offered every spring)

MRKT 321. Principles of Marketing   3 credits

A study of the economic processes including understanding buyers and markets, targeting and satisfying customer segments, and using social media. The course is designed to engage students in marketing strategy and planning and provide students the opportunity to pursue a certification in Google Analytics. Prerequisite: ECON 201 or ECON 202. This course provides an opportunity for professional development. (offered every fall and spring; offered online every fall and spring).

MRKT 322. Marketing Management   3 credits

An advanced course in marketing theory and practice, concentrating on marketing management problems at the executive level, with attention given to the reading and evaluation of current literature in the field, and utilizing case analyses and marketing games. Prerequisite: MRKT 321.

MRKT 350. Sales Automation   3 credits

Prepares students with an understanding and application of the marketing and technology-related sales automation tools, systems, and structures utilized by sales organizations for improving processes and outcomes. Prerequisites: MRKT 240X, MRKT 321.

MRKT 360X. B2B and B2C Sales   3 credits

This course introduces students to the conceptualization of sales strategies, analytical tools, industry practices, and sales tactics utilized to commercialize value creation in both business-to-business and business-to-consumer sales of goods and services. Prerequisite: MRKT 321.

MRKT 371. Digital Marketing   3 credits

An introduction to the fundamental relationship between the Internet and modern marketing techniques. Students will be exposed to pricing, promotion, and product development as influenced by the electronic medium of selling. Prerequisite: MRKT 321.

MRKT 401. Advertising   **3 credits**
A study of the principles of all forms and stages of advertising procedure. Study of methods and effectiveness of mail, radio, newspaper and other types of advertising. Prerequisite: MRKT 321.

MRKT 402. Marketing Research   **3 credits**
A study of the application of statistical and behavioral research techniques to the problems of marketing operations in the business firm. Includes the use of computerized statistical computations and data management. Prerequisites: MRKT 321, BUSI 317.

MRKT 415X. Advanced Sales & Negotiations   **3 credits**
The course integrates the theory and practical application of sales negotiations, examining the influence of cultural, gender, personality traits, global and other attributes on transactional and relation-based selling. Prerequisites: MRKT 321 and MRKT 2XX.

MRKT 420. Digital Marketing Strategy Capstone   **3 credits**
The digital marketing capstone course provides an opportunity to integrate and apply acquired knowledge by developing an applied digital marketing strategy that aligns and advances organizational goals and objectives. Prerequisites: MRKT 321, MRKT 401, MRKT 402, and DMDS 302

MRKT 425X. Sales Strategy Capstone   **3 credits**
Students will apply knowledge from other major courses to complete a capstone research project and a major account sales project. Students will demonstrate professional presentation skills as part of their preparation for professional sales practitioners. Prerequisites: MRKT 321, MRKT 240X, and MRKT 360X.

MRKT 498. Marketing Internship   **1-6 credits**
The digital marketing internship provides students an opportunity to apply knowledge and skills acquired in the classroom to a real-world business setting and to gain professional skills and experiences necessary to prepare for a successful career in digital marketing. The experience allows students to explore career interests and build professional networks. Prerequisite: MRKT 371, and 90 credit hours or approval of an advisor.

MRKT 499X. Sales Internship   **1-6 credits**
Students will apply knowledge and skills acquired in the classroom to a real-world sales setting and gain professional skills and experiences necessary to prepare for a successful professional sales career. Prerequisite: MRKT 240X, MRKT 321, and 90 credit hours or approval of advisor.

MILITARY SCIENCE (MSCI)

Offered in Cooperation with WV State University

MSCI 101. Introduction to Military Science   **2 credits**
A topical survey of military science that introduces the student to the organization of the U.S. Army, contrasting and comparing it with civilian organizations; introduces the student to basic concepts of drill and ceremony; provides basic techniques to refine a student's listening, writing and speaking abilities; examines the nature of military law; explains the evolution of military heritage and standards of professional behavior; provides an overview of training management principles; and throughout the course concentrates on building student self-discipline and self-confidence. Co-requisite: MSCI 103 Military Leadership

Laboratory I; participation in a physical fitness class and a weekend field training exercise is optional but highly recommended.

MSCI 102. Introduction to Leadership   **2 credits**
Continuation of MSCI 101. Students will learn to apply principles of effective leading; reinforce self- confidence through participation in physically and mentally challenging exercises with upper division ROTC students; develop communication skills to improve individual performance and group interaction; and relate organizational ethical values to the effectiveness of a leader. Co-requisite: MSCI 104 Military Science Leadership Laboratory II; participation in a physical fitness class and a weekend field training exercise is optional but highly encouraged.

MSCI 103. Military Leadership Laboratory   **1 credit**
Open only to and required of students in the associated MSCI course (101, 102, 203, 204). This laboratory course is designed to offer the student an opportunity for integration and application of training management and leadership skills. Team members and leadership positions are tailored based on the student's academic alignment. Course includes exercises such as rappelling, group presentations, basic marksmanship, and drill and ceremonies.

MSCI 104. Military Leadership Laboratory II   **1 credit**
Continuation of MSCI 103.

MSCI 203. Military Leadership Laboratory III   **1 credit**
Continuation of MSCI 104.

MSCI 204. Military Leadership Laboratory IV   **1 credit**
Continuation of MSCI 203.

MSCI 150. Basic Physical Fitness and Conditioning   **1 credit**
Open to all students, but required of students enrolled in MSCI 201 and 202. Students participate in and learn to lead a physical fitness program. Emphasis is on the development of an individual fitness program and the role of exercise and fitness in one's life. Leadership positions are tailored based on the student's academic alignment.

MSCI 151. Basic Physical Fitness and Conditioning   **1 credit**
Continuation of MSCI 150.

MSCI 201. Introduction to Small Unit Leadership   **2 credits**
Students learn and apply ethics-based leadership skills that develop individual abilities and contribute to the building of effective teams. Course focuses on the development of skills in oral and written communications, planning events, coordination of group efforts, advanced first aid, land navigation, and basic military tactics. Prerequisite: MSCI 101 and 102 or permission of the Professor of Military Science. Co-requisites: MSCI 250 and 203.

MSCI 202. Practicum in Military Training and Tactics   **2 credits**
Introduction to individual and team aspects of military tactics in small unit organizations. The class compares the actions of small organizations in the process of developing strategy and tactics, while taking into account theoretical, political, economic, and physical factors. Continue development of leadership and critical skills. Prerequisites: MSCI 101 and 102 or prior military training or permission of the Professor of Military Science. Co-requisites: MSCI 251 and 204; participation in a weekend field training exercise is optional but highly encouraged.

MSCI 210. Camp Challenge   **0-6 credits**
A five-week summer camp conducted at an Army post. The student receives pay. Travel, lodging, and most meal costs are defrayed by the Army. The environment is rigorous and is similar to Army Basic Training. No military obligation is incurred. Open only to students who have not taken the sequence of MSCI 101, 102, 201, 202. Entry also requires students to pass a physical examination (paid for by ROTC). Completion of MSCI 210 qualifies a student for entry into the Advanced Course. Three different training cycles are offered during the summer, but spaces are limited by the Army. Candidates can apply for a space any time during the academic year prior to the summer of intended participation. Students are eligible to compete for ROTC scholarships during the summer camp.

MSCI 250. Basic Physical Fitness and Conditioning   **1 credit**
Continuation of MSCI 151.

MSCI 251. Basic Physical Fitness and Conditioning   **1 credit**
Continuation of MSCI 251.

MSCI 301. Leading Small Organizations I   **2 credits**
Series of practical opportunities to lead small groups, receive personal assessments and encouragement, and to lead again in situations of increasing complexity. Uses small unit defensive tactics and opportunities to plan and conduct training for lower division students both to develop skills and as vehicles for practicing leadership. Co-requisites: MSCI 303 and 350. Participation in one weekend field training exercise is required, and one or two more weekend exercises may be offered for optional participation.

MSCI 302. Leading Small Organizations II   **2 credits**
Continues methodology of MSCI 301. Course focuses on the skills necessary to analyze tasks, prepare written and oral guidance for team members to accomplish tasks, and delegate and supervise; to plan for and adapt to the unexpected in organizations under stress; and to examine the importance of ethical decision making in setting a positive climate that enhances team performance. Prerequisite: MSCI 301. Co-requisites: MSCI 351 and 304.

MSCI 303. Advanced Course Leadership Laboratory I   **1 credit**
Open only to students in the associated MSCI lecture courses (MSCI 301, 302, 401, 402). Different leadership roles are designed for students at different levels of the program. The course involves leadership responsibilities for the planning, coordination, execution, and evaluation of various training and activities with Basic Course students and for the ROTC program as a whole. Students develop, practice, and refine leadership skills by serving and being evaluated in a variety of responsible positions.

MSCI 304. Advanced Course Leadership Laboratory II   **1 credit**
Continuation of MSCI 303.

MSCI 310. ROTC National Advanced Leadership Course (NALC)   **6 credits**
A six-week camp conducted at an Army post. Required of students who have completed MSCI 301 and 302. The student receives pay. The U.S. Army defrays travel, lodging, and most meal costs. The NALC environment is highly structured and demanding, stressing leadership at small unit levels under varying, challenging conditions. Individual leadership and basic skills performances are evaluated throughout the course. The leadership and skills evaluations at the course weigh heavily in the subsequent selection process that determines the type of commission and job opportunities given to the student upon graduation from ROTC and the college.

MSCI 311. Nurse Summer Training program   **6 credits**
The NSTP is open only to nursing students who completed Advanced Camp. It is a three-week clinical elective for Army ROTC nurse cadets. This paid elective is conducted at army hospitals in the United States, Germany and Korea. Students attend NSTP during the summer with NALC. During the NSTP clinical elective, students receive "hands-on" experience under the direct supervision of a preceptor; an Army Nurse Corps officer who works with students one on one. Students will exercise leadership skills in a hospital environment by carrying out planning, organizing, and decision-making activities, and by implementing and being accountable for the outcome of nursing care. Students will collaborate with health care professionals on decisions related to patient care, management, unit issues and strategies used in the provision of medical care to a select population.

MSCI 350. Advanced Physical Fitness Training & Conditioning I   **1 credit**
Students will participate in and learn to plan and lead physical fitness programs. Develops the physical fitness required of an officer in the U.S. Army. Open only to, and required of students in MSCI 301.

MSCI 351. Advanced Physical Fitness Training & Conditioning II   **1 credit**
Continuation of MSCI 350. Open only to and required of students in MSCI 302. Open only to, and required of, students in MSCI 302.

MSCI 401. Leadership Challenges and Goal Setting   **2 credits**
Students plan, conduct, and evaluate activities of the ROTC cadet organization; articulate goals and put plans into action to attain them; assess organizational cohesion and develop strategies to improve it; and learn and apply various Army policies and programs in this effort. Co-requisites MSCI 403 and 450. Participation in one weekend field training exercise is required, and one or two more weekend exercises may be offered for optional participation.

MSCI 402. Transition to Lieutenant   **2 credits**
Continues the methodology of MSCI 401. Students identify and resolve ethical dilemmas and refine counseling and motivating techniques; examine aspects of tradition and law as related to leading as an officer in the Army; and prepare for a future as a successful Army lieutenant. Co-requisites: MSCI 404 and 451. Participation in weekend field training exercise is required, and one or two more weekend exercises may be offered for optional participation.

MSCI 403. Advanced Course Leadership Laboratory III   **1 credit**
Continuation of MSCI 304.

MSCI 404. Advanced Course Leadership Laboratory IV   **1 credit**
Continuation of MSCU 403.

MSCI 450. Advanced Physical Fitness Training & Conditioning   **1 credit**
Continuation of MSCI 351. Open only to and required of students in MSCI 401.

MSCI 451. Advanced Physical Fitness Training & Conditioning   **1 credit**
Continuation of MSCI 450. Open only to and required of students in MSCI 402.

MSCI 490. Seminar in Military Leadership   **1-3 credits**
The seminar will include classes, directed readings, and both oral and written presentations on such topics as logistic management, national security, military law, ethics, and analytical models for decision making. Prerequisites: junior or senior standing and permission of the Professor of Military Science.

MTDS 440. Multidisciplinary Studies Capstone   **3 credits**

The Multidisciplinary Studies Program (MTDS) requires the student, in a single original project, subject to the Program Director's approval, to produce a final project that synthesizes the students three Minor study areas. The most common way of completing this course is the writing of a research thesis, alternate projects can be explored in consultation with the instructor of the course. The final project should demonstrate advanced understanding of the relevant subject areas.

MUSIC (MUSC)

(Applied Music courses are at the end of the MUSC listing.)

MUSC 111. Music Skills for Elementary Classroom Teachers   **3 credits**

The course provides the future elementary educator with the rudiments of music, including an introduction to singing simple pieces. Philosophy and methods of teaching on the preschool and elementary level are emphasized. No pre-requisite.

MUSC 101. Music Theory I   **3 credits**

This course will cover the fundamentals of reading and writing music (pitch, intervals, rhythm, key signature, time signature, scales, and chords), the analysis of music and its structures (melody, harmony, cadences, chord progressions, form, texture, and voice leading), and basic techniques used for music composition. No prerequisite

MUSC 11X. Aural Skills

1 credit Students in this course will be introduced to beginning ear-training skills through the practice of interval and chord recognition, diatonic sight-singing examples, and dictation exercises (harmonic, melodic, and rhythmic). Prerequisite: Music Theory or with instructor permission

MUSC 231. Music History I: Medieval to Classical

3 credits Students will analyze the progression and evolution of music (style, harmony, rhythm, and instrumentation) through a brief topical survey of prominent Western and world music and composers from the Medieval, Renaissance, Baroque, and Classical periods.

MUSC 232. Music History II: Romantic to current   **3 credits**

Students will analyze the progression and evolution of music (style, harmony, rhythm, and instrumentation) through a brief topical survey of prominent Western and world music and composers from the Romantic, Impressionistic, 20th/21st century (contemporary), and current popular music periods.

MUSC 324. Concert Choir   **1 credit**

The Concert Choir is the principle choral performing ensemble of the University of Charleston. Membership is open to all university students and everyone is encouraged to join. A wide range of both sacred and secular choral literature is studied and numerous performances are scheduled during the semester. Three rehearsals each week. Participation of members in all scheduled rehearsals and performances required. An audition is required, but students should register before they audition. Offered every semester.

MUSC 327. Band   **1 credit**
Rehearses two times per week. Admission by audition. Open to all University of Charleston students. The band program offers the student the opportunity to study literature in a variety of styles. Offered every semester.

MUSC 328. University Singers   **1 credit**
Mixed ensemble of 12-16 singers performing a variety of chamber chorus repertoire. Three rehearsals each week, and many performances during the semester. Participation of members in all scheduled rehearsals and performances is required. Membership by audition. Must be a member of Concert Choir (MUSC 324). Offered every semester.

MUSC 350P- MUSC 368P. Applied Music (Private Lessons)
1 credit Consists of a series of 15 lessons. To receive credit for private study, students must audition before the appropriate applied study instructor before registering. Students should consult with the Coordinator of the Music Program to determine the appropriate instructor. A fee of $90 will be added to the bill of those students who enroll in one credit of applied lessons unless the course is being taken as a requirement for the music minor.

MUSC 350P. Applied Voice   **1 credit**

MUSC 351P. Applied Piano   **1 credit**

MUSC 352P. Applied Guitar   **1 credit**

NATURAL SCIENCE (NSCI)

NSCI 117. Why Science Matters   **3 credits**
Why Science Matters is a general science course offered to non-science majors as part of the Science Technology, or Math (STEM) flex course options. The objectives of NSCI 117 course are to familiarize students with the ideas, history, and philosophy of science, providing a greater appreciation for the scientific issues of our times. Students will gain a basic understanding of the universe, the planet we inhabit, and details about the emergence of our species, and its effect on this planet. This course also provides the opportunity for the student to develop his or her scientific and information literacy, critical thinking skills, and written communication skills. The course is available in-seat or online.

NSCI 205. Physical Science   **4 credits**
Physical Science is a survey course in physical science designed for non-science majors and for prospective elementary school teachers. Emphasis is on the understanding of the significant concepts of physical science combined with the appropriate level of mathematics. The topics chosen represent the most suitable cross section of physical science content that students will need to understand modern technical and scientific developments. Topics covered fall under the categories of motion and forces, energy, heat, waves and sound, light and optics, electricity and magnetism, atomic and nuclear physics, plus atmospheric and water cycle phenomenon. Students will also examine the relationships of science, technology, and society within each topic. Taught in the fall semester and, when sufficient demand exists, during the summer term.

NSCI 206. Earth and Space Science   **3 credits**
Earth and Space Science surveys the earth and space sciences and is designed for non-science majors and for prospective secondary science instructors and elementary school teachers. Emphasis is on an understanding of the significant concepts and principles of astronomy, meteorology, and geology. Topics covered fall under the categories of planet

earth, the land, oceans, atmosphere, plus the heavens, solar system, stars, galaxies, and the universe. Students also examine the relationships of human society within the appropriate earth science topics. Taught in the spring semester and, when sufficient demand exists, during the summer term.

NSCI 220. Statistics in Science and Research   **3 credits**
This course is designed specifically for science majors. The course will provide the student with a thorough background in statistics which will permit them to conduct scientific research and to understand and interpret the results of scientific research. Topics include normal distributions, interval estimates, t-tests, Chi Square tests, correlation and regression, ANOVA, Factorial ANOVA and non-parametric tests. Software use is required. Required of all science students. Emphasis is placed on hypothesis testing, statistical analysis of data, and writing in the sciences. Prerequisite: MATH 121 or Math ACT score of 24 or higher. Offered every semester.

NSCI 345. Issues in Medicine   **3 credits**
Issues in Medicine provides an exploration of ethical principles and their application to moral and social problems confronting the practice of medicine today. Topics include, but are not limited to patient autonomy, informed consent, physician aid in dying, human research, allocation of scarce health care resources. Prerequisites: UNIV 105.

NURSING (NURSA, NURSB, and NURSR)

NURSA – Associate Degree Courses

NURSA 101. Fundamentals of Nursing   **4 credits**
This course introduces students to the concepts of the nursing process, self-care, communication, and critical thinking in nursing practice. Students apply the nursing process to the care of clients throughout the life span in a variety of settings. Concepts related to the development of the individual as a professional nurse are examined, as well as the foundational principles and competencies used by professional nurses related to safe and effective environment and management of care of individuals, families, and communities across the lifespan. The ANA Code of Ethics, ANA Scope and Standards Practice, ANA Nursing Social Policy Statement, and West Virginia Board of Examiners for Registered Professional Nurses Scope of Practice and Delegation are introduced. Students will explore society's view of nursing and begin development of a personal concept of nursing. This course also presents a basic introduction to selected theoretical/conceptual models of nursing. Prerequisite: BIOL 212/212L, ENGL 101, ENGL 102, PSYC 212. Corequisite: NURSA 101L

NURSA 101L. Fundamentals of Nursing Clinical/Lab/Simulation   **2 credits**
This course introduces the student to the scope of practice of the associate degree nurse as a foundation for subsequent nursing courses. The nursing process is presented with a focus on assessment. Communication, critical thinking, and ethical practice are examined as they apply to nursing practice. Prerequisite: BIOL 212/212L, ENGL 101, ENGL 102, PSYC 212. Corequisite: NURSA 101

NURSA 102. Nursing Assessment   **3 credits**
This course introduces foundational nursing assessment skills and competencies used by professional nurses to provide care to individuals, families, and communities across the lifespan. Students will collect, interpret, and document data using basic skills of

communication, observation, and physical examination. Prerequisites: BIOL 212, BIOL 212L, ENGL 101, ENGL 102, PSYC 212. Corequisites: NURSA 102L

NURSA 102L. Nursing Assessment Clinical/Lab/Simulation   1 credit
This course is taken concurrently with NURSA 102 to provide students with the opportunity to collect and interpret data using the nursing process, basic skills of communication, observation, physical examination, and documentation. Prerequisites: BIOL 212/212L, ENGL 101, ENGL 102, PSYC 212. Corequisite: NURSA 102

NURSA 110. Medical Surgical Nursing I   4 credits
This course ascends on the concepts, principles and skills introduced in NURSA 101 Fundamentals of Nursing and introduces concepts of holistic nursing care of adults experiencing acute and chronic illness in selected structured settings. NURSA 110 Medical Surgical Nursing I will deliver interpretation of the nurse's role in health and illness within evolving practice environments and across the spectrum of health and illness. This course will address nursing care issues from a physiologic, pathologic, pathophysiologic, and psychosocial context. Nursing students will develop up-to-date knowledge to apply through critical thinking and clinical reasoning. Concepts of communication, critical thinking, and ethical practice are examined as they apply to nursing practice. Prerequisites: NURSA 101, NURSA 101L, NURSA 102, NURSA 102L**.** Corequisites: NURSA 110L

NURSA 110L. Medical Surgical Nursing I Clinical/Lab/Simulation   2 credit This course ascends on the concepts, principles and skills introduced in NURSA 101 Fundamentals of Nursing and introduces concepts of holistic nursing care of adults experiencing acute and chronic illness in selected structured settings. Concepts of communication, critical thinking, and ethical practice are examined as they apply to nursing practice. Classroom time will be utilized to help the student clarify content and make connections with content and application regarding safe, competent care of the patient. Prerequisites: NURSA 101, NURSA 101L, NURSA 102, NURSA 102L. Corequisites: NURSA 110

NURSA 115. Mental Health Nursing   2 credits
Students develop evidence-based practice competence to provide care appropriate to the needs of the client and family affected by mental illness. Emphasis is also placed on providing support to individuals and families seeking higher levels of mental and emotional wellness. Prerequisites: NURSA 101, NURSA 101L, NURSA 102, NURSA 102L, NURSA 110, NURSA 110L. Corequisites: NURSA 115L

NURSA 115L. Mental Health Nursing Clinical/Lab/Simulation   2 credits
Experiences are provided for students to interact with and observe individuals in various psychiatric and mental health agencies while applying classroom content. Prerequisites: NURSA 101, NURSA 101L, NURSA 102, NURSA 102L, NURSA 110, NURSA 110L. Corequisites: NURSA 115

NURSA 125. Pathophysiology and Pharmacology I
2 credits This course provides a foundation in the pathophysiology of key disease processes and pharmacological therapies. Principles of pathophysiology and pharmacology are presented in an integrated manner to provide a basis of study of selected medications that are used to treat or manage disease with an application to nursing practice. This course will examine how to calculate drug doses. The course will use drug calculation integrated with pharmacology to provide the student with the competency to calculate and administer

medications appropriately based on physician order, drug strength, time, and patient weight. Prerequisites: NURSA 101, NURSA 101L, NURSA 102, NURSA 102L, NURSA 110, NURSA 110L, NURSA 115, NURSA 115L. Corequisites: None

NURSA 215. Pathophysiology and Pharmacology II   2 credits
This course provides a continued foundation in the pathophysiology of key disease processes and pharmacological therapies from Pathophysiology and Pharmacology I. Principles of pathophysiology and pharmacology are presented in an integrated manner to provide a basis of study of selected medications that are used to treat or manage disease with an application to nursing practice. This course will examine how to calculate drug doses. The course will use drug calculations integrated with pharmacology to provide the student with the competency to calculate and administer medications appropriately based on physician order, drug strength, time, and patient weight. Prerequisites: NURSA 101, NURSA 101L, NURSA 102, NURSA 102L, NURSA 110, NURSA 110L, NURSA 115, NURSA 115L, NURSA 125. Corequisites: None

NURSA 225. Medical Surgical Nursing II   4 credits
This course will deliver interpretation of the nurse's role in health and illness within evolving practice environments and across the spectrum of health and illness. This course will address nursing care issues from a physiologic, pathophysiologic, and psychosocial context. Nursing students will develop up-to-date knowledge to apply through critical thinking and clinical reasoning. Concepts of communication, critical thinking, and ethical practice are examined as they apply to nursing practice. Prerequisites: NURSA 101, NURSA 101L, NURSA 102, NURSA 102L, NURSA 110, NURSA 110L, NURSA 115, NURSA 115L, NURSA 125. Corequisites: NURSA 225L

NURSA 225L. Medical Surgical Nursing II Clinical/Lab/Simulation
2 credits This course introduces concepts of holistic nursing care for adults experiencing acute and chronic illness in selected structured settings. Concepts of communication, critical thinking, and ethical practice are examined as they apply to nursing practice. Prerequisites: NURSA 101, NURSA 101L, NURSA 102, NURSA 102L, NURSA 110, NURSA 110L, NURSA 115, NURSA 115L, NURSA 125. Corequisites: NURSA 225

NURSA 230. Obstetric Nursing   2 credits
This course focuses on developing the evidence-based practice to plan, deliver, and evaluate safe care to the childbearing woman, family, and newborn. Emphasis is placed on development of the student's ability to apply the nursing process to the family unit. Nursing process is presented with an emphasis on the assessment of women and newborn infants. Communication, critical thinking, and ethical practice are examined as they apply to nursing practice. Prerequisites: NURSA 101, NURSA 101L, NURSA 102, NURSA 102L, NURSA 110, NURSA 110L, NURSA 115, NURSA 115L, NURSA 125. Corequisites: NURSA 230L

NURSA 230L. Obstetric Nursing Clinical/Lab/Simulation   1 credit
This course provides students with experiences to interact with and observe individuals and families in various stages of the childbearing process. This course focuses on developing an evidence-based practice to plan, deliver, and evaluate safe care to the childbearing woman, family, and newborn. Emphasis is placed on development of the student's ability to apply the nursing process to the family unit. Nursing process is presented with an emphasis on the assessment of women and newborn infants. Communication, critical thinking, and ethical practice are examined as they apply to nursing practice. Prerequisites: NURSA 101,

NURSA 101L, NURSA 102, NURSA 102L, NURSA 110, NURSA 110L, NURSA 115, NURSA 115L, NURSA 125. Corequisites: NURSA 230

NURSA 235. Medical Surgical Nursing III   **4 credits** This course continues to build upon the concepts and principles introduced in previous courses. The student continues to develop competency with the nursing process while caring for adult patients with complex and/or chronic health deviations. Concepts related to delegation of care are introduced. Nursing care reflecting a holistic view of the patient is emphasized. The student expands knowledge and skills in evaluation to examine how health care delivery systems interact and impact patient outcomes. Prerequisites: NURSA 101, NURSA 101L, NURSA 102, NURSA 102L, NURSA 110, NURSA 110L, NURSA 115, NURSA 115L, NURSA 125, NURSA 215, NURSA 225, NURSA 225L, NURSA 230, NURSA 230L, NURSA 240, NURSA 240L. Corequisites: NURSA 235L

NURSA 235L. Medical Surgical Nursing III Clinical/Lab/Simulation   **2 credits** Clinical and simulation experiences provide opportunities to apply critical thinking and complex clinical problems. Experiences are intended to facilitate the student's ability to make individual nursing decisions, refine nursing skills and to foster independence within the role of the nursing student. Prerequisites: NURSA 101, NURSA 101L, NURSA 102, NURSA 102L, NURSA 110, NURSA 110L, NURSA 115, NURSA 115L, NURSA 125, NURSA 215, NURSA 225, NURSA 225L, NURSA 230, NURSA 230L, NURSA 240, NURSA 240L. Corequisites: NURSA 235

NURSA 240. Pediatric Nursing   **2 credits** This course focuses on application of nursing process and growth and development principles to the care of infants, children, and adolescents with selected health deviations. Emphasis is also on health promotions and maintenance of these age groups. The nursing process is presented with a focus on assessment. Communication, critical thinking, and ethical practice are examined as they apply to nursing practice. Prerequisites: NURSA 101, NURSA 101L, NURSA 102, NURSA 102L, NURSA 110, NURSA 110L, NURSA 115, NURSA 115L, NURSA 125, NURSA 215, NURSA 225, NURSA 225L. Corequisites: NURSA 240L

NURSA 240L. Pediatric Nursing Clinical/Lab/Simulation   **1 credit** This course focuses on clinical application of the nursing process and growth and development principles to the care of infants, children, and adolescents with selected health deviations. Emphasis is also on health promotions and maintenance of these age groups. Communication, critical thinking, and ethical practice are examined as they apply to nursing practice. Prerequisites: NURSA 101, NURSA 101L, NURSA 102, NURSA 102L, NURSA 110, NURSA 110L, NURSA 115, NURSA 115L, NURSA 125, NURSA 215, NURSA 225, NURSA 225L. Corequisites: NURSA 240

NURSA 250. Nursing Practicum   **2 credits** This capstone course in the major is designed to promote successful transition from student to graduate nurse by strengthening knowledge, use of theory, critical thinking, beginning management and leadership principles, and the use of legal, ethical, and professional nursing standards in the practice of nursing. Students must demonstrate the application of a personal philosophy of nursing, therapeutic communication, nursing process, quality evaluation and improvement, and legal, ethical, and professional standards of nursing. The student will complete a preceptorship under the supervision of a license professional registered nurse in an approved healthcare facility. Prerequisites: NURSA 101, NURSA

101L, NURSA 102, NURSA 102L, NURSA 110, NURSA 110L, NURSA 115, NURSA 115L, NURSA 125, NURSA 215, NURSA 225, NURSA 225L, NURSA 230, NURSA 230L, NURSA 240, NURSA 240L. Corequisites: NURSA 250L

NURSA 250L. Nursing Practicum Clinical/Lab/Simulation   **4 credits**
Reliant on competencies developed in all previous nursing courses, and congruent with the ANA Code of Ethics, ANA Scope and Standards of Practice, ANA Nursing's Social Policy Statement, West Virginia Board of Examiners for Registered Professional Nurses Scope of Practice and Delegation, West Virginia Title 19 Legislative Rules, and West Virginia Code and Law Chapter 30, Article 7, student knowledge and performance is enhanced through a variety of experiences in patient care under the direction of a preceptor. Opportunities are provided for students to experience the role of staff nurse, gain confidence in using critical thinking and technical skills in the clinical environment, strengthen knowledge and use of theory in practice, foster collegial respect, enhance self-image as a nurse, and assist in role transition from student to graduate nurse. Prerequisites: NURSA 101, NURSA 101L, NURSA 102, NURSA 102L, NURSA 110, NURSA 110L, NURSA 115, NURSA 115L, NURSA 125, NURSA 215, NURSA 225, NURSA 225L, NURSA 230, NURSA 230L, NURSA 240, NURSA 240L. Corequisites: NURSA 250

NURSA 255. NCLEX-RN   **2 credits**
This course is designed to assist students in their preparation and readiness for NCLEX-RN testing required for licensure as a professional nurse. Students will review content identified on the NCLEX RN test plan, take standardized comprehensive NCLEX-RN predictor exams and remediate content deficits. Prerequisites: NURSA 101, NURSA 101L, NURSA 102, NURSA 102L, NURSA 110, NURSA 110L, NURSA 115, NURSA 115L, NURSA 125, NURSA 215, NURSA 225, NURSA 225L, NURSA 230, NURSA 230L, NURSA 240, NURSA 240L, NURSA 235, NURSA 235L, NURSA 250, NURSA 250L. Corequisites: None

<div align="center">

NURSB – Baccalaureate Degree Courses

</div>

NURSB 201. Fundamentals of Nursing   **4 credits**
This course introduces the student to the scope of nursing practice as a foundation for subsequent nursing courses. Nursing process is presented with an initial focus on assessment, communication, critical thinking, and ethical practice as they apply to nursing practice. Professional competencies and the foundational principles used by professional nurses are presented as related to safe and effective environments of care across the lifespan. The ANA Code of Ethics, ANA Scope and Standards of Practice, ANA Nursing Social Policy Statement, and West Virginia Board of Examiners for Registered Professional Nurses Scope of Practice and Delegation are introduced. Students will be able to comprehend society's view of nursing and integrate selected theoretical and conceptual nursing models. Prerequisites: Admission to the BSN program, completion of all freshman courses or special permission by the program director, BIOL 171, BIOL 251L, BIOL 172, BIOL 172L, ENGL 101, ENGL 102, HSCI 110, SPCH 103*, UNIV 104, UNIV 105. Corequisite: NURSB 201L

NURSB 201L. Fundamentals of Nursing Clinical/Lab/Simulation   **2 credits**
This course introduces the student to the scope of practice of the baccalaureate degree nurse as a foundation for subsequent nursing courses. The nursing process is presented with a focus on assessment, communication, critical thinking, and ethical practice as they apply to nursing practice in the skill laboratory environment and clinical setting. Skills lab time will

be used to learn and apply essential bedside nursing skills to perform the necessary patient care techniques with a focus on patient safety. Prerequisites: Admission to the BSN program, completion of all freshman courses or special permission by the program director, BIOL 171, BIOL 251L, BIOL 172, BIOL 172L, ENGL 101, ENGL 102, HSCI 110, SPCH 103*, UNIV 104, UNIV 105. Corequisite: NURSB 201L

NURSB 204. Health Assessment in Nursing   **3 credits**
This course introduces patient head-to-toe health assessment incorporating mental, emotional, and spiritual well-being of individuals across the lifespan in a variety of care environments. Classroom includes data collection, interpretation, and documentation of complex conditions while using communication, observation, and physical examination techniques. Advanced methods are utilized for assessing the students' knowledge of physical, emotional, and spiritual examination application. Prerequisites: Admission to the BSN program, completion of all freshman courses or special permission by the program director, BIOL 171, BIOL 251L, BIOL 172, BIOL 172L, ENGL 101, ENGL 102, HSCI 110, SPCH 103*, UNIV 104, UNIV 105. Corequisite: NURSB 204L

NURSB 204L. Health Assessment in Nursing Clinical/Lab/Simulation   **1 credit**
This laboratory course introduces the kinesthetic application of patient head-to-toe health assessment incorporating mental, emotional, and spiritual well-being of individuals across the lifespan in a variety of care environments. Clinical experiences include data collection, interpretation, and documentation of complex conditions while using communication, observation, and physical examination techniques. Advanced methods are utilized for assessing the students' knowledge of physical, emotional, and spiritual examination application. Prerequisites: Admission to the BSN program, completion of all freshman courses or special permission by the program director, BIOL 171, BIOL 251L, BIOL 172, BIOL 172L, ENGL 101, ENGL 102, HSCI 110, SPCH 103*, UNIV 104, UNIV 105. Corequisite: NURSB 204L

NURSB 210. Medical Surgical Nursing I   **4 credits**
This course builds upon the concepts, principles, and skills introduced in NURSB 201 Fundamentals of Nursing. Students will be introduced to concepts of holistic nursing care for adults experiencing acute and chronic illnesses in selected structured settings. Students will be expected to learn and interpret the nurse's role in health and illness within evolving practice environments and across the spectrum of health and illness. This course will address nursing care issues from a physiologic, pathophysiologic, and psychosocial context. Nursing students will develop current knowledge to apply through critical thinking and clinical reasoning methodology. Concepts of communication, critical thinking, and ethical practice are examined as they apply to nursing practice. Prerequisites: NURSB 201, NURSB 201L, NURSB 204, NURSB 204L. Corequisite: NURSB 210L

NURSB 210L. Medical Surgical Nursing I Clinical/Lab/Simulation   **2 credits** This course builds upon the concepts, principles, and skills introduced in NURSB 210 Medical Surgical Nursing. Students are introduced to concepts of holistic nursing care for adults experiencing acute and chronic illnesses in selected structured settings. Students will be in various clinical settings using hands-on applications to address care issues from a physiologic, pathophysiologic, and psychosocial context. Nursing students will develop current knowledge to apply through critical thinking and clinical reasoning methodology. Concepts of communication, critical thinking, and ethical practice are examined as they

apply to nursing practice. Prerequisites: NURSB 201, NURSB 201L, NURSB 204, NURSB 204L. Corequisite: NURSB 210

NURSB 215. Mental Health Nursing   **2 credits**
Students will develop evidence-based methods to assess and interact with individuals, families, and communities experiencing mental health disparities. Emphasis is on the analysis and synthesis of recognizing signs of mental illness and development of treatment methods appropriately tailored for individualized patient care. Therapeutic communication techniques are role-modeled and practiced through in-class case studies to prepare students for successful patient interactions to improve psychosocial health outcomes. Prerequisites: NURSB 201, NURSB 201L, NURSB 204, NURSB 204L. Corequisite: NURSB 215L

NURSB 215L. Mental Health Nursing Clinical/Lab/Simulation   **2 credits**
Students will clinically apply the evidence-based methods to assess and interact with individuals, families, and communities experiencing mental health disparities. Emphasis is on accurate assessment of mental illnesses and the application of treatment methods appropriately tailored for individualized patient care. Therapeutic communication techniques are applied to prepare students for successful patient interactions with the goal of improving psychosocial health outcomes. Prerequisites: NURSB 201, NURSB 201L, NURSB 204, NURSB 204. Corequisite: NURSB 215

NURSB 225. Pathophysiology and Pharmacology I   **2 credits**
This course provides a foundation in the pathophysiology of key disease processes and pharmacological therapies for the baccalaureate student. Principles of pathophysiology and pharmacology are learned and integrated into treatment modalities and the initial phases of disease management. Understanding drug calculations will assist the novice student in the phases of safe medication delivery and patient assessment. The pathophysiology of diseases and the effects of medications are applied to nursing practice and patient care methods. Assessment, diagnoses, patient planning, drug interventions, and safe dosage evaluation methods provide the student with the competency to administer medications appropriately based on provider order, strength, and weight-based delivery modalities to optimize health care outcomes. Prerequisites: NURSB 201, NURSB 201L, NURSB 204, NURSB 204L. Corequisite: None

NURSB 315. Pathophysiology and Pharmacology II   **2 credits**
This course builds upon the concepts mastered in NURSB 225 Pathophysiology and Pharmacology I. Complex disease processes are introduced in combination with evidence-based medication therapies to enhance critical thinking in the medication delivery process for application in nursing practice. Students will complete increasingly complex drug calculations involving critical care concepts and intravenous drip therapies for titration in response to the patient's physiological condition. Advanced concepts are taught through both patient interaction and simulated exercises to prepare the student for real world scenarios. Assessment, diagnosis, planning, implementation, and evaluation of complex drug administration decisions are incorporated with interprofessional methods of collaborative care involving team-based communications to improve upon holistic care and optimal patient outcomes. Prerequisites: NURSB 201, NURSB 201L, NURSB 204, NURSB 204L, NURSB 225. Corequisite: None

NURSB 325. Medical Surgical Nursing II   **4 credits**
Specific altered health states are explored in depth through application of the nursing process in client care. Clients experiencing chronic as well as acute self-care deficits will be

the focus of nursing care. This course builds upon the concepts learned in NURSB 210 Medical Surgical Nursing I. Nursing students will expand their current knowledge to apply critical thinking and complex clinical reasoning methodology. Concepts of communication and ethical practice are examined as they apply to nursing practice. Prerequisites: NURSB 201, NURSB 201L, NURSB 204, NURSB 204L, NURSB 225. Corequisite: NURSB 325L

NURSB 325L. Medical Surgical Nursing II Clinical/Lab/Simulation   2 credits Students apply theory to professional nursing practice during clinical experiences, laboratory practice, and simulation. Students provide professional nursing care to seriously ill patient populations that may be anticipating surgery, having surgery, or recovering from medical illness and/or surgery, preparing for professional nursing practice. Early in the semester, students take the theory they have mastered and skills they have built and apply that theory and those skills to professional nursing practice in clinical settings where patients are experiencing medical surgical treatment. Prerequisites: NURSB 201, NURSB 201L, NURSB 204, NURSB 204L, NURSB 225. Corequisite: NURSB 325

NURSB 330. Obstetric Nursing   2 credits
This course will examine the nursing process and its application to the care of the woman preparing for pregnancy, during pregnancy and after pregnancy. Theories and principles of family development, family dynamics, childbearing, and care of the newborn are applied to nursing practice in acute and community-based settings. Students will examine obstetric complications impacting the pregnant patient to further develop critical thinking skills. Prerequisites: NURSB 201, NURSB 201L, NURSB 204, NURSB 204L, NURSB 225. Corequisite: NURSB 330L

NURSB 330L. Obstetric Nursing Clinical/Lab/Simulation   1 credit
This course examines the professional nursing practice in clinical experiences of pregnant and postpartum patients. Clinical experiences help the student prepare for professional nursing practice. Students will enhance their skills of professional nursing practice in clinical settings where patient populations are anticipating pregnancy, pregnancy, giving birth, or providing a safe welcoming environment for the newborn. Prerequisites: NURSB 201, NURSB 201L, NURSB 204, NURSB 204L, NURSB 225. Corequisite: NURSB 330

NURSB 335. Medical Surgical Nursing III   4 credits Care of clients and families with multiple and/or complex altered health states is the focus for students in this course. Clinical experiences in critical care settings are added to the acute and community environments and built upon from previous Medical Surgical I and II courses. The students are introduced to delegation experiences and acute care management in relation to complex health care delivery systems and the impact on patient outcomes. Prerequisites: NURSB 201, NURSB 201L, NURSB 204, NURSB 204L, NURSB 225, NURSB 315, NURSB 325, NURSB 325L, NURSB 330, NURSB 330L. Corequisite: NURSB 335L

NURSB 335L. Medical Surgical Nursing III Clinical/Lab/Simulation   2 credits Students participate in clinical experiences that engage the student to apply skills in clinical practice. Students participate in critical care settings in the community, that serve adult patients experiencing complex multi-system illness. Students take the theory they have mastered and the skills they have built in previous courses and apply that theory and corresponding skills to professional nursing practice in clinical settings where patient populations are critically ill. Prerequisites: NURSB 201, NURSB 201L, NURSB 204,

NURSB 204L, NURSB 225, NURSB 315, NURSB 325, NURSB 325L, NURSB 330, NURSB 330L. Corequisite: NURSB 335

NURSB 340. Pediatric Nursing **2 credits**
This course provides opportunities for students to develop a theoretical foundation for competence within evidence-based practice to address the individual needs of the pediatric client in the context of the family. Developmental frameworks are employed to understand the evidence-based, therapeutic approaches to children and adolescents. Prerequisites: NURSB 201, NURSB 201L, NURSB 204, NURSB 204L, NURSB 225, NURSB 315, NURSB 325, NURSB 325L, NURSB 330, NURSB 330L. Corequisite: NURSB 340L

NURSB 340L. Pediatric Nursing Clinical/Lab/Simulation **1 credit** This course applies the theory presented in the didactic course to the professional nursing practice in clinical experiences caring for children and the family unit. Clinical experience assignments prepare the student for professional, pediatric nursing practice in the hospital and community settings. Students will adapt to the ever-changing family unit as they practice effective communication, provide well-childcare, assist in illness recovery, or managing chronic diseases. Prerequisites: NURSB 201, NURSB 201L, NURSB 204, NURSB 204L, NURSB 225, NURSB 315, NURSB 325, NURSB 325L, NURSB 330, NURSB 330L. Corequisite: NURSB 340

NURSB 404. Nursing Research **3 credits**
This course is an introduction to the designs, methods, ethical principles, and statistical analysis used by nurse-scientists to research health phenomena. Descriptive and inferential statistics are introduced. Data is manipulated, graphed, and analyzed using statistical software. Prerequisites: NURSB 201, NURSB 201L, NURSB 204, NURSB 204L, NURSB 225, NURSB 315, NURSB 325, NURSB 325L, NURSB 330, NURSB 330L, NURSB 335, NURSB 335L, NURSB 340, NURSB 340L. Corequisite: None

NURSB 450. Nursing Practicum I
2 credits This first practicum course in the baccalaureate of nursing program is designed to allow for students to focus on chronic complex health deviations. In this course, students focus on strategies for prioritization, assignment and delegating in nursing. Students will apply knowledge about productive transition from student to graduate nurse by strengthening knowledge, use of theory, critical thinking, beginning management and leadership principles, and the use of legal, ethical, and professional nursing standards in the practice of nursing, specifically medical surgical nursing. Students must demonstrate the application of a personal philosophy of nursing, therapeutic communication, nursing process, quality evaluation and improvement, and legal, ethical, and professional standards of nursing. This course is specific to the transition to medical surgical nursing. Prerequisites: NURSB 201, NURSB 201L, NURSB 204, NURSB 204L, NURSB 225, NURSB 315, NURSB 325, NURSB 325L, NURSB 330, NURSB 330L, NURSB 335, NURSB 335L, NURSB 340, NURSB 340L. Corequisite: NURSB 450L

NURSB 450L. Nursing Practicum I Clinical/Lab/Simulation **4 credits**
The first practicum laboratory course in the baccalaureate of nursing program allows enhancement of knowledge through a variety of medical surgical experiences in patient care under the direction of a preceptor. Students experience the initial transition to role of registered nurse, on a medical surgical unit, while gaining confidence in using critical thinking and technical skills in the clinical environment, strengthening knowledge, use of theory in practice, fostering collegial respect, enhancing self-image as a nurse, and assisting

in role transition from student to graduate nurse. Prerequisites: NURSB 201, NURSB 201L, NURSB 204, NURSB 204L, NURSB 225, NURSB 315, NURSB 325, NURSB 325L, NURSB 330, NURSB 330L, NURSB 335, NURSB 335L, NURSB 340, NURSB 340L. Corequisite: NURSB 450

NURSB 455 .Prevention and Population Health   **3 credits**
This course is designed to help the student develop the knowledge and skill necessary to practice nursing in the context of the community. The focus includes learning about population-based health enhancement initiatives, global health priorities and concerns, disaster nursing, characteristics of effective and ineffective communities, as well as the process of population-based health behavior change. Relying on foundational knowledge from nursing, science, social, and public health resources, students will study evidence-based approaches to applying the nursing process at the community level. The course focus is nursing advocacy as a pathway to local, national, and global health. Prerequisites: NURSB 201, NURSB 201L, NURSB 204, NURSB 204L, NURSB 225, NURSB 315, NURSB 325, NURSB 325L, NURSB 330, NURSB 330L, NURSB 335, NURSB 335L, NURSB 340, NURSB 340L. Corequisite: NURSB 455L

NURSB 455L. Prevention and Population Health Clinical/Lab/Simulation   **1 credit** During the prevention of population health lab students will focus on nursing practice with families and communities. Students will be partnered with key community health agencies during the semester. Nursing care provided will be subject to the ANA Code of Ethics and the ANA Scope and Standards of Practice. Learning activities will include a community assessment of the geopolitical community or a phenomenological community and participation in a planned intervention project providing primary, secondary and/or tertiary services to benefit the community. Prerequisites: NURSB 201, NURSB 201L, NURSB 204, NURSB 204L, NURSB 225, NURSB 315, NURSB 325, NURSB 325L, NURSB 330, NURSB 330L, NURSB 335, NURSB 335L, NURSB 340, NURSB 340L. Corequisite: NURSB 455

NURSB 460 .Nursing Practicum II   **2 credits**
The second practicum course in the baccalaureate of nursing program allows students to assess, plan and deliver ethically based patient care collaboratively with other health care professions. Students will synthesize evidence-based knowledge for the physical, behavioral, and emotional well-being of the patient in the practice of nursing. Students will create a plan of care collaboratively with patients that respects the diversity of the needs of the patient. Prerequisites: NURSB 201, NURSB 201L, NURSB 204, NURSB 204L, NURSB 225, NURSB 315, NURSB 325, NURSB 325L, NURSB 330, NURSB 330L, NURSB 335, NURSB 335L, NURSB 340, NURSB 340L, NURSB 404, NURSB 450, NURSB 450L, NURSB 455, NURSB 455L. Corequisite: NURSB 460L

NURSB 460L. Nursing Practicum II Clinical/Lab/Simulation   **4 credits**
The second practicum lab course in the baccalaureate of nursing program allows students to evaluate clinical nursing practice in the health care setting to improve the quality of care for patients, families, and communities. Students interpret professional legal, ethical, and professional standards to guide nursing practice. Students use the ethical decision model to analyze ethical dilemmas to demonstrate creative, thoughtful, analytic, logical approaches to nursing. Prerequisites: NURSB 201, NURSB 201L, NURSB 204, NURSB 204L, NURSB 225, NURSB 315, NURSB 325, NURSB 325L, NURSB 330, NURSB 330L,

NURSB 335, NURSB 335L, NURSB 340, NURSB 340L, NURSB 404, NURSB 450, NURSB 450L, NURSB 455, NURSB 455L. Corequisite: NURSB 460

NURSB 470 .Leadership and Health Policy   3 credits
This course will examine principles of management and leadership theory. It is designed to assist with the development/augmentation of leadership competencies that promote quality improvement and patient safety, both critical components in the promotion of quality health care. Key components of this course that will assist in the acquisition of leadership competencies include critical thinking, communication, creativity/innovation, legal/ethical, nursing and health care systems, quality improvement and change theory in nursing leadership and management roles. Prerequisites: NURSB 201, NURSB 201L, NURSB 204, NURSB 204L, NURSB 225, NURSB 315, NURSB 325, NURSB 325L, NURSB 330, NURSB 330L, NURSB 335, NURSB 335L, NURSB 340, NURSB 340L, NURSB 404, NURSB 450, NURSB 450L, NURSB 455, NURSB 455L. Corequisite: NURSB 470L

NURSB 470L. Leadership and Health Policy Clinical/Lab/Simulation   1 credit
Building upon existing professional nursing practice experiences, this course provides an intensive clinical practicum experience focusing on the application of the nursing management process for organizing and facilitating the delivery of comprehensive, holistic, efficient, and effective nursing care to groups of clients in a variety of settings. Concepts of health policy are applicable to current nursing issues within a variety of health care organizations. Prerequisites: NURSB 201, NURSB 201L, NURSB 204, NURSB 204L, NURSB 225, NURSB 315, NURSB 325, NURSB 325L, NURSB 330, NURSB 330L, NURSB 335, NURSB 335L, NURSB 340, NURSB 340L, NURSB 404, NURSB 450, NURSB 450L, NURSB 455, NURSB 455L. Corequisite: NURSB 470

NURSB 475 .NCLEX-RN   3 credits
This course is designed to assist the baccalaureate nursing student in their preparation and readiness for NCLEX- RN testing required for licensure as they transition to a practicing, bachelor's prepared, registered professional nurse. During this course, the student will apply the knowledge gained throughout the BSN program to successfully complete 2,000 NCLEX style questions, ATI Capstone, Virtual ATI, and the ATI Comprehensive Predictor. In addition, the student will construct success plans and complete remediation that guide study preparation to distinguish content area deficits and enhance knowledge in the identified content areas deficits. Prerequisites: NURSB 201, NURSB 201L, NURSB 204, NURSB 204L, NURSB 210, NURSB 210L, NURSB 215, NURSB 215L, NURSB 225, NURSB 315, NURSB 325, NURSB 325L, NURSB 330, NURSB 330L, NURSB 340, NURSB 340L, NURSB 404, NURSB 450, NURSB 450L, NURSB 455, NURSB 455L, NURSB 460, NURSB 460L, NURSB 470, NURSB 470L. Corequisite: None

NURSR – RN to BSN Courses

NURSR 302. Advanced Health Assessment for the RN   4 credits
This course prepares the nurse for comprehensive, integrative, and holistic health assessment of groups and populations across the lifespan. Emphasis is placed on data collection, documentation, and analysis of data, information, knowledge, and wisdom development to support nursing decision-making in a technology driven practice. Prerequisites: HCSI 110, HSCI 230, HSCI 302, HSCI 310, HSCI 312.

NURSR 402. Prevention and Population Health   4 credits
This course prepares the nurse for an understanding of U.S and global population health.

Students will explore effective communication strategies designed to reduce the risk for disease and develop evidence-based nursing judgements regarding disparities and inequalities within a community health context. Patterns of population health outcomes will be analyzed and health policy issues that employ advocacy strategies to promote wellness will be examined. Prerequisites: HCSI 110, HSCI 230, HSCI 302, HSCI 310, HSCI 312.

NURSR 404. Intro to Nursing Research   **3 credits**
This course prepares the nurse for research focused on inquiry and an ability to evaluate evidence that underlies clinical practice to a) challenge the status quo, b) question underlying assumptions, and c) to offer new insights to improve the quality of care for patients, families, and communities in a technology driven practice. Prerequisites: HCSI 110, HSCI 230, HSCI 302, HSCI 310, HSCI 312.

NURSR 410. Leadership and Health Policy   **4 credits**
This course prepares the registered nurse for an understanding of leadership roles, behaviors, and strategies that use digitization, mobility of health services, and complex big data to inform health care leader decisions and advance the work of organizations. The course will focus on evidence-based innovation, clinical therapeutics, and delivery models to support infrastructure as a central function of nursing leaders in all health settings. Prerequisites: HCSI 110, HSCI 230, HSCI 302, HSCI 310, HSCI 312.

OCCUPATIONAL SCIENCE (OCSC)

OCSC 300. Intro to Occupational Science   **1 credit**
Explores the history and philosophical base of occupational therapy, introduces the various roles of the occupational therapy practitioner, and presents the traditional and emerging practice settings in which they work. *Pre-Requisites:* PSCY 101; *Co-Requisite*: SSCI 105

OCSC 301. Occupations and Well-Being   **1 credit**
Familiarizes students with the concept of occupation and investigates evidence of the relationship between occupations and participation, health, and well-being.

OCCUPATIONAL THERAPY ASSISTANT (OTA)

OTA 201. Introduction to Occupational Therapy   **3 credits**
Fundamentals of occupational therapy, including the roles of both the OTR and the OTA will be explored. The student will learn the history of the profession and the political infrastructure of the American Occupational Therapy Association, as well as the importance of remaining an active and engaged member of both the national and state OT associations. Ethical decision making will be explored, along with the introduction of promoting OT to the various payer sources. We will discuss and define theory development and its importance to Occupational Therapy. Professional behaviors including presentations, communication, and documentation will be emphasized. OT professional language will also be introduced. Prerequisite: This course is offered as a prerequisite course for the OTA program but may be taken within the program year.

OTA 202. Principles of Performance in Occupational Therapy   **3 credits**
This course will introduce the Occupational Therapy Practice Framework (OTPF). The OTPF is the basis of the occupational therapy profession, providing an introduction into OT specific language and the activity analysis process. Within principles of performance, the Occupational Therapy Practice Framework and activity analysis are utilized to understand the occupational

therapy client centered outlook and unique perspective. Prerequisite: OTA program admission. Corequisites: OTA 201, OTA 204, OTA 205, OTA 208, OTA 209

OTA 203. Clinical Kinesiology   3 credits
Kinesiology is the study of movement of the human body with an emphasis on musculoskeletal components producing specific movements. It involves the study and understanding of functional, anatomical, and mechanical principles that apply to human motion and posture. Kinesiology applies principles of anatomy, physics, and physiology to help analyze human motion. Prerequisites: This course is offered as a prerequisite to the OTA program but may be taken within the program year.

OTA 204. Occupational Therapy in Adult Physical Performance and Lab I   4 credits
Students will be introduced to diagnosis of medical, neurological, orthopedic, and multisystem conditions treated in occupational therapy practice. Etiology, symptomatology, prognosis, and treatment will be discussed. Guest speakers discuss conditions unique to the Appalachian area and treatment. Students are encouraged to develop their problem- solving skills to enhance and normalize the client's way of life. Splinting techniques are demonstrated. Students continue to learn to grade activities. Documentation and professional behaviors are also stressed. Prerequisite: OTA program admission. Co requisite: OTA 201, OTA 202, OTA 205, OTA 208, OTA 209

OTA 205. Level 1 Fieldwork I   1 credit
This is the first fieldwork experience for the OTA student. The student will be assigned simulation case studies that correlate with specific courses and age groups taken during the spring semester. The focus of these activities will include screening, assessment, and intervention of /for ADL's, Environmental Accessibility and Modification, Orthotics and Prosthetics, Sensory, Vision, and Social, Play and Leisure while interacting with virtual clients, family members, and professionals. Level 1 fieldwork will encourage development of professional behaviors and opportunities to practice clinical skills in a safe, nonthreatening environment and is intended to build knowledge and professional judgment by providing students with immediate feedback on clinical scenarios. Students will be required to complete assignments within each case study and a de-briefing to promote the development of clinical reasoning skills through reflective learning processes. Prerequisites: OTA program admission. Co-requisites: 201, 202, 204, 208, 209

OTA 206. Level 1 Fieldwork II   1 credit
This is the second fieldwork experience, but the first in-person experience for the OTA student. The student will be assigned a clinical site to observe an occupational therapist, an occupational therapy assistant or a professional of another discipline conducting OT related activities, assessments or groups. The student will observe evaluations, and ongoing individual and group treatment related to activities of daily living, work and leisure. Level 1 fieldwork will encourage the development of professional behaviors including collaborating with other members of the treatment team. Students will be required to complete written assignments including a case study, a discussion post, and progress notes. Prerequisites: Successful completion of all fall program courses. Corequisites: 203, 207, 210, 215, 216

OTA 207. Occupational Therapy in Adult Physical Performance and Lab II   4 credits
A continuation of OTA 204, this course presents additional diagnosis of medical, neurological, orthopedic, and multisystem conditions treated in occupational therapy practice. Students are introduced to and demonstrate skills with an electronic documentation system. Etiology, symptomatology, prognosis, and treatment will be

discussed. Basic health promotions are stressed. The laboratory element provides a hands-on section for treating physical dysfunction in adults, including transfer training and ADL training. The focus is on correct technique in PROM, AROM, manual muscle testing, and goniometry. Students continue to learn to grade activities. Documentation and professional behaviors are also stressed. Issues that involve OT within the political system are discussed and addressed. Prerequisites: Successful completion of all fall OTA program courses. Corequisites: 203, 206, 210, 215, 216

OTA 208. Occupational Therapy in Psychosocial Performance   **3 credits**
This course explores Occupational Therapy in mental health. The student will demonstrate an understanding of mental health disorders and be introduced to therapeutic use of self through group treatment sessions. The unique role of occupational therapy within mental health and addiction is explored. Students will utilize this knowledge to improve treatment of patients and understand the distinct role mental health plays in overall quality of life and occupations. Prerequisites: OTA program admission. Corequisites: 201, 202, 204, 205, 209

OTA 209. Modalities   **3 credits**
This course will provide a foundation of basic treatment practices within the scope of the OTA, including massage, pain management, standardized assessments, transfers, active and passive range of motion, electrical stimulation, ultrasound, paraffin, manual muscle testing, and patient safety. Students will learn the theory's associated with physical agent modalities and demonstrate these foundational skills while focusing on awareness of safety for clients. Prerequisites: OTA program admission. Corequisites: 201, 202, 204, 205, 208 Course fee $50.00: Students will create a simple project using various items that can be used as treatment modalities in clinical practice.

OTA 210. Occupational Performance of Children   **3 credits**
This course provides the student with an in-depth look at performance and occupation in the pediatric population. Specific settings and diagnoses are explored to address the development of function for children. The student will explore developmentally appropriate treatments by utilizing activity analysis for various pediatric and adolescent diagnoses. Prerequisites: Successful completion of all fall OTA courses. Corequisites: 203, 206, 207, 215, 216 Course fee: $60.00 for the purchase of sensory kits.

OTA 211 and OTA 212. Level II Fieldwork I & Level II Fieldwork II   **5 credits each**
The standards of education for the occupational therapy assistant (as outlined by the American Occupational Therapy Association), require that the student successfully complete at least two eight-week Level II clinical fieldwork assignments at (or within 12 months of) the completion of all other academic course work. The student will utilize knowledge obtained within the coursework to develop and master clinical skills in diverse settings. This skill level will allow students to be successful in a multitude of practice settings. These clinical fieldworks are non-paid, pre-employment experiences essential to enhance student learning and knowledge of clinical practice. Prerequisite: successful completion of all OTA didactic requirements. Corequisites: 217 Course fee: $55.00 per fieldwork: Additional drug screen / background check / physical fees per fieldwork location. Electronic FW Evaluation fee.

OTA 215. Occupational Performance in the Older Adult   **3 credits**
This course provides an in-depth look at the aging process and how it effects occupational performance. Appropriate interventions as well as specific diagnoses and considerations are discussed from an occupational therapy standpoint. Utilizing activity analysis, the student

will determine best practices for maintaining functioning and independence within the elderly and aging population. Prerequisites: Successful completion of all fall OTA program courses. Corequisites: 203, 206, 207, 210,216 Course fee: $60.00: AOTA Digital Badging program is connected with this course in order to enhance learning and show advanced skills for practice.

OTA 216 Professional Development and Ethics   **1 credit**
This 15-week, hybrid course focuses on licensure, professional development, ethics, and different roles available for the OTA. Leadership styles will be identified, and OTA students will develop a professional development plan. Test-taking strategies are discussed. Students navigate through the NBCOT website in preparation for registering for the certification exam. Course meetings are offered online but can be attended in person. All assignments and quizzes are completed through an online process. Prerequisites: Successful completion of all Fall OTA program courses. Additional fees may apply. Corequisites: 203, 207, 210, 215.

OTA 217 Clinical Competence for the OTA   **2 credits**
This 15-week, hybrid course focuses, in part, on reviewing major areas of OTA study in preparation for the national certification exam. Practice exams are given. Test-taking strategies are discussed. Students will complete various modules through an online program which is meant to enhance their OTA program educational experience and prepare the student for registering for and passing the certification exam. There are scheduled days you will need to be on campus to take exams and a detailed schedule will be included in the course syllabus. Prerequisite: Successful completion of fall and spring OTA courses. Additional fees may apply. Corequisites: 211, 212.

> *** Each student will pay an additional 185.00 per semester while in the OTA program in order to cover their NBCOT exam cost of $555.00 at the end of their program.**

ORGANIZATIONAL LEADERSHIP (ORGL)

ORGL 150. Introduction to Professional Development   **3 credits**
An introductory course in adult online learning and outcome-based education. Throughout this course of practicality, the significance of the core material is highlighted through substantial activities utilizing individual and collaborative teamwork, thereby developing and creating professional written submissions in standard APA format. The students will learn to conduct library research and other necessary formative applications within the scope of this course. Students will be introduced to technology utilization and accessing various supportive university functions such as the planning and advising resources provided by the university. Further, the student will develop the critical skills of understanding the concepts of academic integrity, and formulate strategies for critical reading, writing, thinking and reflection. The goal of this foundational course is to provide a basis of understanding necessary for online learning academic success. *Online*

ORGL 151. Introduction to Business   **3 credits**
A survey of business principles, practices, and procedures. A background for subsequent specialized courses in economics, management, marketing, and finance. *Online*

ORGL 301. The Adult Learner   **3 credits**
Introduces participants to lifelong learning, emphasizing learning and cognition theories, models, and principles applied to the workplace and other adult learning venues. Explores

adult learning in different contexts to acquaint participants with the main debates in the field and with the philosophies and methodologies used by a variety of adult education projects. This course will additionally focus upon ethical responsibility of leadership through dimensions of promoting adult learning and practice. This includes reflecting on practicing ethics, self-examination to increase awareness and the understanding of personal values systems. Contributes to competencies of leading self with character, leading in a climate of change, and leading across boundaries. *Online.*

ORGL 302. Principles and Issues of Management   3 credits
This course introduces a broad range of concepts, theories, and practices important for understanding management principles. Students will explore the core management functions of planning, organizing, directing, and controlling. Topics focus on diversity within an organization and the environment in which managers must effectively operate. The course also addresses the practical applications of management principles and realistic situations managers encounter as they attempt to achieve organizational objectives. Explores behavioral science concepts and research findings directed toward understanding human behavior within organizations; examine and study this behavior as a function of the individual, interactive groups within the organization, and the organization itself. *Online.*

ORGL 305. Principles and Issues of Human Resources   3 credits
Study of organizational structure with emphasis on staffing management involved in recruitment, selection, training, wage and salary administration, and personnel assessment. Introduces employment, selection, and placement of personnel; usage levels and methods; job descriptions; training methods and programs; and employee evaluation systems. Includes leadership procedures for management of human resources and uses case studies and problems to demonstrate implementation of these techniques. *Online.*

ORGL 307. Leadership   3 credits
Introduces a broad range of concepts, theories, and practices important for understanding leadership. Topics focus on various styles and environments in which effective leaders operate and manage their relationships. Emphasis is placed on the application of leadership principles to real-world situations and problems, resulting in quality, productivity, and success as organizations strive to achieve their objectives. *Online*

ORGL 309. Collaborative Leadership   3 credits
Addresses the need for collaborative and team-engagement skills in twenty-first century leadership. Research and the experience of leaders and scholars show that leading teams and groups to successful realization of goals and projects cannot be accomplished alone. Collaborative leadership emphasizes engagement, capacity building, diversity, social sense-making, and communication as aspects of collaborative work with groups. *Online*

ORGL 316. Ethic   3 credits
An inquiry into diversity, the fundamental norms of conduct in any organization, and the justifications of conduct in relation to ethical theories. Gives special attention to ethical problems encountered by leaders in organizations and their relationships with members, employees, customers, administrators, and society. *Online*

ORGL 401. The Learning Organization   3 credits
Addresses a broad range of concepts, theories, and practices from the disciplines of adult learning, organizational development, and human resource development. Emphasizes transformational leadership, how it develops, and the competencies and principles needed

to reinvent or transform oneself into a leader. Students examine the change process from the perspective of the individual within an organization. They further examine a career model for improving professional development and explore basic assumptions about the contributions of individuals to organizations, with a goal of producing competent professionals who can think in action and apply their knowledge under changing conditions. *Online*

ORGL 402. Organizational Behavior   **3 credits**
Addresses issues of how people live their lives at work and in organizations. An over-arching theme of gaining a competitive edge through people involves understanding individuals as they function in organizations, as well as how organizations design and structure work to achieve goals. Behaviorally oriented; conceptually, combines the function of management with the psychology of leading and managing people. Emphasizes effective use of human resources through understanding diversity; human motivation and behavior patterns; conflict management and resolution; group functioning and process; the psychology of decision making; and the importance of recognizing, analyzing, and managing change. *Online*

ORGL 406. Organizational Development and Change   **3 credits**
Vertically and horizontally integrates all courses in the organizational leadership curriculum. Creates synergies by presenting organizational development as a management discipline aimed at improving organizational effectiveness by increasing the use of human resources within the enterprise. *Online*

ORGL 408. Action Research   **3 credits**
Offers an immediate, localized, and actionable framework for investigating and analyzing organizations. Students learn how to conduct action research as scholar-practitioners in many diverse fields, as well as how to critically analyze an organization's operational components that impact decision making. Provides students with knowledge and practice for leading for results with resource acumen. *Online*

ORGL 413. Human Resource Development   **3 credits**
Addresses current human resource development practice from the perspective of the role of change agent and organizational transformation. Incorporates a broad range of concepts, theories, and practices in human resource and organizational development. Texts present real-world change agents and their attempts to deal with problems and situations. *Online*

ORGL 415. Leadership Communication   **3 credits**
Expands and hones students' communication skills as they apply to leadership roles. Students develop skills for building relationships across disciplines, departments, cultures, and politics and for leading engagement and collaboration in local, global, and virtual realms. Contributes to using language and communication skills as a resource for leadership, supports leadership in climates of change, and prepares students to lead across boundaries toward coalition building; conveys core communication concepts by preparing students to connect and communicate effectively. Meets practical needs of written communication fluency for leaders, line managers, and consultants. *Online*

ORGL 430. Developing Teams   **3 credits**
This course emphasizes the practical application of leadership concepts, theories, and practices from coursework in real organizational environments and situations. Provides flexible opportunities to employ various and evolving technologies. Students design and

implement team and collaborative initiatives that address an organizational problem or situation for their employer or a comparable organization. Practicum work culminates in a project that combines an academic paper and video production. *Online*

ORGL 435. Practicum: Assessing Culture (OER Resources)　　　　　**3 credits**
Emphasizes the practical application of concepts, theories, and practices from coursework in real organizational environments and situations. Provides flexible opportunities to employ various and evolving technologies. Students design and implement initiatives that assess an organizational culture. Initiatives incorporate the use of technologies as part of their evolving leadership practices. *Online - OE Resources*

ORGL 441. Coaching and Mentoring (OER Resources)　　　　　**3 credits**
This course will provide an overview and a foundation for understanding coaching and mentoring elements to enhance leadership success. Students will examine coaching and mentoring models, strategies, and practices to comprehend the coach and mentor's roles and responsibilities. In addition, students will learn to differentiate between the two approaches to apply these to their leadership approach for developing individuals and teams. This course emphasizes common collaborative concepts and elements related to developing communication, nurturing relationships, and providing effective feedback. The course covers topics such as setting goals, assessing performance, and developing the trust and commitment of others, while creating a positive and supportive environment for learning. Students will also recognize the benefits of coaching and mentoring for organizations. At the course's end, students can apply the skills learned to their leadership roles.

ORGL 442. Leading Change　　　　　**3 credits**
This course will give students the skills and knowledge to lead successful change initiatives confidently. Students will examine change models and tools to identify and assess the impact of change, develop strategies to manage the change process, and foster successful change outcomes. Through lectures, case studies, and hands-on activities, students will learn to recognize and address the challenges associated with change, create an effective communication strategy, and ensure buy-in from stakeholders. Students will also explore methods for monitoring and reporting on the progress of change initiatives. Upon completing this course, students will have a comprehensive understanding of the change process and the ability to lead change effectively. At the course's end, students can apply the skills learned to their leadership roles, enabling them to lead successful change initiatives.

FIRST RESPONDER / CRIMINAL JUSTICE CONCENTRATION OLFR

OLFR 302. Principles and Issues of Emergency Planning and Management　　　**3 credits**
This course introduces a broad range of concepts, theories, and practices essential for a basic understanding of the fundamental principles and leadership that are foundational for first responder operations, emergency planning, and management. The course examines present emergency management steps and roles as an integrated system with resources and capabilities networked together to address hazards and vulnerabilities. Additionally, a focus is placed on the application and fundamentals of emergency planning concepts and realistic situations that first responder leaders may encounter. *Online*

OLFR 316. Ethical Responsibility and Diversity Awareness in Public Safety　　**3 credits**
This course gives the participant the opportunity to examine the ethical challenges first responders face and learn strategies for resolving them. This is aligned with the lessons on

diversity awareness by taking a professional commitment to diversity, culture, and identifying the benefits both individually and collectively for overcoming stereotypes to augment diversity. While some theory is presented, the focus will be on the real world in which we all live and work. Challenges for practicing ethics within a First Responder organizational setting will be explored, first by looking at those encountered at the individual level, then interpersonal level, and group level. *Online – OE Resources*

OLFR 402. Organizational behavior and Public Trust Formation   **3 credits**
This course looks at organizational behavior within first responder organizations to promote adaptability within a climate of change. The course emphasizes developing positive working relationships to increase trust between first responder's organizations and the public. This is accomplished by focusing on innovative and creative solutions to help first responders build lasting partnerships and improve the health and safety of their communities. *Online*

OLFR 415. Leadership Communication and Media Community Relations   **3 credits**
This course focuses on the practical use of relevant language and communication skills by studying core communication concepts to prepare first responders to connect and communicate effectively. Emphasis is placed on building positive media relationships, understanding cross-cultural communication challenges, and creating effective partnerships within the community for improving public perception and involvement. *Online*

OLFR 435. Leadership Capstone: Assessing the First Responder Culture   **3 credits**
This course builds upon skills learned in the core courses and competencies in the Leadership curricula and the First Responder courses. It is designed to produce knowledge and learning by participating in a structured applied experience reference 21st-century challenges facing first responders. Students have an opportunity to apply different information gathering techniques, leadership competencies, and practices presented in previous coursework. *Online*

<div align="center">

PHYSICAL SCIENCE (PHSC)

</div>

PHSC 201. Introductory Physics I   **3 credits**
This is a course intended for science majors. The areas of study fall under the headings of mechanics, thermodynamics, vibrations and waves. Specific topics are motion in one and two dimensions, forces, energy, momentum, collisions, rotational motion, solids/fluids, thermal processes, vibrations, sound . Prerequisites: MATH 123 or Math 201. Taught fall semester. Corequisite PHSC 201L

PHSC 201L. Introductory Physics Lab   **1 credit**
Laboratory exercises to reinforce topics in Physics 201 lecture. Corequisite PHSC 201 Laboratory fee $15

PHSC 202. Introductory Physics II   **3 credits**
This laboratory course is intended for science majors. The topics that are considered to be crucial include: electricity, magnetism, light, optics, relativity, quantum physics, atomic physics, and nuclear physics. Prerequisite: MATH 123 or Math 201. Taught spring semester. Corequisite PHSC 202L

PHSC 202L Introductory Physics Lab II.   **1 credit**
Laboratory exercises to reinforce topics in Physics 202 lecture. Corequisite PHSC 202 Laboratory fee $15

POLITICAL SCIENCE (POLS)

POLS 101. American National Government   **3 credits**
An introduction to the forms, functions, and processes of the American national
government. As such, the course offers a broad overview of the American political system.
The first portion of the course discusses the foundations of the American political system.
The second section focuses on the politics and policies associated with the American
system of government, and the final section of the course is concerned with the institutional
arrangements that characterize American government.

POLS 102. State and Local Government   **3 credits**
A study of the development of state and local government, present political organization
and interrelations, with special attention to the government of West Virginia. This course
focuses on governmental forms used in our states and various units of local governments
and emphasizes local political institutions and the relationship of citizens to them.

POLS 200. Introduction to Public Policy   **3 credits**
A study of the issues and problems currently facing Congress, the Presidency, and the
Courts, including an introduction to the way public policy is determined through the use of
analytical models.

POLS 210. Comparative Government   **3 credits**
This course is a comparative study of selected Western and non-Western political systems
with special attention to state-society relations. The main goal of the course is to study
different political systems with two objectives in mind. First, we want to better understand
the different ways in which people are governed. Second, comparisons give us the reference
points that we need to help us better understand politics and government. Perhaps just as
importantly, we will examine how these governments have addressed various societal
problems and study both their success and their failures.

POLS 230. Introduction to Political Philosophy   **3 credits**
This course provides an introduction to western political thought. Among the questions to
be considered in the course are: What is the relationship between politics and ethics? Do
the ends justify the means in politics? Do humans have natural rights? What is the
relationship between economics and politics? What are the proper limits on government?
Should government attempt to shape society and, if so, in what manner?

POLS 240. Legislative Branch Politics   **3 credits**
This course focuses on the legislative function of the American national government. The
structure and function of Congress will be examined, as well as various theories on how
policy is made within this branch. The relationship of the legislative process to other
branches of government will also be considered.

POLS 250. Executive Branch Politics   **3 credits**
This course focuses on the executive function of the American national government. The
structure and function of the Executive branch will be examined, as well as various theories on
how policy is made within this branch. Also considered in this course will be the President's
responsibility for foreign policy and the associated bureaucratic agencies charged with
implementing the President's decisions related to this area of policymaking. The relationship of
the executive branch to other branches of government will also be considered.

POLS 260. Judicial Branch Politics   **3 credits**

This course focuses on the judicial branch of the American national government. The structure and function of the judiciary will be examined, as well as various theories on how policy is made within this branch. Particular attention will be given to the courts and their relation to criminal justice. The relationship of the judiciary to other branches of government will also be considered.

POLS 280. Debating Political Issues   **3 credits**

This course introduces students to the art of debate. Effectively researching and organizing ideas, presenting thoughts verbally, and listening critically are covered. Current political issues provide the topics debated within this course.

POLS 300. Political Science Research Methods   **3 credits**

This course introduces students to the philosophy and practice of political science research and examines the approaches that researchers use to understand political phenomenon. Students will learn and apply key concepts, including inductive and deductive reasoning, hypothesis construction, operationalization of concepts, measurement, sampling and probability, causal inference, and the logic of controls. In addition, students will gain experience utilizing the introductory tools necessary to prepare for graduate school, law school or applied research in the field.

POLS 314. Constitutional Law I   **3 credits**

This is the first of what is designed to be a two semester course in Constitutional Law. The focus will initially be on the structure, powers, and limitations of the judicial, executive, and legislative branches of the federal government. It will then examine the concept of federalism unique to the American experience. Finally, it will begin the transition to substantive due process rights which will be examined in detail in Constitutional Law II.

POLS 316. Constitutional Law II   **3 credits**

This is the second in what is designed to be a two semester course in Constitutional Law. The course will examine the varied interpretations of the Equal Protections Clause of the 14th Amendment. It will then analyze First Amendment jurisprudence as applied to freedom of expression and religious freedom. It will close with the struggles of the United States Supreme Court to balance the arguably incompatible concepts of freedom and security. Although POLS 314 is not a mandatory prerequisite for this course, students who have not taken POLS 314 will be at a substantial disadvantage.

POLS 370. Moral Issues in Capitalism   **3 credits**

An introduction to the philosophy of objectivism. The student will learn objectivist theory as well as contrasting theories of capitalism (cross listed as BUSI 370).

POLS 380. Interest Group Politics   **3 credits**

This course focuses on outside actors who influence different levels of the American government. The structure and function of the interest groups are examined, as well as various theories on how policy is influenced by these actors. Particular attention is given to the lobbyists and the strategies they utilize in pursuing their preferred policies. The relationship of interest groups to other branches of government is also considered.

POLS 390. Ethical Dilemmas in Policy Making   **3 credits**

This course introduces students to some of the ethical dilemmas policymakers face in crafting policy. In addition, students will have the opportunity to think critically about the ways in which moral and political values come into play in the American policy process,

particularly as they affect non-elected public officials who work in a world shaped by politics. Topics covered include the tensions between ethics and politics, an introduction to various moral theories that relate to contemporary policy debates, and the issues and dilemmas of professional ethics. The course takes an interdisciplinary approach, drawing on applied ethics, politics, and public management for examining contemporary problems in public policy.

POLS 400. Senior Thesis   **3 credits**
This course is designed to demonstrate your accumulated training in Political Science in a single original project, subject to the instructor's approval and under the additional supervision of a faculty mentor. The primary goal of the course is to facilitate student application of the knowledge and skills acquired in the program. Relevant skills include analysis, critical thinking, and integration of information, synthesis of ideas, presentation, and written communication. The course is structured as a seminar with a mixed format and requires significant self-direction and participation by students. *Prerequisite: POLS 300. Note that POLS 300 can be taken in the same semester as POLS 400 with instructor approval.*

POLS 490. EAGLE Internship   **12 credits**
The Political Science EAGLE (Engaged Adaptive Guided Learning Experience) internship program is available to junior or senior Political Science majors who have permission from the Program Coordinator. Students will complete a 40 hour per week, 15-week long internship for 12 hours of course credit. The EAGLE internship program is intended to provide students with an enhanced learning experience unavailable in the classroom.

POLS 492. Internship   **1-11 credits**
This course is available to junior or senior Political Science majors who are unable to complete the full 12 hour EAGLE internship, who have multiple internships rather than a single experience, or who have substantial life experience. All students must complete a minimum of 3 hours of internship credit but the three hours need not be in the same internship. Students can therefore register for POLS 492 more than once.

<div align="center">

PSYCHOLOGY (PSYC)

</div>

PSYC 101. Introduction to Psychology   **3 credits**
This course provides a general introduction to psychology and its approaches to gathering and evaluating evidence about the causes and correlates of behavior. The topics surveyed will include brain and behavior, memory, perception, development across the lifespan, personality, abnormal behavior and psychotherapies. (Credit by Examination available.)

PSYC 212. Life-Span Development   **3 credits**
This course covers physical, cognitive-intellectual, and social-personality development from infancy through old age as well as an introduction to research methods and different theories of developmental psychology.

PSYC 315. Psychological Statistics   **3 credits**
This course provides an intensive interpretation of experimental data in quantitative terms. Topics included are description by ranking and averaging, correlation, regression, probability, inference, t-tests, analysis of variance (ANOVA), Chi square and other nonparametric methods. Prerequisite: SSCI 203. Cross-listed as SSCI 315.

PSYC 340. Ethics in Psychology   **3 credits**
The course focuses on various ethical issues in psychology. Students will explore ethical standards and issues that impact psychology as a science and practice. In this course, students will be introduced to the APA Ethical Standards and Code of Conduct and its application in psychology. In addition, students will explore history of ethics in psychology research.

PSYC 342. Social Psychology   **3 credits**
This course is a survey of the systematic study of social behavior. Interpersonal processes and behaviors related to social phenomena are emphasized by focusing upon such topics as attraction, social perception, aggression, conformity, group dynamics, persuasion, and attitude change.

PSYC 343. Personality   **3 credits**
This course is a survey of current and traditional theories of personality. Various types of personality assessment are demonstrated and evaluated. Prerequisite: PSYC 101.

PSYC 350. Special Topics   **3 credits**
Presents coverage of special interest topics in psychology such as political psychology, sleep and dreaming, and industrial/organizational psychology.

PSYC 351. Human Sexuality   **3 credits**
This course provides an overview of human sexuality from biological, socio-emotional, and social-cultural perspectives. Areas covered include the biological basis of sexuality, sexual behavior, social issues, sexuality and the life cycle, and sexual problems. Special emphasis is given to the ethical and moral aspects of human sexuality.

PSYC 352. Cognitive Psychology   **3 credits**
This course provides an overview of human cognition, including such topics as attention, perception, pattern recognition, memory, language, problem solving, creativity, and decision making. The relevance of the study of human cognition to everyday experiences will be emphasized. Students will actively investigate their own cognitive processes through classroom demonstrations, simulations, and field observations.

PSYC 353. Physiological Psychology   **3 credits**
This course provides the student with an introduction to the study of brain and behavior. The role of the nervous system in movement, sensation, and perception will be covered. Research concerning brain processes involved in memory, attention, learning, and consciousness also will be included. A focus on emotion, stress, and psychopathology will provide the student with knowledge of cutting-edge topics in pathology and psychological disorders.

PSYC 354. Psychology and the Law   **3 credits**
This course explores the relationship between the fields of psychology and the law from the psychological perspective. The major areas of interface between the disciplines are explored, including the values of each discipline, crime and crime investigation, competency and insanity, the trial process, jury decision-making, and suggested reforms to the legal system. Additionally, students are expected to apply their knowledge in a trial reenactment, from jury selection to the rendering of a verdict.

PSYC 355. Advanced Social Psychology   **3 credits**
This course is intended as a follow-up to PSYC 342 – Social Psychology. It will provide in-depth review and discussion of topics first introduced in the previous class, including

attribution, attitude formation and attitude change, social influence, interpersonal relationships, social biases, and pro-social behavior. It is intended that students will cultivate the skills of a competent psychology researcher. Prerequisite: PSYC 342.

PSYC 356. Terrorism — 3 credits
This course explores the multifaceted topic of terrorism. Areas of discussion include the inherent difficulties in defining and identifying terrorism, root causes, including economic, political, religious, and psychological, of terrorism, the impact of terrorism on its victims and the terrorists, and intervention strategies. The role of the media on our perceptions and understanding of terrorism is addressed as a constant theme throughout the course.

PSYC 357. Psychological Aspects of Aging — 3 credits
This course examines human aging from a psychological, social, and biological perspective. Topics include biological health, cognitive and mental health, personality, work/retirement, and social policy relevant to an aging population.

PSYC 358. Health Psychology — 3 credits
This course examines how psychological, social, and biological factors interact with and affect health and illness. The impact of psychological stress on mental and physical health is examined in detail. Ways of coping with stress are also addressed.

PSYC 359. Advanced Developmental Psychology — 3 credits
Students participate in an in-depth analysis of important developmental themes and current research in the field. The course focuses mainly on early development but may also include topics such as adolescence and aging. The course is designed for students who have already taken Lifespan Development and want to explore topics in more depth. Prerequisite: PSYC 212.

PSYC 360. Learning and Memory — 3 credits
This course explores human and animal models of both classical and contemporary theories of learning and memory, including clinical applications. Relevant neuroscience research is also integrated into each topic. Students learn to creatively apply learning concepts to solve real problems.

PSYC 361. Introduction to Clinical Psychology — 3 credits
This course introduces clinical psychology and therapeutic methods, including familiarization with current testing and assessment procedures. Prerequisite: PSYC 101.

PSYC 362. Abnormal Psychology — 3 credits
This course includes a study of the diversity of psychological disorders ranging from stress-related disorders, emotional, affective, social, organic, and psychotic disorders. Coverage will include diagnosis and assessment techniques, theoretical perspectives on etiology and treatment, and consideration of individual and community-based psychotherapies.

PSYC 373. History of Systems and Theories in Psychology — 3 credits
This course includes a comprehensive and historical coverage of systematic and theoretical psychology. The course is designed to provide the student with a basis for critical analysis of the major systems of psychological thought and the major psychological theories. A historical tracing of major schools, notable contributors, and major theories and perspectives will be provided as well as coverage of contemporary trends. Prerequisite: PSYC 101.

PSYC 441. Psychology BA Senior Capstone **3 credits**
This is the capstone course for psychology B.A. majors. Topics to be covered include
ethical considerations, the importance of reliability and validity to research, and seminal
studies in psychology. Students will identify an area of interest in the field, complete a
literature review and submit a formal APA style research paper. Prerequisites: PSYC 101,
315, SSCI 203, or permission of the instructor.

PSYC 451. Experimental Psychology **3 credits**
Experimental design considerations for research studies are the focus of the course. Topic
areas to be covered include hypothesis formation, determination of independent and
dependent variables, control in experimentation, and quasi-experimental designs. Each
student will determine a research problem, complete a literature review and submit an APA
style proposal. Prerequisites: PSYC 101, 315, SSCI 203.

PSYC 452. Thesis **3 credits**
This course is a continuation of PSYC 451. Topic areas to be covered include ethical
considerations, single subject designs, data collection, internal and external validity. Upon
approval of the proposed study submitted for PSYC 451, each student will conduct the
experiment, analyze the data and submit the final thesis in APA format. Prerequisite: PSYC
451.

PSYC 495. Professional Semester **15 credits**
This course gives students an opportunity for an off-campus internship in public or
professional agencies. Prerequisite: Junior or senior standing and permission of the Program
Coordinator.

PSYC 498. Internship **1-4 credits**
This off-campus internship program is available to junior or senior psychology majors who
have permission from the course instructor. Students will complete a minimum of 40
supervised contact hours per credit hour with a maximum of four course credits available.
The internship is intended to provide career-related work experience. Additional
requirements include keeping a journal (log) of experiences and completing a written
reflection for each 40 hours completed. Grading for this course is Pass/Fail. Prerequisites:
Junior or Senior status and instructor permission.

PSYC 499. Independent Study in Psychology **1-4 credits**
Students will be individually supervised in a research or field experience. Prerequisite:
Junior or senior standing and permission of the discipline coordinator.

PUBLIC HEALTH (PUBH)

PUBH 100. Introduction to Public Health **3 credits**
This is an introductory course that focuses on the practice of public health and education.
Students will learn the major responsibilities of a public health specialist and the historical
progression of the profession, as well as, the current and future role of public health and
education. Students will also be introduced to basic health promotion planning,
implementation, and advocacy principles with an added emphasis on health behaviors,
exercise prescription, professional associations, and credentialing.

PUBH 220. Introduction to Epidemiology **3 credits**
This introductory course explores the historical roots of the practice of epidemiology. The
course will provide students with a foundation in the study of the distributions of health-

related states or events (including injury and disease) in human populations and the control of these health-related problems. This course will cover the foundations of epidemiology including definitions, concepts, and applications; the historic developments in epidemiology; disease concepts; descriptive and analytic epidemiology; causal inference; field, chronic disease, and clinical epidemiology.

PUBH 250. Public Health Policy   **3 credits**
This course focuses on understanding the processes, complexities, and approach to health policy at the levels of federal, state, local, and private sector policy makers. The course seeks to examine the policymaking process at each of these levels and discuss how healthcare policy can inform the execution of public health activity. The course looks to review contemporary issues in public health policy, analyze and critique public health policy, and develop skills in communication to policy makers to ensure health is at the center of all legislative processes. Topics explored included but are not limited to public health policy involving environmental health policy, health insurance policy such as Medicaid/Medicare and Affordable Care Act, and drug policy.

PUBH 310. Public & Global Health   **3 credits**
The purpose of this course is to introduce students to critical global health issues and ways to address or solve them. The curriculum focuses on the following global and public health topics: socioeconomic and environmental determinants of health, HIV/AIDS, common infectious diseases, cancer, reproductive health, and mental health. The course also looks at what we can do as a society to promote health through the ages.

PUBH 320. Socioeconomic Determinants of Health   **3 credits**
Social determinants of health (SDH) refer to the realities of social conditions, phenomena, and systems that largely determine a person's health status and trajectory. SDH place people from different socio-demographic and socioeconomic groups (social class, gender, sexuality, race, ethnicity, and geographic origin) at varying risk of poor heath, quality of heath, and premature death. The aim of this course will be to introduce the core concepts of the SDH and to explore how they influence the individual, communities, and populations. Further, this course will explore social, psychological, and cultural determinants of health behavior and consider their meaning for lay people, public health and clinical professionals. Specifically, the intent of this course is to introduce students to the SDH, health disparities, and approaches to address the social determinants of health and to lessen health disparities.

PUBH 340. Exercise & Psychological Mindfulness   **3 credits**
This course is designed to promote greater awareness, understanding and ownership of the multiple dimensions of mindfulness and well-being. It provides students with a wholistic and dynamic approach to understanding self in order to then provide more mindful services to clients in the healthcare or physical fitness realms. Through dialog, experiential activities, and reflection, students explore theory and practice while encompassing mental, emotional, physical, spiritual, environmental, social, and vocational issues.

PUBH-350 Appalachian Health & Well   **3 credits**

This course explores the health of rural and urban Appalachians, particularly those in West Virginia, and the factors influencing their health and wellbeing. Specific areas of concern, and medical crisis, such as TYPE II Diabetes, Substance Use Disorder, HIV/AIDS, obesity, cardiovascular and pulmonary disease will be given special attention. Consideration will be

given to structural elements that elucidate the state and development of health/wellness and health care delivery services in Appalachia.

PUBH 350. Public Health Policy   **3 credits**

This course focuses on understanding the processes, complexities, and approach to health policy at the levels of federal, state, local, and private sector policy makers. The course seeks to examine the policymaking process at each of these levels and discuss how healthcare policy can inform the execution of public health activity. The course looks to review contemporary issues in public health policy, analyze and critique public health policy, and develop skills in communication to policy makers to ensure health is at the center of all legislative processes. Topics explored included but are not limited to public health policy involving environmental health policy, health insurance policy such as Medicaid/Medicare and Affordable Care Act, and drug policy.

PUBH 475. Public Health Capstone   **3 credits**

A capstone course for public health majors that focuses on the application and demonstration of skills needed to plan, implement, and evaluate health promotion programs in a variety of settings.

PUBH 497. Internship in Public Health   **3 credits**

Students acquire professional experience in their chosen field. Internship arrangements between the student and instructor must be solidified prior to enrolling in this course.

PUBH 499. Independent Study in Public Health   **1-4 credits**

Students will be individually supervised in research or field experience. Prerequisite: Junior or Senior academically standing in the Public Health Program.

RADIOLOGIC SCIENCE (RADI)

RADI 101. Introduction to Radiologic Science   **2 credits**

The course introduces beginning Radiologic Science students to the foundational concepts for their academic curriculum and professional careers. Concepts related to the development of the individual as a health care professional are examined through career exploration and the investigation of commonalties of the health professions. Students study the historical development of Radiologic Science, legal and ethical concepts, credentialing, interdisciplinary collaboration and networking, impacting legislation and individual accountability. Students are encouraged to work independently and in small groups to achieve the desired competencies and develop first-level competencies in communication, team-building, critical thinking, and research. Students will be expected to demonstrate the ability to use word processing and to develop a power point presentation.

RADI 102. Radiation Physics   **3 credits**

This course will provide the student with a knowledge of basic physics including selected topics in units of measurement, atomic physics, electricity, magnetism, x-ray production, electrical circuits and x-ray circuits.

RADI 201. Radiographic Positioning, I   **3 credits**

This course is designed to acquaint the student with the basic body positions used in radiography. This includes anatomy, positioning nomenclature and anatomical landmarks. This didactic course work is integrated into the clinical setting.

RADI 201L. Clinical Lab I   **3 credits**

This is the first in a series of clinical courses that will provide the student with the

necessary clinical education to become competent in the medical imaging field. The student will become familiar with the basic equipment within the assigned clinic, and shall begin to master skills necessary to function in the medical imaging departments. This unit is designed to provide the student with the opportunity to achieve knowledge and skill necessary to perform standard radiographic procedures with concentration in chest, abdomen, and extremities. A module in Radiation Safety will be included as part of RADI 201L.

RADI 202. Osteology   3 credits
This course is designed to give the student an in-depth knowledge of the human skeletal system with a specific emphasis to the field of radiology. This class focuses on anatomical terminology, units of body structure, a comprehensive review of the joints of the body, and the bones composing the appendicular skeleton and the axial skeleton.

RADI 210. Radiographic Processing   1 credit
This course is an introductory course that will provide the student with the basic information on how to process digital images. Requirements for the processing area will be identified; Historical processing methods, image receptors, digital imaging systems, artifacts and picture archiving systems will be discussed. Processing procedures and artifacts will be described. Prerequisites: RADI 201, 201L, 202.

RADI 211. Radiographic Positioning II   3 credits
This course is designed to provide the student with the knowledge and skill necessary to perform standard radiographic procedures with concentration in fluoroscopic exam, spine, headwork procedures, and bony thorax. Consideration will be given to the production of radiographs of optimal diagnostic quality. Radiograph evaluation will include critiquing for contrast/gray scale, density/brightness, detail, and positioning. Laboratory experience will be used to complement the classroom portion of the course. The course is a continuation of RADI 201 and is available only to students who are enrolled in or have successfully completed RADI 201.

RADI 211L Clinical Lab II   3 credits
This is the second in a series of clinical courses that will provide the student with the necessary clinical education to become competent in the medical imaging field. All the courses in this series take place in the assigned clinical areas, and the student will continually be exposed to actual patient handling and care. The student will continue to master basic skills necessary toward becoming a competent radiographer. The student will also continue to master basic radiographic procedures on which he/she has proven competent. The student will have the opportunity to achieve knowledge and skill necessary to perform standard procedures with concentration in chest/abdomen, extremity, fluoroscopic, bony thorax, spine, and headwork procedures. The hours spent in the clinical lab will be divided among day and evening rotations. Prerequisites: RADI 201, 201L, 202.

RADI 212. Radiographic Exposure   3 credits
This course discusses the construction and operation of radiographic tubes, property and production of x-rays, and factors affecting the quality of a radiograph. The class information includes production of radiation and reaction with matter. Radiographic contrast/gray scale, density/brightness, and detail will be emphasized. Prerequisites: RADI 201, 201L, 202.

RADI 301. Radiographic Positioning III   3 credits
Advanced positioning of the patient including discussion of special procedures and the equipment used during the advanced procedures will be covered. Study of the position of major blood vessels, structures, and organs of the head, neck, thorax, abdomen, and pelvis. Venipuncture and contrast media injection lecture and lab will be emphasized. Prerequisites: RADI 211, 211L.

RADI 301L. Clinical Lab III   6 credits
The third in a series of clinical courses that will provide the student with the opportunity to gain competence in clinical education in the art and science of radiography. The student shall continue to expand knowledge and skills in obtaining health histories for patient of all ages. The student shall perform vital signs and practice physical assessments during contrast media procedures. The student shall continue to practice patient education skills and continue developing sensitivity to patient's needs. This course will clinically integrate headwork and advanced procedure examinations. The student shall continue to demonstrate the skills required to assess patient condition and then formulate techniques and position routine radiologic examinations under direct or indirect supervision of a registered radiographer, depending on his/her level of competency. The hours spent in clinical lab will be divided among day and evening rotations. Prerequisites: RADI 211, 211L.

RADI 302. Cross Sectional Anatomy   1 credit
This course is designed to include regional anatomy in coronal, sagittal, and axial images, oblique sections, and three-dimensional reconstruction with emphasis and applications toward medical imaging such as Computed Tomography, Magnetic Resonance Imaging, and Diagnostic Sonography. Prerequisites: RADI 211, 211L.

RADI 304. Imaging Equipment   3 credits
This course will provide the student with knowledge of equipment routinely utilized to produce diagnostic images. Much of the course focus is x-ray circuitry and fluoroscopic equipment. Also included is mobile and digital equipment. Various recording media and techniques are discussed. Prerequisites: RADI 301, 301L, 311.

RADI 311. Radiology Pathology   2 credits
A study of the various diseases and recognition between bacterial and viral organisms will be covered. The student will also recognize conditions of illness involving the different systems of the body and the pathological effects of radiographs Prerequisites: RADI 211, 211L.

RADI 311L. Clinical Lab IV   6 credits
The fourth in a series of clinical courses that will provide the student with the opportunity to gain competence in clinical education in the art and science of radiography. The student shall continue to expand knowledge and skills in obtaining health histories for patient of all ages. Clinical experience will be gained under the direct and indirect supervision of accredited professionals. Students will have opportunities to perform procedures on more critically ill patients and continue to practice physical assessment skills. Students will learn to adapt routine positioning and technique procedures determined by patient condition. Pharmacology will be delivered 1 hour each week as part of RADI 311L. The student will perform venipuncture competency during this clinical course. Clinical experience will be scheduled during both daytime and evening shift hours. Prerequisites: RADI 301, 301L.

RADI 320/320L. Cardio-Vascular Imaging   3 credits

RADI students will gain knowledge of the history, equipment, principles, imaging procedures, disease pathologies, patient care, and contrast media relative to CVIT. Lab experience will also be gained to prepare the learner for application in the clinical area. Prerequisite: consent of the instructor.

RADI 321/321L. Computed Tomography Imaging   3 credits

RADI students who selected Computed Tomography (CT), as their choice of modality, will gain knowledge of the history, equipment, principles, imaging procedures, disease pathologies, patient care, and contrast media relative to CT. Prerequisite: consent of the instructor.

RADI 322/322L. Mammography   2 credits

This course is designed to provide mammography education to students enrolled in the Radiologic Science Program and/or to registered radiologic technologists who desire to continue their education in an area of advanced specialization. The course content will encompass a sequential and complete mammographic study to include: history, breast anatomy, physiology, and pathology, equipment and application of technique, breast positioning, intervention procedures, quality control, and patient relations. The clinical education component of the mammography modality is not included in this course. Radiographers who can document clinical experience may be exempt from the clinical component. Prerequisite: consent of the instructor.

RADI 323/323L. Magnetic Resonance Imaging   3 credits

Students will gain knowledge of patient care, imaging procedures, data acquisition and processing and physical principles of image formation relative to Magnetic Resonance Imaging. Prerequisite: consent of the instructor.

RADI 324/324L Diagnostic Medical Sonography   3 credits

This course provides the student with basic knowledge of ultrasound principles, equipment, imaging procedures/techniques, normal anatomy, bioeffects/safety, and quality assurance relative to ultrasound. This didactic course and lab serve **only as an introduction to diagnostic medical sonography and is not intended to provide the student with a complete educational program for ultrasound.** This is a voluntary course for the student who chooses to study diagnostic medical sonography. Completion of this course will depend on the student's initiative and ability.

RADI 325/325L. Vascular Interventional   3 credits

RADI students will gain knowledge of the history, equipment, principles, imaging procedures, disease pathologies, patient care, and contrast media relative to vascular interventional radiography. The lab portion of the class will give students experience in the clinical setting in the vascular lab. RADI 325L is directly linked to RADI 325. Both courses are combined for 3 credit hours. Prerequisite: consent of the instructor.

RADI 401L. Clinical Lab V   5 credits

The fifth in a series of clinical courses that will provide the student with the opportunity to gain competence in clinical education in the art and science of radiography. The student shall continue to expand knowledge and skills in obtaining quality images and providing quality patient care in all areas. The first phase of graduate competencies will be conducted during this unit. Prerequisites: RADI 311, 311L.

RADI 405. Radiation Biology / Advanced Radiation Protection   3 credits
Focus on understanding the effects of ionizing radiation in the biologic systems with the public right to minimal radiation exposure. Discussion on genetic and somatic radiation effects including radiation syndromes and radiation oncology will be presented. Prerequisites: RADI 311, 311L.

RADI 407. Radiologic Science Digital Processing and Quality Manageme   3 credits

Principles of practice for effective digital processing and quality management protocols. Topics covered include a historical perspective of pre-electronic imaging, components of digital imaging, image processing and display including digital informatics, quality control of imaging equipment including federal guidelines

Prerequisites: RADI 304

RADI 410. Radiologic Science Senior Seminar   3 credits
The course will integrate all didactic and clinical knowledge obtained during the entire Radiologic Science Program. It will serve as an evaluation and assessment of the student's progress and readiness to write the ARRT Registry Examination following graduation. Prerequisites: All RADI courses up to the final spring semester.

RADI 411L. Clinical Lab VI   5 credits
A final clinical rotation to evaluate competency levels of students preparing to become registered radiographers. Students will be given the opportunity to complete any remaining clinical objectives and competencies within the framework of this unit. The student may rotate through each of the five clinical education centers and be scheduled on both day and evening shifts. Prerequisites: RADI 401L.

RADI 420L-425L. Specialization Clinical Lab   3 credits
This is the clinical education component of the professional specialization courses. Students will be given an opportunity to perform examinations in their respective imaging modalities at one or more of the program's hospital affiliates. Specialties areas included: RADI 420L, Cardiac Interventional; 421L, CT; 422L, Mammography; 423L, MRI; 424L US; 425L Vascular Interventional. Prerequisites: Completion of RADI 320-325, RADI 320-L-325L and/or consent of program chair.

RADI 498. Clinical Internship   1-6 credits
This course is designed and arranged to meet the individual academic needs of each upper level student. It allows students the opportunity to continue practicing the skills and knowledge previously learned in the clinical setting in each respective imaging modality and provides the opportunity for competency achievement for the ARRT modality exams. Rotations during this internship may include diagnostic imaging, CT, CV, mammography, US, or MRI. Prerequisites: Consent of the Department Chair or Clinical Coordinator required.

RADIOLOGIC TECHNOLOGY (RADT)

RADT 101. Imaging Procedure I   2 credits
Presents knowledge base necessary for performing entry level diagnostic studies related to medical imaging. Co-requisites: MATH 120, BIOL 212, 212L, RADT 101L, 107, 107L.

RADT 101L. Imaging Procedures Lab I   2 credits
In conjunction with 101, provides hands-on demonstration and positioning using the on-

campus lab. Review of radiographs for pertinent anatomic structures as well as for diagnostic quality. Radiographic analysis includes positioning, technique, and problem resolution. Co-requisites: MATH120, BIOL212, 212L, RADT101,107,107L.

RADT 107. Introduction to Radiology and Patient Care   **1 credit**
Introduction to the clinical program and the health care delivery system; covers various aspects of the hospital organization, the department of radiology, and medical ethics and law. Includes transfer techniques, proper body mechanics, and standard precautions. Co-requisites: MATH 120, BIOL 212, 212L, RADT 101, 101L, 107L.

RADT 107L. Introduction to Radiology and Patient Care Laboratory   **1 credit**
Lab experience for 107. Application of knowledge acquired in 107 through practice in a lab environment. Co-requisites: MATH120, BIOL212, 212L, RADT101, 101L, 107.

RADT 108. Radiologic Clinical I   **2 credits**
First course in clinical series. Incorporates practical experience in a variety of hospital clinical settings. Addresses patient care principles, radiographic positioning, image critique, radiation protection, and principles of exposure using a competency-based approach. Prerequisites: MATH 120, BIOL 212, 212L, RADT 101, 101L, 107, 107L. Co-requisites: SSCI 105, ENGL 101, RADT 111, 111L, 115, 125.

RADT 111. Imaging Procedures II   **2 credits**
Presents knowledge base necessary for performing diagnostic studies beyond those presented in RADT 101. These are considered intermediate level procedures. Prerequisites: MATH 120, BIOL 212, 212L, RADT 101, 101L, 107, 107L. Co-requisites: SSCI 105, ENGL 101, RADT 108, 111L, 115, 125.

RADT 111L. Imaging Procedures Lab II   **2 credits**
Provides hands-on demonstration and positioning using the on-campus lab. Review of radiographs for pertinent anatomic structures as well as for diagnostic quality. Radiographic analysis includes positioning, technique, and problem resolution. Prerequisites: MATH 120, BIOL 212, 212L, RADT 101, 101L, 107, 107L. Co-requisites: SSCI 105, ENGL 101, RADT 108, 111, 115, 125.

RADT 115. Radiographic Physics I   **3 credits**
Examination of the beginning concepts of the physics behind the production of ionizing radiation including the fundamentals of technical mathematics and electromagnetism. X-ray generating equipment, principles of operation, and beginning contrast and density are also included. Prerequisites: MATH 120, BIOL 212, 212L, RADT 101, 101L, 107, 107L. Co-requisites: SSCI 105, ENGL 101, RADT 108, 111, 111L.

RADT 118. Radiologic Clinical II   **1 credit**
Second course in clinical series. Incorporates practical experience in a variety of hospital clinical settings. Addresses patient care principles, radiographic positioning, image critique, radiation protection and principles of exposure using a competency-based approach. Students observe and participate in radiographic examinations by applying knowledge base acquired in 101 and 108. Prerequisites: MATH 120, BIOL 212, 212L, SSCI 105, ENGL 101, RADT 101, 101L, 107, 107L, 108, 111, 111L, 115, 125. Co-requisites: ENGL 102.

RADT 125. Radiologic Physics II   **3 credits**
Builds on concepts learned in 115 and applies them to understanding X-ray production, interaction of photons with matter, and radiographic equipment. Prerequisites: MATH 120,

BIOL 212, 212L, RADT 101, 101L, 107, 107L, 115. Co-requisites: SSCI 105, ENGL 101, RADT 108, 111, 111L.

RADT 128. Radiologic Clinical III   1 credit
Third course in clinical series. Addresses patient care principles, radiographic positioning, image critique, radiation protection, and principles of exposure using a competency-based approach. Students observe and participate in radiographic examinations by applying knowledge base acquired in previous courses. Prerequisites: MATH 120, BIOL 212, 212L, SSCI 105, ENGL 101, ENGL 102, RADT 101, 101L, 107, 107L, 108, 111, 111L, 115, 118, 125. Co-requisites: RADT 206.

RADT 201. Imaging Procedures III   2 credits
Presents the knowledge base necessary for performing diagnostic studies beyond those presented in RADT 101 and 111. This course presents advanced level imaging procedures. Prerequisites: MATH 120, BIOL 212, 212L, SSCI 105, ENGL 101, ENGL 102, RADT 101, 101L, 107, 107L, 108, 111, 111L, 115, 118, 125, 128, 206. Co-requisites: RADT 201L, 203, 204, 208, 210.

RADT 201L. Imaging Procedures III Lab   2 credits
In conjunction with 201, provides hands-on demonstration and positioning using the on-campus lab. Review of radiographs for pertinent anatomic structures as well as for diagnostic quality. Radiographic analysis includes positioning, technique, and problem resolution. Prerequisites: MATH 120, BIOL 212, 212L, SSCI 105, ENGL 101, ENGL 102, RADT 101, 101L, 107, 107L, 108, 111, 111L, 115, 118, 125, 128, 206. Co- requisites: RADT 201, 203, 204, 208, 210.

RADT 203. Image Acquisition   3 credits
Study of concepts and practical applications for producing quality radiographs, including brightness and contrast, technique variations, spatial resolution, and distortion. Incorporates concepts of equipment usage including image receptors, flat panel detectors, beam restrictors, and automatic exposure control. Prerequisites: MATH 120, BIOL 212, 212L, SSCI 105, ENGL 101, ENGL 102, RADT 101, 101L, 107, 107L, 108, 111, 111L, 115, 118, 125, 128, 206. Co-requisites: RADT 201, 201L, 204, 208, 210.

RADT 204. Radiobiology/Radiation Protection   2 credits
Studies the effects of ionizing radiation on the body at the molecular, cellular, tissue, and organ levels. Includes genetic and somatic effects as well as degrees of acute radiation lethality. Encompasses principles of protection for both patient and personnel, including health and safety regulations in such areas as protective equipment and personnel and area monitoring. Prerequisites: MATH 120, BIOL 212, 212L, SSCI 105, ENGL 101, ENGL 102, RADT 101, 101L, 107, 107L, 108, 111, 111L, 115, 118, 125, 128, 206. Co- requisites: RADT 201, 201L, 203, 208, 210.

RADT 206. Quality Assurance   1 credit
Principles of practice for effective imaging quality control. Addresses equipment calibration, digital image processing, repeat rate, artifacts, and various quality standards. Prerequisites: MATH 120, BIOL 212, 212L, SSCI 105, ENGL 101, ENGL 102, RADT 101, 101L, 107, 107L, 108, 111, 111L, 115, 118, 125. Co-requisites: RADT 128.

RADT 208. Radiologic Clinical IV   3 credits
Fourth course in clinical series. Addresses patient care principles, radiographic positioning, image critique, radiation protection, and principles of exposure using a competency-based

approach. Students observe and participate in radiographic examinations by applying knowledge base acquired in previous courses. Prerequisites: MATH 120, BIOL 212, 212L, SSCI 105, ENGL 101, ENGL 102, RADT 101, 101L, 107, 107L, 108, 111, 111L, 115, 118, 125, 128, 206. Co-requisites: RADT 201, 201L, 203, 204, 210.

RADT 210. Radiologic Pharmacology and Drug Administration   **2 credits**

Introduces basic pharmacological concepts including pharmokinetics, pharmodynamics, contrast administration, venipuncture, and overall patient care during these processes and procedures. Prerequisites: MATH 120, BIOL 212, 212L, SSCI 105, ENGL 101, ENGL 102, RADT 101, 101L, 107, 107L, 108, 111, 111L, 115, 118, 125, 128, 206. Co-requisites: RADT 201, 201L, 203, 204, 208.

RADT 217. Radiographic Pathology   **2 credits**

Focuses on disease and injury processes throughout the body's systems and their radiographic appearance. Includes principles of imaging surrounding these pathologies. Prerequisites: MATH 120, BIOL 212, 212L, SSCI 105, ENGL 101, ENGL 102, RADT 101, 101L, 107, 107L, 108, 111, 111L, 115, 118, 125, 128, 201, 201L, 203, 204, 206, 208, 210. Co-requisites: RADT 218, 229, 230.

RADT 218. Radiologic Clinical V   **3 credits**

Fifth course in clinical series. Addresses patient care principles, radiographic positioning, image critique, radiation protection, and principles of exposure using a competency-based approach. Students observe and participate in radiographic examinations by applying knowledge base acquired in previous courses. Prerequisites: MATH 120, BIOL 212, 212L, SSCI 105, ENGL 101, ENGL 102, RADT 101, 101L, 107, 107L, 108, 111, 111L, 115, 118, 125, 128, 201, 201L, 203, 204, 206, 208, 210. Co-requisites: RADT 217, 229, 230.

RADT 229. Advanced Imaging   **1 credit**

Introduction to advanced imaging modalities including CT, MRI, and mammography, as well as evaluation of radiographs and digital images produced. Includes principles surrounding ultrasound, nuclear medicine, and PET imaging. Prerequisites: MATH 120, BIOL 212, 212L, SSCI 105, ENGL 101, ENGL 102, RADT 101, 101L, 107, 107L, 108, 111, 111L, 115, 118, 125, 128, 201, 201L, 203, 204, 206, 208, 210. Co-requisites: RADT 217, 218, 230.

RADT 230. Capstone Seminar   **3 credits**

Generalized review of all radiologic theory taught in prior courses and extensive practice testing in final preparation for the American Registry of Radiologic Technologists registry examination. Also includes resume and interview preparation Prerequisites: MATH 120, BIOL 212, 212L, SSCI 105, ENGL 101, ENGL 102, RADT 101, 101L, 107, 107L, 108, 111, 111L, 115, 118, 125, 128, 201, 201L, 203, 204, 206, 208, 210. Co-requisites: RADT 211, 217, 218, 229.

RADT 211. Imaging Procedure IV   **3 credits**

Generalized review of all radiologic theory taught in prior imaging procedures courses, introduction of new procedures, extensive practice testing in final preparation for the American Registry of Radiologic Technologists Prerequisites: MATH 120, BIOL 212, 212L, SSCI 105, ENGL 101, ENGL 102, RADT 101, 101L, 107, 107L, 108, 111, 111L, 115, 118, 125, 128, 201, 201L, 203, 204, 206, 208, 210. Co-requisites: RADT 217, 218, 229, 230.

SSCI 104. Social Issues: The Status of Women   **3 credits**
This course will explore the status of women, in the United States and internationally, and attempt to explain how we arrived at current relative status. The course will examine social institutions in the attempt to best understand how women (and men) are socialized in to the roles that they currently hold. The course will examine historical and modern contexts of gender status. Topically, there will include a historical overview as well as exploration into such modern social problems as female body image, sexual harassment, the *me too* campaign, the national women's march, and beyond.

SSCI 105. Issues in Social Science   **3 credits**
This is an introductory course offered to provide a foundational understanding of social institutions. This course focuses on the social, political and economic structures of society. Social problems and political issues will be addressed. Studies in this course will prepare students to evaluate society from an informed, culturally competent perspective that reveals that individuals and groups largely act in accordance with their socialized experience.

SSCI 106. Social Science Issues in Appalachia   **3 credits**
This course provides students with foundational critical thinking, communication, and research skills necessary for college success. The course focuses on the social institutions (politics, education, economics, religion, and family) of Appalachian society from the first settlers through the development of an economy based on extractive industries. This course will also look at issues such as Appalachian culture, poverty, racial and gender discrimination, and mechanisms of social change.

SSCI 203. Methods for the Behavioral Sciences   **3 credits**
An introduction to the basic techniques used by social scientists to study and analyze social phenomena. The course focuses primarily on research design, but also includes an introduction to descriptive statistics.

SSCI 204. Methods for the Social Sciences   **3 credits**
A modular-based introduction to techniques and methods used in the social sciences. The first two modules focus on questions of hypothesis testing, research design and basic descriptive statistics. Module three is discipline specific dealing with the unique methodologies of History or Public Policy.

SSCI 221. Information and Research Strategies   **3 credits**
The course begins with an introduction to basic library information skills and progresses in a modular format to include skills necessary for searching electronic databases, print resources, and the internet, and for critically evaluating information sources and identifying ethical and legal issues in the online environment.

SSCI 310. West Virginia and the Appalachian Region   **3 credits**
The course examines the social, political and economic development as well as the geology of West Virginia in a broad historical context. The course incudes a study of West Virginia state government and the broader Appalachian region.

SSCI 315. Statistics for the Social Sciences   **3 credits**
An intensive interpretation of experimental data in quantitative terms. Topics included are description by ranking and averaging, linear correlation, regression, probability, inference, t-

tests, analysis of variance (ANOVA), Chi square and other nonparametric methods. Prerequisite: SSCI 203. Cross-listed as PSYC 315.

SSCI 320. Computer Assisted Research in the Social Sciences　　　**3 credits**
Students are instructed in the use of the Statistical Package for the Social Sciences software (SPSS) to analyze and evaluate data from survey and experimental investigations. Prerequisites: SSCI 203, SSCI 315 or PSYC 315, permission of instructor.

SSCI 350. Topics in Social Sciences　　　**1-3 credits**
The course will include topics devoted to the study of interdisciplinary subjects within the social sciences.

SSCI 400. Seminar in Social Science　　　**3 credits**
A course designed to provide senior students a capstone opportunity for independent research and investigation in Public Policy, History and Experimental Psychology. Psychology students enroll in PSYC 452. Prerequisites: Completion of required courses appropriate to the major.

SOCIOLOGY (SOCI)

SOCI 221. Juvenile Delinquency and Criminology　　　**3 credits**
A study of the causes of delinquency and crime. Attention is given to agencies dealing with delinquents and crime, as well as methods of rehabilitation and penal institutions.

SOCI 322. Marriage and Family Relationships　　　**3 credits**
A comparative study of marriage and the family with particular attention to the influence on the family of current social and economic conditions. Discussions of courtship, marriage, and problems of divorce will be included.

SPEECH (SPCH)

SPCH 103. Oral Communication Fundamentals　　　**3 credits**
Students demonstrate proficiency in everyday communication including interpersonal communication, group problem solving, and impromptu, informative and persuasive speaking. Organization of ideas and control of mind and body are stressed in varied speaking projects.

SPORT BUSINESS (SPBU)

SPBU 101. Introduction to Sport Business　　　**3 credits**
An overview of sport business through a basic introduction into the conduct and administration of many different sport areas. It is designed to offer students an insight to the career opportunities available in sport business and start their development toward a sport business career that meets their aptitude and interest. Topics of discussion will include overviews of interscholastic, intercollegiate and professional sport programs, international sport, sponsorship, event management, marketing, facility management and broadcasting/communications within the sport industry. (offered fall and spring).

SPBU 201. History of Sport in America　　　**3 credits**
A study of the development of sport in American Society from the colonial period to the present. Students will examine topics such as: race, social class, gender, economics, education, and mass media and how each topic relates to the historical perspective of sport in America. Students will learn how the history of sport has led American society to its current state of sport development. (offered fall of odd years).

SPBU 202. International Sport   **3 credits**

A study of the global perspectives of the sport industry. Students will explore the role of politics, culture, social practices and class on sport practices internationally. The geographic distribution of sports and the popularity of different sports around the world will also be discussed. Sport business specific study abroad trips may be offered in some years. Prerequisites: SPBU 101.

SPBU 220. Coaching Theory   **3 credits**

A theoretical and practical introduction to coaching theory. The content of the course will focus on the theory of coaching and developing methods of application in the practical setting. Class material will focus on tools needed to discover and apply coaching styles to develop a personal coaching philosophy. Topics will include leadership, creating a culture, team building, program management, scheduling, recruiting and fundraising. Prerequisites: SPBU 101. (offered spring).

SPBU 225. Sport Media   **3 credits**

An overview of the media's role in sport. Topics include marketing, media, promotion, public relations, press releases and the influence of media coverage. Emphasis will be on sport reporting, writing, and media sports on radio, TV, Internet and print media. Sport coverage will be explored at the high school, college and professional levels. Additional emphasis will be placed on sport's statistics. Prerequisites: SPBU 101, ENGL 102, COMM 103. (offered spring).

SPBU 250. Social Issues in Sport   **3 credits**

A study of the role of sport in our society and social issues as they apply to sport and life. Students will critically examine sociological issues and controversies surrounding sport and their relationship to business managers in sport organizations. Topics will include an introduction to sport and society, sociological theories, youth sports, deviance, violence, gender, ethnicity, social class, the economy, religion, politics, gay/lesbian issues, education and the media. Prerequisite SPBU 101.

SPBU 298. Practicum Experience   **1-3 credits**

A practical opportunity is an introductory field experience in sport business. The practicum experience is designed to expose students to a wide variety of concentrations or specializations in the field such as marketing, sales, ticketing, sponsorship, facility management, advertising and public relations. The course will allow the student to explore career options in a practical work setting. Students may receive 1-3 hours of academic credit for this course depending on the number of practicum hours worked by the student. Students must work 40 practicum hours for each hour of academic credit desired. This course is repeatable twice, so a student may get credit for a maximum of three (3) credits for the course. All practicum experience site proposals must be pre- approved by the program coordinator. Prerequisite: SPBU 101. (offered fall, spring and summer).

SPBU 301. Sport Marketing   **3 credits**

The purpose of this course is to analyze marketing, promotions and fund-raising principles, techniques and strategies as they relate to athletics and the sport industry. Students will also study sales and sponsorship in sports. Personal selling techniques, customer service, and basic principles of sport sponsorship will also be addressed. Students will develop a marketing plan and perform a formal presentation of that proposal. Prerequisites: SPBU 101, MRKT 321. (offered spring).

SPBU 310. Recreation/Fitness Management   **3 credits**
The content of this course is designed to examine the management principles associated
with Recreation and Fitness Management. SPBU 310 will focus on theories of recreational
and fitness management and develop methods of application in the practical setting. Topics
will include fitness operations, intramurals and extramurals, human resource management,
tournament design, outdoor recreation, branding and event operations. Prerequisite SPBU
101. (offered fall).

SPBU 320. Facility/Event Management   **3 credits**
Students will be offered a theoretical and practical introduction to sport facility and event
management. The course will focus on the theory of facility and event management and
develop methods of application in the practical setting. The students will develop, organize
and run a major event in the community. Class material will focus on tools needed to run an
event. Topics will include planning and design, facility management, risk management,
marketing, advertising, public relations and event operations. Prerequisite SPBU 101,
SPBU 310. (offered spring).

SPBU 325. Sport Analytics I   **3 credits**
This course will provide students with then knowledge of the research process, including
research design, sampling methods, data collection, statistical analysis, and interpreting
results. Students will learn how these statistical processes are used to make decisions within
the sport industry and will begin the design process of a personalized research project
within the context of their desired sport. (offered fall)

SPBU 340. Sport Economics   **3 credits**
Students will gain an understanding of economic impact analysis, franchise valuation, and
feasibility studies in sport. The course explores the areas of facility/event financing, the
economics of collegiate sport, and sport organization funding. Students will be provided
with an introduction to ticket pricing strategies, elasticity of demand, economic risk, and
sponsorship analysis. Prerequisite ECON 201, ECON 202, SPBU 101. (offered fall).

SPBU 360. Sport & Business Psychology   **3 credits**
This course is an introduction to psychological issues as they apply to sport and business.
The course will focus on understanding sport and business environments, group processes,
the individual participants and enhancing performance. Topics will include an introduction
to the psychology of sport, personality traits, motivation, leadership, anxiety, stress, arousal,
competition, cooperation, feedback, reinforcement, group cohesion, communication and
imagery. (offered fall).

SPBU 380. Sport Journalism   **3 credits**
This course focuses on the study of journalism within sports. Students apply their
knowledge of media and journalism to sport writing. Students will be introduced to feature
writing, game and event coverage, opinion writing, and investigative reporting within sport.
Alternate mediums and the publishing process are discussed. Prerequisite SPBU 101,
ICOM 221. (offered spring).

SPBU 425X Sport Analytics II   **3 credits**
This courses provides students with the study of statistical methods and applied analytical
processes that aid in decision making within the sport industry. Topics include applying
analytics to athletic performance, injury prevention and rehabilitation, and core business
processes. Prerequisite: SPBU 101 and SPBU 325. (offered spring).

SPBU 435 Sport Ethics   **3 credits**
Ethics and morality in the management of sport will be examined in 435. The content of the course will focus on understanding ethical theories and critical thinking guidelines and using them as a basis for making sound managerial decisions. Ethical decision making will be discussed in relation to increased productivity, enhanced public relations and an increase in long term profitability. Topics will include an introduction to ethical and moral issues, ethical theories, personal ethics, professional ethics, codes of ethics, ethical decision making, ethics in marketing operations and ethical human resource management. Students will be actively involved in the ethical decision-making process in the classroom. Students complete the NASBA Ethical Leadership Certification Program as part of the course. Prerequisite: SPBU 101 and senior standing. (offered spring).

SPBU 460. Sport Law   **3 credits**
The content of 460 covers various amateur sport law issues and will focus on negligence, risk management and criminal acts in recreation and sport business. Topics to be discussed are the legal system, legal research, negligence, liability, waivers, emergency care, criminal liability, fiduciary duty, hazing, risk and crowd management, contracts, Title IX, drug testing, antitrust law and trademark law. Prerequisite: SPBU 101 and senior standing. (offered fall).

SPBU 490. Senior Seminar   **1 credit**
Senior Seminar allows students an opportunity to explore the areas of the sport industry in which they may want to pursue a career. It also offers the students time, resources and opportunity to apply for employment. Students will research internships/full time positions, contact organizations and essentially take the first step to starting their professional careers. Networking is emphasized as a method to gain entrance into sport organizations. Students will share their contacts with others in the classroom through seminar discussions and individual presentations. Professionalism will be expected in creating cover letters and resumes, developing interview skills and producing follow-up materials. Prerequisites: Senior standing and approval of program director. (offered fall).

SPBU 498. Internship in Sport Business   **3 credits**
The internship experience is designed to place the student in the field with a capable supervisor for the purpose of gaining work experience and exposure to techniques, methodologies, and procedures utilized in the sport industry work place. The student is evaluated on the quality and timely submission of task and responsibility logs, written assignments, the major project, self-evaluation of the experience and an evaluation from the site supervisor. Prerequisites: 108 credit hours, all other required SPBU and Business courses for graduation and permission of the program coordinator. Students must have an overall GPA of at least 2.5 to be eligible for the 12-credit internship. Students who choose the 3-credit option for internship will also have to complete 9 credits of upper level (300-400 level) business courses in their final semester. This course is offered each fall, spring and summer semesters.

SPBU 499. Internship in Sport Business   **12 credits**
The internship experience is designed to place the student in the field with a capable supervisor for the purpose of gaining work experience and exposure to techniques, methodologies, and procedures utilized in the sport industry work place. The student is evaluated on the quality and timely submission of task and responsibility logs, written assignments, the major project, self-evaluation of the experience and an evaluation from the

site supervisor. Prerequisites: 108 credit hours, all other required SPBU and Business courses for graduation and permission of the program coordinator. Students must have an overall GPA of at least 2.5 to be eligible for the 12-credit internship. Students who choose the 3-credit option for internship will also have to complete 9 credits of upper level (300-400 level) business courses in their final semester. (offered fall, spring and summer).

STATISTICS (STAT)

STAT 101. Introduction to Statistics   **4 credits**
The course covers the basic principles of descriptive and inferential statistics: topics to be covered include descriptive statistics for various data types, normal and other distributions, their properties and uses, hypothesis testing, linear correlation and regression. Prerequisite: MATH 121; background in Excel is very helpful since Excel, R or Python will be used for all homework assignments.

UNIVERSITY COURSES (UNIV)

UNIV 100. Health and Wellness   **2 credits**
Health and Wellness is a web-based introduction to principles and practices of wellness, hygiene, physical fitness, and responsible behavior. The learner explores aspects of personal conduct and attitudes about physical and mental health, relationships, sexuality, alcohol and drug use, and other health-related topics. Educational experiences provide the student knowledge and skills needed for making informed personal choices. Learners can demonstrate competencies in communication and critical thinking. The course is offered during the second seven-week session of the fall and spring semester.

UNIV 104. College Motivation & Success   **3 credits**
This course is designed to foster a meaningful, professional relationship between the student and his/her faculty mentor. During the semester, the student will work to discover the importance of assuming responsibility for his/her role in the educational process; receive focused guidance on curricular and professional choices that will enhance personal and professional development; and identify and learn to access University resources and support structures designed to enhance academic and professional success.

UNIV 105. Foundations of Character & Leadership   **3 credits**
This course is designed to foster a meaningful, professional relationship between the student and his/her faculty mentor. During the semester, the student will work to discover the importance of assuming responsibility for his/her role in the educational process; receive focused guidance on curricular and professional choices that will enhance personal and professional development; and develop skills necessary for team building, leadership and enlightened living.

UNIV 106. Success in College Reading   **1 credits**
This course is designed to prepare students for college-level reading. Topics include improving vocabulary, increasing comprehension, critical reading, active reading, and study reading.

UNIV 204. College Success & Leadership   **3 credits**
This course is designed to foster a meaningful, professional relationship between the student and his/her faculty mentor. During the semester, the student will work to discover the importance of assuming responsibility for his/her role in the educational process; receive focused guidance on curricular and professional choices that will enhance personal

and professional development; identify and learn to access University resources and support structures designed to enhance academic and professional success and develop skills necessary for team building, leadership and enlightened living.

UNIV 440. General Studies Capstone 3 credits
The General Studies Capstone is open to General Studies Majors only and cannot serve as a substitute for a capstone experience in the student's declared major. Students in this class will complete the required coursework but will have some latitude in the subjects covered by the coursework to focus specifically on the student's area of concentration. Prerequisites: ENGL 101, ENGL 102, SPCH 103

UNIV 460. Social Problems in Appalachia Senior Capstone 3 credits
The Social Problems in Appalachia course supports students in exploring advanced application of Communication, Critical Thinking, and Ethical Practice in investigating and dissecting a variety of social problems specific to the Appalachian region. To this end, students will explore Appalachian culture, Appalachian demography, Appalachian representation, the economics of the region, social issues such as the addiction epidemic, changing family structure, joblessness, environmental concerns, among many others. Content for the course includes articles, guest speakers, field trips, and text. Students demonstrate their relative academic fitness by exploring said issues via critical review, feedback/experiential essay responses, a teaching demonstration, and social problem documentary presentation. Finally, students will be required to explore the course content through the lens of their major course of study, the philosophies support by the University Mission, and their overall collegiate experience. Prerequisites: ENGL 101, ENGL 102, SPCH 103

<div align="center">

WORKFORCE LEADERSHIP (WKLD)

</div>

WKLD 120 Technology for Workforce Success 3 credits
An Introductory course focused on effective and ethical use of personal technology in the workplace. Students build foundational knowledge of computers, windows operating system, and internet literacy. Real-world projects develop skills in use of commands and operations for word processing, spreadsheets, and presentations applications for common workplace tasks and decision-making. Creates awareness of security, privacy, and professional issues associated with the use of computers, social media and phone technology. Pre-requisites: None

WKLD 250 Personal Development 3 credits
Personal development of knowledge, attitudes, skills and habits that contribute to personal and professional success. Participants complete self-assessments and goal setting related to intra- and interpersonal emotional intelligence, character, strengths, resilience, and grit. Workforce scenarios provide practice employing self-management and these skills for personal and professional success. Pre-requisites: None

WKLD 280 Workforce Trends and Issues 3 credits
Investigation of trends and issues in the contemporary workforce including mental health, drug/alcohol abuse, violence and bullying in the workplace, sexual harassment and diversity and inclusion. Students will investigate the regulations, social and organizational impact, and behaviors and practices to effectively respond to these workforce trends and issues. Participants create presentations and engage in role-playing to demonstrate effective practices. Pre-requisites: None

OLGB 300. Lean Six Sigma Green Belt   **3 credits**
The Lean Six Sigma Green Belt course has been designed to teach Lean Six Sigma fundamentals and application. Students are trained and tested on their understanding and ability to apply the tools and techniques of all elements of the Lean Six Sigma DMAIC methodology. As part of the DMAIC methodology, students are taught how to integrate Lean Six Sigma into an overall approach to process improvement and project management. Training is conducted online and uses a multi-media format that includes audio by Lean Six Sigma experts, examples of successful performance improvement, interactive simulations and quizzes, and the most current and robust tools and techniques available. Prerequisite: Program Director approval.

WKLD 285. Introduction to Project Management   **3 credits**
This course introduces project management terms and concepts and the project life cycle for achieving agreed upon goals within a set scope, time, quality and budget. Students will learn how to build a successful project from pre-implementation to completion. The course meets the 23 hours of project management education/training required for certification. Prerequisite: Program Director approval.

WKLD 290. Health, Well-being, and Safety in the Workplace   **3 credits**
The course examines how employees' health, well-being, and safety are interlinked with many factors in their work and nonwork environment and assesses practices for creating a positive work environment to promote well-being. Regulations and guidelines for the workplace on these topics are introduced. Prerequisite: Program Director approval.

WKLD 298. Workforce Internship   **9 credits**
An opportunity to apply knowledge and skills acquired in the classroom to a real-world business setting and to gain professional skills and experiences necessary to prepare for a successful career. The experience allows students to explore career interests, build professional networks, and way-finding skills.
Prerequisite: Program Director approval.

MASTER OF ARTS IN MENTAL HEALTH COUNSELING

COUN 500. Professional Counseling Orientation   **3 credits**
This course serves as an introduction to the history, professional roles, ethics, and standards of practice of the counseling profession. Students will also examine current issues and trends in the counseling profession.

COUN 501. Human Growth and Development   **3 credits**
This course provides students with a foundation for understanding human development from birth through late adulthood. Students will explore developmental theories as applied to personality, cognitive, social, and physical development. Students will also examine how counseling methods may be used to facilitate wellness throughout the lifespan.

COUN 502. Multicultural Counseling   **3 credits**
This course helps students recognize the various ways that racial, ethnic, socioeconomic, spiritual, geographical, and other factors may impact the practice of mental health counseling. Theoretical models of identity formation and multicultural counseling are presented. Counselor self-awareness will be emphasized with the goal of eliminating biases, prejudice, and discrimination from the counseling relationship.

COUN 503. Counseling Theories   **3 credits**
Students in this course will learn the major theoretical models of counseling and psychotherapy and how various client problems may be conceptualized from these models. Students will examine current approaches to counseling from these perspectives with an emphasis on empirically supported treatment methods.

COUN 510. Introduction to Mental Health Counseling   **3 credits**
This course provides an overview of the roles and functions of clinical mental health counselors. Students will examine the practice of mental health counselors including ethical decision-making, relationships with other mental health professions, and assessment and diagnosis. Pre/Corequisite: COUN 503

COUN 511. Counseling Techniques   **3 credits**
This course examines theoretical and practical aspects of counseling techniques and the counselor-client relationship. Students will develop a foundational level of competency in basic counseling skills. Students will also learn a variety of techniques that are grounded in the major theories of counseling and psychotherapy. Prerequisites: COUN 500, COUN 501, COUN 502, COUN 503

COUN 512. Theories and Techniques of Assessment   **3 credits**
This course will help students understand and apply different approaches to assessment in the context of mental health counseling. Students will learn to apply theoretical, statistical, and legal and ethical concepts to the assessment process. Prerequisites: COUN 510, COUN 511 (COUN 511 may be Corequisite)

COUN 513. Research and Program Evaluation   **3 credits**

This course helps students apply the scientific method to the practice of counseling with emphasis on research methods, efficacy, and effectiveness. Students will learn how theory, research, and practice relate and their relevance to the professional practice of counseling.

COUN 520. Diagnosis and Treatment Planning   **3 credits**

Students in this course will examine psychopathology as described in the current edition of the *Diagnostic and Statistical Manual of Mental Disorders*. Students will examine diagnostic criteria, apply these criteria to hypothetical cases, and develop comprehensive treatment plans to address the related problems and symptoms.
Pre/Corequisites: COUN 512

COUN 600. Group Counseling   **3 credits**

This course provides training and practice in group counseling methods. Students will learn about group dynamics, expectations, behaviors, and therapeutic factors that impact group work. Group member selection criteria and relevant ethical considerations will also be explored. Prerequisites: COUN 511

COUN 601. Career Counseling   **3 credits**

This course provides students with theoretical concepts and practical skills to assist individuals in the processes of career exploration with an understanding of how values, personality characteristics, spirituality, socioeconomic, and other factors impact career planning and decision-making. Prerequisites: COUN 511, COUN 512

COUN 602. Substance Abuse Counseling and Prevention   **3 credits**

This course introduces students to current etiological models of addictions and addictive behaviors as well as strategies for treatment and prevention. Students will learn about various assessment tools for the diagnosis of substance abuse disorders as well as the assessment of co-occurring disorders. The course also describes evidence-based models for treating substance abuse and co-occurring disorders. Prerequisites: COUN 511, COUN 512

COUN 603. Marriage and Family Counseling   **3 credits**

This course considers the dynamics of marriage and family relationships from a systems perspective. The course emphasizes understanding family and other systems theories, various aspects of the marital relationship and family systems, and models of intervention that apply to family systems. Prerequisites: COUN 511

COUN 698. Practicum   **3 credits**

Students in this course will engage in a highly supervised experience of professional counseling at an approved clinical site. This supervision includes both individual and group supervision in a synchronous format. Students are required to complete a total of 100 hours of counseling and related services, 40 of which are direct client contact hours. Written and oral presentations accompanied by audio and video recordings are a basic part of the group supervisory process. Prerequisites: COUN 511, COUN 512, COUN 520

COUN 699. Internship   **1-6 credits**

Students enrolled in this course will engage in a supervised experience in mental health counseling. Students will participate in 4 synchronous seminars on specific topics. Students will register for 1 to 6 semester hours and complete 100 clock hours for each semester hour. Clock hours must include a minimum of 40% of direct client contact. Grading for this course is Pass/Fail. Prerequisites: COUN 511, COUN 512, COUN 520, two of 600/601/602/603, COUN 698

<div align="center">

MASTER OF CYBERSECURITY (CYBR)

</div>

CYBR 610. Cyber Operations Management   **3 credits**

The Cyber Operations Management course evaluates the current doctrine and planning procedures for strategies, policies, and case study reviews to successfully engineer, operate, and manage networks from small to global scale to protect from data theft, malware, intrusion attempts, and data leakage. This course will cover security operational design of the top-level architecture security suite, internal network monitoring, data security, user training, and strategic best practices.

CYBR 615. Strategic Cyber Intelligence   **3 credits**

This course provides a comprehensive study of strategic cyber intelligence and organizational security. A focus on the strategic impact of audit and security requirements on the design and implementation of cybersecurity will be reviewed. Cyber warfare, both offensive and defensive, and their effects on critical infrastructure will also be a primary focus.

CYBR 620. Legal Issues in Cybersecurity   **3 credits**

This course will review policy and legal concepts relating to cybersecurity and information management. It will examine laws, authorities, and the responsibilities of government and the private sector to protect data and privacy in the cyber domain. The course will provide the learner with the history and evolution of cyber laws and an analysis of terminology. The student will examine the ethical considerations of surveillance, cyber laws and policies. Cyber law raises complex issues involving the characterization of acts (e.g., as a criminal matter or an act of war), and their attribution to responsible actors (e.g., individuals, non-state groups, and state actors) under domestic and international law. On one hand, an act might be characterized as a criminal matter in one jurisdiction, but not at the point of origin--raising issues for policymakers, lawyers and investigators. On the other hand, that same act could also be treated as economic espionage, terrorism or as an act of war--raising issues of international responsibility. In any case, the attribution problem raises technical and policy problems in identifying both the point of origin and the persons responsible for an event. Cyber practitioners must, therefore, have a general appreciation for the complex legal issues, to include the unsettled state of the law and the practical limitations in its application, often raised in addressing cybercrime.

CYBR 625. Cyber Psychology   **3 credits**

This course provides students with an appreciation for and understanding of the psychological processes that impact information and security. The course objectives stress three major topics: (1) the mindset and motivation of a hacker; (2) similarities and differences between the types of hackers-white, black and gray; and (3) technology and humans in terms of how human interaction affects cybersecurity. Research and activities in the course include a study of human interactions with emerging technologies to include

cloud, mobile computing, social media, virtual reality, blogs, digital media and any other technology, which have demonstrated an ability to alter human behavior.

CYBR 630. Offensive and Defensive Strategies   **3 credits**
The course focuses on offensive and defensive cyber capabilities. The purpose of the course is to synthesize organizations' recognition of the need to operate on the offense to prevent and detect cyber-attacks. Further, the study looks at their ability to deploy offensive tactics such as prevention and counter measures to protect their organizations. This course also provides students with the opportunity to explore and examine emerging trends and technology in cybersecurity. The course prepares students to defend enterprise networks from web based and internal attacks using techniques such as system hardening, encryption, and policy enforcement and software/hardware intrusion detection systems to protect enterprise data assets.

CYBR 635. Security and Information Data Analytics   **3 credits**
Introduction to analytical software including data mining, statistical software, and analytical models are developed. The application of strategic analytics for predictive, trending, forecasting, intrusion, and prevention models of information management losses are proposed. Planning and resolution of common and ad-hoc security threats, within private and public organizations, are reviewed to secure data and the management of information through detection and preventive techniques.

CYBR 640. Strategic Investments in Information Security   **3 credits**
Various strategic financial models for the buy vs. build of security and information decision(s) is reviewed. Methods and techniques for fraud prevention, including operational risk assessment, fraud controls, data security, and compliance best practices and regulatory requirements are reviewed. Performance management processes, and information security program evaluations are analyzed in the context of building a portfolio of information technology investments.

CYBR 645. Enterprise Infrastructure Planning & Safeguarding   **3 credits**
An overview of strategic planning and safeguarding of enterprise level infrastructure is reviewed. Advanced planning methodologies are developed to adopt, implement, and manage technological ecosystems including software, hardware, networks, applications, data, communications, and other relevant infrastructure. Principles of privacy, security, organizational vs. customer owned data, and issues related to protection are analyzed within public and private organizations.

CYBR 650. Cybersecurity Policy Implementation   **3 credits**
This course is designed to provide the knowledge and skills necessary to implement effective cybersecurity policy. The course investigates US domestic and foreign cybersecurity policy and how it affects cybercrime in the US. Main aspects of implementation covered in class will involve methods and guidelines for delivering cyber-security policy. The course addresses prototypical organizational goals in managing the development, maintenance, and replacement of cybersecurity policy. Students will engage in the use of the bottom up, top down, and the synthesis approach in implementing cybersecurity policy. The different arms of the government and how they approach cybersecurity implementation is also addressed.

CYBR 660. Capstone: Practical Applications in Security   **3 credits**
This capstone course integrates cybersecurity strategy, program management, leadership,

and technological concepts. Graduate students will demonstrate the ability to effectively strategize, implement and sustain a Defense in Depth cybersecurity information management program. Students will be expected to synthesize security and information management research from a local and an international perspective of public and private agencies. The goal of this course is to encapsulate security theories and applications learned throughout the Master in Cybersecurity degree, by developing a strategic proposal demonstrating a security and information management strategy.

CYBR 710. Open Source Intelligence   3 credits

This course will examine critically the scope of the open source environment with a special emphasis on the cyber domain. It will demonstrate the strengths and weaknesses of open sources as a basis for intelligence information and analysis. Students will be exposed to various open source analytic techniques and methodologies including advanced search techniques using Boolean logic, apply search strategies such as successive fractions and citation pearl growing, conduct Deep Web searches, perform technical validation on mobile and organizational websites, and conduct source and content analysis.

CYBR 715. Social Media Intelligence   3 credits

This course examines the strengths and weaknesses of social media as a source of cybersecurity intelligence. Emphasis will be placed on analytics and trending, collection management, social network dynamics, crowdsourcing, and ethics and privacy issues. Students will synthesize viable security intelligence for warning, threat assessment, law enforcement investigations, and strategic communication. An analysis with other sources of intelligence information, and social media intelligence will be evaluated as a valuable tool for intelligence assessments. Students will further develop critical skills using analytical tools and software for sentiment and network analysis.

CYBR 720. Information Operations   3 credits

This course is a comprehensive survey of the theory and fundamental principles and tools used to shape the "infosphere." Heavy emphasis will be placed on the cyber power and the influence strategies for employing effective strategic communication, public diplomacy, military diplomacy, military public affairs, civil affairs, and psychological operations. Students will be exposed to past and present attempts to shape the information environment and influence mass and targeted public audiences via today's digital realm.

CYBR 810. Information Assurance & Risk Management   3 credits

This prepares equips students with the knowledge and skills necessary to protect and maintain the reliability of information and manage the ethical and business risks related to the use, processing, storage, and transmission of data. The learner will be challenged through research to identify the tenants of information assurance including information integrity, availability, authenticity, non-repudiation and confidentiality of organizational data and information. Through case study practice the student will utilize the physical, technical and administrative controls needed to identify, evaluate, prioritize, monitor and manage security risks. Topics covered include the enterprise security landscape, the design and development of security controls, human factor impacts, enterprise risk management (ERM), business impact analysis, disaster recovery and response, the information assurance and risk management life cycle, and the ethics involved in information management.

CYBR 815. Security Governance Frameworks   3 credits

This course prepares students to address the governance framework issues required for effective organizational information security management. The develop of information

security governance frameworks and the Information Governance (IG) discipline will be studied, leading to exercises in the creation and implementation plan development of policies that ensure compliance with laws and industry standards. Research activity will include best practices for managing cybersecurity processes and meeting the needs of enterprise management by balancing cybersecurity technical issues, business risk, control needs, and reporting metric requirements. Topics include cybersecurity management framework strategy and controls, the establishment and management of a governance program, understanding the business context of key stakeholders, corporate culture issues, and the Governance, Risk Management and Compliance (GRC) relationship in business function reliability and integrity.

CYBR 820. Security & Regulatory Compliance   3 credits

This course provides the student the knowledge and skills necessary to manage the information security, privacy and regulatory compliance issues of an enterprise or organization. The student, through research and case study activities will examine information security and privacy-related federal and relevant state laws and regulations, international laws, and cybersecurity compliance standards and practices. Topics involved in the course of study include privacy laws, federal statues and compliance (HIPAA, SEC regulations, Gramm-Leach-Bliley and Sarbanes-Oxley), security and compliance framework standards (NIST, FISMA, CIS, ISO27001, PCI DSS, Patriot Act), COBIT, contracts, eDiscovery, Intellectual Property (IP) issues and data breach notification requirements.

DOCTOR OF EXECUTIVE LEADERSHIP (DEL)

DEL 700. Research: Culture of Inquiry   2 credits

Examines research as a culture of inquiry including elements of critical thought, ways of knowing, practices of scientific and intellectual communities, the role of concepts and theory in research, and conceptual frameworks for research performance. Initiates skill building for critical reading and writing for research performance.

DEL 710. Leadership Theories and Perspectives   3 credits

Reviews and critically analyzes the foundations of leadership theories; identifies connections between theories; introduces leadership as a field of study and discusses researchable questions in the field.

DEL 720. Leadership in Context   3 credits

Critically assesses the role of the contextual environment from two perspectives: (1) the moderating effect of context on leadership effectiveness and (2) the ways leaders imagine, shape, and leverage context to accomplish organizational sustainment. Focuses on executive leadership but within a multi-level framework and on the role of context in leadership research.

DEL 727. Leadership Research and Design Logic   3 credits

Critically reviews current approaches for leadership research and examines development of significant research questions for advancing leadership scholarship and practice. Explores design logic and alignment with research questions.

DEL 730. Ethics: Values and Decision Making   3 credits

Focuses on ethics as challenges leaders face in organizations. Addresses contemporary challenges, including the effect of the increasingly complex environment on the nature of ethical behavior, and considers the consequence of historical events.

DEL 740. Organizational Dynamics   **3 credits**

Examines complex strategic problem solving for sustained organizational success. Provides participants with an understanding of the role of leadership in creating long- term viability. Focuses primarily on learning, innovation, and dynamic capabilities.

DEL 750. Collaborative Leadership   **3 credits**

Examines issues related to collaboration and communication primarily in the context of organizations and interests external to the organization. Identifies unique aspects of effective leadership in collaborations, including the need to be politically savvy.

DEL 760. Leadership Development   **3 credits**

Examines the relationship between practices and processes of developing leaders in various contexts (e.g., industry, nonprofit, human services, political, and military) and strategically managing talent as a source of organizational sustainability.

DEL 800. Research: Responsible Conduct of Research   **1 credit**

Analyses the ethical standards and guidelines for social and behavioral research and addresses issues related to protected subjects, potential harm, informed consent, and confidentiality, as well as the consideration of the institutional research approval processes.

DEL 802. Conceptual Frameworks for Leadership   **3 credits**

Explores topical areas of leadership research through reading broadly in leadership literature and developing a conceptual framework as it relates to an integrated research design. Activities build specialized knowledge in the topical areas and facilitate dialogic engagement in the intellectual community to generate, conserve and transform knowledge on the topics.

DEL 805. Quantitative Research   **3 credits**

Examines the nature of quantitative research, discusses quantitative research methodologies, and develops the skills appropriate for those methodologies. Explores criteria for decisions in quantitative research from design through data collection, analysis, and interpretation. Investigates quantitative methodologies within mixed methods research, and requires conceptualization and completion of a quantitative phase of a mixed method mini-research study.

DEL 815. Qualitative Research   **3 credits**

Examines the nature of qualitative research, discusses qualitative research methodologies, and develops the skills appropriate for those methodologies. Explores criteria for decisions in qualitative research from design through data collection, analysis, and interpretation. Investigates qualitative methodologies within mixed methods research and requires conceptualization and completion of a qualitative phase of a mixed method mini- research study.

DEL 810. Complexity and Sustainability   **3 credits**

Focuses on exploring complex adaptive systems and complexity leadership as ways to achieve sustainability for organizations during times of uncertainty and ambiguity.

DEL 830 Executive Decision-Making   **3 credits**

Integrates the concepts and skills in the program's core leadership courses in a capstone exploration which investigates the challenges executive leaders face in the design and execution of strategy. Focuses on the art and science of decision-making, including constrained optimization and process analysis. Considers decision making during periods of

uncertainty, how to involve internal resources and knowing when to tap external resources during the decision-making process

DEL 860 Special Topics 1-3 credits
Special Topics in Leadership is a seminar course offered in response to departmental needs. The content may vary depending on the leadership topic selected. This seminar explores the executive leader's strategic role in aligning people, processes and resources in today's rapidly changing competitive environment impacted by a specialized topic area in leadership. Participants will critically reflect on discussions and scenarios drawn from literature on a specialized topic area in leadership.

DEL 895. Executive Leadership Seminar II: Futuring 3 credits
This Executive Leadership Seminar explores the challenges for executive leadership in learning agility and expanding it within their organization. With the rapid growth of knowledge, the business landscape is rapidly changing. Participants will critically reflect on discussions and scenarios drawn from literature on knowledge management, complexity, innovation, ethics, and dynamic capabilities. Participants will identify how their research and their practice of leadership helps expand forward-thinking.

DEL 896. Executive Leadership Seminar I: Stewardship 3 credits
This Executive Leadership Seminar explores the role of the executive leader as a steward. Participants will critically reflect on discussions and scenarios drawn from literature on philosophies of ethics, leadership development and leadership in context. Participants will identify how their research and their practice of leadership will extend stewardship to their own professional context.

DEL 900. Creating Portfolios 1 credit
Participants review, reflect on, and develop artifacts in preparation for the Pro-seminar series. During the course, participants begin to create portfolios for use as scholars and practitioners.

DEL 901/902/903. Dissertation I/II/III 3 credits
each The doctoral dissertation is designed to demonstrate the researcher's ability to conduct research as a scholar-practitioner. This process begins after the approval of the proposed dissertation argument (proposal). The goal of the dissertation is to generate new knowledge and/or to answer significant questions within the leadership field of study. This research project is accomplished by collecting and analyzing both primary and original data on a specific problem. The researcher's project culminates with a scholarly document and presentation representing the three elements of stewardship: generation, conservation, and transformation of knowledge within the leadership field.

DEL 904. Dissertation Continuation 1-3 credits
The doctoral dissertation is designed to demonstrate the researcher's ability to conduct research as a scholar practitioner. This process begins after the approval of the dissertation proposal. The goal is to generate new knowledge within the discipline of leadership. This research project is accomplished through the collection and analysis of both primary and original data on a specific problem. The researcher's project culminates with a scholarly document and presentation that represents the three elements of stewardship: generation, conservation, and transformation of knowledge within the discipline.

DEL 910/920/930. Pro-seminar: Generating, Conserving, and Transforming Knowledge I/II/III   **3 credits**
each Participants answer this question: As stewards of the discipline, how will they and others meet the expectations of generating new knowledge, conserving the discipline, and transforming knowledge to others? Participants assess existing knowledge in the leadership discipline to determine goals and directions for their professional activities, engage in experiential learning in support of their professional goals, and create and present their post-graduate personal plan as a scholar-practitioner.

STRATEGIC LEADERSHIP (GSL)

GSL 510. Art and Science of Strategic Leadership   **3 credits**
Begins an in-depth analysis of the discipline of leadership as specifically related to how a leader can help ensure organizational effectiveness in an unpredictable environment. Throughout the duration of this course, we will explore the myriad concepts underlying strategic leadership. Emphasis will be placed on developing an understanding of leadership theory; particularly the development of a personal model that will be meaningful for you, now and in the future.

GSL 506. The Human Side of Organizations   **3 credits**
This course is an in-depth study of the critical components of the strategic leadership of human capital. Essential to this concept is to identify and implement organizational practices and designs that are beneficial to both individuals and organizations in a way that actually produces long-term payoffs for organizations and the people who work in them.

GSL 507. Reframing Leadership   **3 credits**
This course is the genesis of a process of reframing our leadership model into one that incorporates the context of organizations in its broadest possible conception. Leadership, strategic or otherwise, exists because of organized activity. It is imperative that leaders understand the importance of reframing their view of leadership and the organizational activities which necessitate them.

GSL 601. Organizational Theory   **3 credits**
This course provides an interdisciplinary application of psychological principles and methods to a wide variety of problems that develop within the context of work. It emphasizes the application of psychological facts and principles as they apply to people operating in business and industry.

GSL 610. Strategic Thinking   **3 credits**
This course concentrates on business decision-making under conditions of uncertainty. The development of mission statements, strategic goals, control mechanisms, and alternative levels of strategy will be explored. Students learn the analytical process firms use to determine the parameters of their strategic plan, the problems firms encounter in formulating their plan, and the methods firms use to ensure that their strategic plan is implemented efficiently.

GSL 615. Leading Across Boundaries   **3 credits**
This course explores how to create sustainable collaborative cultures in an organization to develop successful and long-lasting relationships. The course examines interpersonal and organizational forces that can inhibit collaboration and strategies to overcome those challenges. Throughout the course, the opportunity to explore topics such as ethics,

complexity, design-thinking and social responsibility are presented within the scope of leading across boundaries.

GSL 630. Strategic Project Management   3 credits
This course offers a strategic perspective to the process of managing complex projects through project management techniques in order to implement the business strategy and deliver organizational change. The course will focus on the business aspect of the project to support the organization's business strategy and sustainability. Throughout the course, strategic project management capability is explored as it relates to competitive advantage, organizational change, and added value for the organization and stakeholders.

GSL 629. Research Methods   3 credits
Students will examine and analyze qualitative, quantitative, and mixed methods in the investigation of phenomena relevant to ethical evidence-based practice and research in organizational leadership. Based on a critical analysis of relevant scholarly literature and practices, students will learn how to formulate a researchable problem and an appropriate investigation strategy. Course topics include basic research designs, the development of sound research questions, measurement, data collection techniques, data analysis methods.

GSL 690. Strategic Leadership Capstone   3 credits
The capstone course emphasizes the practical application of strategic leadership concepts, theories and practices in real organizational environments and situations. Students participate in an organizational assessment and observe organizational leadership, strategy, customer focus, knowledge management, workforce, operations, and results; analyze and interpret the findings; and make recommendations for future actions based on strategic leadership theories and the research. Students will finalize their capstone with the Baldrige Self-Analysis based on their completed Organization Profile and Criteria.

STRATEGIC LEADERSHIP CONCENTRATION

Strategy as Practice

GSL 641. Strategic Issues in Strategy as Practice   3 credits
This course concentrates on understanding the strategic issues that comprises the framework for developing a fundamental understanding of SAP. At its core SAP focuses on three primary components; who does SAP, what tools and techniques do they employ, and what do their daily activities look like. As such, this course emphasizes practice as managerial action through a lens of management and organization theories. Additionally, practice as a set of tools through the lens of communication and language theories is explored. Finally, practice as knowledge and organizational resources through a lens of social science theories are considered. Students will exercise their ethnographic and case study research methodology skills to provide a more contextual understanding of SAP.

GSL 651. Strategic Decision Making in Strategy as Practice   3 credits
This course concentrates on strategic decision-making under conditions of uncertainty using SAP as the analytical framework. The development of mission statements, strategic goals, control mechanisms, and alternative levels of strategy will be explored. Students learn the analytical process organizations use to determine the parameters of their strategic plan, the problems organizations encounter in formulating their plan, and the methods firms use to ensure that their strategic plan is implemented efficiently.

GSL 661. Strategic Innovation in Strategy as Practice   **3 credits**

This course focuses on exploring recent initiatives and innovations within SAP along with the processes leaders utilize to acquire and implement new initiatives and innovations within an organization. Teams will explore new initiatives and innovations evaluating the implementation strategies making predictions from inferences and determining the best practices and lessons learned from these efforts to improve the strategizing function as a driver of innovative practice.

Business Leadership

GSL 642. Strategic Issues in Business Leadership   **3 credits**

This course introduces the key concepts, tools, and principles of contemporary business strategy formulation and competitive analysis. It is concerned with leadership and managerial decisions and actions that affect the performance and survival of business enterprises. The course is focused on the information, analyses, organizational processes, skills and business judgment leaders and managers must use to devise strategies, position their businesses, define firm boundaries and maximize long-term profits in the face of uncertainty and competition. This course emphasizes leadership and strategy through a lens of management and leadership theories and interdisciplinary student experience.

GSL 652. Strategic Decision Making in Business Leadership   **3 credits**

This course concentrates on the dynamics of strategic decision making in business to strengthen leadership skills and establish a culture of decisive action. Students analyze the long-term impact decisions have on an organization and consider decision-making as a regular process and not as a periodic event. Students engage in the analytical process organizations use to determine the parameters of their strategic plan, the problems organizations encounter in formulating their plan, and the methods organizations use to ensure the strategic plan is implemented efficiently.

GSL 662. Strategic Innovation in Business Leadership   **3 credits**

This course analyzes key concepts, tools, and principles of contemporary business strategy and innovation. The course focuses on exploring leadership's role in nurturing organizational innovation, in part through managing culture. The course is designed to help students understand the forces that limit innovation, identify barriers in their own business culture, and develop strategies to capitalize on the full value of their team's imagination. Participants will evaluate the capacity for innovation, distinguish an innovative culture, and discriminate issues before they become constraints.

Healthcare Leadership

GSL 644. Strategic Issues in Healthcare Leadership   **3 credits**

This course concentrates on analyzing the strategic issues which impact the ability to successfully implement cost effective programs, maintain efficient operations and services, staff and train employees and support other healthcare initiatives. This course emphasizes leadership action through a lens of communication and capacity development as a process of healthcare leadership. Students will exercise their ethnographic and case study research methodology skills to provide a more contextual understanding of strategic issues within healthcare leadership.

GSL 654. Strategic Decision Making in Healthcare Leadership   **3 credits**

This course concentrates on cross-functional strategic decision-making under conditions of uncertainty. Students are challenged to identify environmental and competitive demands

and develop alternative levels of strategy with respect to patient and care processes, improving service processes and repositioning care programs for value add to the organization. Students are exposed to the analytical process organizations use to determine the parameters of their strategic plan, the problems organizations encounter in formulating their plan, and the methods used to ensure the strategic plan is implemented as planned.

GSL 664. Strategic Innovation in Healthcare Leadership   3 credits
This course focuses on exploring recent innovations within healthcare leadership along with the processes leaders utilize to acquire and implement new initiatives within an organization. Teams will explore new initiatives and innovations evaluating the implementation strategies making predictions from inferences and determining the best practices and lessons learned from these efforts to improve the strategizing function as a driver of innovative practice. (3 graduate credit hours)

<div align="center">

Logistics and Supply Chain Leadership

</div>

GSL 643. Strategic Issues in Logistics and Supply Chain Leadership   3 credits
This course offers an in-depth study of issues within strategic level logistics and supply chain functional areas. Logistics functional areas addressed will be supply, inventory, packaging, storage, materials handling, maintenance, and transportation. Supply chain areas addressed will be networks, complexity, information, resource management, organizational relationships, performance measurement, technology, security, and talent management.

GSL 653. Strategic Decision Making in Logistics and Supply Chain Leadership
3 credits
This course concentrates on strategic level decision making techniques specifically the application of these techniques within logistics and supply chain management activities and functions. Teams will evaluate strategic level plans to assess decision points and results gleaning best practices and lessons learned relative to leadership approaches in support of logistics and supply chain functional areas within an organization. These functional areas will include logistics functions such as supply, maintenance, transportation and supply chain functions such as networks, information, technology, resource management, operational performance, and data analytics.

GSL 663. Strategic Innovation in Logistics and Supply Chain Leadership   3 credits
This course focuses on exploring recent initiatives and innovations within logistics and supply chain management functional areas along with the processes leaders utilize to acquire and implement new initiatives and innovations within an organization. Teams will explore new initiatives and innovations evaluating the implementation strategies making predictions from inferences and determining the best practices and lessons learned from these efforts to improve logistics and supply chain functional areas for specific organizations.

<div align="center">

Crisis Leadership

</div>

GSL 645. Strategic Issues in Crisis Leadership   3 credits
This course introduces the concept of "crisis" as a matter of strategic leadership interest. It begins by considering what formulates and constitutes a crisis. Students will consider the similarities and differences of crisis situations in the public, non-profit, and private sectors. Coursework will include examinations of communications, growth, survival, and other strategies commonly noted in the crisis leadership literature through real-world examples (similar to case study analysis). Students will compare and contrast command,

management, and leadership in the crisis context. The intent will be to deduce themes common to crises, regardless of sector, as well as issues that may be sector dependent. This investigation formulates the basis for an introduction to the role of the crisis leader.

GSL 655. Strategic Decision Making in Crisis Leadership   **3 credits**
This course considers a leader's crisis-related decision-making from multiple angles. It begins by discussing the ways in which perceptions of crisis severity impact decision-making, as well as introduces the notion of enacted sensemaking, whereby a decision affects every follow-on decision for the remainder of the crisis. This course will examine the similarities and differences of decision-making at the tactical and strategic levels in crises. Critical components include basing decisions on incomplete or conflicting information, changing course as new data becomes available, maintaining authenticity and credibility, etc. Organizational and community crisis response relies on a network of individuals, and as such, how does the decision-making of those followers impact the strategy as put forth by the leader? This course analyzes cognition, communication, and control as central responsibilities of crisis leaders and those responsibilities which support decision-making on the part of followers. Additionally, this course concludes with a discussion of how best to gauge the quality of crisis decision-making and organizational performance during crisis response.

GSL 665. Strategic Innovation in Crisis Leadership   **3 credits**
This course focuses on contemporary challenges and developments and associated innovations in the crisis leadership realm. Of particular interest is the balance between inward/reactive strategies and outward/progressive strategies. Historically, a centralized command and control theory has dominated crisis leadership research and practice; however, current research is examining the applicability of network or distributed approaches to leadership during crisis. This course incorporates concepts from crisis management discussions surrounding resilience, looking at crisis as an organizational or community development opportunity, and situating "crisis leadership" alongside of terms like "in extremis leadership."

MASTER OF BUSINESS ADMINISTRATION (MBA)

MBA 591. Professional Experience I   **3 credits**
Professional Experience I is required as part of the curriculum for students enrolling in the MBA program, having less than 2 years of professional work experience. (unless waived by the MBA program director after a comprehensive review of the students resume). Credit hours: 3

MBA 591. Professional Experience II   **3 credits**
Professional Experience II is an experiential class of the MBA program for students who have completed MBA 581 and have less than two years of work experience. This course focuses on giving you a grounding in the world of professional work – what managers do, how they behave, react and lead. In addition to continuing their internship and mentoring relationship, which will be enhanced by joint classes with MBA 591 for quest speakers and a team Business Case Study. Each student in the course will create a personal development plan required as part of the curriculum for students enrolling in the MBA program, having less than 2 years of professional work experience. (unless waived by the MBA program director after a comprehensive review of the students resume). Credit hours: 3

MBA 671. Management
3 credits

This course explores organizational structure and change; personnel perceptions/attitudes and personalities; the various definitions of leadership and the difference between leadership and management/supervision; ethical decision making in business; and beginning legal and human resource applications.

MBA 672. Managerial Accounting
3 credits

This course is designed to help participants gain an understanding of the roles of managerial accounting and financial management and their relationship to each other and to other functions within the business enterprise. Emphasis will be placed on the principal responsibilities of these functions and the institutional framework within which they operate. Students will learn how managerial accounting interfaces with decision models from operations research, economics and finance.

MBA 673. Applied Marketing
3 credits

This course explores the marketing strategy process by examining how to create customer value by effectively evaluating options based on a business's competitive position. The course uses tools to help business leaders make informed decisions on where and how to compete and how to assess performance. This course combines concepts of market research, consumer behavior, and marketing communications as they are applied to existing business.

MBA 674 / MBDA 760. Quantitative Methods for Business & Economics
3 credits

This course is a combination of theory and application of various quantitative and statistical methods to address the goal of improved and informed decision making. The focus is on the identification of potential applications in selected industries and companies. Students should expect to build on foundations from business and economic concepts in order to grasp the application of tools and methods covered in the course.

MBA 675. International Business & Trade
3 credits

This course offers a global perspective on challenges facing modern corporations in organizing activities that span multiple cross borders environments as well as the interaction between countries, regulatory systems and organizations. Attention is especially focused on the dynamics of international trade and investment, including the relationship between trade and economic growth, trade imbalances and protectionism, foreign direct investment and the role of multi-national corporations in the global economy.

MBA 676. Managerial Economics
3 credits

In this course students apply microeconomic concepts and decision science to managerial problems, relating each topic to a basic valuation model of the firm. Topics include economic optimization, the theory of consumer behavior (demand analysis, demand estimation and forecasting), the theory of the firm (production and cost analysis and estimation), market structure analysis, and other related topics. The objective is for students to demonstrate the ability to understand and apply managerial economics concepts and tools to improve managerial decision-making processes as part of a broader strategic planning process for organizations. Students will also demonstrate the ability to communicate both individually and as a group.

MBA 677. Managerial Finance
3 credits

This course is designed to help participants gain an understanding of the principles of corporate finance. Emphasis will be placed on the application of financial decision- making

tools to inform managerial decisions about how to finance the assets needed for production, asset valuation, capital budgeting, capital market theory, cost of capital, risk, and uncertainty.

MBA 678. Strategic Decision-Making   3 credits
This course is the culminating capstone course in the program. It covers the total integration of business functions in the context of corporate strategic planning and future development; provides the student with a "case development" project on a selected company or corporation; and requires the completion of a team project based on a detailed presentation on a selected business with specific emphasis on business planning, operation and possible expansion.

MBA CONCENTRATION COURSES

MBA 711. Organizational Behavior   3 credits
Organizations have behavior patterns that can be identified, assessed, understood, and improved. This course is about people, and especially people at work. Organizations are made up of people and people create workplace cultures and sub-cultures. Individual and group attitudes and behaviors are examined in the context of the workplace and how they impact the organization. This course also covers communication, conflict, power and politics and how the workplace is organized.

MBA 712. Operations Management   3 credits
This course will develop the student's ability to understand and apply operations management concepts and statistical techniques to inform managerial decision making, solve problems, and communicate solutions. Real-world applications will include manufacturing and service sectors. The areas of focus include productivity, lean and six-sigma operations, process strategy, human resource and work analysis, planning, scheduling, quality management, outsourcing, and inventory analysis as applied to quantitative and qualitative decision making.

MBA 713. Leadership and Ethics   3 credits
This course examines the theoretical frameworks of leadership and expands on management's roles and responsibilities as leaders to create and maintain ethical workplaces. Providing foundations and frameworks for making ethical decisions in business, government, and society.

MBA 721 / PHAR 505. Healthcare Informatics   3 credits
This course explores the role of information technology in the management of health information systems to improve healthcare outcomes. Topics include the terminology, storage, retrieval, and use of information in healthcare.

MBA 722 / PHAR 507. Healthcare Economics   3 credits
This course applies principles of economics to the healthcare sector. The course analyzes medical care markets and public policy, recognizing the importance of scarcity and economic incentives, and allowing for differences peculiar to healthcare. Demand and supply of health and medical care are examined as they involve: consumer/patients, healthcare professionals, hospitals, health insurance providers, managed care plans, and public policy.

MBA 723 / PHAR 508. Healthcare Policy & Ethics   3 credits
This course provides an overview of the healthcare system in the U.S. and develops the

student's understanding of government policy and ethical issues as they relate to healthcare access, quality, affordability, and the implications of different views on healthcare reform.

MBA 731 / MBDA 700. Business Analytics for Managers   **3 credits**
This course will introduce students to managerial perspectives on Big Data, Data Science and Analytics. It frames business analytics concepts, models and applications for gaining data driven insights and improvement of business outcomes. This course will familiarize students with four commonly stated facets of big data: volume, velocity, variety and veracity. It will also introduce three generally acknowledged dimensions of analytics: Descriptive Analytics, Predictive Analytics, and Prescriptive Analytics. Prerequisites: None

MBA 732 / MBDA 720. Data Visualization & Data Mining   **3 credits**
This course will introduce students to managerial perspectives on Data Visualization, Data Mining and related Data Science concepts. This course will help students understand the development of fair and meaningful graphical representation of information. Students will be introduced to data association, classification and clustering techniques under data mining topics. Student will thus learn to draw logical conclusions, provide interpretation and recommendations through the use of data visualization and data mining for pattern identification and insights discovery. Prerequisites: MBA 731

MBA 733 / MBDA 740. Data Science Applications & Technologies   **3 credits**
This course will introduce students to data science thinking and applications, with a focus on using technologies to manage data and generate insights. The course will also introduce students to cloud computing principles, and associated challenges and benefits. Students will also be exposed to current industry trends and challenges including distributed computing for analytics, real time data analysis and in-memory computing concepts. Prerequisites: MBA 731

MBA 591. Professional Experience I   **2 credits**
Professional Experience I is a two-credit hour experiential class of the MBA program for students who have less than three years of professional work experience. This course focuses on giving you a grounding in the world of professional work – what managers do, how they behave, react and lead. Understanding work as a process *and* applying that thinking to solve a problem for a real-world company will be the emphasis.

MBA 592. Professional Experience II   **2 credits**
Professional Experience II is a two-credit hour experiential class of the MBA program for students who have less than three years of work experience. This course focuses on giving you a grounding in the world of professional work – what managers do, how they behave, react and lead. Three components comprise the work of this course: internship / employment, mentoring, and community involvement.

MBA 594. Professional Experience IV   **2 credits**
Professional Experience IV is a two-credit hour experiential class of the MBA program that is the culmination of Professional Experience courses. Completion of this last module will bridge together the fundamentals and experiences you have gained through class assignments, projects, mentor interaction, research, written papers and oral presentations. The most important learning outcome is creation of a Personal Development Plan.

MASTER OF SCIENCE IN BUSINESS & DATA ANALYTICS (MBDA)

MBDA 700 (MBA 731). Business Analytics for Managers   3 credits
This course will introduce students to managerial perspectives on Big Data, Data Science and Analytics. It frames business analytics concepts, models and applications for gaining data driven insights and improvement of business outcomes. This course will familiarize students with four commonly stated facets of big data: volume, velocity, variety and veracity. It will also introduce three generally acknowledged dimensions of analytics: Descriptive Analytics, Predictive Analytics, and Prescriptive Analytics. Prerequisites: None

MBDA 710. Big Data: Management & Applications   3 credits
This course will help students to understand how data is acquired, stored, managed, manipulated and utilized to create business value. Students will learn techniques to manage large datasets, model data and manipulate data. Students will also study data transformation, conversion of data, management of data in multiple formats, data cleaning and methods to address structured and unstructured data types. Prerequisites: None

MBDA 720 (MBA 732). Data Visualization & Data Mining   3 credits
This course will introduce students to managerial perspectives on Data Visualization, Data Mining and related Data Science concepts. This course will help students understand the development of fair and meaningful graphical representation of information. Students will be introduced to data association, classification and clustering techniques under data mining topics. Student will thus learn to draw logical conclusions, provide interpretation and recommendations through the use of data visualization and data mining for pattern identification and insights discovery. Prerequisites: MBDA 700

MBDA 730. Data, AI, Ethics & Leadership,   3 credits
Students will be provided exposure to the most current industry issues in big data, analytics and AI with a focus on ethical principles. The course will emphasize ethics and leadership requirements in data gathering, and storage and usage of data. The course will introduce students to important principles of data privacy, data security and moral issues associated with the responsibilities of possessing sensitive and non-sensitive data. Prerequisites: None

MBDA 740 (MBA 733). Data Science Applications & Technologies   3 credits
This course will introduce students to data science thinking and applications, with a focus on using technologies to manage data and generate insights. The course will also introduce students to cloud computing principles, and associated challenges and benefits. Students will also be exposed to current industry trends and challenges including distributed computing for analytics, real time data analysis and in-memory computing concepts. Prerequisites: MBDA 700

MBDA 750. Predictive Modeling for Business & Data Analytics   3 credits
This course will give insights into various predictive modeling techniques and business intelligence to make better future business decisions. Students will learn the analytical and quantitative tools to make predictions of big data and gain knowledge of explanatory data analysis. The modeling techniques discussed in this course will be applied in all the fundamental areas of business. Prerequisites: MBDA 710, MBDA 740

MBDA 760 (MBA 674). Quantitative Methods for Business & Economics   3 credits
This course is a combination of theory and application of various quantitative and statistical methods to address the goal of improved and informed decision-making. The focus is on identification of potential applications in selected industries and companies. Students

should expect to build on foundations from business and economic concepts in order to grasp the application of tools and methods covered in the course. Prerequisites: None

MBDA 770. Machine Learning   **3 credits**
This course will provide students with a clear overview of machine learning models and applications. The course will help students to learn and apply supervised learning methods and unsupervised learning methods for improving business outcomes with continuous or repetitive adaptive data driven modeling. It will provide students with thought leadership in the usage of machine learning for big-data analytics, and enable them to understand emerging industry applications of machine learning and the vast application potential for machine learning methods and tools. Prerequisites: MBDA 700, MBDA 710, MBDA 740

MBDA 780. Business Forecasting for Analytics   **3 credits**
This course builds the necessary qualitative and quantitative skills necessary to forecast future events that will help businesses and government for long term planning. Students will use historical economic and business data and use applied statistical forecast models to give useful analytical business solutions. The course will explore time series analysis and calibrate models to make a meaningful business forecast. Prerequisites: MBDA 750, MBDA 760

MBDA 790. Business Analytics Capstone   **3 credits**
This course has been articulated to prepare MBDA candidates to integrate their knowledge across courses and past experiences and prepare them for their future careers. This course will enable students to ideate, design and define a project of their own choice, with faculty approval, in an area most relevant to their professional interests. This project-based learning will be augmented by case studies, discussions, and industry narratives to support students' industry-preparedness. Prerequisites: MBDA 700, MBDA 710, MBDA 750

MASTER OF PHYSICIAN ASSISTANT STUDIES (MPAS)

MPAS 501. Professional Development I   **1 credit**
The professional development sequence of courses spans the entire program curriculum and is intended to introduce and integrate principles of professionalism, ethics, and the business of medicine with the practice of medicine. This first semester focuses on the history of the profession, professionalism, medical ethics, and working as part of a health care delivery team.

MPAS 502. Professional Development II   **1 credit**
The professional development sequence of courses spans the entire program curriculum and is intended to introduce and integrate principles of professionalism, ethics, and the business of medicine with the practice of medicine. This second course in the series focuses on the health care provider's roles and responsibilities in the area of public health and the practice of preventive medicine.

MPAS 503. Professional Development III   **1 credit**
The professional development sequence of courses spans the entire program curriculum and is intended to introduce and integrate principles of professionalism, ethics, and the business of medicine with the practice of medicine. The third in this seven-course sequence evaluates health care disparities and provides sensitivity to cultural diversity, socioeconomic differences, and their impact on health and wellness. Alternative, integrative and preventive approaches to health care are examined.

MPAS 504. Professional Development IV   **1 credit**
The professional development sequence of courses spans the entire program curriculum and is intended to introduce and integrate principles of professionalism, ethics, and the business of medicine with the practice of medicine. Offered during the final semester of the didactic curriculum, this course focuses on preparation for clinical practice looking at many of the legal and practice-based issues including electronic data management, coding, billing, reimbursement, rules and regulations, confidentiality, certification and licensure, and safety

MPAS 505. Professional Development V   **1 credit**
The professional development sequence of courses spans the entire program curriculum and is intended to introduce and integrate principles of professionalism, ethics, and the business of medicine with the practice of medicine. This fifth course in the series is taken at the onset of the student's supervised clinical practice experiential learning. The focus during this transitional phase is the development of skills needed to become a lifelong learner through practice-based learning/self-improvement and developing awareness of health care systems, health policy, and current trends/issues. There is a continued emphasis on the display and development of professionalism as it applies to clinical practice.

MPAS 506. Professional Development VI   **1 credit**
The professional development sequence of courses spans the entire program curriculum and is intended to introduce and integrate principles of professionalism, ethics, and the business of medicine with the practice of medicine. During this sixth semester of professional development the organizational and economic elements of a systems-based practice are examined focusing on cost-effective and efficient health care, case management, risk management, error prevention, patient safety, and quality improvement.

MPAS 507. Professional Development VII   **1 credit**
The professional development sequence of courses spans the entire program curriculum and is intended to introduce and integrate principles of professionalism, ethics, and the business of medicine with the practice of medicine. The focus of this final course in the series will be the professional expectations and responsibilities facing the new physician assistant graduate and cultivation of the skills necessary for career development and growth. Topics will include such things as curriculum vitae/resume development, job searching, interviewing, employment contracts, credentialing, privileging, mentoring, leadership development and sustaining the profession.

MPAS 550. Mechanisms of Disease   **2 credits**
This course is an introduction to general pathology covering the basic principles of cell biology, histology, embryology, immunology, molecular genetics, infectious processes, nutrition, and environmental effects on health necessary for an understanding of human disease processes and the molecular mechanisms underlying disease development. The pathophysiology of diseases affecting specific body regions is presented in the individual organ system courses.

MPAS 560. Clinical Pharmacology   **2 credits**
This course covers fundamental pharmacology principles to provide a foundation for students to learn more about and subsequently utilize pharmacotherapeutics in the practice of patient-centered care. Topics include but are not limited to pharmacokinetics, pharmacodynamics, drug interactions, adverse drug reactions, autonomic nervous system pharmacology, and analgesia. Emphasis will be placed on individualization of drug therapy.

MPAS 570. Applied Anatomy   **4 credits**

This course in human anatomy is intended to stress the clinical applications of topographic, radiographic and gross anatomy in the day-to-day practice of medicine. Recognizing normal anatomic structures, common anatomic variations, and anatomic pathology as well as the application of that knowledge toward effective diagnostic evaluation and therapeutic intervention is emphasized.

MPAS 580. Medical Physiology   **3 credits**

This course covers fundamental physiologic principles that must be understood in order to fully appreciate health and disease. Alterations of normal function will be highlighted throughout. Students will also be introduced to common laboratory medicine practices used to evaluate for disruption of the normal health state.

MPAS 590. History and Physical Examination Skills   **2 credits**

This course begins to develop effective interviewing skills necessary to perform a comprehensive health history as well as a problem-specific history. Students will be taught the principles of physical examination, including inspection, auscultation, percussion, and palpation. The initial focus will be on normal physical exam findings, with a latter emphasis on abnormal findings, so that students can identify normal findings and later differentiate between them. Instruction and practice in recording the comprehensive health history and physical exam will be included in this course. This course focuses on the history and physical examination specific to adults. History and physical exam skills specific to the pediatric and geriatric population are taught in other courses.

MPAS 590L. History and Physical Examination Skills Lab.   **1 credit**

This course begins to develop effective interviewing skills necessary to perform a comprehensive health history as well as a problem-specific history. Students will be taught the principles of physical examination, including inspection, auscultation, percussion, and palpation. The initial focus will be on normal physical exam findings, with a latter emphasis on abnormal findings, so that students can identify normal findings and later differentiate between them. Instruction and practice in recording the comprehensive health history and physical exam will be included in this course. This course focuses on the history and physical examination specific to adults. History and physical exam skills specific to the pediatric and geriatric population are taught in other courses.

MPAS 600. Clinical Nutrition   **1 credit**

This course is designed to provide a broad understanding of the basic principles of nutrition, as applied to clinical medicine. Students will identify the essential nutrients and their functions, as well as describe nutritional behaviors that promote optimal nutrition and disease prevention throughout the life span. Energy balance, nutrition for fitness, and nutrition in the treatment of disease will be included.

MPAS 601. Behavioral Dynamics   **3 credits**

This course will challenge students to learn about and apply interpersonal and communication skills that are critical in the practice of medicine. Health and disease will be examined from a biopsychological perspective with reference to psychotherapies, psychopharmacology, and environmental intervention. Diagnosis and management of common psychiatric and psychosocial problems encountered in primary care will also be highlighted. Topics covered include, but are not limited to anxiety disorders, mood disorders, psychosis, substance use disorders, personality disorders, eating disorders, and psychiatric emergencies and crises.

MPAS 602. Clinical Medicine IA   **4 credits**

This is one of the series of courses using an organ systems approach for study of the clinical sciences. During this course, the commonly encountered medical problems primarily affecting the hematopoietic and lymphoid organs and processes of hemostasis and medical problems primarily affecting metabolism and organs of the endocrine system are examined. The clinical presentation, epidemiology, pathology, patient assessment, diagnosis, therapeutic interventions, management, and clinical course of these conditions will be explored. An introduction to oncology is also included which focuses on the clinical aspects of cancer screening, diagnosis, staging, and therapeutic intervention. Organ specific cancers are primarily discussed in their corresponding clinical science courses.

MPAS 603. Clinical Medicine IB   **4 credits**

This is one of the foundational courses for study of the clinical sciences. This course uses a generalized approach to study infectious diseases by examining the mechanisms of disease transmission and pathogenicity, methods of diagnosis, antimicrobial pharmacotherapy, common and systemic clinical presentations, and methods for infection control and prevention. Common bacterial, viral, fungal, and parasitic pathogens are explored. Organ system specific infections are primarily discussed in their corresponding clinical science courses. Commonly encountered medical problems primarily affecting the eyes, ears, nose and throat (EENT) are examined. The clinical presentation, epidemiology, pathology, patient assessment, diagnosis, therapeutic interventions, management, and clinical course of these conditions will be explored.

MPAS 604. Cardiovascular-EKG   **4 credits**

This is one of the series of courses using an organ systems approach for study of the clinical sciences. During this course, the commonly encountered medical problems primarily affecting the cardiovascular system are examined. The clinical presentation, epidemiology, pathology, patient assessment, diagnosis, therapeutic interventions, management, and clinical course of these conditions will be explored. Students will also be challenged to learn the fundamentals of interpreting an electrocardiogram (EKG) with an emphasis on identifying common abnormal EKG patterns and differentiating these patterns from normal and normal variant EKG tracings.

MPAS 605. Geriatrics   **1 credit**

This course is designed to provide the foundation to address changes that occur with aging and medical problems commonly seen in the elderly. In addition, there is focus on the impact of aging on a patient's quality of life, limitations in mobility and communication, access to health care, therapeutic interventions, and issues related to death and dying.

MPAS 606. Clinical Medicine IIA   **4 credits**

This is one of the series of courses using an organ systems approach for study of the clinical sciences. During this course, the commonly encountered medical problems primarily affecting the gastrointestinal and genitourinary system are examined. The clinical presentation, epidemiology, pathology, patient assessment, diagnosis, therapeutic interventions, management, and clinical course of these conditions will be explored.

MPAS 607. Clinical Medicine IIB   **4 credits**

This is one of the series of courses using an organ systems approach for study of the clinical sciences. During this course, the commonly encountered medical problems primarily affecting the pulmonary and neurologic system are examined. The clinical presentation,

epidemiology, pathology, patient assessment, diagnosis, therapeutic interventions, management, and clinical course of these conditions will be explored.

MPAS 613 Principles of Rural Appalachian Medicine   **1 credit**
This course is designed to provide instruction on the differences in health care of individuals in rural Appalachian communities. There is a focus on the vast health disparities for this region, as well as the environmental, economic, and social conditions that contribute to poor health and substandard health care.

MPAS 608. Women's Health   **3 credits**
This course addresses important aspects of women's health with an emphasis on obstetrical, gynecologic, and preventive care. Content will include a thorough exploration of physiology, pathophysiology, disease states, management options, and screening guidelines for women's health issues. Obstetrics focuses on the principles of prenatal care, complications that arise in pregnancy, and management of the more common emergent problems that can occur in pregnancy.

MPAS 609. Pediatrics   **3 credits**
This course examines important aspects of primary care pediatrics including assessment of the child patient, preventive health, and pediatric diseases and conditions. Specific issues of the newborn and older child will be presented in such areas as perinatal care, child development & behavior, congenital & genetic disorders, pediatric pharmacotherapy, pediatric infectious disease, and parenting. The student will also learn assessment techniques specific to the pediatric population.

MPAS 610. Emergency Medicine   **3 credits**
This course is designed to prepare students to recognize, rapidly assess, and effectively manage an emergent illness or injury. Problem-based case studies and team-based activities are utilized extensively in this course to encourage the development of teamwork, collaboration, and interdisciplinary values. BLS and ACLS certification are part of this course.

MPAS 611. Surgery   **1 credit**
This course focuses on the surgical management of health care problems emphasizing the principles and practices involved in aseptic and surgical technique, wound management, anesthesia, and preoperative, perioperative and postoperative evaluation and management of patients.

MPAS 612. Clinical Medicine III   **4 credits**
This is one of the series of courses using an organ systems approach for study of the clinical sciences. During this course, the commonly encountered medical problems primarily affecting the musculoskeletal and dermatologic system are examined. The clinical presentation, epidemiology, pathology, patient assessment, diagnosis, therapeutic interventions, management, and clinical course of these conditions will be explored.

MPAS 614. Hospital Medicine   **1 credit**
This course will address the core competencies that are essential in managing many of the challenges experienced by hospital-based health care professionals. Using an interactive, case-based format, key highlights from most major areas of internal medicine will be presented. The goals of this course are to develop an understanding of how to appropriately manage common inpatient clinical conditions and their potential complications during hospitalization and to incorporate multidisciplinary plans for clinical decision making and transition of care.

MPAS 691. Patient-Centered Care I   **2 credits**

The patient-centered care (PCC) sequence of courses spans the didactic component of the curriculum and is designed to challenge students to develop clinical reasoning skills, think critically, enhance interpersonal and communication skills, apply evidence-based resources, and problem-solve as clinicians and as members of an interdisciplinary health care team. The first PCC course focuses on several fundamental concepts: team approach to care, patient-centered medical home (PCMH), roles and responsibilities of various health professions, core epidemiology and biostatistics principles, evidence-based medicine, and health information literacy. Tailoring care to individual patients will also be discussed, including principles related to treating patients with chronic disease so that students may subsequently consider disease processes of organ-systems in the context of patients with underlying comorbidities.

MPAS 692. Patient-Centered Care II   **1 credit**

The patient-centered care (PCC) sequence of courses spans the didactic component of the curriculum and is designed to challenge students to develop clinical reasoning skills, think critically, enhance interpersonal and communication skills, apply evidence-based resources, and problem-solve as clinicians and as members of an interdisciplinary health care team. The second PCC course introduces students to simulated cases where they will act as clinicians to evaluate standardized patients. Cases will be acute care in nature and emphasis will be placed on the following: developing differential diagnoses, developing assessments and plans, the medical chart, medical documentation, informed consent, oral case presentation, and integration of preventive care and public health principles in the context of acute care.

MPAS 692L. Patient-Centered Care II Lab   **1 credit**

The second PCC course introduces students to simulated cases where they will act as clinicians to evaluate standardized patients. Cases will be acute care in nature and emphasis will be placed on the following: developing differential diagnoses, developing assessments and plans, the medical chart, medical documentation, informed consent, oral case presentation, and integration of preventive care and public health principles in the context of acute care.

MPAS 693. Patient-Centered Care III   **1 credit**

The patient-centered care (PCC) sequence of courses spans the didactic component of the curriculum and is designed to challenge students to develop clinical reasoning skills, think critically, enhance interpersonal and communication skills, apply evidence-based resources, and problem-solve as clinicians and as members of an interdisciplinary health care team. The third PCC course again utilizes simulated cases where students will evaluate standardized patients. Emphasis will be placed on the following: comprehensive patient management, longitudinal management of established patients, admission orders, inpatient management, progress notes, discharge summaries, rehabilitative care, palliative care and end-of-life issues, and utilization of an electronic health care record.

MPAS 693L. Patient-Centered Care III Lab   **1 credit**

The third PCC course again utilizes simulated cases where students will evaluate standardized patients. PCC III will begin to prepare students to work in teams with students from other health professions on campus. Students will be challenged to rely on the strengths of students from other disciplines to solve complex medical cases. Emphasis will be placed on the following: comprehensive patient management, longitudinal management of established

patients, admission orders, inpatient management, progress notes, discharge summaries, and rehabilitative care.

MPAS 694. Patient-Centered Care IV   1 credit

The patient-centered care (PCC) sequence of courses spans the didactic component of the curriculum and is designed to challenge students to develop clinical reasoning skills, think critically, enhance interpersonal and communication skills, apply evidence-based resources, and problem-solve as clinicians and as members of an interdisciplinary health care team. The fourth PCC course will prepare students to work in teams with students from other health professions on campus. Case-based scenarios and cases utilizing mannequin simulators will facilitate a team approach to patient centered care. Students will be challenged to rely on the strengths of students from other disciplines to solve complex medical cases. Emphasis will also be placed on further developing interpersonal and communication skills.

MPAS 694L. Patient-Centered Care IV Lab   1 credit

The fourth PCC course will continue to prepare students to work in teams with students from other health professions on campus to solve complex medical cases. Emphasis will be placed on the following: further development of interpersonal and communication skills, utilization of an electronic health record, palliative care and end-of-life issues, and development of self-reflective practices in preparation for the self-reflective portfolio component of the supervised clinical practice experience.

MPAS 699. Pre-Clinical Seminar   0 credit

This pass/fail seminar is required prior to the supervised clinical practice experiential learning component of the physician assistant program. Students must satisfactorily demonstrate a comprehensive basic medical and clinical sciences knowledge base and essential technical skills before they can proceed into clinical practice rotations.

MPAS 701-710. Supervised Clinical Practice Rotations   5 credits each

The supervised clinical practice experience (SCPE) rotations are the culminating learning activities of the physician assistant program. SCPE consists of seven core rotations that all students must take and one elective rotation in any of the medical specialties or subspecialties, or in medical research or medical academia. During each rotation students work with a practicing clinician (referred to as the preceptor) and are actively participating in health care delivery as part of the health care team.

MPAS 701. Primary Care Rotation   5 credits

This five-week core clinical practice rotation provides an opportunity to learn, understand and gain supervised experience in practicing the principles of Primary Care medicine. The focus of this preceptorship is evaluation and management of commonly encountered conditions in the outpatient setting and in patients of all ages.

MPAS 702. Internal Medicine Rotation   5 credits

This five-week core clinical practice rotation provides an opportunity to learn, understand, and gain supervised experience in practicing the principles of Internal Medicine. The focus of this preceptorship is providing care for patients with both acute and chronic conditions.

MPAS 703. Pediatrics Rotation   5 credits

This five-week core clinical practice rotation provides an opportunity to learn, understand

and gain supervised experience in practicing the principles of Pediatrics. The focus of this preceptorship is acute and preventive health care for pediatric patients.

MPAS 704. Women's Health Rotation   5 credits
This five-week core clinical practice rotation provides an opportunity to learn, understand, and gain supervised experience in the principles and practice of women's health conditions. The overall focus of this preceptorship is obstetric, gynecologic, and women's preventive care.

MPAS 705. Emergency Medicine Rotation   5 credits
This five-week core clinical practice rotation provides an opportunity to learn, understand and gain supervised experience in practicing the principles of Emergency Medicine. The focus of this preceptorship is evaluation and management of commonly encountered emergent/urgent illnesses and injuries in the emergency department setting and in patients of all ages.

MPAS 706. Surgery Rotation   5 credits
This five-week core clinical practice rotation provides an opportunity to learn, understand, and gain supervised experience in the principle and practice of surgery, especially in the operating room setting. The overall focus of this preceptorship is evaluation and care of patients with commonly encountered conditions requiring surgical management.

MPAS 707. Psychiatry Rotation   5 credits
This five-week core clinical practice rotation provides an opportunity to learn, understand and gain supervised experience in practicing the principles of Psychiatry. The focus of this preceptorship is behavioral and psychiatric health care.

MPAS 710. Elective Rotation   5 credits
This mandatory elective five-week rotation provides the opportunity to gain experience in a specific area of interest that may include a medical or surgical subspecialty, academic medicine, or medical research. The focus of this preceptorship is to explore the role of health care specialists.

MPAS 799. Summative Seminar   0 credit
The purpose of this pass/fail seminar is twofold: to comprehensively demonstrate knowledge, patient care skills, and professional competency sufficient to function as an entry-level physician assistant and to prepare graduation candidates for the *Physician Assistant National Certifying Examination* (PANCE).

MASTER OF SCIENCE-FAMILY NURSE PRACTITIONER (NURSM)

NURSM 501. Advanced Practice Roles   3 credits
The purpose of this course is to introduce students to the role of the advanced practice nurse and interprofessional collaboration to develop a deeper understanding of the role and scope of advanced nurses. State and federal regulations are explored. The course will examine how the advanced practice nurse uses communication, collaboration, and evidence to build interprofessional teams in order to create healthy work environments and promote quality outcomes.

NURSM 502. EBP Research   3 credits
This course introduces evidence-based practice and scholarly research as well as their implications. Students will be exposed to concepts, design, methods, utilization, dissemination, and ethical issues. Students will use research and evidence-based practice to

improve care, outcomes, and delivery systems. Students will learn how to critique qualitative and quantitative research methods. In addition, students will be able to develop a research proposal or design a quality improvement project.

NURSM 503. Advanced Leadership   **3 credits**
This course expands students' knowledge of leadership, skills, characteristics, and qualities to contribute to profession of nursing in the advanced practice role. Principles of leadership are examined including ethics, negotiation, interprofessional teamwork, advocacy, problem-solving, managing diversity, interprofessional collaboration, and multi-agency partnerships, quality improvement and safety, and organizational behavior. Prerequisites: NURSM 501 Advanced Practice Roles, NURSM 502 EBP Research, NURSM 504 IT in Advanced Practice.

NURSM 504. IT in Advanced Practice   **3 credits**
This course examines nursing informatics and technology in the practice of the advanced practice registered nurse. Students examine the relationship between patient care and nursing informatics to prepare for leadership roles that support patient safety and promote quality improvement within complex health systems. Students also examine the impact of these technologies on nursing practice, administration, teaching, and research.

NURSM 505. Healthcare Policy   **3 credits**
This course guides students in the evaluation of healthcare policy issues and outcomes as it relates to advanced practice nursing. Students will examine policy issues such as the relationship between providers and patients, insurance policies, quality management, ethical decision making, and business plans. Students will analyze factors influencing healthcare. The course emphasizes strategies and processes that foster policy implementation, leadership, and change at local, state, national, and international levels. Prerequisites: NURSM 510 Advanced Pathophysiology, NURSM 515 Advanced Pharmacology, NURSM 501 Advanced Practice Roles, NURSM 502 EBP Research, NURSM 504 IT in Advanced Practice

NURSM 510. Advanced Pathophysiology   **3 credits**
This course examines the physiological and pathophysiological reactions to disease and injury and how that influences patient care. The focus is on normal and variations of normal using scientific concepts of disease processes. Students will examine cellular and systematic functions, the body's defense responses, maintenance of vital functions, and develop treatment plans for patients across the lifespan in an effort to support homeostasis.

NURSM 515. Advanced Pharmacology   **3 credits**
In this course the student will build and magnify their knowledge of pharmaceutics, pharmacokinetics, and pharmacodynamics as an advanced practice registered nurse. Students will examine factors that influence medication efficacy, safety, cost, complementary regimens, genetic and environmental impacts, drug legislation and regulation for prescriptive authority. The student will examine considerations for patients across the lifespan considering age, health state, culture, financial abilities, and quality of life.

NURSM 520. Advanced Assessment   **3 credits**
The focus of this course is the advanced physical assessment of patients' physical and emotional well-being across the lifespan using culturally sensitive strategies. This course

will teach skilled interviewing, diagnostic reasoning, data collection and analysis from the patient history, physical examination skills, and diagnostic procedures in a systemic approach. Students will demonstrate their skills by completing a comprehensive physical assessment.

NURSM 525. FNP Capstone   3 credits
This course includes the scholarly project which provides the opportunity to complete a culminating scholarly synthesis of their graduate education. Students focus on a scholarly project that fosters the development of and dissemination of evidence-based project findings. Students will complete a literature review, identify a theory or framework, work with IRB if applicable, and present their capstone as a presentation. Prerequisites: NURSM 510 Advanced Pathophysiology, NURSM 515 Advanced Pharmacology, NURSM 520 Advanced Assessment, and NURSP 625 Primary Care I, NURSP 635 Primary Care II

NURSP 625. Primary Care I   5 credits
This course focuses on the care of acute and episodic health conditions frequently encountered in the primary care of adults and health behaviors that effect health such as nutrition, exercise, smoking, sedentary lifestyles that are intrinsic to diseases. The course emphasizes the development of assessment, differential diagnoses, interventions, screening, evidence-based care, health promotion, and illness prevention. The goal is to focus on patient education, data collection, aggregation of patient data, and evaluation to develop a diagnosis and a plan of care. This course will include 200 hours of supervised clinical practicum. Prerequisites: NURSM 510 Advanced Pathophysiology; NURSM 515 Advanced Pharmacology; NURSM 520 Advanced Assessment; NURSM 501 Advanced Practice Roles; NURSM 502 EBP Research, NURSM 504 IT in Advanced Practice

NURSP 635. Primary Care II   5 credits
This course explores the care of women and pediatric patients with acute and chronic illnesses. The course emphasizes developmental differences related to screening, evidence-based care, health promotion and prevention. The goal is to focus on evaluation, intervention, patient education, treatment, differential diagnoses, and implementation of the plan of care. Students will apply the advanced practice nurse role when providing care to women and children. This course will include 250 hours of supervised clinical practicum. Prerequisites: NURSM 510 Advanced Pathophysiology, NURSM 515 Advanced Pharmacology, NURSM 520 Advanced Assessment, NURSM 501 Advanced Practice Roles, NURSM 502 EBP Research, NURSM 504 IT in Advanced Practice

NURSP 645. Transitions: Advanced Nursing   5 credits
This course examines the care of chronic and complex conditions of older adults with emphasis on quality of life, normal aging and health of chronic and complex conditions. The course will examine patients with multiple comorbidities. The goal is to focus on evaluation, intervention, patient education, evidence-based care, treatment, follow-up, referral, health promotion, and illness prevention. The course will assist with transition to practice as an advanced professional registered nurse by expanding the thinking of students and providing a sense of identity in their new practice role. This course will include 300 hours of supervised clinical practicum. Prerequisites: NURSM 501 Advanced Practice Roles, NURSM 502 EBP and Research, NURSM 503 Advanced Leadership, NURSM 504 IT in Advanced Practice, NURSM 504 IT in Advanced Practice, NURSM 505 Health Policy, NURSM 510 Advanced Pathophysiology, NURSM 515 Advanced Pharmacology,

NURSM 520 Advanced Assessment, and NURSP 625 Primary Care I, NURSP 635 Primary Care II

DOCTOR OF PHARMACY (PHAR)

PHAR 501L. Professional Awareness & Preparation Seminar Graduation Requirement **0 credit**

This seminar lab is designed to provide the enrolling first year professional pharmacy student with foundational information and knowledge necessary to begin the program. The seminar contains approximately 40 hours of contact and takes place the week immediately preceding the start of the fall semester. The seminar will provide general orientation to: the School of Pharmacy policies and procedures, curriculum, faculty and staff, the advising process, assessment methods, study skills that may promote success, stress management techniques, available University of Charleston services, an overview of professional expectations, experiential requirements, student governance, student organizations, co-curricular opportunities and an introduction to communication (both written and verbal). Participants will also participate in activities designed to facilitate productive group interactions. This seminar lab provides foundational information and activities to prepare entering pharmacy students for the rigor and professional expectations of pharmacy school. The culminating activity of the course is participation in the School of Pharmacy White Coat Ceremony.

PHAR 502 / GSL 644. Strategic Issues in Healthcare Leadership **3 credits**

This course concentrates on analyzing the strategic issues which impact the ability to successfully implement cost effective programs, maintain efficient operations and services, staff and train employees and support other healthcare initiatives. This course emphasizes leadership action through a lens of communication and capacity development as a process of healthcare leadership. Students will exercise their ethnographic and case study research methodology skills to provide a more contextual understanding of strategic issues within healthcare leadership. This course is considered a concentration credit within the MSSL program and an elective credit within the Pharm.D. program.

PHAR 503 / GSL 654. Strategic Decision Making in Healthcare Leadership **3 credits**

This course concentrates on cross-functional strategic decision-making under conditions of uncertainty. Students are challenged to identify environmental and competitive demands and develop alternative levels of strategy with respect to patient and care processes, improving service processes and repositioning care programs for value add to the organization. Students are exposed to the analytical process organizations use to determine the parameters of their strategic plan, the problems organizations encounter in formulating their plan, and the methods used to ensure the strategic plan is implemented as planned. This course is considered a concentration credit within the MBA program and an elective credit within the Pharm.D. program.

PHAR 504/ GSL 664. Strategic Innovation in Healthcare Leadership **3 credits**

This course focuses on exploring recent innovations within healthcare leadership along with the processes leaders utilize to acquire and implement new initiatives within an organization. Teams will explore new initiatives and innovations evaluating the implementation strategies making predictions from inferences and determining the best practices and lessons learned from these efforts to improve the strategizing function as a driver of innovative practice. This course is considered a concentration credit within the MBA program and an elective credit within the Pharm.D. program.

PHAR 505 / MBA 721. Healthcare Informatics   **3 credits**
This course explores the role of information technology in the management of health information systems to improve healthcare outcomes. Topics include the terminology, storage, retrieval, and use of information in healthcare. This course is considered a concentration credit within the MBA program and an elective credit within the Pharm.D. program.

PHAR 506. Immunization Certification   **1 credit**
Upon successful completion of this self-study and hands-on course, the student will receive a certificate of completion from the American Pharmacists Association. Upon licensure and BLS certification graduates will be able to provide immunization therapy in accordance with the pharmacy regulations in their state of licensure.

PHAR 507 / MBA 722. Healthcare Economics   **3 credits**
This course applies principles of economics to the healthcare sector. The course analyzes medical care markets and public policy, recognizing the importance of scarcity and economic incentives, and allowing for differences peculiar to healthcare. Demand and supply of health and medical care are examined as they involve: consumer/patients, healthcare professionals, hospitals, health insurance providers, managed care plans, and public policy. This course is considered a concentration credit within the MBA program and an elective credit within the Pharm.D. program.

PHAR 508 / MBA 723. Healthcare Policy and Ethics   **3 credits**
This course provides an overview of the healthcare system in the U.S. and develops the student's understanding of government policy and ethical issues as they relate to healthcare access, quality, affordability, and the implications of different views on healthcare reform. This course is considered a concentration credit within the MBA program and an elective credit within the Pharm.D. program.

PHAR 510. Introduction to Pharmacy Practice & Law   **3 credits**
Introduction to Pharmacy Practice orients the entering pharmacy student to the social, economic, and political environments within which pharmaceutical care was previously and is currently being delivered to the patient. The basic health care environment is examined with particular emphasis on the role of the pharmacist in the United States health care system. This includes examining the pharmacist's role in a variety of practice settings. The course will introduce legal and ethical concepts that encompass the rights and responsibilities of the pharmacist and a practical application of the concepts. Discussion and exercises to increase awareness of cultural diversity that is critical to pharmacy practice are included.

PHAR 511. Drug Literature Evaluation   **1 credit**
Drug Literature Evaluation addresses an area of rapid growth in all areas of pharmacy practice assuring the intelligent and safe use of drugs through effective utilization of medical literature. The staggering size and varying quality of the clinical literature require that the pharmacy student develop sophisticated methods for managing the literature and critically evaluating the data that it often represents. Drug Literature Evaluation will present the student with the knowledge and tools necessary to manage drug information in other pharmacy classes.

PHAR 512. Immunology   **3 credits**
Immunology will provide an introductory course that presents the basic elements of the immune system and of the means through which the mechanisms of immunity act in a wide range of clinical conditions, including protection against infectious agents, rejection of tumors, transplantation of tissues and organs, autoimmune and other immunopathologic conditions, and allergy.

PHAR 513. Biochemistry   **3 credits**
This course will provide students with the fundamental biochemical principles underlying cellular physiology and biological processes. Biochemistry will introduce bio-molecules mainly from a structural point of view and presents metabolism as well as molecular biology (gene expression and replication) by integrating structure-function relationship of enzymes and DNA-binding proteins, respectively.

PHAR 514. Pharmaceutics I (Calculations)[OBJ]   **2 credits**

The study of the measurement units, and mathematical functions and applications that are essential to the safe, accurate practice of pharmacy. This course emphasizes pharmaceutical nomenclature, numerical expressions, measurement equivalents, calculation formulas, and problem analysis and reasoning.

PHAR 515L. Pharmacy Skills Lab I   **1 credit**
The purpose of this course is to orient the student pharmacist in skills necessary for contemporary pharmacy practice. The one credit hour course will provide an integrated experience of both pharmaceutical sciences and pharmacy practice disciplines, and help students understand the important link between the two. Topics will include basic pharmaceutics, acid-base implications in pharmacy, assay measurement and compounding, and point-of-care testing skills (POCT). During the semester-long course, students will work both individually and in designated pairs, facilitating group learning, communication, and a team approach to problem solving.

PHAR 516. Medicinal Chemistry   **3 credits**
Medicinal chemistry is the application of organic chemistry to biological and pharmaceutical sciences. The course encompasses drug discovery, identification and preparation of pharmaceuticals, the structure activity relationships used to define or enhance drug action, xenobiotic metabolism and the interpretations of pharmaceutical mechanisms of action at the molecular level.

PHAR 520. Basic Principles of Pathophysiology   **4 credits**
The basic biological mechanisms of disease will be presented and discussed. Importance will be placed on basic principles of cell injury and death; inflammation; and neoplasia.

PHAR 522. Pharmaceutics II   **3 credits**
Pharmaceutics II is an overview of medicinal formulations and physical/chemical properties of drugs. The course covers such topics as the stability of compounded products, quality control, sterilization, biotechnology preparations, and pharmaceutical compounding. Prerequisites: PHAR 514.

PHAR 523L. Pharmacy Skills Lab II   **1 credit**
Pharmacy 523L is a one (1) credit hour lab course offered to first-year pharmacy students. The lab class will cover two distinct areas of pharmacy skills during the semester: 1. The legal, practical, and scientific basis of drug products and pharmaceutical delivery systems.

It represents physicochemical theories, terminology, pharmaceutical skills, and interpretation of the formulation and performance of pharmaceutical products. This course will incorporate the pharmaceutics behind dosage forms, while providing a hands-on application for the physicochemical theories presented via prescriptions and extemporaneous compounding labs. 2. The concepts and processes associated with sterile pharmaceutical compounding. The course will begin with the general principles of sterile compounding, focusing on the USP <797> guidelines for sterile compounding. Students will gain hands-on experience with various types of compounding equipment, including needles, syringes, vials, and minibags. The students will become familiar with the sterile compounding of hazardous drugs, antibiotics and nutrition products, and learn to assign appropriate beyond-use-dates to them.

PHAR 525L. Introductory Pharmacy Practice Experience I   **1 credit**
Introductory Pharmacy Practice Experience I (IPPE I) is intended to provide initial exposure to community practice for first year pharmacy students. Early exposure to practice will make didactic instruction more relevant by providing opportunities to observe pharmacist patient care activities as well as managerial practices. Students will be placed in a community practice setting for 32 hours. This course also includes community pharmacy-based simulation activities designed to prepare students for their IPPE experiences (the simulation experiences do not count for the number of required IPPE hours). Students will be enrolled in this course in either the fall or spring semester of the first professional year.

PHAR 527. Lifestyle Modifications and Disease Prevention   **3 credits**
This course will focus on the non-pharmacological basis of disease prevention and those modifications to improve health. This course will combine a lecture-based course focusing on the need for wellness and the promotion of healthy lifestyles with projects geared towards elevating the students' understanding of how to put the concepts into pharmacy practice. Key components of the course will focus on nutrition, physical activity, smoking cessation, and health behavior modification. Students will also learn how cultural differences and social disparities may play a role in achieving the lifestyle modifications necessary for positive health outcomes. A focus on the therapeutic indications of over the counter medications is also included in the course content.

PHAR 528. Social Pharmacy   **2 credits**
This course is a comprehensive overview of the social and behavioral aspects of health behavior and the implications for pharmaceutical care. It is designed to explore the theoretical concepts basic to the Social Behavioral Sciences, and how they relate to pharmaceutical care as a discipline. Theoretical models will be examined to elaborate the diversity in patient behavior in health and sickness. The pharmacist's role in providing patient specific care will be discussed as integrated with the complexities of human behavior. Social beahvioral research students that explore how individual health actions are influenced by the social processes, social and cultural groups, and diversity in social consequences of his/her environment and group interactions, will be a significant component of the class. (Elective)

PHAR 531. Ethnopharmacology of Appalachia   **3 credits**
This course provides the study and understandings about the people of Appalachia's use of plants, fungi, animals, microorganisms, and minerals and their biological and pharmacological effects. In this class there will be an examination of remedies from the

standpoint of medical efficacy, potential toxicities, and drug interactions with prescribed medications. (Elective)

PHAR 535. Introduction to Psychiatric Pharmacy   **3 credits**
Introduction to Psychiatric Pharmacy takes a global view of mental health illnesses and its treatment. The historical perspective of the treatment of the mentally ill and the growth and increased compassion that has now become a standard expectation in the treatment of mental disorders will be presented. The goal of the course is to provide introductory and foundational knowledge for competent, compassionate, and empathetic care of patients with mental illnesses. Course content covers the identification of what encompasses mental health disorders as classified by the Diagnostic Standards Manual, Fifth Edition (DSM-V) and the general treatment of the most common mood disorders, substance abuse disorders, thought disorders, and cognitive disorders. The use of visitation to mental health support groups, historic or contemporary mental health institutions, guest lecturers, and viewing of contemporary movies that portray important issues associated with persons afflicted with mental illnesses and the effect on family, caregivers, and society at large may be incorporated into the activities of the course. Ultimately, students enrolled in the course will be provided with content designed to provide them with sufficient information to have the appropriate attitude, skills, and awareness to avoid stereotypes, stigmas, and other barriers that limit the adequate treatment of the mentally impaired. Students will become familiar with the changing demographics of mental illness and the impact that this will have on their provision of pharmacy care, regardless of their practice environment upon graduation. (Elective)

PHAR 536 Barriers to Health in Underserved Populations   **2 credits**
Barriers to Health in Underserved Populations is a two credit-hour elective designed to improve the student's awareness and understanding of the obstacles to good health that various underserved populations face, and to introduce students to tools that they can use as healthcare providers to lessen some of these obstacles. An emphasis will be placed on pharmacist-related concerns, including health literacy and access to medications. This course will meet for three hours every week. The first half of class will generally involve a lecture or documentary film, and the second half will be spent in 'workshops' where students will practice using the tools or skills they have learned. (Elective)

PHAR 537. Patient Safety in Pharmacy Practice   **3 credits**
This course is designed to introduce the students to patient Safety as related to Pharmacy Practice. The student will learn definitions related to patient safety, learn how to evaluate the medication use system for error potential, discuss and develop safety strategies as related to the medication use system, learn about regulatory agencies involved in patient and medication safety, and learn about quality management resources used in evaluating medication and patient safety. Note: For elective courses additional course enrollment information (class size, year preference, etc.) May be provided at the time of registration. (Elective)

PHAR 539. Prevention of Drug Diversion and Substance Use Disorder   **2 credits**
This course will introduce the students to the how's and why's of drug diversion and substance abuse including: recognition of drug diversion and substance abuse, types of drugs abused, intervention, treatment considerations, implications to society, the profession and the law. Students will be required to complete several projects and participate in several activities outside of the classroom. (Elective)

PHAR 545. Bad Bugs, Pathogens and Prions   **3 credits**
This course will provide students with an understanding of virulence and pathogenesis of medically important microbes commonly seen by pharmacists. Topics will include diseases caused by bacteria, fungi, viruses, rickettsia, ecto and endo parasites. Special emphasis will be given to agents covered in pharmacotherapy and vaccine preventable microbial and viral diseases. Other topics will include emerging pandemic organisms, and prions. This course will build on material from the first year immunology course as it relates to immune response to infectious diseases. Pharmacy students considering a post graduate residency in infectious disease also will find this course valuable. (Elective)

PHAR 546. History of Pharmacy   **2 credits**
The profession of pharmacy can trace its origins to prehistoric times. This elective course will focus on the evolution of the profession in the United States from 18th century to present time. Upon completion, the student will be familiar with the general chronology of the profession's development. Moreover, the students will understand that pharmacy development is part of a larger context of social, political and cultural development in the healthcare realm. Sequential development periods will be presented through readings, lectures and discussions. (Elective)

PHAR 547. Spanish for Pharmacists   **3 credits**
Spanish for Pharmacists is a beginner to intermediate course that focuses on mastery of oral and written communications in the Spanish language with a special emphasis on vocabulary and conversation beneficial to health care professionals. Students will explore topics relevant to real-world everyday situations. This course is an intensive exercise in learning to effectively, and directly apply linguistic, reading and writing skills in the target language. The curriculum focuses primarily on oral listening and speaking communication skills during class sessions. The application of reading and writing skills will be mostly *self-directed* and addressed in out-of-class assignments, activities, and projects. Prerequisite: one or more years of general high school and/or Advanced Placement Spanish. (Elective)

PHAR 548. Personal Financial Planning   **3 credits**
The goal of this course is to provide pharmacy students with a foundation in the various aspects of Personal Finance. Research shows that those students who take a Personal Finance course early in their lives accumulate approximately one year's salary more in net worth than those who do not take one (Garman et al., 1998). Students will learn basic financial planning skills via a process that will give them both the competence and confidence to prudently manage their savings, budgets, and debt. In addition, they will learn about the different types of insurance. Finally, a significant amount of time will be spent on the different types of investments, risk assessments, and retirement planning. Most students taking this course will likely never have purchased a house, invested money for retirement, or purchased a home. After taking this course, they will feel more competent and confident in doing these. The ultimate goal is to place students on the path to become financial independence, and to give back to their communities through philanthropy. (Elective)

PHAR 549. Leadership & Advocacy for Pharmacy Practice   **3 credits**
This course will examine the importance of leadership as it relates to pharmacy practice, advocacy, and patient care; and is specifically designed for student pharmacists to enhance their ability to become effective leaders in the practice of pharmacy. The objective of this course is not to build a leader, rather to augment the characteristics the particular leader possesses. Students have the opportunity to partake in a variety of self-assessment, leadership, and

advocacy activities including the development of a proposal with implementation plan to address a pharmacy-related issue and participation in an advocacy campaign. (Elective)

PHAR 550. Introduction to Global Pharmacy Practice   **3 credits**
This course will introduce P1 P2 and P3 professional year students to the practice of pharmacy throughout the world. Differences in pharmacy practice between the United States and other countries will be highlighted. In addition, different cultural influences on the practice of pharmacy within the United States will be discussed. Students will get the opportunity to communicate with pharmacists and pharmacy students from various countries. This type of exposure and discussion may help form awareness that will prepare a student for further global pharmacy opportunities. This course will be highly discussion-based and is ideal for students who are interested in pursuing international rotations. (Elective)

PHAR 551. Everybody with Diabetes Counts   **3 credits**
Peer educator training in this course will prepare student pharmacists to deliver an evidence- based, diabetes education curriculum model – Diabetes Empowerment Education Program (DEEP). DEEP is a part of Everyone with Diabetes Counts (EDC) which is a health disparities reduction program for persons with diabetes. Students will learn about the scope of pre-diabetes and the diabetes epidemic. They will gain an understanding of the causes, diagnosis, and management of pre-diabetes and diabetes, principles of adult education, DEEP teaching activities, and program planning, implementation and evaluation, ultimately preparing them to offer diabetes self- management education and support (DSMES) to the community using the DEEP curriculum. Upon completion of the DEEP Peer Educator training requirements, students will be required to assist with and teach in DSMES community workshops. Students will receive a signed Recommendation for Certification upon completion of all course requirements. (Elective)

PHAR 555. Strategies for Positive Health Outcomes   **3 credits**
The goal of this course is to challenge the student to take creative action to overcome the barriers to providing comprehensive pharmaceutical care. The contemporary pharmacist must not only be focused on the delivery of an accurate product, but responsible for the delivery of pharmaceutical care. Many barriers exist which must be identified and overcome in order to effect positive health outcomes. The course describes forces within and between individuals and societies which influence health. Topics covered include the psychosocial aspects of care, public health, cultural competency, health literacy, basic epidemiology among others.

PHAR 597. Professionalism and Academic Success in Pharmacy School   **3 credits**
This class will help the student develop effective study skills and professional habits to improve his/her performance at the graduate/professional academic level. Through guided exercises, the student will be able to enhance his/her abilities in studying, oral and written communication, stress and time management and leadership. This course will be delivered as a "flipped classroom" or hybrid course. Students will meet in seat 90-minutes per week. However, they will be expected to have completed all course readings and view video lectures prior to class. (Elective)

PHAR 598. & PHAR 599. P1 e-Portfolio   **0 credit**
These courses are designed to allow the P1 student pharmacist to complete their e- Portfolio as required for graduation and progression in the pharmacy program. The courses have been

designed to meet the 2016 ACPE Standards and 2013 CAPE Outcomes for Pharmacy Education.

PHAR 607 Case Studies on Structurally Based Therapeutic Evaluation and Drug Discovery **2 credits**

This is a case study based elective course highlighting concepts of medicinal chemistry and drug discovery in therapeutic evaluations. Students will gain exposure to different clinically based as well as drug discovery-based case studies where problem-based learning will be incorporated to demonstrate and apply a culmination of concepts learned in the medicinal chemistry, pharmacology, and therapeutic sequences. Team based and individual discussions and presentations will be integrated which will be important in improving their communication and problem-solving skills as well as help to retain concepts. (Elective)

PHAR 610. Pharmacokinetic Principles and Clinical Application **3 credits**

Pharmacokinetics Principles presents the theoretical mathematical and functionally dependent physiologic relationships that comprise the quantitative basis for determining patient-specific and drug dosage regimens. This course emphasizes interpreting the (1) rate or time course of drug absorption and elimination, and (2) extent of in vivo distribution from data, graphs, and equations to calculate, identify, and monitor safe and therapeutically effective drug in plasma concentrations, especially for narrow therapeutic range drugs. Clinical application of these principles is also covered in this course.

PHAR 611L. Pharmacy Skills Lab III **1 credit**

The purpose of this course is to orient the student pharmacist in skills necessary for contemporary pharmacy practice. Topics will focus on cognitive aspects of dispensing, such as communication with both patients and other health care providers. Students will receive training on, then have the opportunity to practice using, the Pharmacist's Patient Care Process (include obtaining a health history, medication history, basic patient assessment, development of patient care plans, and appropriate documentation styles). In addition, students will receive training and practice on medication counseling, medication errors, medication reconciliation as well as various physical assessment and medication devices.

PHAR 612. Basic Principles of Pharmacology I **3 credits**

The basic biological mechanism of therapeutic agents used to treat diseases will be presented and discussed. Importance will be placed on basic pharmacologic principles of pharmacodynamics and cellular processes that underlie understanding a rational approach to therapeutics.

PHAR 615L. Introductory Pharmacy Practice Experience II **4 credits**

Introductory Pharmacy Practice Experience II (IPPE II) is intended to provide a more in depth experience in community practice for second year pharmacy students. Early exposure to practice will make didactic instruction more relevant by providing opportunities to participate in pharmacist patient care activities (under the direct supervision of a preceptor) as well as managerial practices. Students will be placed in a community practice setting for 160 hours and will be enrolled in this course in either the fall or spring semester of the second professional year.

PHAR 626L. Introductory Pharmacy Practice Experience III **2 credits**

Introductory Pharmacy Practice Experience III (IPPE III) is intended to provide an

overview of institutional pharmacy practice to second year pharmacy students. Early exposure to practice will make didactic instruction more relevant by providing opportunities to participate in pharmacist patient care activities (under the direct supervision of a preceptor) as well as managerial practices. Students will be placed in an institutional practice setting for two weeks (80 hours) during the summer between P2 and P3 year.

PHAR 629. Healthcare Communications   3 credits
This course is designed to help student pharmacists enhance the communication skills they need to deliver quality patient care and to function as a health care practitioner in a global society. This course includes comprehensive assignments and discussions that cover a variety of communication skills necessary for success as a healthcare practitioner to include; the interpersonal and inter-professional communication skills of listening and responding and the provision of health information orally and in writing to a variety of audiences The course will focus on the development of individual skills through application of knowledge gained through lectures and active learning opportunities.

PHAR 630. Pharmaceutical Biotechnology   3 credits
Pharmaceutical Biotechnology is intended to provide the student with a working knowledge of the preparation, stability and formulation of different protein and peptide drugs such as antisense agents, transgenic therapeutics and gene therapy. Current FDA approved biotechnology drugs such as human insulin, growth hormones and interferons will be discussed. Note: For elective courses additional course enrollment information (class size, year preference, etc.) may be provided at the time of registration. (Elective)

PHAR 631. Human Cancer   3 credits
This course provides students with knowledge of the fundamental principles of biology of cancer, therapeutic agents, the identification, enrollment and the mechanism of clinical trials, nuclear pharmacy, and patient treatment. Discussions of the scientific literature in the field will complement didactic lectures. Discussion of aspects of cancer epidemiology, prevention, and principles of drug action in cancer management will be part of the course. Note: For elective courses additional course enrollment information (class size, year preference, etc.) may be provided at the time of registration. (Elective)

PHAR 632. Advanced Topics in Pharmacogenomics   3 credits
This course extends and applies the concepts presented in the Human Response to Disease course. The goal is for students to develop a deeper understanding and working knowledge regarding current pharmacogenomic issues that influence the drive toward individualized medicine. In the near future, pharmacists will be required to evaluate current scientific and lay media reports on genetic variations that produce variability in expression of disease and response to treatment. The course will focus on the evaluation of scientific and lay media reports, application of this knowledge to predict variable patient outcomes, and translate the information to facilitate counseling to patients as individuals. Note: For elective courses additional course enrollment information (class size, year preference, etc.) may be provided at the time of registration. (Elective)

PHAR 633 Advanced Clinical Research in Pharmaceutical Industry   3 credits
This course introduces Pharm D students to the principles and practice of clinical research. The course covers both basic and advanced topics for those who want to pursue a career in the pharmaceutical industry or the FDA. It covers a variety of topics linked to clinical research like design of clinical trials, writing clinical protocols, management of patient

samples, biostatistics, ethics, legal concerns, regulatory issues, financial management, working with Institutional Review Boards, clinical site management, data management and the role of pharmaceutical industry in clinical research. (Elective)

PHAR 636. Diabetes Education and the Patient   **3 credits** This course is introductory and designed to educate students with the general understanding of diabetes. The student will learn about the pathophysiology of diabetes, affected body organs, diagnosis, management, and the different types of diabetes. The course also covers the importance of glucose and insulin, symptoms, testing methodology to maintain blood sugar and insulin levels. The course also emphasizes lifestyle, infection prevention, nutrition and diet, coping with diabetes and medications. The course explores different types of diabetes including elderly and gestational diabetes. The course introduces technology utilization in clinical practice and management of diabetes (Elective)

PHAR 640. Pharmacotherapy 1   **3 credits**
The objective of this 7- week course is to introduce the pharmacy student to pharmacotherapy management for patients with select disorders. This course is designed to provide a comprehensive overview of each therapeutic topic listed in the individual course schedule. For each therapeutic area studied, applicable concepts in self-care (i.e., nonprescription pharmacotherapy), geriatric and pediatric issues, and cultural competency will be integrated throughout this course. Students should understand, integrate, and apply the information and skills obtained from pathophysiology, pharmacology, medicinal chemistry, drug literature evaluation and pharmacokinetics to develop a rational drug therapy plan for patients. Students will be responsible for preparing for each class session by reading assignments and preparing to discuss cases or applications in class daily.

PHAR 641. Basic Principles of Pharmacology II   **3 credits**
The basic biological mechanism of therapeutic agents used to treat diseases will be presented and discussed. Importance will be placed on basic pharmacologic principles of pharmacodynamics and cellular processes that underlie understanding a rational approach to therapeutics.

PHAR 644 Clinical Research Methods & Biostatistics   **3 credits**
Clinical Research Methods & Biostatistics serves as an introduction to the principles of study design, biostatistics, and analysis. The course will introduce students to the elements of scientific research, the scientific process, and the role of research in clinical practice and pharmaceutical care. The course also will provide the student with the knowledge and skills necessary for interpreting and conducting research, planning, protocol development, and reporting of research findings. Statistical analysis and interpretation is integrated into the course allowing the student to evaluate current studies for appropriate assessment. After this course, students should be able to understand the key elements of the scientific process and study design, and the application of statistical analysis to this process.

PHAR 645 Clinical Assessment of Laboratory and Diagnostic Studies   **3 credits**
The objective of this course is to introduce the student pharmacist to all aspects of lab work that apply to clinical practice. This course is designed to provide essential information on common laboratory tests used to screen for or diagnose diseases and monitor the effectiveness and safety of treatment and disease severity. (Elective)

PHAR 650. Pharmacotherapy 2   **3 credits**

The objective of this 7- week course is to introduce the pharmacy student to pharmacotherapy management for patients with select disorders. This course is designed to provide a comprehensive overview of each therapeutic topic listed in the individual course schedule. For each therapeutic area studied, applicable concepts in self-care (i.e., nonprescription pharmacotherapy), geriatric and pediatric issues, and cultural competency will be integrated throughout this course. Students should understand, integrate, and apply the information and skills obtained from pathophysiology, pharmacology, medicinal chemistry, drug literature evaluation and pharmacokinetics to develop a rational drug therapy plan for patients. Students will be responsible for preparing for each class session by reading assignments and preparing to discuss cases or applications in class daily.

PHAR 660. Pharmacotherapy 3   **3 credits**

The objective of this 7- week course is to introduce the pharmacy student to pharmacotherapy management for patients with select disorders. This course is designed to provide a comprehensive overview of each therapeutic topic listed in the individual course schedule. For each therapeutic area studied, applicable concepts in self-care (i.e., nonprescription pharmacotherapy), geriatric and pediatric issues, and cultural competency will be integrated throughout this course. Students should understand, integrate, and apply the information and skills obtained from pathophysiology, pharmacology, medicinal chemistry, drug literature evaluation and pharmacokinetics to develop a rational drug therapy plan for patients. Students will be responsible for preparing for each class session by reading assignments and preparing to discuss cases or applications in class daily.

PHAR 670. Pharmacotherapy 4   **3 credits**

The objective of this 7- week course is to introduce the pharmacy student to pharmacotherapy management for patients with select disorders. This course is designed to provide a comprehensive overview of each therapeutic topic listed in the individual course schedule. For each therapeutic area studied, applicable concepts in self-care (i.e., nonprescription pharmacotherapy), geriatric and pediatric issues, and cultural competency will be integrated throughout this course. Students should understand, integrate, and apply the information and skills obtained from pathophysiology, pharmacology, medicinal chemistry, drug literature evaluation and pharmacokinetics to develop a rational drug therapy plan for patients. Students will be responsible for preparing for each class session by reading assignments and preparing to discuss cases or applications in class daily.

PHAR 698. & PHAR 699. P2 e-Portfolio   **0 credit**

These courses are designed to allow the P2 student pharmacist to complete the e-Portfolio as required for graduation and progression in the pharmacy program. The courses have been designed to meet the 2016 ACPE Standards and 2013 CAPE Outcomes for Pharmacy Education.

PHAR 700 Pharmacy Skills Lab IV   **1 credit**

This is a capstone laboratory course highlighting pharmacy practice skills that focus on Entrustable Professional Activities (EPAs) and demonstrate student readiness for Advanced Pharmacy Practice Experiences (APPEs). Students will gain exposure to pharmacist-delivered patient care services through use of simulated experiences. Team-readiness is emphasized as students collaborate with UC Physician Assistant students in interprofessional patient care simulated activities. Problem-based learning will be incorporated to demonstrate and apply a culmination of concepts learned in the

pharmacotherapy sequence covering care across the lifespan of patients. Pharmacy administration concepts, communication skills and problem-solving will be practiced such that students may demonstrate competence in these areas prior to APPE rotations where these skills will be expected.

PHAR 716L. Introductory Pharmacy Practice Experience IV   **1 credit**
Introductory Pharmacy Practice Experience IV (IPPE IV) is designed to provide an introduction to establishing the appropriate delivery of pharmaceutical care services to patients. Topics will focus on the role pharmacists play in pharmaceutical care, how those roles may be achieved, and the process of completing comprehensive medication reviews. Students will apply previous knowledge learned to further develop the skills and attitudes necessary to complete comprehensive medication reviews and participate in team-based care. Upon completion of this course, students should have gained the basic knowledge, abilities, and attitudes necessary for developing pharmaceutical care practices. This course will provide 32 IPPE hours.

PHAR 718. Pharmacogenomics and Medical Genetics   **3 credits**
Human response to Disease will explore how DNA variations are important in understanding the genetic basis for disease and individual responses to environmental factors, as well as for such normal variations in biological processes as development and a drug response. The course will also focus on the psychosocial response to the disease process and physiologic markers of that process

PHAR 725. Pharmacy Management and Marketing   **3 credits**
The major goal of this course is to provide the student pharmacist with a conceptual and practical understanding of accounting, financial analysis, human resource management, basic organizational behavior concepts, management skills, and their applications to pharmacy and healthcare organizations. Additionally, the course will provide a working knowledge of the marketing principles to pharmacy practice, marketing techniques for pharmacy practice, operations, quality improvement, service marketing management, prescription drug promotion and pharmaceutical marketing issues currently of interest to the pharmaceutical industry and pharmacy practice.

PHAR 728. Pharmacy Law   **3 credits**
Students will learn the federal laws governing the practice of pharmacy. The course will emphasize introductory legal concepts that encompass the rights and responsibilities of the pharmacist and their practical application.

PHAR 729. Geriatric Pharmacotherapy and Pharmaceutical Care   **2 credits**
This course is designed to provide current information regarding pharmacotherapy and pharmacy care for the geriatric population. It is intended to build upon existing pharmacotherapy knowledge and prior course content. Case-based learning will be used to develop problem solving and critical thinking skills, particularly in regard to the selection and monitoring of medication therapies. Special emphasis will be placed on preventing and detecting medication-related problems and geriatric syndromes. This course will also emphasize the broader aspects of care for geriatric patients, including psychological, sociological, and financial elements that influence therapy management. The interdisciplinary team approach in caring for the geriatric population will be incorporated, along with the pharmacist's role in various care settings. (Elective)

PHAR 730 Community Pharmacy Practice and Management   **3 credits**

This course is designed for students to learn the responsibilities and duties of a pharmacy manager. Students will be expected to develop their own "pharmacy" and use real-life examples and simulation activities to solve issues that challenge a pharmacist in charge. Areas covered will include, operations management, regulatory functions, human resource, budgeting, marketing, and value added services. (Elective)

PHAR 732. Adverse Drug Reaction   **3 credits**

Adverse Drug Reaction is an in-depth study course for P3 students to provide a comprehensive evaluation of drug induced reactions and diseases. This course prepares the student for an optional P4 elective rotation on adverse drug reactions as well as a greater understanding of adverse reactions for patient care in clinical settings (i.e., pharmacy residency, clinics, hospital pharmacy). Topics covered include (but not limited to) adverse drug reaction definition, reporting, prediction, treatments, mechanism of action, and documentation. (Elective)

PHAR 733. Palliative Care   **3 credits**

This course will provide knowledge and skills for the pharmacist to function as an integral member of the multidisciplinary team caring for the palliative care patient. Critical thinking and communication skills will be emphasized. Topics for this course include general principles of palliative care, pain and symptom management and the pharmacoeconomic issues that influence the delivery of pharmaceutical care in the palliative care or hospice setting. (Elective)

PHAR 734. Advanced Medical Communication   **3 credits**

Advanced Medical Communications will provide students with knowledge and skills in basic medical writing, including punctuation, grammar, and writing style, and various communications styles. Students will participate in a variety of communications activities using their basic skills, including writing blogs, newspaper articles, patient education materials, presenting in small and large formats, and creating videos for patient education. Additionally, students will be introduced to career options in medical communications. (Elective)

PHAR 735. Exploring Postgraduate Training   **3 credits**

The objective of this course is to introduce and prepare students for navigating the process of researching, applying and obtaining a postgraduate training opportunity. As positions are becoming more competitive it is necessary to be equipped with tools to ensure you stand out in the applicant pool. This course will explore what postgraduate training opportunities are available, how to prepare for them and how to excel once obtaining one. (Elective)

PHAR 736. Advanced Topics in Pharmacotherapy   **3 credits**

The objective of this course is to challenge the pharmacy student to expand their baseline pharmacotherapy knowledge gained in the pharmacotherapy courses through the study of advanced therapeutic topics. For each therapeutic area studied, students will be expected to exhibit skills in thinking and decision making, provide effective communication both with other healthcare providers and patients, and enhance self-learning skills. Students should understand, integrate, and apply the information and skills obtained from pathophysiology, pharmacology, medicinal chemistry, and pharmacokinetics to develop and implement a rational drug therapy plan. Students will be responsible for attending each class session and completing application-based case scenarios and topic debates as assigned. (Elective)

PHAR 737. Pharmacoepidemiology   **3 credits**

This course is designed to assist students to understand concepts of pharmacoepidemiology, how pharmacoepidemiology students are conducted; and how to interpret findings. Based on the clinical pharmacology knowledge and epidemiology concepts, the course will include the process for drug approval, methods for identification and attribution of adverse drug events, current understanding of the epidemiology of adverse drug events; student design and data source for pharmacoepidemiology studies; and application of these studies in the medication decision-making process. (Elective)

PHAR 738. Ambulatory Care Pharmacy   **2 credits**

By participating in this course, students will learn to apply evidence-based medicine, problem-solving, communication, and critical thinking to patient cases and presentations related to ambulatory care pharmacy practice. Class sessions will consist of ambulatory care topic presentations and discussions, quizzes, active learning activities such as group case completion and discussion, and patient counseling presentations. Class engagement (preparation and participation) is expected for each class session. Course topics include, but are not limited to, pharmacist management of chronic disease states commonly encountered in the ambulatory setting (hypertension, diabetes, hyperlipidemia, heart failure, COPD, etc.), billing for pharmacy services, and transitions of care. (Elective)

PHAR 739. Emergency Medicine   **3 credits**

Emergency Medicine is an evolving and increasingly recognized practice area for clinical pharmacists. As interest and professional opportunities continue to expand in this therapeutic arena, it is imperative for students to become cognizant of the various aspects of this unique specialty. In addition, the practice of emergency medicine is a collection of various therapeutic areas. This course will not only serve to expose the learner to many new and exciting topics but also serve as a refresher of many topics that are briefly covered in the regular curriculum with and added emphasis on the rapid treatment of the undifferentiated patient. (Elective)

PHAR 740. Pharmacotherapy 5   **3 credits**

The objective of this 7- week course is to introduce the pharmacy student to pharmacotherapy management for patients with select disorders. This course is designed to provide a comprehensive overview of each therapeutic topic listed in the individual course schedule. For each therapeutic area studied, applicable concepts in self-care (i.e., nonprescription pharmacotherapy), geriatric and pediatric issues, and cultural competency will be integrated throughout this course. Students should understand, integrate, and apply the information and skills obtained from pathophysiology, pharmacology, medicinal chemistry, drug literature evaluation and pharmacokinetics to develop a rational drug therapy plan for patients. Students will be responsible for preparing for each class session by reading assignments and preparing to discuss cases or applications in class daily.

PHAR 741. Pharmacoeconomics and Outcomes Research   **2 credits**

Topics addressed in this course will include the many facets of pharmacoeconomics in pharmacy & healthcare settings, including the use of pharmaceuticals, appropriateness and quality of care, patient outcomes, patient satisfaction with care, costs of both appropriate and inappropriate medication use, healthcare policies related to health care and pharmacoepidemiological considerations. Moreover, the course will examine the respective roles and behaviors of the healthcare professionals (e.g., physicians, pharmacists, nurses, allied health) involved in patient care and the influence of healthcare-related organizations

(e.g., managed care, health maintenance organizations, public and private insurance, pharmaceutical manufacturers) on health outcomes.

PHAR 742. Advanced Drug Literature Evaluation **2 credits**
Advanced Drug Literature Evaluation provides the student with advanced problem-solving skills in drug information and related material. The first part of the class is dedicated to didactics and background information relating to drug information resources and activities while on APPE rotations. The second half of the class will be journal club presentations provided by students. After this course, students should be able to apply skills learned in class to the APPE rotations and NAPLEX.

PHAR 750. Pharmacotherapy 6 **3 credits**
The objective of this 7- week course is to introduce the pharmacy student to pharmacotherapy management for patients with select disorders. This course is designed to provide a comprehensive overview of each therapeutic topic listed in the individual course schedule. For each therapeutic area studied, applicable concepts in self-care (i.e., nonprescription pharmacotherapy), geriatric and pediatric issues, and cultural competency will be integrated throughout this course. Students should understand, integrate, and apply the information and skills obtained from pathophysiology, pharmacology, medicinal chemistry, drug literature evaluation and pharmacokinetics to develop a rational drug therapy plan for patients. Students will be responsible for preparing for each class session by reading assignments and preparing to discuss cases or applications in class daily.

PHAR 760. Pharmacotherapy 7 **3 credits**
The objective of this 7- week course is to introduce the pharmacy student to pharmacotherapy management for patients with select disorders. This course is designed to provide a comprehensive overview of each therapeutic topic listed in the individual course schedule. For each therapeutic area studied, applicable concepts in self-care (i.e., nonprescription pharmacotherapy), geriatric and pediatric issues, and cultural competency will be integrated throughout this course. Students should understand, integrate, and apply the information and skills obtained from pathophysiology, pharmacology, medicinal chemistry, drug literature evaluation and pharmacokinetics to develop a rational drug therapy plan for patients. Students will be responsible for preparing for each class session by reading assignments and preparing to discuss cases or applications in class daily.

PHAR 770. Pharmacotherapy 8 **3 credits**
The objective of this 7- week course is to introduce the pharmacy student to pharmacotherapy management for patients with select disorders. This course is designed to provide a comprehensive overview of each therapeutic topic listed in the individual course schedule. For each therapeutic area studied, applicable concepts in self-care (i.e., nonprescription pharmacotherapy), geriatric and pediatric issues, and cultural competency will be integrated throughout this course. Students should understand, integrate, and apply the information and skills obtained from pathophysiology, pharmacology, medicinal chemistry, drug literature evaluation and pharmacokinetics to develop a rational drug therapy plan for patients. Students will be responsible for preparing for each class session by reading assignments and preparing to discuss cases or applications in class daily.

PHAR 798. & PHAR 799. P3 e-Portfolio **0 credit**
These courses are designed to allow the P3 student pharmacist to complete the e-Portfolio as required for graduation and progression in the pharmacy program. The courses have been

designed to meet the 2016 ACPE Standards and 2013 CAPE Outcomes for Pharmacy Education.

PHAR 821-828. Advanced Pharmacy Practice Experiencesand Course   40 credits
Eight advanced pharmacy practice experiences in various practice environments that present the student with the opportunity to engage in the advanced practice of pharmacy in a structured and supervised environment. Prerequisites: Students must have achieved fourth year professional status and successfully completed all academic and programmatic requirements of the first three professional years.

Ambulatory Care Experience   5 credits
Students will be assigned a pharmacist preceptor for a five-week equivalent in the pharmacist's practice site. Each equivalent week of experience shall contain an average of forty hours of practice. The student will perform pharmacist functions while under the supervision of the faculty (full-time, part-time or affiliate) member. Activities designed as part of this course give the student experience in an ambulatory care practice setting.

Acute Care/Internal Medicine Experience   5 credits
Students will be assigned a pharmacist preceptor for a five-week equivalent in the pharmacist's practice site. Each equivalent week of experience shall contain an average of forty hours of practice. The student will perform pharmacist functions while under the supervision of the faculty (full-time, part-time or affiliate) member. Activities designed as part of this course give the student experience in an in-patient practice setting.

Community Care Experience   5 credits
Students will be assigned a pharmacist preceptor for a five-week equivalent in the pharmacist's practice site. Each equivalent week of experience shall contain an average of forty hours of practice. The student will perform pharmacist functions while under the supervision of the faculty (full-time, part-time or affiliate) member. Activities designed as part of this course gives the student experience in a community clinical care practice setting.

Institutional Practice Experience   5 credits
Students will be assigned a pharmacist preceptor for a five-week equivalent in the pharmacist's practice site. Each equivalent week of experience shall contain an average of forty hours of practice. The student will perform pharmacist functions while under the supervision of the faculty (full-time, part-time or affiliate) member. Activities designed as part of this course give the student experience in an institutional (hospital) practice setting.

Selective Experience I   5 credits
Students will be assigned a pharmacist preceptor for a five-week equivalent in the pharmacist's practice site. Each equivalent week of experience shall contain an average of forty hours of practice. The student will perform pharmacist functions while under the supervision of the faculty (full-time, part-time or affiliate) member. Students will complete either a clinical or management rotation in a community or institutional setting. Placement will be determined based on the student's stated preference.

Selective Experience II   5 credits
Students will be assigned a pharmacist preceptor for a five-week equivalent in the pharmacist's practice site. Each equivalent week of experience shall contain an average of forty hours of practice. The student will perform pharmacist functions while under the supervision of the faculty (full-time, part-time or affiliate) member. Students will complete

either a clinical or management rotation in a community or institutional setting. Placement will be determined based on the student's stated preference.

Elective Care Experience I $\qquad$ 5 credits

Students will be assigned a pharmacist preceptor for a five-week equivalent in the pharmacist's practice site. Each equivalent week of experience shall contain an average of forty hours of practice. The student will perform pharmacist functions while under the supervision of the faculty (full-time, part-time or affiliate) member.

Elective Care Experience II $\qquad$ 5 credits

Students will be assigned a pharmacist preceptor for a five-week equivalent in the pharmacist's practice site. Each equivalent week of experience shall contain an average of forty hours of practice. The student will perform pharmacist functions while under the supervision of the faculty (full-time, part-time or affiliate) member.

PHAR 812. Medication Therapy Management Certification

2 credits

Students will participate in pre-determined certification program and receive a certificate upon successful completion of the course requirements.

PHAR 870. NAPLEX/MPJE Preparation Graduation Requirement Part 1. 0 credit

This is the first of a 3-part graduation requirement which is intended to stimulate students to reflect on material that they have been exposed to during the pharmacy curriculum and re-familiarize themselves with the material to the level required to pass the North American Pharmacist Licensure Examination (NAPLEX) and Multistate Pharmacy Jurisprudence Examination (MPJE).

PHAR 880. NAPLEX/MPJE Preparation Graduation Requirement Part 2. 1 credit

This is the second of a 3-part graduation requirement which is intended to stimulate students to reflect on material that they have been exposed to during the pharmacy curriculum and re-familiarize themselves with the material to the level required to pass the North American Pharmacist Licensure Examination (NAPLEX) and Multistate Pharmacy Jurisprudence Examination (MPJE).

PHAR 891. NAPLEX/MPJE Preparation Graduation Requirement Part 3. 1 credit

This is the third of a 3-part graduation requirement which is intended to stimulate students to reflect on material that they have been exposed to during the pharmacy curriculum and re-familiarize themselves with the material to the level required to pass the North American Pharmacist Licensure Examination (NAPLEX) and Multistate Pharmacy Jurisprudence Examination (MPJE).

PHAR 899. ePortfolio $\qquad$ 1 credit

This course represents the culmination of the student's e-Portfolio. During this course each P4 student will successfully complete an oral defense of the e-Portfolio. The course has been designed to meet the 2016 ACPE Standards and 2013 CAPE Outcomes for Pharmacy Education

THE FACULTY

PROFESSORS

Bayly, Michael J., *Professor of Psychology and Chair, Department of Social Sciences.* BS, University of Maryland; MA, PhD, University of Kansas. (1990-)

Fandy, Tamer*, Professor of Pharmaceutical and Administrative Sciences and Chair of Department of Pharmaceutical and Administrative Science*. BS, Cairo University, MS, University of Southern California, PhD, University of Maryland. (2017-)

Hoffman, Jennifer G., *Professor and Program Director of Mathematics; Chair of Computer Science, Data Analytics, & Mathematics Department.* BS University of Charleston; MA, Marshall University. (1997-)

Khan, M. Omar F, *Professor of Pharmaceutical and Administrative Sciences.* BPharm, MPharm, University of Dhaka, Bangladesh, PhD, Manchester University, UK, MBA, Southwestern Oklahoma State University. (2018-)

Lesh, Steven G, *Professor and Program Director of Physical Therapy.* BHS Physical Therapy, University of Missouri; MPA, Arkansas State University; PhD, Capella University. (2023-)

Linger, Rebecca, *Professor of Pharmaceutical and Administrative Sciences.* BA, BS, San Francisco State University, PhD, Purdue University. (2006-)

Lucas, Kristy, *Dean, School of Pharmacy and Professor of Pharmacy Practice.* PharmD, Campbell University. (2010-)

Mech, Stephen, *Professor of Biology.* BS, Boise State University; MS, Washington State University; PhD, Washington State University. (2023-)

Siddig, Aladin A., *Professor of Pharmaceutical and Administrative Sciences.* BS, University of Khartoum; MS, Jackson State University; PhD, Mercer University. (2007-)

Sun, Xiaoping, *Professor of Chemistry.* BS, Peking University; MS, Peking University; PhD, University of New Brunswick. (2001-)

Testman, Julie, *Associate Dean for Academic Affairs and Professor of Pharmacy Practice.* PharmD, West Virginia University. (2006-)

Watson, Mark B., *Professor of Biology; Chair of Natural Sciences Department* BS, MS, Marshall University; PhD, University of Georgia. (2004-)

White, Douglas, *Professor of Leadership.* BA, Houghton College; M.R.E., Trinity International University; EdD, The Southern Baptist Theological Seminary. (2013-)

Wylie, Ruth, *Professor of Leadership.* BS, Virginia Polytechnic Institute and State University; MS, Drake University; PhD, West Virginia University. (2014-)

ASSOCIATE PROFESSORS

Adkins, John E., *Director, Schoenbaum Library (Librarian III).* BA, West Virginia State College; MA, West Virginia Graduate College; MSLS, University of Kentucky. (2004-)

Ajani, Taiwo, *Associate Professor of Business Analytics and Program Director of MS Business & Data Analytics, and BSBA in Business Analytics.* B.Sc., University of Ibadan; MS, University of South Florida; D.Sc., Robert Morris University. (2022-)

Bannister, Debbie, *Associate Professor and Director of First Year Program & Advising Center.* BS, University of Charleston; MA, University of Phoenix. (1986-)

Barnett, Kristi, *Associate Professor of Radiologic Science. Radiologic Science and Public Health Program Director.* AAS University of Charleston; R.T. (R) (MR); BS Weber State University; MPH, West Virginia University.(2008-)

Beatty, Adam, *Associate Professor and Program Director of BS and AS of Cybersecurity.* BS, Mountain State University; MA, West Liberty University; DEL, University of Charleston. (2022-)

Beimel, Betty, *Graduate Nursing Program Director and Associate Professor of MSN FNP*, Capito Department of Nursing. PhD, CRNP, FNP-C. BSN, Roberts Wesleyan College, MSN, Regis University, PhD Nursing, University of Phoenix, Post Masters FNP Certificate School of Advanced Studies, Herzing University. (2021-)

Bradley, Tracy L., *Dean, Morris Harvey School of Arts & Sciences and Associate Professor of Interior Design.* BS, MS, Minnesota State University-Mankato; EdD, Marshall University. (1997-)

Chillag, Hallie, *Associate Professor of Social Sciences and Director, Individualized Major – Multidisciplinary Studies.* BA, West Virginia University; MS, The Pennsylvania State University (2008-)

Clark, Joan Lee*, Associate Professor of Leadership.* BS Siena Heights University, MA, DEL University of Charleston, Doctor of Executive Leadership (1986-)

Cuckler, Indre, *Associate Professor of Psychology.* BS, MA, Mountain State University; EdD, Fielding Graduate University. (2015-)

De, Suvayan, *Associate Professor of Business and MBA Program Director. BSc, MSc,* University of Calcutta; MA, PhD, University of Memphis. (2018-)

Dugan, **Kristen L.,** *Dean, School of Leadership and Associate Professor of Executive Leadership Program.* AAS, Catawba Valley Community College; BA Ashford University; MS Mountain State University; DEL University of Charleston. (2015-)

Farrish, Melissa, Associate Professor of Business, *Undergraduate Business Department Chair, and Program Director of BSBA in Management and Online Undergraduate Business Programs*. BBA, MBA, EdS, EdD Marshall University. (2013-)

Ferris, Frederick, *Associate Professor of Business and Program Director of BSBA in Digital Marketing.* BS, Park University; MBA, Wright State University; PhD University of Dayton. (2012-)

Gahbauer, Alice, *Associate Professor of Pharmacy Practice.* BA, Johns Hopkins University; PharmD University of California, San Francisco. (2015-)

Griffith, Laura, *Associate Professor/ Associate Program Director of Nurse Anesthesia Practice.* BSN, West Virginia University; BA, MS, DMPNA, Marshall University. (2024-)

Hall, Leah, *Associate Professor of Pharmacy Practice and Executive Director of Assessment.* PharmD, West Virginia University. (2013-)

Harris, Kevin*, Associate Professor and Program Director of M.S. in Cybersecurity.* BS, Lincoln University; MS, Southern Illinois University; DBA, Argosy University. (2022-)

Hurst, Scott M., *Associate Professor of Chemistry*; BS, West Virginia University; PhD, Loyola University Chicago. (2023-)

King, J. Suzanne, *Associate Professor of Accounting and Program Director of BSBA in Accounting.* BS, West Virginia University; CPA; MBA, West Virginia College of Graduate Studies. (1980-)

Lathan, Calvin, *Associate Professor of Leadership and Professional Development.* BS, University of the State of New York; MA, Webster University; EdD, University of Southern California. (2014-)

Layne, Melissa, A., *Associate Professor of Nursing, Program Director of Undergraduate Nursing,* ADN, West Virginia University- Parkersburg; BSN, MSN, Marshall University School of Nursing. (2008-)

Lonam, Matthew W., *Associate Professor of Leadership.* BA, Loyola College; MA, The George Washington University; 1999 PhD, University of Missouri. (2015-)

Marsh, Skylar, *Assistant Professor of Nursing, Clinical Coordinator Beckley Instructional Site.* BSN, RN, Mountain State University; MSN, Wheeling Jesuit University. (2015-).

McClellan, Jerry, *Associate Professor of Nurse Anesthesia Practice.* BSN, West Virginia University Institute of Technology; DMPNA, Marshall University. (2024-)

McIntyre, Laura Silver, *Associate Professor of Leadership.* BS, Westfield State College; MA, National University, MA, Westfield State College; DEL University of Charleston. (2016-)

McLaughlin, Robin G., *Associate Professor of Leadership.* BA, MA, Antioch University; PhD, Lesley University. (2015-)

Monk, Gannett, *Associate Professor of Pharmacy Practice and Chair of Department of Pharmacy Practice*. BS Pharm, PharmD: West Virginia University. (2008-2013), (2016-)

Murphy, Karrie, *Associate Professor of Pharmacy Practice.* PharmD, Ferris State University. (2015-)

Orphanos, Megan L., *Associate Professor/ Program Director of Nurse Anesthesia Practice.* BSN, DMPNA, Marshall University. (2024-)

Pauley, Beth Anne, *Associate Professor of Biology, and Associate Provost of Academic Affairs.* BS, MS, EdD, Marshall University. (2006-)

Preston, Teresa R., *Associate Professor and Program Director/Chair of the Department of Physician Assistant Studies*. BS Biology, University of Pittsburgh at Bradford, PA; BS Chemistry, University of Pittsburgh at Bradford, PA; MPAS, Saint Francis University, Loretto, PA; MBA, Saint Francis University, Loretto, PA. (2022-)

Rashrash, Mohamed, *Associate Professor of Pharmaceutical and Administrative Sciences*. BPharm, MS, PhD, Howard University. (2019-)
