

# CAMC & UC DOCTORATE OF NURSE ANESTHESIA PROGRAM PROGRAM EXPERIENCE FORM

## Tell us about your primary site of employment

Name of Hospital

City, State

How long have you worked in the hospital named above (dates)?

How many beds are in the unit you are currently working in?

How many beds in the hospital you are currently working in?

Characterize your hospital  Rural  Suburban  Urban

Type of ICU

Approximately how many hours per week do you work?

How long have you worked in the unit described above (Dates)?

## How often do you personally perform the following skills?

Skills	Never	Occas.	Monthly	Biweekly	Weekly	2-3 times/week	Daily
Intravenous Line Insertion							
Arterial Line Insertion							
Arterial Line Monitoring							
Central Venous Pressure Monitoring							
Pulmonary Artery Pressure Monitoring							
Systematic Vascular Resistance Monitoring							
Mixed Venous Blood Saturation Monitoring							
Cardiac Output Monitoring							
Neuromuscular Monitoring							
Adjust Ventilator Settings							
Make Ventilator Weaning Decisions							
Monitor During Conscious Sedation							
Intra-aortic Balloon Pump							
CRRT							
ICP Monitoring							
Massive Transfusion							
Intraventricular Drain							
Advanced Hemodynamic Monitoring (SV02, SVV, SVI)							
Assistance w/Invasive Bedside Procedures (such as Bronchoscopy, Chest Tube Insertion, Peritoneal/Intraplural/Pericardial Drains)

How often do you personally administer the following pharmacological agents?

Pharmacological Agent	Never	Occas.	Monthly	Biweekly	Weekly	2-3 times/week	Daily
Nitroglycerin Infusion							
Nitroprusside Infusion							
Phenylephrine Infusion							
Phenylephrine Bolus							
Dopamine Infusion							
Levophed Infusion							
Epinephrine Infusion							
Ephedrine Bolus							
Neuromuscular Blocking Agents							
Sedation Agents							
Intravenous Narcotics							

Critical Care experience is defined by the Council on Accreditation as: Critical care experience must be obtained in a critical care area within the United States, its territories or a US military hospital outside of the United States. During this experience, the registered professional nurse has developed critical decision making and psychomotor skills, competency in patient assessment, and the ability to use and interpret advanced monitoring techniques. A critical care area is defined as one where, on a routine basis, the registered professional nurse manages one or more of the following: invasive hemodynamic monitors (e.g., pulmonary artery, central venous pressure, and arterial catheters), cardiac assist devices, mechanical ventilation, and vasoactive infusions. Examples of critical care units may include but are not limited to: surgical intensive care, cardiothoracic intensive care, coronary intensive care, medical intensive care, pediatric intensive care, and neonatal intensive Standards for Accreditation of Nurse Anesthesia Programs - Practice Doctorate Page 37 Revised January 30, 2023 care. Those who have experiences in other areas may be considered provided they can demonstrate competence with managing unstable patients, invasive monitoring, ventilators, and critical care pharmacology.
