Clinical Education

Does this program have a requirement for all students to complete at least one clinical education experience for which the students would be required to seek alternative housing or travel accommodations to attend: **Yes** ☒ **No** ☐

Note: Students are responsible for costs associated with housing, travel and food during clinical education. Additional expectations are as follows:

The expected outcome of the UC DPT curriculum including clinical experiences will be a graduate ready to practice as a generalist physical therapist. While student input to the assignment process is valued and considered, UC DPT cannot guarantee that such requests for clinical matching will be met. The final decision rests with the Director of Clinical Education (DCE) with endorsements from the Core Faculty. The student should be readily prepared to attend an experience that may not have been a top preferred position on the part of the student. The method by which students are selected for clinical sites is determined and approved by the core faculty. UC DPT utilizes a semi-selective, best-fit model that matches the needs of the clinical site, the university, and the student. The rank of priority of needs is: 1) the Clinical Site, 2) the University, and lastly 3) the student. Matching guidelines are as follows for each student:

- a) at least one experience located in greater Appalachia.
- b) at least one experience managing patients or clients with painful conditions.
- c) at least one experience managing patients or clients in an environment where the patient sleeps.
- d) in aggregate, students will experience managing a diverse patient or client workload typical of those commonly seen in practice across the life span and the continuum of care representative of settings where physical therapy is practiced.
